After a weak spell, monsoon strengthens over coast, Malnad

Water levels go up in major rivers of state

BENGALURU, DHNS

The monsoon activity has picked up with fresh vigour in the coastal and Malnad districts on Monday. Many parts of Dakshina Kannada, Udupi, Kodagu and Chikkamagaluru districts experienced heavy showers intermittently.

In the last 24 hours ending 8 am on Monday, Dakshina Kannada has received an average of 5.2 cm of rain. Mani recorded 11 cm on Monday while Manki and Mangaluru received 9 and 7 cm of rain respectively.

With the ghat receiving copious rains, the water level has increased in Kumara Dharura, Netravati and Phalguni rivers—the lifelines of the region. The bath ghat at Kukke Subramanya has submerged.

Meanwhile, there was no let-up in showers in Kodagu. Madikeri, Napoklu, Talacauvery, Bhagamandala and surrounding areas witnessed heavy showers, accompanied by thunder activity, in spells on Monday. Inflow into Harangi reservoir clocked at 2,423 cusecs at 8 am on Monday and it increased to 2937 by evening.

The hilly district had recorded an average of 45.82 mm of rain in the corresponding period last year. Inciscent rain in Chikkafigaluru district has upped the water levels of Tunga, Bhadra and Hemavathi rivers. Heavy rains continued to lash NR Pura and Mudigere taluks. Kottigehara recorded 5.4 cm of rain.

The catchment areas of Malaprabha and Mahadavi rivers in Khanapur taluk of Bellagavi district continued to witness heavy showers.

Kanakumbi received 8.4 cm of rain on Monday followed by Jamboti and Londa 3.1 cm and Khanapur 1.2 cm.

Meanwhile, the plains of Uttara Kannada including Sirsi, Hubballi-Dharwad, parts of Gadag saw a few sporadic spells of moderate showers through the day.

Orange alert for 7 dists

The India Meteorological Department has declared an orange alert for seven coastal and Malnad districts till August 7. The weather department has predicted heavy to very heavy showers, accompanied by thunder, in the aforementioned regions. Belagavi and Dharwad districts are likely to receive heavy rain on Tuesday, the IMD sources said.

Living with floods, the Assam way

SAMBHA KARMAKAR

Rampur Assam, 10 July 2020

Rampur,Sarkar still remembers the day he and his family were forced to evacuate their home in 2015. The floods forced the villagers to leave for Assam’s Lakhimpur district. We were taken to a relief camp in Assam’s Lakhimpur district. It took a month for us to get back home. But the floodwater didn’t subside and it didn’t let us start our lives again.

The floodwaters had submerged the village, turning it into a sea of water. As the floodwaters receded, the villagers started digging trenches and building embankments to prevent future floods. The villagers also built a new school and a hospital in the area.

The floodwaters had not only destroyed the villagers’ homes but also their livelihoods. Many of them had to work as laborers in the nearby town to make ends meet. The floodwaters also affected the local economy, as many of the villagers had to leave their fields and work as laborers in the nearby town.

Heavy rain in Mumbai: govt. offices closed, HC hearings hit

Landslide on Western Express Highway; healthcare staff struggle to reach hospital

PRESS TRUST OF INDIA

MUMBAI

Heavy showers in Mumbai and the neighbouring areas crippled normal life and disrupted rail and road traffic on Tuesday, with many essential services workers, like nurses and other medical staff treating COVID-19 patients, finding it difficult to reach hospitals.

Several areas in the city and suburbs have received more than 200 mm rainfall since Monday night. For the second consecutive day, the India Meteorological Department issued a red alert for the Mumbai Metropolitan Region (MMR) and some other parts of Maharashtra for Wednesday.

In the morning, local train services, currently being operated only for essential services workers, were suspended on the Harbour Line due to waterlogging on the rail tracks. Some services on the Western and Central Lines were also affected.

Some roads near Byculla, Dadar and Mahalaxmi were inundated and the traffic police had to divert vehicles from those areas.

Several houses in low-lying areas like Karla, Sion and parts of Bhandup were flooded due to the heavy downpour, according to a civic official.

A landslide on the Western Express Highway in Kandivali affected movement of traffic towards south Mumbai. However, there were no casualties, officials said.

Waterlogging outside the civic-run Nair Hospital in central Mumbai, where several COVID-19 patients from the city are being treated, posed a problem for its medical staff. "Nurses and other medical staff have been struggling to reach the hospital due to waterlogging on the premises and elsewhere," a resident doctor from the hospital said.

The Bombay High Court adjourned its virtual hearings in various cases as many staff members could not reach the court, an official said. The court will now hear the matters on Wednesday, an official said.

The State government announced a holiday for all its offices in Mumbai city and suburbs on Tuesday in view of the heavy rainfall in the metropolis.

Boat capsizes, two fishermen missing

RAINA ASSAIGNAR
MUMBAI

Two fishermen are missing, while 11 were rescued after a fishing boat capsized around 12 km off Goral beach in north Mumbai on Tuesday afternoon.

According to the police, the boat, Lucky Star, had left for fishing at 7 a.m. on August 1, with 13 fishermen on board. "After learning of the alert of heavy rainfall from August 4, they started to return. But around 9 a.m. on Tuesday, the boat capsized some 10 nautical miles from Goral. Another fishing boat, God King, from Utan coastal town, which was passing by, rescued 11 fishermen around 1:30 p.m. However, two of them are still missing," senior police inspector Sanjay Narkar from Goral police station said.

The vessel too has not yet been found, he confirmed. The missing two have been identified as Mangesh Kadam (24) and Satish Jagtap (25), residents of Goral Koli Wada.

The disaster management department of the Brihanmumbai Municipal Corporation, fire brigade, coast guard, police, and maritime board, along with a helicopter from the Navy, are involved in the rescue operations, Mr. Narkar said.

Collapse in Vakola

Meanwhile, a residential chawl of two rooms collapsed at Agripada in Vakola around 11:30 a.m. on Tuesday, due to heavy rainfall. The one plus one structure was near a nullah, and a 26-year-old woman and her two daughters, aged seven and one, were swept away after the chawl came down. Her third daughter Shivanya, aged two, was rescued by locals and admitted to a hospital in Vakola.

The bodies of the woman, Rekha Kakade, and one-year-old Jarvi were found by a National Disaster Response Force rescue team in the evening. At the time of going to press, a search was under way to find seven-year-old Shreyas.
3 DEAD IN MUMBAI RAINFALL

Heavy rainfall in the Mumbai Metropolitan Region claimed three lives in separate incidents, as the monsoon woes of waterlogging, damaged structures, suspended trains and traffic jams resurfaced.

The India Meteorological Department issued a red alert for Mumbai, Thane, Palghar, Raigad, Pune, Ahmednagar and Nashik districts of Maharashtra for Wednesday.

IMD: Intense rain likely in central, peninsular regions

Jayashree Nandi
writes@hindustantimes.com

NEW DELHI: A low-pressure area has formed over the North Bay of Bengal for the first this monsoon season since June 21, which is likely to cause intense rainfall in central and peninsular India over the next three to four days, India Meteorological Department (IMD) said on Tuesday. Northwest India, including Delhi which had a rain deficiency of 28% as on Tuesday, is likely to largely remain dry during the period.

IMD said the monsoon is in its active phase over Konkan and adjoining areas of the western coast, Odisha, and West Bengal. A cyclonic circulation is also lying over south Gujarat, which has strengthened monsoon flow over the Arabian Sea. Most parts of Konkan and Goa, including Mumbai, have been receiving heavy rain. The low-pressure area over the West Bengal-Bangladesh coast is likely to move overland and reach Gujarat on August 7 across central India. “It will bring extremely heavy rain on its path covering Chhattisgarh, east Madhya Pradesh, west Madhya Pradesh, and Gujarat. The rain deficiency over central India will reduce this week,” said Jenamani.

HEAVY RAINS BATTER MUMBAI
