Rain-struck

- Mumbai city received 331.08 mm rainfall from Wednesday to Thursday
- Winds packing speed up to 106 kmph uprooted trees and poles at many places
- There are 16 NDRF teams deployed in rain-hit areas, including four in Kolhapur
- Taking stock of the situation, CM Uddhav Thackeray told officials to remain alert
Rain breaks South Mumbai record

IMD forecasts moderate to heavy showers in next 24 hours

ALOK DESHPANDE

South Mumbai received a record 300 mm rainfall in just four hours on Wednesday, as torrential rain accompanied by a wind speed of 101 km per hour, led to flood-type situation for the first time in many parts of the city, Brihanmumbai Municipal Corporation (BMC) Commissioner Iqbal Singh Chahal said on Thursday.

He said the civic administration was well-prepared following an advisory on heavy rain and necessary precaution was taken to keep all COVID-19 special hospitals unaffected.

Meanwhile, Chief Minister Uddhav Thackeray on Thursday took stock of the situation in Mumbai, all coastal districts, and Sangli and Kolhapur, which have received heavy rainfall.

“As many as 16 teams of the National Disaster Response Force (NDRF) have been deployed in Maharashtra, of which four are in Kolhapur,” he said.

Mr. Chahal said Nariman Point and Colaba received a record rainfall, which was more than even the figure on July 26, 2005. “The BMC, in coordination with the Railways and the NDRF, rescued those trapped in local trains. Rain abated by midnight and water started receding,” he said.

He was speaking to reporters after visiting the site of landslide near Peddar Road in south Mumbai.

However, catchment areas of the dams supplying water to Mumbai lag behind the last year’s rainfall. The percentage of usable water in Upper Vaitarna, Modak Sagar, Tanasa, Madhya Vaitarna, and Bhatsa at present is 22, 11, 46.27, 35.28, 41.73 and 44.99, respectively. In 2019, the percentage for all the dams was above 80.

According to the disaster management cell of the BMC, Colaba observatory recorded 331.8 mm rainfall while Santacruz recorded 162.3 mm rain in the 24 hours ending at 8 a.m. on Thursday.

The India Meteorological Department has predicted moderate to heavy rainfall in the city and suburbs and intense showers in some parts of the Mumbai Metropolitan Region in the next 24 hours.

Rain brings Mumbai to halt

Wednesday. Official said the maximum rainfall from the area was recorded at Vile Parle. On Thursday, the highest rainfall was reported at 2 am, with 44.7 mm rain.

The IMD has forecast rain for the next 24 hours, with the possibility of thunderstorms in some parts of the city.

The Brihanmumbai Municipal Corporation (BMC) has advised residents to stay away from low-lying areas and avoid driving through flooded roads.

Situation grim as rain hits normal life in north Kerala

Rivers in spate, largescale crop destruction

Special Correspondent, Thiruvananthapuram

Torrential rain and strong winds lashed Kerala on Thursday leaving one dead in Thiruvananthapuram and causing a flood situation in low-lying regions in northern Kerala.

The continuing rain hit life in many parts of Malabar. Steady increase in water level of rivers, including Chaliyar and its tributaries in northeastern parts of Malappuram and Kozhikode, kept local administrators and rescue squads on their toes. All tributaries of the Kabini river in Wayanad are in spate. Large-scale crop destruction was reported from Mukkom, Thiruvambadi, Karassery, and Mavoor in Kozhikode and Udayagiri and Ayyanakummu in Kannur.

Several village roads and bridges were submerged in the region. As many as 1,396 members of 368 families in Wayanad district were shifted to 30 relief camps.

Water levels in the idukki and Mullaperiyar dams are increasing steadily.

Good samaritans: Volunteers preparing to shift families trapped in a waterlogged area at Thengilakadavu.

Five dead, missing as rain lashes Karnataka

Landslide flattens swathes of land in Kodagu district

Special Correspondent

Heavy rain in different parts of Karnataka has left a trail of destruction with at least five deaths in the last 48 hours, while five other people are missing.

The State has received 93.5 mm of rainfall from August 1 to 6 as against a normal of 51 mm, which is 81% excess rainfall.

A major landslide in the Brahmagiri Hills surrounding Talacauvery and Bhagamandala in Kodagu district flattened vast swathes of land and five people are missing.

A team of the National Disaster Response Force (NDRF) was pressed into service but it took quite a while to reach the scene of the disaster as the roads were inundated by the overflowing Caumuri or blocked by trees.

Sources said there was no sight of the dwellings feared to be flattened in the landslide. The search operation was called off late in the evening and will resume on Friday.
