## 2.2 Flood Situation as per actual/forecasted rainfallsituation

IMD has forecasted heavy to very heavy rainfall with isolated extremely heavy rainfall in Assam and Meghalaya between 10<sup>th</sup> and 13<sup>th</sup> July, Eastern Uttar Pradesh & Arunachal Pradesh on 11<sup>th</sup> and 12<sup>th</sup> July 2019, Uttarakhand on 12<sup>th</sup> July. Heavy to very heavy rainfall over Konkan, Goa & Madhya Maharashtra on 10<sup>th</sup> July, UP, Bihar and Sub-Himalayan West Bengal has been forecasted on most of the days. Due to this warning, there is likelihood of rise in Water Levels in various river basins and the likely impact of these rains as inferred from rainfall runoff model run for 3 days advisory forecast is detailed as under:

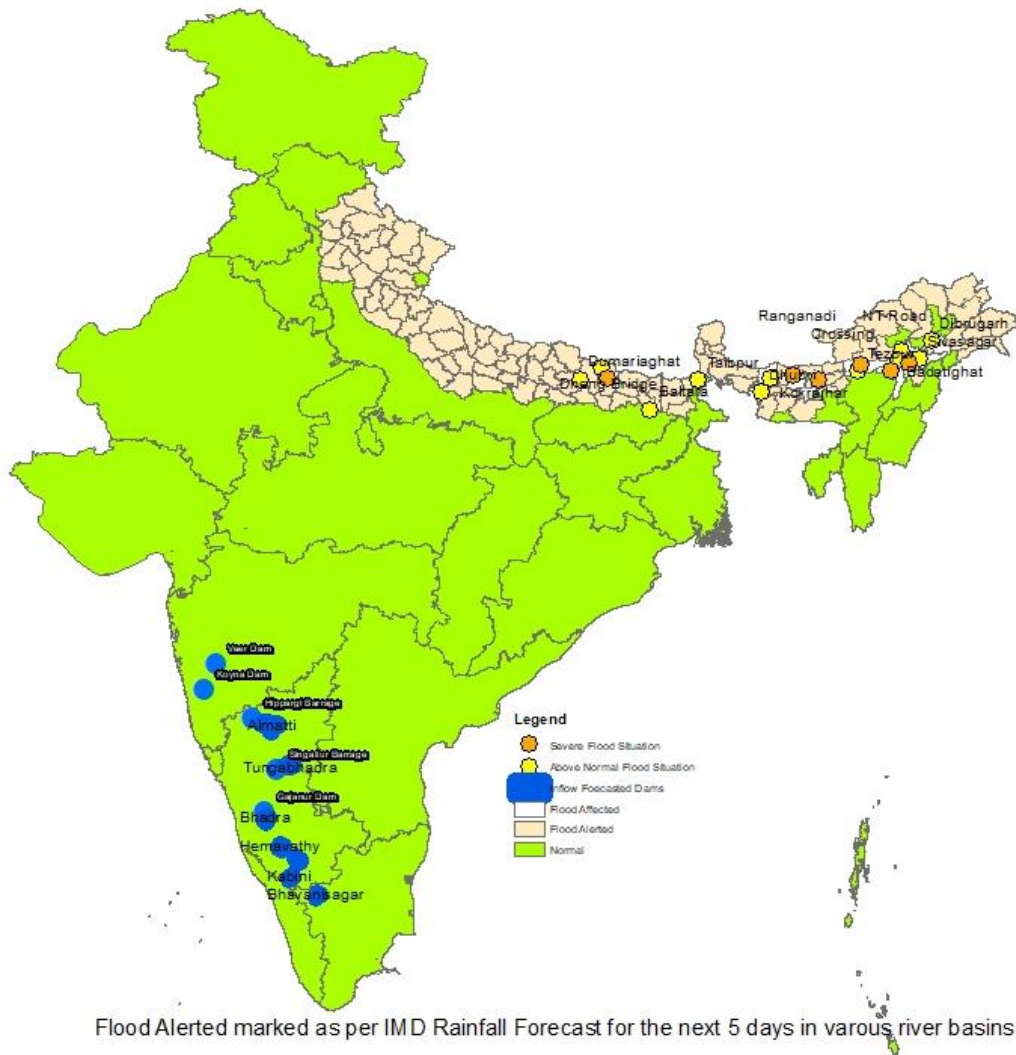

Krishna Basin	Due to Heavy rains in Source regions of Krishna, Bhima and Tungabhadra rivers in Maharashtra & Karnataka, there is rise in water level of river Krishna, Bhima & Tungabhadra in the districts of Satara, Pune, Sangli and Kolhapur in Maharashtra and in Vijayapura, Bagalkote, Shivamogga, Chikmagalur, Ballari districts of Karnataka. The inflows into reservoirs have increased considerably. However, the level are much below Full Reservoir Levels (FRL)
Konkan &Goa	West Flowing Rivers in the districts of Palghar, Thane, Raigad, Ratnagiri and Sindhudurg are likely to have flood like situation in view of the above forecast. There may be chances of Urban Flooding due to drainage congestion and water logging in urban areas of Mumbai and its suburbs.
Ganga Basin	In view of the rainfall forecast along foot hills of Uttarakhand, Himachal Pradesh, UP, Bihar as well as in catchment areas of Northern Tributaries of Ganga in Nepal, here is likely to be rapid rise in water levels in rivers such as Alaknanda, Bhagirathi, Yamuna in upper reaches, Ramganga, Ghaghra, Rapti, Sharda, Gandak, Kosi, Bagmati, Burhi Gandak, Kamla Balan, Mahananda in UP and Bihar.
Brahmaputra Basin	In view of the rainfall forecast in Arunachal Pradesh, Assam & Meghalaya, there is likely to be further increase in Water Levels in the river Brahmaputra and its tributaries such as Siang, Lohit, Buridehing, Desang, Debang, Dikhow, Subansiri, Jia-Bharali, Dhansiri (S), Kopili, Pagladiya, Puthimari, Beki, Manas, Aie, Champamati, Gaurang, Sankosh, Teesta, Raidak, Torsa, Jaldhaka in Arunachal Pradesh, Assam, Northern Districts of West Bengal

Most of the Rivers in Brahmaputra Basin have started rising. The likelihood of continuing rainfall for next 3 to 4 days in Arunachal Pradesh, Assam, Meghalaya and West Bengal, **indicates Severe to Extreme Floods in main Brahmaputra and its tributaries such as Siang, Lohit, Dikhow, Buridehing, Desang, Subansiri, Jia- Bharali, Dhansiri (South & North), Kopili, Puthimari, Pagladiya, Beki, Manas, Aie, Champamati, Gaurang, Sankosh, Torsa, Raidak, Teesta, Jaldhaka during the next one week. Necessary Precautions have to be taken and Disaster Management teams have to be placed well in advance in affected river locations.** Some of the rivers are already flowing well above Danger Level as indicated in the hydrographs below:
