As per IMD, monsoon is in active phase during this week. Therefore, heavy rainfall can be expected in the catchment area of Harangi Dam, Hemavathy Dam, Upper Tunga Dam, Krishna Raja Sagar Dam and Kabini Dam. Most of the Dams, the water level is about to reach FRL, hence, Dams are to be operated as per the rule curves/ area capacity curves in the next 7 days. The water release from the Dams may be informed well in advance to all the concerned downstream district authorities in Karnataka, lower riparian state and also may be informed to this office.
