

## **BRIEF NOTE ON LIVE STORAGE STATUS OF 100 RESERVOIRS IN THE COUNTRY (WITH REFERENCE TO RESERVOIR STORAGE BULLETIN OF 01.08.2019)**

### **1. ALL INDIA STATUS**

Central Water Commission is monitoring live storage status of 100 reservoirs of the country on weekly basis and is issuing weekly bulletin on every Thursday. Out of these reservoirs, 37 reservoirs have hydropower benefit with installed capacity of more than 60 MW. The total live storage capacity of these 100 reservoirs is 163.045 BCM which is about 63.24% of the live storage capacity of 257.812 BCM which is estimated to have been created in the country. As per reservoir storage bulletin dated **01.08.2019**, live storage available in these reservoirs is **54.258 BCM**, which is **33%** of total live storage capacity of these reservoirs. However, last year the live storage available in these reservoirs for the corresponding period was **73.162 BCM** and the average of last 10 years live storage was **67.922BCM**. Thus, the live storage available in 100 reservoirs **as per 01.08.2019 Bulletin** is **74%** of the live storage of corresponding period of last year and **80%** of storage of average of last ten years.

As per Table-01, the overall storage position is **less than the** corresponding period of last year in the country as a whole and is also **less than the** average storage of last ten years during the corresponding period.

### **2. REGION WISE STORAGE STATUS:**

#### **a) NORTHERN REGION**

The northern region includes States of Himachal Pradesh, Punjab and Rajasthan. There are 6 reservoirs under CWC monitoring having total live storage capacity of 18.01 BCM. As per Reservoir Storage Bulletin dated **01.08.2019**, the total live storage available in these reservoirs is **9.95 BCM** which is **55%** of total live storage capacity of these reservoirs. The storage during corresponding period of last year was **32%** and average storage of last ten years during corresponding period was **47%** of live storage capacity of these reservoirs. Thus, storage during current year is better than the corresponding period of last year and is also better than the average storage of last ten years during the corresponding period.

#### **b) EASTERN REGION**

The Eastern region includes States of Jharkhand, Odisha, West Bengal and Tripura. There are 16 reservoirs under CWC monitoring having total live storage capacity of 18.83 BCM. As per Reservoir Storage Bulletin dated **01.08.2019**, the total live storage available in these reservoirs is **4.21 BCM** which is **22%** of total live storage capacity of these reservoirs. The storage during corresponding period of last year was **40%** and average storage of last ten years during corresponding period was **35%** of live storage capacity of these reservoirs. Thus, storage during current year is less than the corresponding period of last year and is also less than the average storage of last ten years during the corresponding period.

#### **c) WESTERN REGION**

The Western region includes States of Gujarat and Maharashtra. There are 35 reservoirs under CWC monitoring having total live storage capacity of 32.31 BCM. As per Reservoir Storage Bulletin dated **01.08.2019**, the total live storage available in these reservoirs is **9.19 BCM** which is **28%** of total live storage capacity of these reservoirs. The storage during corresponding period of last year was **34%** and average storage of last ten years during corresponding period was **38%** of live storage capacity of these reservoirs. Thus, storage during current year is less than the storage of last year and is also less than the average storage of last ten years during the corresponding period.

**d) CENTRAL REGION**

The Central region includes States of Uttar Pradesh, Uttarakhand, Madhya Pradesh and Chhattisgarh. There are 12 reservoirs under CWC monitoring having total live storage capacity of 42.30 BCM. As per Reservoir Storage Bulletin dated **01.08.2019**, the total live storage available in these reservoirs is **17.13 BCM** which is **40%** of total live storage capacity of these reservoirs. The storage during corresponding period of last year was **40%** and average storage of last ten years during corresponding period was **43%** of live storage capacity of these reservoirs. Thus, storage during current year is equal to the storage of last year and is less than the average storage of last ten years during the corresponding period.

**e) SOUTHERN REGION**

The Southern region includes States of Andhra Pradesh, Telangana, AP&TG (2combined projects in both states), Karnataka, Kerala and Tamil Nadu. There are 31 reservoirs under CWC monitoring having total live storage capacity of 51.59 BCM. As per Reservoir Storage Bulletin dated **01.08.2019**, the total live storage available in these reservoirs is **13.79 BCM** which is **27%** of total live storage capacity of these reservoirs. The storage during corresponding period of last year was **62%** and average storage of last ten years during corresponding period was **43%** of live storage capacity of these reservoirs. Thus, storage during current year is less than the corresponding period of last year and is also less than the average storage of last ten years during the corresponding period.

The region wise and reservoir wise details are given in the following pages of the Bulletin.

**BROAD ANALYSIS OF OTHER TABLES IN THE BULLETIN**

- Normal storage means average storage of last ten years, Close to normal storage means where shortfall is upto 20% of normal, deficient storage is where shortfall is more than 20% of the normal and upto 60% of the normal, highly deficient means where shortfall is more than 60% of normal.
- In the table on page 11, better than normal storage is available in Indus and Narmada. Close to Normal in Mahi and West Flowing Rivers of South. Deficient in Ganga, Tapi Godavari, Krishna, Mahanadi & Neighbouring East Flowing Rivers and Cauvery & neighbouring EFRs and Highly Deficient in Sabarmati and Rivers of Kutch.
- Table on page 12-14 of the bulletin. The numbers of reservoirs having storage more than last year are **17** and reservoirs having storage more than average of last ten years are **21**. The numbers of reservoirs having storage less than or equal to 20% with respect to last year is **16** and having storage less than or equal to 20% with reference to average of last ten years is **14**. The number of reservoirs having storage less than or equal to 50% with respect to last year are **40** and having storage less than or equal to 50% with reference to average of last ten years are **41**.

States having better storage (in %) than last year for corresponding period: Himachal Pradesh, Punjab, Gujarat and Madhya Pradesh.

States having equal storage (in %) to last year for corresponding period: NIL

States having lesser storage (in %) than last year for corresponding period: Rajasthan, Jharkhand, Odisha, West Bengal, Tripura, Maharashtra, Uttar Pradesh, Uttarakhand, Chhattisgarh, AP&TG (Two combined projects in both states), Andhra Pradesh, Telangana, Karnataka, Kerala and Tamil Nadu.

**Disclaimer:** The Data contained in this Bulletin is as received from the State Government/Project Authorities.

## STORAGE STATUS OF IMPORTANT RESERVOIRS IN THE COUNTRY

AS ON : 01.08.2019

- 1 Central Water Commission is monitoring storage status of 100 important reservoirs spread all over the country, in which **37** reservoirs have hydropower benefit each with installed capacity of more than 60 MW. These reservoirs are identified thus(\*) in the enclosed weekly report.
- 2 The total live storage in 100 important reservoirs in different parts of the country, monitored by CWC as on **01.08.2019** is **54.258** BCM ( **33** percent of the live storage capacity at FRL ).The current year's storage is nearly **74** percent of last year's storage and **80** percent of the average of last ten years.

### **3 Region wise storage status:-**

REGION (States), (Monitoring No. of Reservoirs)	Filling position of 100 reservoirs w.r.t. FRL								Departure from Normal storage	
	100%	91%- 99%	81%- 90%	71%- 80%	61%- 70%	51%- 60%	41%- 50%	40% & below

### **4 Basin wise storage position:**

**Better than normal:** Indus and Narmada

**Close to normal:** Mahi and West Flowing Rivers of South.

**Deficient:** Ganga,Tapi , Godavari, Krishna ,Mahanadi & Neighbouring East Flowing Rivers and Cauvery & neighbouring EFRs.

**Highly deficient:** Sabarmati and Rivers of Kutch

**5** Out of 100 reservoirs, **36** reservoirs reported more than 80% of normal storage & **64** reservoirs reported 80% or below of normal storage. Out of these **64** reservoirs **41** having storage upto 50% of normal storage.

Name of reservoir	%	Name of reservoir	%
YELDARI	0	UPPER WARDHA	31
PENCH (TOTALADOH)	0	BHIMA(UJJANI)	33
