REHABILITATION & RESETTLEMENT

Irrigation development being a state subject, planning, execution and operation & maintenance of irrigation projects including repairing and strengthening of dams, embankments and canals are carried out by the State Governments from their own resources and as per their own requirements and priority of works. The Union Government has launched Accelerated Irrigation Benefit Programme (AIBP) in 1996-97 for providing financial assistance with an objective of expediting the implementation of ongoing major, medium and Extension, Renovation and Modernization (ERM) Irrigation Project including Lift Irrigation and Minor Irrigation Schemes for the schemes which are in advance stage and for which State Government is facing financial resource crunch. The ERM Irrigation Projects including restoration of existing irrigation canal system are proposed by the State Government to Government of India for seeking central assistance (CA) under AIBP.

During 2015-16, Pradhan Mantri Krishi Sinchayee Yojana (PMKSY) was launched by Union Government with an aim to enhance physical access of water on farm and expand cultivable area under assured irrigation, improve on farm water use efficiency, introduce sustainable water conservation practices etc. Under the PMKSY-AIBP, 99 priority projects have been identified out of ongoing 149 major / medium irrigation projects under AIBP with a dedicated funding mechanism to complete them in a time bound manner with the aim to be completed by Dec. 2019.

Presently Rani Avanti Bai Sagar (Bargi) Project situated in Jabalpur district of Madhya Pradesh has been included as a priority project with 04 phases namely Bargi Diversion Project Phase-I, Bargi Diversion Project Phase-II, Bargi Diversion Project Phase-III and Bargi Diversion Project Phase-IV.

As stated above, Water Resources projects are planned and implemented by the respective State Governments. Further, the concerned State Government and Project Authorities make assessment of number of people/families displaced due to such projects and formulate and implement project-wise Rehabilitation and Resettlement (R&R) Plans. To facilitate this process, Union Government has issued National Rehabilitation and Resettlement Policy 2007 (NRRP-2007) and Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013+ for smooth implementation of R&R action plan in respect of Project Affected Families. However, Compensation for project affected people are decided by the project authorities as per existing R&R policy of Centre/State whichever is more beneficial.

The details of Land Acquisition in respect of Rani Avanti Bai Sagar (Bargi) Project are given below phase-wise. Since only Canal works are included in all phases of the project, there is no issue of Rehabilitation & Resettlement.

Pradhan Mantri Krishi Sinchayee Yojana (PMKSY)

Irrigation development being a state subject, planning, execution and operation & maintenance of irrigation projects including repairing and strengthening of dams, embankments and canals are carried out by the State Governments from their own resources and as per their own requirements and priority of works. The Union Government has launched Accelerated Irrigation Benefit Programme (AIBP) in 1996-97 for providing financial assistance with an objective of expediting the implementation of ongoing major, medium and Extension, Renovation and Modernization (ERM) Irrigation Project including Lift Irrigation and Minor Irrigation Schemes for the schemes which are in advance stage and for which State Government is facing financial resource crunch. The ERM Irrigation Projects including restoration of existing irrigation canal system are proposed by the State Government to Government of India for seeking central assistance (CA) under AIBP.

During 2015-16, Pradhan Mantri Krishi Sinchayee Yojana (PMKSY) was launched by Union Government with an aim to enhance physical access of water on farm and expand cultivable area under assured irrigation, improve on farm water use efficiency, introduce sustainable water conservation practices etc. Under the PMKSY-AIBP, 99 priority projects have been identified out of ongoing 149 major / medium irrigation projects under AIBP with a dedicated funding mechanism to complete them in a time bound manner with the aim to be completed by Dec. 2019.

Various measures like timely release of central assistance to the projects, performance and evaluation of physical and financial progress by various agencies like CWC, NITI Ayog etc., review meetings with project authorities, suggestion for alternates in case of any bottlenecks like land acquisition problem etc. have been adopted in order to complete the projects in time bound manner. A web-based Management Information System for PMKSY (PMKSY-MIS) has been developed to collect essential information related to each project. States will be responsible for timely submission/updating project data online in the system (on a weekly basis), which provide current and authenticated data on outputs, outcome and contribution of PMKSY projects in the public domain. Monitorable targets against each component have been fixed by concerned Ministry/department of GOI. Same measures have to be followed in future also.

As desired, project wise details of 99* priority projects under PMKSY are furnished as under:

विषय: Information sought by shri Shadab Hussain Choudhary, C 199, Jahangir Puri, Dehli, Pin 110033 (Email: shadabhussain.47@gmail.com) under RTI Act 2005 vide his application No CWCND/R/2019/50073 dt 08/06/2019 .

With reference to above RTI Application, which was received in this office on 11-06-2019 on transfer from Nodal Officer for RTI, CWC, New Delhi letter No A-49012/8/2019/RTI/219 dated 10-06-2019 , the information as available with WP&P Wing of CWC, New Delhi is furnished below:-

"The Water Management Directorate under IMO, Central Water Commission is monitoring live storage status of 91 reservoirs of the country on weekly basis and is issuing weekly bulletin on every Thursday. The Weekly Bulletin of all these 91 reservoirs state-wise as well as region-wise under CWC monitoring ,s available on the website of www.cwc.gov.in< water info Daily/ weekly water level and storage capacity of 91 important reservoirs of India>. Whenever the live storage of State for the projects monitored by CWC is less than 80% of the average of the last ten years, CWC issues an advisory to state for judicious use of available water in view of low storage position of reservoirs. During current year CWC has issued an advisory to six states namely, Gujarat, Andhra Pradesh, Telangana, Maharashtra, Uttar Pradesh and Tamil Nadu in the month of May 2019".

विषय: Information sought by shri Prabhjot singh, Plot No.155, Amantarn Colony, Kailash Nagar Road, Basti Jodhewal, Ludhiana, Punjab-141007 (email - singhprabhjot251dh@gmail.com) under RTI Act 2005 vide his application No CWCND/R/2019/50077 Dt 13/06/2019 .

With reference to above RTI Application, which is received in this office on 14-06-2019 on transfer from Under Secretary & Nodal Officer for RTI, CWC, New Delhi, (No A-49012/8/2019/RTI/228 dt 14-06-2019), it is to inform that the relevant information available in WP&P Wing of CWC, is as under:

- A- Ministry of Jal Shakti (erstwhile Ministry of Water Resources, RD&GR), Government of India is implementing the Scheme “**RRR of water bodies**” which has multiple objectives like Comprehensive improvement and restoration of water bodies thereby increasing tank storage capacity, Ground Water Recharge, Increased availability of drinking water, Improvement in agriculture/horticulture productivity, Improvement of catchment areas of tank commands, Environmental benefits through improved water use efficiency; by promotion of conjunctive use of surface and ground water, Community participation and self-supporting system for sustainable management for each water body, Capacity Building of communities in better water management and Development of tourism, cultural activities, etc. The water bodies under the minor irrigation schemes which have a maximum CCA of 2000 ha (Rural water bodies) and satisfying the criteria of minimum 5 ha of water spread area in case of rural water bodies and 2-10 ha water spread area in case of urban water bodies are eligible to be included under the scheme RRR of water bodies. This is a continuing scheme since X Plan and is presently being implemented during XII Plan and onwards also.
- B- **XII Plan & onwards:** Government of India is committed to accord high priority to water conservation and its management. To this effect Pradhan Mantri Krishi Sinchayee Yojana (PMKSY) has been formulated with the vision of extending the coverage of irrigation ‘**Har Khet ko pani**’ and improving water use efficiency ‘**More crop per drop**’ in a focused manner with end to end solution on source creation, distribution, management, field application and extension activities. The Cabinet Committee on Economic Affairs chaired by Hon’ble Prime Minister has accorded approval of Pradhan Mantri Krishi Sinchayee Yojana (PMKSY) in its meeting held on 1st July, 2015. The schemes “**Surface Minor Irrigation(SMI) & RRR of water bodies**” are now part of PMKSY (Har Khet ko pani, HKKP).
- C- Note on central assistance to irrigation projects is enclosed

Note on central assistance to irrigation projects

Irrigation being a state subject, irrigation projects are planned, executed and operated by the State Governments themselves from their own resource as per their own priority and availability of funds. However, Central Govt. is providing Central Assistance to the irrigation projects through various plan schemes for the projects which are in the advance stage of completion and having unavailability of funds for harnessing the desired outcome/benefit i.e. IP creation/utilization. The Union Government had launched Accelerated Irrigation Benefit Programme (AIBP) in 1996-97 to expedite the implementation of ongoing Major, Medium Irrigation Projects which are in advance stage of construction and for which State Government is facing financial resource crunch. Since the inception of Accelerated Irrigation Benefit Programme (AIBP), 297 MMI projects have been benefitted. 143 projects have been completed, whereas 5 projects have been deferred from the AIBP due to their inadequate performance and non-submission of subsequent proposals for seeking Central Assistance (CA) under AIBP. 149 projects were ongoing under AIBP as on March 2015. During 2015-16, Pradhan Mantri Krishi Sinchayee Yojana (PMKSY) was conceived by the Central Government with an aim to enhance physical access of water on farm and expand cultivable area under assured irrigation, improve on farm water use efficiency, introduce sustainable water conservation practices etc to produce per drop more crop, thus bringing much desired rural prosperity. The programmes as being implemented by the Govt. of India, viz. Accelerated Irrigation Benefits Programmes (AIBP); Repair, Renovation and Restoration (RRR) and Command Area Development and Water Management (CADWM) have been subsumed in PMKSY. On consultation with the concerned State Governments, 99 MMI projects have been identified as priority projects under PMKSY-AIBP amongst 149 ongoing projects under AIBP with a dedicated funding mechanism to complete the projects in a time bound manner by December 2019. Out of these priority projects, 34 projects have been reported as complete till date. Total Irrigation Potential targeted under 99 Priority Project is 75.43 Lakh Ha. During last three years from 2015-16 to 2018-19; a central assistance of Rs 12082.97 Cr has been released under PMKSY-AIBP. Under PMKSY-AIBP, a dedicated funding mechanism i.e. Long Term Irrigation Fund (LTIF) - a special window

has been created in NABARD which could be utilized by the Central and State Governments to bridge the requirement of funds for completion of the 99 priority projects including CAD works for central assistance as well as state share component.

विषय: सूचना का अधिकार, 2005 के अंतर्गत श्री गुलशन, म0 स0 242, ग्राम- भांदुर, पोस्ट-भिव्की (उत्तर प्रदेश)-251203 (email- gk30900@gmail.com) के दिनांक 19-06-2019 के आवेदन (CWCND/R/2019/50080) द्वारा मांगी गई सूचना के संबंध में।

इस कार्यालय में 21-06-2019 को केन्द्रीय जल आयोग के अवर सचिव एवं सूचना के अधिकार के नोडल अधिकारी के पत्र संख्या- A-49012/8/2019/RTI/234 दिनांक 20-06-2019 से प्राप्त उपरोक्त आवेदन के समक्ष बिन्दुवार उपलब्ध सूचना निम्नानुसार है:-

बिन्दु क्र	चाही गई जानकारी	जवाब
1	श्रीमान जी मे यह जानना चाहा है कि जल संरक्षण के लिए गाँव में जो तालाब होते हैं उनके संरक्षण के लिए केन्द्र सरकार या उत्तर प्रदेश सरकार द्वारा क्या उपाय किए गए हैं और जिन तालाब की भूमि पर भूमाफियाओं का कब्जा हो चुका है उन लोगों के विरुद्ध केन्द्र सरकार या उत्तर प्रदेश सरकार ने क्या कदम उठाए हैं और क्या इसके लिए सरकार ने कोई कानून भी बनाया है , कृपया इसकी विस्तारित जानकारी प्रदान करने की कृपा करें।	<p>सूचित किया जाता है कि पानी एक राज्य का विषय होने के नाते, संबन्धित राज्य सरकार द्वारा उनकी आवश्यकता और प्राथमिकता के अनुसार योजना बनाकर, निष्पादन करना और अनुरक्षण करना है। इसके अलावा, राज्य सरकार जल निकायों की सीमाओं की सुरक्षा के लिए भी जिम्मेदार है क्योंकि वे इसकी संरक्षक हैं। हालांकि उनके प्रयासों को पूरा करने के लिए भारत सरकार के जल शक्ति मंत्रालय की जल निकायों की मरम्मत, नवीनीकरण एवं पुनुरुद्धार (RRR) योजना कार्य कर रही है, जिसके अंतर्गत हर खेत को पानी (HKKP) जो प्रधानमंत्री कृषि सिंचाई योजना (PMKSY) का एक घटक है।</p> <p>इस संबंध में यह भी अवगत कराया जाता है कि माननीय उच्चतम न्यायालय के फैसले के अनुपालन में एवं जल संसाधन की संसदीय स्थायी समिति की अनुसंधान पर जल निकायों के अतिक्रमण को रोकने हेतु दिशा निर्देशों का मसौदा जल संसाधन मंत्रालय को माह जून 2017 में भेजा गया है, जो कि मंत्रालय में विचारधीन है।</p> <p>भारत सरकार की 12 वीं योजना के अंतर्गत जल निकायों की मरम्मत, नवीनीकरण एवं पुनुरुद्धार (RRR) कार्य का किर्यान्वयन किया जा रहा है। राज्य सरकारें अपने अधीनस्थ सरकारी जल निकायों के मरम्मत, नवीनीकरण एवं पुनुरुद्धार (RRR) के प्रस्ताव स्वीकृत कर उन्हें, मरम्मत, नवीनीकरण एवं पुनुरुद्धार (RRR) के जल निकायों की योजना के आधीन सम्मिलित करने हेतु भेज सकती हैं। उक्त प्रस्ताव भारत सरकार की मरम्मत, नवीनीकरण एवं पुनुरुद्धार (RRR) की जल निकायों की योजना के जून 2017 के दिशा निर्देशों के अनुसार तैयार कर, वित्तीय सहायता हेतु केन्द्रीय जल आयोग के क्षेत्रीय कार्यालय के माध्यम से मंत्रालय में प्रस्तुत किया जा सकता है। अधिक जानकारी मंत्रालय की वेब साइट http://mowr.gov.in/sites/default/files/RRR_PMKSY_Guidelines%20June%202017.pdf पर उपलब्ध है।</p>

विषय: सूचना का अधिकार, 2005 के अंतर्गत Shri Sandeep, 4-112/d, SathyaSai Nagar, Near Kesavayangunta, Andhra Pradesh, Tirupati, Pin-517503 के दिनांक 21-06-2019 के आवेदन (CWCND/R/2019/50081) द्वारा मांगी गई सूचना के संबंध में ।

With reference to above RTI Application, which was received in this office on 24-06-2019 on transfer from Under Secretary & Nodal Officer for RTI, CWC, New Delhi, (No A-49012/8/2019/RTI/242 dt 21/06/2019), the information available with WP&P wing of CWC is as under:

Information sought	Reply
Will Kaleshwaram Project and other projects built across river Godavari by Telangana State Government affect the water inflow to Polavaram Project and Andhra Pradesh (can you please tell amount of water that Telangana withdraws and amount of water they release to Andhra Pradesh after making all the projects of Telangana come into existence)?	DPR of Kaleshwaram Project was considered and accepted by the Advisory Committee of DoWR, RD&GR in June 2018. Information in regard with amount of water being withdrawn by various projects of Govt of Telangana and amount of water being released to Andhra Pradesh is not available in WP & P Wing of CWC. The applicant is requested to contact concern project authorities/ water resources department of the concern state. However it is to intimate that the irrigation planning aspects of the Kaleshwaram Project was finalised for total water demand of 237 TMC. Against this demand, as per the DPR of the Kaleshwaram Project, the total water availability was shown as 240 TMC (diversion of Godavari water at Medigadda as 195 TMC + additional Godavari water from Yellampally barrage (for integration of part of Yellampally project command) as 20 TMC + additional utilisable ground water due to irrigation recharge as 25 TMC).

Status of Dwarkeswar Gandheswari Reservoir Project, West Bengal

a) **Project Proposal:** The project proposal envisages the construction of:

- i. A dam across Dwarkeswar River about 27 km. upstream of Bankura town.
- ii. A dam across Gandheswari River about 15 km. upstream of Bankura town.
- iii. A barrage at Pratappur across the River Dwarkeswar at 2 km downstream of the confluence point of Dwarkeswar and Gandheswari rivers.
- iv. Four main canals taking off from the left and right banks of the proposed dams over Dwarkeswar and Gandheswari respectively. Another main canal off-taking from the left bank of the proposed barrage at Pratappur is also proposed. All the five main canals will be having their distributary system to supply water to the command.

b) **Salient Feature**

1. Date of receipt of DPR	:-	28.09.2015
2. Date of circulation	:-	14.10.2015
3. Estimated Cost	:-	Rs.3552.37 Cr. (PL 2013)
4. Category of project	:-	New Major/Irrigation.
5. River/Basin	:-	Dwarkeshwar&Gandheswar/Ganga
6. Districts Benefitted	:-	Bankura
7. C.C.A	:-	38500 ha
8. B.C.Ratio	:-	1.977

c) **Appraisal Status**

1. International and Interstate aspects had been accepted.
2. Compliances on the Observations of CWC on Irrigation Planning (01.04.2016), Construction material and soil survey (1.11.2016), Ground water (17.08.2016), Agriculture (01.04.2016) and Plant Planning (13.04.2016) aspects are awaited from Project Authority.
3. The State Govt. were requested either to submit further 3 sets of DPR for examination of design aspect or to submit CDO certificate vide letter dated 28.10.2015. The same has not been submitted till date.
4. The Statutory Clearances such as Forest Clearance and clearance from MoTA have not been submitted till date. Project Authorities were also requested to submit clearance from Kolkata Port Trust. The same has not been submitted till date.
5. During the review meeting held on 01.04.2016, representative from Ministry of Agriculture and Farmer Welfare stated that the information may be submitted in prescribed format duly authenticated by Director of Agriculture, Govt. of West Bengal which was noted by the Project Authorities present in the meeting. However the same has not been submitted till date.
6. During the review meeting held on 01.04.2016, the Project Authority agreed that the compliances on the comments / observations of CWC/CSMRS/CGWB on above pending aspects will be submitted within one month. The same has not been submitted till date.
7. Review meeting was also held on 25.10.2016 and project authorities were invited to discuss Dwarkeswar-Gandheswari Reservoir Project, but the project couldn't be discussed as the project authorities did not turn up for the meeting.

As per guidelines for Submission, Appraisal and Acceptance of Irrigation and Multipurpose projects, 2017, If deficiencies reported by CWC are not attended within three (3) months from the date of communication of deficiencies, the DPR / RCE shall be treated as sent back / returned to Project Authority and the project will be deleted from the list of projects under appraisal. Since it has been more than 1 year, the project may be treated as returned to Project Authority.

विषय: सूचना का अधिकार, 2005 के अंतर्गत Shri Ram, Vpo Chawali via Tanwra Jayal ,
Distt. Nagaur, Rajasthan, Pin : 341020 (email- Khanwarpharma@rediffmail.com) का
दिनांक 21/06/2019 का आवेदन (CWCND/R/2019/80111) द्वारा मांगी गई सूचना के संबंध में।

इस कार्यालय में 28-06-2019 को प्राप्त केन्द्रीय जल आयोग के अवर सचिव एवं सूचना के अधिकार के नोडल अधिकारी के पत्र क्रमांक A-49012/8/2019/RTI/247 दिनांक 27-06-2019, जिसे निदेशक एवं CPIO RMCD द्वारा उनके पत्रांक No 2/18/RTI/Gen/2018-19-RMCD/454-57 Dt 05/07/19, section 5(4) के तहत भी स्थानांतरित किया गया था के संदर्भ में सूचित है कि केन्द्रीय जल आयोग के जल आयोजन एवं परियोजना स्कन्ध में उपलब्ध सूचना निम्नानुसार है:

Information sought	Reply
1। नागोर जिले के किसानों हेतु कृषि कार्य में सिंचाई हेतु पानी की व्यवस्था किस बांध नहर या परियोजना से की गई है ?	इंदिरा गांधी नहर परियोजना में पानी पहली बार वर्ष 1978 में मानव आबादी के लिए पीने का पानी एवं लाइव स्टॉक के लिए श्री गंगा नगर, चूरू, नागौर, जोधपुर, बीकानेर और जैसलमेर जिलों हेतु आरक्षित किया गया था
2. क्या इन्दिरा गांधी नहर (आईजीएनपी) से नागोर जिले को सिंचाई पानी देने का भविष्य में प्रावधान है?	पीने का पानी की आपूर्ति न केवल परियोजना क्षेत्र के लिए की जाती है , बल्कि अन्य शहरों और गाँवों के लिए जो मुख्य नहर के दक्षिण में और प्रोजेक्ट क्षेत्र के बाहर जो 200 किमी से अधिक दूरी पर स्थित है तथा
3. क्या नागोर जिले का हिस्सा IGNP नहर परियोजना में कृषि व सिंचाई कार्य हेतु समझौते के अनुसार है या नहीं, बताइये ?	पीने का पानी की आपूर्ति के लिए कोई अन्य स्रोत न होने के कारण है . जल आपूर्ति की जाती है लाभार्थी जिले / प्रस्तावित लाभार्थी जिले श्री गंगानगर , हनुमानगढ़, , बीकानेर, चूरू, जैसलमेर, जोधपुर
4. क्या लूनी नदी को नदी जोड़ो परियोजना के तहत अन्य नदियों से जोड़ने की परियोजना विभाग बना रहा है , विस्तृत कारण बताये ?	नागौर, बाड़मेर, झुनझुनु और सीकर हैं। लूनी नदी के चंबल नदी के साथ कायाकल्प और लिंक के लिए नीति संबंधी सूचना उपलब्ध नहीं है।
5. क्या लूनी नदी को अन्य नदियों से जोड़ने के बाद आए हुए पानी से नागोर जिले में सिंचाई हेतु दिए जाने का परवधान है, बताइये?	

आवेदक से अनुरोध है की विस्तृत सूचना प्राप्त करने हेतु राज्य सरकार के जल संसाधन विभाग अथवा संबन्धित परियोजना प्राधिकरण से सम्पर्क करे।

With reference to above RTI Application (CWCND/R/2019/50087), which was received in this office on 02-07-2019 on transfer from Under Secretary & Nodal Officer for RTI, CWC, New Delhi vide No A-49012/8/2019/RTI/251 dt 1/07/2019, the information available in WP&P Wing of CWC, New Delhi is as under:

Sl. No	Information sought	Reply
1	Please provide all the steps that has been taken in past two years for controlling Water Scarcity problem in Bengaluru	Specific information is not available. However, it is to intimate that Ministry of Jal Shakti (erstwhile Ministry of Water Resources, RD&GR), Government of India is implementing the Scheme for Repair, Renovation and Restoration (RRR) of water bodies which has multiple objectives like Comprehensive improvement and restoration of water bodies thereby increasing tank storage capacity, Ground Water Recharge, Increased availability of drinking water, Improvement in agriculture/horticulture productivity, Improvement of catchment areas of tank commands, Environmental benefits through improved water use efficiency; by promotion of conjunctive use of surface and ground water, Community participation and self-supporting system for sustainable management for each water body, Capacity Building of communities in better water management and Development of tourism, cultural activities, etc. The water bodies under the minor irrigation schemes which have a maximum CCA of 2000 ha (Rural water bodies) and satisfying the criteria of minimum 5 ha of water spread area in case of rural water bodies and 2-10 ha water spread area in case of urban water bodies are eligible to be included under the scheme RRR of water bodies. This is a continuing scheme since X Plan and is presently being implemented during XII Plan and onwards also.
2.	Please provide all the Programmes and Schemes made for controlling Water Scarcity problem in Bengaluru	The above cited scheme is now part of Pradhan Mantri Krishi Sinchayee Yojana

	(PMKSY)- Har Khet ko pani (HKKP). A DPR namely "Mekedatu Balancing Reservoir cum Drinking Water Project" was submitted to CWC in 2019 which has a drinking water component to the tune of 4.75 TMC of water to Bangalore Metropolitan Region.

With reference to above RTI Application (CWCND/R/2019/80113), which was received in this office on 05-07-2019 on transfer from Director & CPIO, RMCD RTI, CWC, New Delhi vide No 2/18/RTI/Gen/2018-19-RMCD/451-53 Dt 05/07/19, the information available in WP&P Wing of CWC, New Delhi is as under:

SNo	Information sought	reply
1	What is and has been the scope of CWC in the entire Kaleshwaram Project.	As per the guide line for investment clearance by MoWR, RD & GR "All new major and medium irrigation projects and flood control projects are coastal projection project including multipurpose and which have inter-state or international ramification will be subject to techno economic appraisal in CWC and then approval by the advisory committee on irrigation". Flood control and multipurpose projects in the MoWR RD & GR "Kaleshwaram Project is being constructed in Godavari River Basin. The Detailed project report(DPR) of Kaleshwaram Project was submitted in CWC in Feb 2017 for techno economic appraisal. The project proposal was examined in respect of Hydrology, Irrigation planning, Plant planning, inter state matters and cost aspects etc". The project proposal was then considered and accepted by the advisory committee of MoWR RD & GR in its 136th meeting held on 06/06/2018
2.	Kindly forward the copy of detailed project	The detailed project report (DPR) of the above project was submitted vide letter dated 28/02/2019 .The following

	reports as submitted by the Telangana State Govt to you for your approval, assessment etc, before and after the redesigning of the project	<p>volumes of DPR are available in WP&P Wing in hard copy only.</p> <p>Vol- I :- Project report (Colour Page 53, B/W P 209, Total 292 P(A4))</p> <p>Vol- II :- Project Hydrology (Colour Page 38, B/W P 209, Total 247 (A4))</p> <p>Colour Page 1 (A3)</p> <p>Vol- III :- Project Design (Colour Page 1, B/W P 481, Total 482 (A4))</p> <p>Vol- V:- Irrigation Planning (Colour Page 12, B/W P 295, Total 307 (A4))</p> <p>Colour Page 1 (A3)</p> <p>Vol- VI:- Project Cost Estimate(Colour Page 9, B/W P 264, Total 273 (A4))</p> <p>Simulation studies Part 1 and 2</p> <p>(Colour Page 1, B/W P 617, Total 618 (A4))</p>
3	Kindly forward clearances and approvals along with economic viability and technical feasibility of the project as given by the CWC to the state government in the project and the terms and condition thereof.	The approvals accorded by various apprising directorates consist of 14 pages.
4	Kindly furnish the copies of the complete Inspection Reports of CWC/ appreciation letters conducted from time to time so far by CWC officials/members.	As per the note for consideration of Advisory Committee of MoWR, Rd & GR, the project site was visited by four member team of CWC officers. Later, a team of senior officers headed by Chairman, CWC also visited the project site. It is also to inform that no inspection report/ appreciation letter is being issued by this office on the above project. Only the note for Advisory Committee as mentioned above has been finalized and put up for consideration of 136 th meeting held on 06.06.2018

As per provisions of RTI Act, 2005 without consent of the Project Authority, / concern State Government, Central Water Commission is unable to supply the document mentioned against point 2 above, being third part documents. Obtaining of consent may take time, hence it is advised to obtain the DPR from the Project Authority of Kaleshwaram Project.

As far as the copy of approvals accorded by various apprising directorates consist of 14 pages can be made available after payment of relevant fee as prescribed under RTI Act, 2005 i.e Rs 28 for Xeroxing charges+ Rs 35 for postal charges i.e. in total Rs 63/- Rs sixty three only. Amount shall be payable in the name of DDO-II, CWC, New Delhi by postal order..

1	According to second condition , Detailed Project Report of Mekedatu Balancing Reservoir cum drinking water Project would be prepared in due consultation with CEA and concerned units of CENTRAL WATER COMMISSION. Is there any consultation with CENTRAL WATER COMMISSION made by Karnataka government as per condition? If so , give the copies of those things.	"In principle consent" of CWC for preparation of DPR of Mekedatu Balancing Reservoir Cum Drinking Water Project subjected to certain Conditions were conveyed to the State Government (Project Authorities) in November, 2018. Mean while. the DPR of Mekedatu Balancing Reservoir Cum Drinking Water Project was submitted to CWC in January, 2019 by the Project Authorities i.e.' Government of Karnataka. The copies of DPR of Mekedatu Balancing Reservoir Cum Drinking Water Project has been Circulated to specialized Directorates of CWC/Central Electricity Authority & Cauvery Water Management Authority. It is also to inform that the matter is

		<p>subjudice as Court cases are presently' being heard in the Hon'ble Supreme Court of India.</p> <p>In view of the above, any further action/decision with respect to this Project can only be taken after Hon'ble Supreme Court & CWMA give a decision on the said Project.</p> <p>It is also to inform that as per the information/records available in WP&P wing of CWC, no consultation w.r.t. state Govt & CEA is being held after submission of DPR. Sl. No	Information sought	Reply
	Central Water Commission has given permission to make Detailed Project Report for Mekedatu Balancing Reservoir Cum Drinking Water Project with four conditions. The second condition is, As the main objective of this scheme as stated in feasibility report is to implement the Cauvery Water Dispute Tribunal award as modified by the Supreme Court, acceptance of Cauvery Water Management Authority would be a pre-requisite for consideration of the detailed project report by the Advisory committee of MoWR, RD & GR.	The copies of DPR of Mekedatu Balancing Reservoir cum Drinking Water Project have been circulated to Cauvery Water Management Authority (CWMA). However, no further information/ status with respect to

		consideration acceptance of DPR of said project by CWMA is available in WP&P Wing of CWC.
1	According to the second condition of Central Water Commission, is Cauvery Water Management Authority considered the detailed project report of Mekedatu Balancing Reservoir Cum Drinking Water Project. If so, give the copies of those things.	
2	According to the second condition of Central Water Commission, is Cauvery Water Management Authority accepted the detailed project report of Mekedatu Balancing Reservoir Cum Drinking Water Project. If so, give the copies of those things.

विषय: सूचना का अधिकार, 2005 के अंतर्गत श्री अजय कुमार यादव , ग्राम- नागल, पोस्ट- कटीना, जिला- फोर्जबाद, उत्तर प्रदेश Pin: 283145 (email: yajay5511@gmail.com) का दिनांक 30/07/2019 का आवेदन (CWCND/R/2019/80139) द्वारा मांगी गई सूचना के संबंध में।

इस कार्यालय में 31-07-2019 को प्राप्त केन्द्रीय जल आयोग के अवर सचिव एवं सूचना के अधिकार के नोडल अधिकारी के पत्र क्रमांक A-49012/8/2019/RTI/299 दिनांक 30-07-2019 के सूचना के अधिकार, 2005 के अंतर्गत दिनांक 16-07-2019 का आवेदन के संदर्भ में सूचित है कि केन्द्रीय जल आयोग के जल आयोजन एवं परियोजना स्कन्ध में विषय संबंधी सूचना जिलावार उपलब्ध नहीं ।

सूचित है कि राज्यवार बड़ी परियोजनाओं के विवरण सीडब्ल्यूसी बेब साइट cwc.gov.in पर वाटर इन्फो टेब के अंतर्गत register for large dam में उपलब्ध है जिन्हे वे डाउन लोड कर सकते हैं। आवेदन के बिन्दु 3- इस संबंध में यह भी अवगत कराना है कि मध्य प्रदेश में जल निकायों की मरम्मत, नवीनीकरण एवं पुनुरुद्धार (RRR) की योजना के अंतर्गत 2014-15 तक 125 जल निकायों को सम्मिलित किया गया जिसमें अब तक 121 को पूरा कर लिया गया है।

केंद्र सरकार ने पानी के संरक्षण, अपव्यय को कम करने और एकीकृत जल संसाधनों का विकास और प्रबंधन के माध्यम से राज्यों के भीतर और अधिक समान वितरण को सुनिश्चित करने के उद्देश्य से राष्ट्रीय जल मिशन शुरू किया गया है। राष्ट्रीय जल मिशन के लक्ष्यों में से एक 20% जल उपयोग दक्षता बढ़ाना है। सिंचाई (सूक्ष्म सिंचाई, जैसे-ड्रिप, स्प्रिंकलर आदि) के माध्यम से विभिन्न क्षेत्रों में बेहतर जल उपयोग दक्षता, उद्योग और घरों को सरकार की विभिन्न पहलों, कार्यक्रमों / योजनाओं के माध्यम से प्रोत्साहित किया जा रहा है।

जल शक्ति मंत्रालय ने जल संरक्षण अभियान-जल संरक्षण और जल सुरक्षा के लिए एक अभियान शुरू किया है। जिसका मुख्य उद्देश्य identified water stressed जिलों और ब्लकों पर महत्वपूर्ण हस्तक्षेप क्षेत्रों जैसे जल संरक्षण और वर्षा जल संचयन, पारंपरिक और अन्य जल निकायों / टैंकों के नवीनीकरण, पुनः उपयोग और पुनर्भरण संरचनाओं, वाटरशेड विकास और गहन वनीकरण पर होगा। जल शक्ति अभियान का उद्देश्य संपत्ति निर्माण और व्यापक संचार के माध्यम से जल संरक्षण को जन आंदोलन बनाना है।

जिलावार सूचना तथा जलस्रोतों की धारण क्षमता(परियोजनाओं की) प्राप्त करने हेतु आवेदक से अनुरोध है की राज्य सरकार के जल संसाधन विभाग तथा संबन्धित जिला प्रशासन कार्यालयों से संपर्क करे।

Information sought by Shri Aakash Kumar Jain H, 61-B/33, Opposite to SMS Marriage Hall, Dhanappa Mudali Street, Madurai (Tamilnadu)-625001

Pointwise Reply-

- (i) Information may please be treated as NIL as the matter is not related to Central Water Commission. ***The application has been transferred vide this office letter no.- T-57077/3/2019-WPP Coord/I/7488/2019 dated 06-08-2019 to the Member Secretary, Cauvery Water Regulatory Committee under section 6(3) of RTI act with a request to provide the information directly to the applicant.***
- (ii) The matter of ground water does not pertain to Central Water Commission. However, information on WR projects being implemented by States with Govt of India, Central Assistance as available with CPIO, WP&P Wing, Central Water Commission is furnished as below-

AIBP/Pradhan Mantri Krishi Sinchai Yojna

(a) Repair, Renovation and Restoration of Water Bodies.

Water being a State subject, steps for augmentation, conservation and efficient management to ensure sustainability of water resources are undertaken by the respective State Governments. In order to supplement the efforts of the State Governments, Government of India provides technical and financial assistance to State Governments to encourage sustainable development and efficient management of water resources through various schemes and programmes namely Accelerated Irrigation Benefits Programme (AIBP)" and "Repair, Renovation and Restoration (RRR) of Water Bodies". Further, Surface Minor Irrigation (SMI) schemes with irrigation potential less than 2000 ha were included under Accelerated Irrigation Benefit Programme (AIBP) for providing Central Assistance (CA) since 1999-2000 for Special Category States. Subsequently the Scheme extended to area covering DPAP, Tribal, DDP, Flood prone, Left Wing extremist and Koraput, Bolangir and Kalahandi (KBK) region of Odisha. The water bodies under the minor irrigation schemes which have a maximum CCA of 2000 ha (Rural water bodies) and satisfying the criteria of minimum 5 ha of water spread area in case of rural water bodies and 2-10 ha water spread area in case of urban water bodies are eligible to be included under the scheme RRR of water bodies. This is a continuing scheme since X Plan and is presently being implemented during Xli Plan and onwards also. The schemes, Surface Minor Irrigation (SMI) and RRR of water bodies are now part of Pradhan Mantri Krishi Sinchayee Yojana (PMKSY) Hár Khet ko pani (HKKP).

(b) Irrigation Projects

Central Water Commission pertains to Surface Water Irrigation Projects only. Irrigation is a state subject and irrigation projects are planned and executed by the State Govts. as per their own priority and availability of funds, however, the Union Government provides Central Assistance in the form of Loan to State Governments for speedy completion of irrigation projects

Since inception altogether 297 major and medium irrigation projects have been included under AIBP out of which 143 projects have been completed and five projects have been deferred, leaving 149 projects as ongoing as on 2015-16. A total of 9231 th. ha. has been created under AIBP upto March 2016. The Government of India has launched the Pradhan Mantri Krishi Sinchayee Yojana (PMKSY)

I/7693/2019

during 2015-16 with the motto of providing 'Har Khet Ko Pani' ensuring access to some means of protective irrigation to all agricultural farms in the country, to produce 'per drop more crop', thus bringing much desired rural prosperity. AIBP has now been subsumed into PMKSY. Under PMKSY-AIBP, 99 projects have been prioritized amongst the 149 ongoing projects under AIBP. Out of these priority projects, 34 projects have been reported as completed and remaining projects are targeted to be completed in phases by December 2019. Total Irrigation Potential targeted under 99 Priority Project is 75.43 Lakh Ha., out of which 53.53 lakhs ha. has already been achieved.

While planning the project or subsequently, if there is need of water for drinking purpose, volume of water demanded has been included in the project planning stage for supply to the concerned department for distribution to public or supplied from the existing project as per drinking water need and rest of the water is utilized for irrigation and other purpose.

Ministry of Jal Shakti has been created by the Government of India, integrating the erstwhile Ministry of Water Resources, River Development and Ganga Rejuvenation and the Ministry of Drinking Water and Sanitation, with an aim to integrate water resources management under one umbrella so that the issues relating to water are dealt with in a holistic manner. Recently, the Hon'ble PM has personally addressed letters to all Sarpanches in the country motivating them to take up water conservation activities. Ministry of Jal Shakti has launched Jal Shakti Abhiyan (JSA) – a campaign for water conservation and water security. During the campaign, officers, groundwater experts and scientists from the Government of India will work together with State and district officials in India's most water-stressed districts for water conservation and water resource management.

The focus of the campaign will be on water stressed districts and blocks through key intervention areas like water conservation and rainwater harvesting, renovation of traditional and other water bodies/tanks, reuse and recharge structures, watershed development and intensive afforestation. Jal Shakti Abhiyan aims at making water conservation a Jan Andolan through asset creation and extensive communication.

Central Government has formulated a National Perspective Plan (NPP) for Water Resources Development which envisages transfer of water from water surplus basins to water deficit basins to improve availability of water.

Central Government has formulated National Water Policy (NWP), 2012 which inter-alia recommends conservation, promotion and protection of water and highlights the need for augmenting the availability of water through rain water harvesting, direct use of rainfall and other management measures. The NWP, 2012 has been sent to all States/ Union Territories and the concerned Central Ministries for appropriate action. Some initiatives/measures taken by Central Government to control water depletion and promote rain water harvesting / conservation are available at the URL:

Subject : RTI Application Under RTI Act 2005 of Shri Bhaskar reddy, Shri Gajapat, Kaveri Colony, Narayanaguda, Hyderabad, Telangana – reg.

Ref: Email dated 23.08.2019 from WP&P Coordination Directorate

Applicant's Name: Sh. Bhaskar Reddy

r/o Shri Gajapat, Kaveri Colony, Narayanaguda, Hyderabad - 500029

उपर्युक्त विषय एवं संदर्भ में इस निदेशालय से जवाब निम्नांकित है।

Ques 1. How many paid studies and reports have been prepared by all ministries through outside agencies (Private Companies/Councils/any other organisations) since April 2013 till, for which any payment (part/full) has been released.

Ques 2. Details may be provided in the format attached (Date of submission of studies, cost incurred etc)

Ans 1. Since April 2013, 09 studies have been done for “Sedimentation Assessment Study of Reservoirs in India through Remote Sensing Technique”. The work was awarded to Maharashtra Engineering Research Institute (MERI), Nashik.

Ans 2. Requisite information is provided in the Annex- 1.

विषय: सूचना का अधिकार, 2005 के अंतर्गत Shri Anik Bhattacharya, Village- Anadanagar, PO- Maynaguri, Distt- Jalpaiguri, West Bengal, Pin 735224 (email- anik.mng94@gmail.com) का दिनांक 01/08/2019 का आवेदन (CWCND/R/2019/80140) द्वारा मांगी गई सूचना के संबंध में।

(Information sought by Shri Anik Bhattacharya, Village- Anadanagar, PO- Maynaguri, Distt- Jalpaiguri, West Bengal, Pin 735224 (email- anik.mng94@gmail.com) under RTI Act -2005 vide application dt 01/08/2019)

With reference to above RTI Application, which was received in this office on 08-08-2019 on transfer from Nodal Officer for RTI, CWC, New Delhi, having No A-49012/8/2019/RTI/319 dated 08-08-2019, it is to inform that, the information as available with WP&P Wing of CWC, New Delhi is as under:-

Information sought	Reply
I want to know from the respected authority that, what steps have been taken in past 5 years (2015 to 2019) by the Government of India for water reservation and finding the new water sources	<p>Water being a State subject, steps for augmentation, conservation and efficient management to ensure sustainability of water resources are undertaken by the respective State Governments. In order to supplement the efforts of the State Governments, Government of India provides technical and financial assistance to State Governments to encourage sustainable development and efficient management of water resources through various schemes and programmes namely "Accelerated Irrigation Benefits Programme (AIBP)" and "Repair, Renovation and Restoration(RRR) of Water Bodies". Further, Surface Minor Irrigation (SMI) schemes with irrigation potential less than 2000 ha were included under Accelerated Irrigation Benefit Programme (AIBP) for providing Central Assistance (CA) since 1999-2000 for Special Category States. Subsequently the Scheme extended to area covering DPAP, Tribal, DDP, Flood prone, Left Wing extremist and Koraput, Bolangir and Kalahandi (KBK) region of Odisha.</p> <p>The schemes, Surface Minor Irrigation (SMI) and RRR of water bodies are now part of Pradhan Mantri Krishi Sinchayee Yojana (PMKSY)- Har Khet ko pani (HKKP).</p> <p>Further, it is to intimate that Ministry of Jal Shakti (erstwhile Ministry of Water Resources, RD&GR) conducted the 5th Minor Irrigation Census with reference year 2013-14. The report of the same is available at http://jalshakti-dowr.gov.in/sites/default/files/5th-MICensusReport_0.pdf</p> <p>Recently, Ministry of Jal Shakti has launched Jal Shakti Abhiyan - a campaign for water conservation and water security. The focus of the campaign will be on water stressed districts and blocks through key intervention areas like water conservation and rainwater harvesting, renovation of traditional and other water bodies/tanks, reuse and recharge structures, watershed development and intensive afforestation. Jal Shakti Abhiyan aims at making water conservation a Jan Andolan through asset creation and extensive communication.</p>
1. Statistical Data Nationwide	Central Water Commission is monitoring live storage status of 107 reservoirs of the country on weekly basis and is issuing weekly bulletin on every Thursday. The total live storage capacity of these 107 reservoirs is 166.17 BCM which is about 64.45% of the

	live storage capacity of 257.812 BCM which is estimated to have been created in the country. As per. reservoir storage bulletin dated 14.08.2019, live storage available in these reservoirs is 106.676 BCM, which is 64%, of total live storage capacity of these reservoirs. However, last year the live storage available in these reservoirs for the corresponding period was 85.421 BCM and the average of last 10 years live storage was 87.535 BCM. Thus, the live storage available in 107 reservoirs as per 14.08.2019 Bulletin is 125% of the live storage of Corresponding period of last year and 122% of storage of average of last ten years.
2. Authorities who searched for new water resources (Government and Non-Government)	May be treated as nil as far as WP&P wing of CWC is concern. Annual Reports published by CWC, Dept of WR RD&GR, CGWB, NWDA, Wapcos etc are available on web :jalshakti-dowr.gov.in/Annual report. It is suggested that for some addition information web link mowr.gov.in>ngo-initiative can be referred.
3. Annual Reports (2015-2019)	The published Annual reports of CWC are available on CWC Web site link http://cwc.gov.in/reports-published-cwc., http://cwc.gov.in/annual-reports-english Applicant is requested to down load the same.
4. State names which have most negative effect on water crisis	Whenever the percentage of departure of current storage of a State goes below 20% of Normal (Average Storage of last Ten years), Advisory is being issued to the State Govt for Judicious use of available water. Based on reservoir storage, CWC has issued advisory, to the State Govts. namely Gujarat, Maharashtra, Uttar Pradesh, Andhra Pradesh. Telangana and Tamil Nadu in the month of May 2019, to Jharkhand, Karnataka and Kerala in the in the month of June 2019 and to Tripura & Uttarakhand in the month of July 2019 for judicious use of available water.
5. Is there any national water management to control water crisis, please mention it.	<p>Water, being a State subject, steps for augmentation, conservation and efficient management of water resources are primarily undertaken by the respective State Governments. In order to supplement the efforts of the State Governments, Central Government provides technical and financial assistance to them through various schemes and programmes. Central Government has taken various steps to improve the water availability in the country.</p> <p>Ministry of Jal Shakti has been created by the Government of India, integrating the erstwhile Ministry of Water Resources, River Development and Ganga Rejuvenation and the Ministry of Drinking Water and Sanitation, with an aim to integrate water resources management under one umbrella so that the issues relating to water are dealt with in a holistic manner. Recently, the Hon'ble PM has personally addressed letters to Sarpanches in the country motivating them to take up water conservation activities.</p> <p>Ministry of Jal Shakti has launched Jal Shakti Abhiyan (JSA) - a campaign for water conservation and water security. During the campaign, officers, water experts and scientists from the Government of India will work together with State and district officials in India's water-stressed districts for water conservation and water resource management.</p> <p>Central Government has formulated a National Perspective Plan (NPP) for Water Resources Development which envisages transfer of water from water surplus basins to water deficit basins to improve availability of water.</p> <p>Central Government has launched Pradhan Mantri Krishi Sinchayee Yojana (PMKSY) for completion of 99 on-going Major/Medium irrigation projects having ultimate irrigation potential of 76.03 lakh hectares.</p> <p>Central Government has formulated National Water Policy (NWP), 2012 which inter-alia recommends conservation, promotion and protection of water and</p>

	<p>highlights the need for augmenting the availability of water through rain water harvesting, direct use of rainfall and other management measures. The NWP, 2012 has been sent to all States/ Union Territories and the concerned Central Ministries for appropriate action.</p> <p>Some initiatives/measures taken by Central Government to control water depletion and promote rain water harvesting / conservation are available at the URL: http://mowr.gov.in/sites/default/files/Steps_to_control_water_depletion_Jun2019.pdf</p>

संदर्भ: आपका पत्र दिनांक 14/08/2019

महोदय,

With reference to your application under RTI Act 2005 mentioned under subject and your letter under reference it is to inform that:

A. Central Water Commission is headed by a Chairman, with the status of Ex-Officio Secretary to the Government of India. The work of the Commission is handled by 3 wings namely:

- Designs and Research Wing (D&R);
- Water Planning and Projects Wing (WP&P); and
- River Management Wing (RM).

Allied functions are grouped under respective wings and each wing is placed under the charge of a full-time Member with the status of an Ex-Officio Additional Secretary to the Government of India. Each wing comprising of a number of Organizations.

Each wing has separate CPIO of the rank of Director and a appellate authority (Chief Engineer level).

Further point wise information is as under:

1. The Copy of approvals accorded (14 pages) is enclosed.
2. Summary record of discussion of the 136th meeting of Advisory Committee is enclosed.(4 page)
- 2.b & 3 As per provisions of RTI Act, 2005 without consent of the Project Authority, / concern State Government, Central Water Commission is unable to supply the document mentioned against point 2 above, being third part documents. Obtaining of consent

may take time, hence it is requested to obtain the DPR from the Project Authority of Kaleshwaram Project.

4. it is to intimate that the first appellate authority as far as WP&P Wing of CWC is concerned is **Chief Engineer (PAO), Central Water Commission, 7th Floor (S), Sewa Bhawan, R. K. Puram, New Delhi – 110066. Phone No. 26103561 Fax No.26103561. email-ceprjap@nic.in**

Subject: Detailed Project Report of Kaleshwaram Project, Telangana – reg.

Ref: No. (i) Lr No. CE/KPH/DCE/DEE-3/AEE-9/CWC/2017/1507 dated 12.09.2017
(ii) Meeting with WAPCOS dated 24.10.2017

With reference to above the Detailed Project Report of Kaleshwaram Project, Telangana has been further discussed during meeting and submitted for vetting/examination of hydrological aspects. The DPR has been scrutinized from hydrological angle & observations of this office are as under:

1. PROJECT PROPOSAL

The lift Irrigation scheme namely, Pranahita Chevella Lift Irrigation Scheme (PCLIS) was planned for irrigation of 16.4 lakh acres in seven districts of Telangana by diverting 160 TMC of water from Pranahita river at Tummidihatti. However, due to inter-state water issues and on other basis, the scheme is stated to be shifted to near Medigadda Village, below the point of confluence of Pranahita and Godavari River about 20 km downstream of confluence. The project is now renamed as Kaleshwaram Project.

The project envisages diversion of 180 TMC of water by constructing a barrage across River Godavari located at Medigadda near Kaleshwaram, Mahadevpur, Karimnagar District below the confluence of rivers Pranahita and Godavari. In addition to the barrage at Medigadda, two more barrages on River Godavari u/s of Medigadda to Sripada Rao Yellampally Project have been proposed, one at Annaram and other at Sundilla. The live storage capacities of Medigadda Barrage, Annaram Barrage and Sundilla Barrage are 457.9 MCM (16.17 TMC), 337 MCM (11.90 TMC) and 144.7 MCM (5.11 TMC) respectively. The water conveyance system consists of pumping from Medigadda Barrage to Annaram Barrage, Annaram Barrage to Sundilla Barrage and Sundilla Barrage to Sripada Rao Yellampally project. The water is proposed to be conveyed further to all beneficiary districts of projects viz., Karimnagar, Rajanna Sircilla, Siddipet, Medak, Yadadri-Bhongir, Nalgonda, Sangareddy, Nizamabad, Jagityal, Kamareddy, Nirmal, Medchal and Peddapally by a system of gravity canals, tunnels and lifts with online storages.

*P. S. Sharma
if. with
P. S. Sharma
Copy to
30/11/17*

The total culturable command area (CCA) proposed to be covered is about 7,38,851 Ha (18,25,700 Acres) in districts of projects including of drinking water and industrial requirements to Hyderabad, Secunderabad and en-route villages. The project will also stabilize shortfalls in planned utilization, under SRSP Stage-I and Stage-II, flood flow canal, Singur Project and Nizam Sagar.

DD

The project also envisages to facilitate restoration of the ground water levels to its original state by the way of shifting from usage of ground water for irrigation to usage of surface water and conjunctive use of ground water for the same.

The entire project system has been divided into seven links:

- Link-I: From Medigadda Barrage on Godavari River to Sripada Yellampally Project
- Link-II: From Sripada Yellampally Project to Mid Manair Reservoir
- Link-III: From Mid Manair Reservoir to Upper Manair Reservoir
- Link-IV: From Mid Manair Reservoir to Konda Pochamma Reservoir
- Link-V: From Anicut to Chityala Mandal
- Link-VI: From Sri Komaravelly Mallana Sagar to Singur Reservoir
- Link-VII: (i) From SRSP Foreshore to Nizam Sagar Canals and to Dilwapur and Hangarga Village for Nirmal and Mudhole Constituency
(ii) From Sri Komaravelly Mallana Sagar to Bhoompally Reservoir

The total length of water conductor system is 1832 km comprising gravity canal of 1531 km, tunnel gravity canals of 203 km and pressure mains of 98 km. In order to effectively store and utilize the diverted water of Godavari, it is also proposed to form 20 en-route online storages. The number of lifts envisaged is 20 nos. The power and energy requirements of scheme are 4627 MW (13558 MU) respectively.

It is stated by project authorities that as per the interstate agreement under Godavari Water Dispute Tribunal Award (GWDTA), Telangana and Andhra Pradesh states is having share of 1480 TMC of water at 75% dependability.

2. WATER AVAILABILITY STUDY CARRIED OUT BY PROJECT AUTHORITY

The water availability at the project location is contributed by five sub-basins namely Pranahita, Penganga, Wardha, Maner and Middle Godavari of Godavari Basin. The net yield series at Kaleswaram Lift Irrigation has been assessed based on the individual yield contribution from Pranahita sub-basin (CA-61,819 sq km) as approved by CWC. The residual flows as observed at CWC sites namely Mancherial on Godavari and Somanpally on Maner river has been increased pro rata to assessed water availability at Middle Godavari sub-basin (CA-10,3667 sq km) and Maner sub-basin (CA-13,106sq km) respectively. The flows for Pranahita sub-basin, Middle Godavari sub-basin and Maner sub-basin are integrated on monthly basis to assess the water availability at Medigadda barrage near Kaleswaram site after accounting utilization between co-basin states for their ongoing and future projects. The net availability at Medigadda Barrage site has been worked out as **7993.5 MCM (282.3 TMC)**.

3. FINDINGS/OBSERVATIONS OF CWC

3.1 Water Availability

- (i) The water availability at the project location(Kaleshwaram) contributed by five sub-basins namely Penganga (G7) (CA-23854 sq km) , Wardha(G8) (CA-24016 sq km), Maner(G6) (CA-13106 sq km), Middle Godavari(G5)(CA-17189 sq km) and Pranahita(G9)(CA-61819 sq km) of Godavari Basin. The sub-basin wise water entitlement to party state has been given in the GWDT award. Accordingly, availability of water to Andhra Pradesh & Telangana have been worked out as per GWDT award. The yield series for five sub-basins and at various projects locations have been estimated using corresponding rainfall-runoff model for each sub-basin. Earlier, 10 daily yield series were prepared by this office for Pranahita- Chavella Lift irrigation Scheme (PCLIS), in which the 10 daily surpluses were available for Penganga and Pranahita sub-basin for period from 1971-72 to 2011-12 . On basis of available 10 daily surplus for Penganga and Pranahita, yield series at Kaleshwaram Project has been worked out using following methodology:
- (ii) The gross yield for Pranahita sub- basin (CA-61819 sq km) at 75% dependability has been assessed as 22300.29 MCM. The monsoon yield has been estimated by rainfall-runoff yield model. The gross yield of Pranahita sub- basin has been worked out by adding non-monsoon yield in monsoon yield. Non-monsoon yield for Pranahita sub-basin has been adopted as 4.62% of monsoon yield. The upstream utilization of 15079.8 MCM and 566.4 MCM (20 TMC assumed utilization from proposed Pranahita Project) respectively has been deducted from annual yield to obtained surplus annual yield for each year. The surplus annual yield has been converted in 10 daily yields by using average distribution coefficient obtained from the observed discharge data of Asthi G&D site.
- (iii) The gross yield for Penganga sub- basin (CA-23854 sq km) at 75% dependability has been assessed as 4269.22 MCM. The monsoon yield has been estimated by rainfall-runoff yield model of Penganaga sub-basin. The gross yield has been worked out by adding non-monsoon yield in monsoon yield. Non-monsoon yield for Penganga sub-basin has been adopted as 3.97% of monsoon yield. The upstream utilization of 3362.5 MCM has been deducted from annual yield to obtained surplus annual yield for each year. The surplus annual yield has been converted in 10 daily yield by using average distribution coefficient obtained from the observed discharge data of P.G Bridge G&D site.
- (iv) There is no surplus available from Wardha, Maner and Middle Godavari sub-basin. Therefore, the 10 daily series of Pranahita and Penganga sub-basin has been added to get the yield series at Kaleshwaram Project. The 75% dependable net yield at Kaleshwaram Project for the given series is worked out in order of **8049.8 MCM (284.3 TMC)** from the period 1971-72 to 2011-12. The same may be utilized for further planning purpose of project. The brief details of 10 daily net yield series at Kaleshwarm Project is enclosed at **Annex-I**.

3.2 Design Flood

- (i) The proposed Sundilla Barrage Project (CA- 103482 sq km) and Annaram Barrage project (CA-17535 sq km) are situated about 30 km and 62 km respectively downstream of existing Yellampalli Barrage (CA- 101864 sq km) having PMF of 64937 m³/s assessed by CWC. The 100 year return period flood for Sundilla and Annaram barrages has been estimated as 29739 m³/s and 32731 m³/s respectively, based on flood frequency of Mancherla G&D site data (CA 102900 sq.km). The corresponding 500 year return period flood for Sundilla and Annaram barrages has been estimated as 38439 m³/s and 42250 m³/s respectively. Further, since Yellampally, Sundilla and Annaram Barrages are in cascade, hence, design flood for Sundilla and Annaram Barrages may be adopted as 64937 m³/s, which shall ensure safe passage of flood released from Yellampally barrage.
- (ii) The design flood at Kaleshwaram barrage site has been computed by the project authorities on the basis of annual peak discharge data at Perur G&D site (CA- 268200 sq km). The 1 in 100 year and 1 in 500 year return period flood computed at Perur G&D site using frequency analysis is about 74919 m³/s and 92860 m³/s respectively. The same has been transferred at Kaleshwaram barrage site using Dicken's formula. The 1 in 100 year and 1 in 500 year return period flood at Kaleshwaram Project site (CA-225652 sq km) worked out as **65816 m³/s** and **81576 m³/s** respectively. Considering the design flood of Yellampally barrage, and contributions from Pranahita river, the design flood for Kaleshwaram barrage may be adopted as **81576 m³/s**.

Enclosed: As Stated Above

विषय: DPR of Kaleshwaram Project-Compliance of Inter State aspects, Telangana – Reg

Please refer to letter No 6/23/2017-PA(S)/1488 dated 29.11.2017 forwarding therewith the compliance submitted by Government of Telangana vide there letter no: CE/KPH/DCE/DEE-3/AEE-9/camp/2017 dated 29.11.2017 on the comments of Government of Andhra Pradesh, Water Resource department for necessary action.

In this regard it is to state that this Directorate vide letter no: 04/02/TEL/ISM-1/2017/927-28 dated 03.11.2017, has communicated that there are no further comments on the DPR of Kaleshwaram Project. From above referred letter, it is noted that in the meeting held on 28.11.2017 in the chambers of Secretary, MoWR, RD & GR, the objections raised by Government of Andhra Pradesh on Kaleshwaram Project were further communicated to State of Telangana. State of Telangana has now furnished the point wise reply to the comments of Water Resource Department, Government of Andhra Pradesh.

The points raised by Government of Andhra Pradesh and the replies of State of Telangana to the points of Government of AP have been further examined.

On perusal, it seen that most of the comments of Government of AP relate to the assessment of water availability at the Kaleshwaram Project site. It is mentioned that with finalization of hydrology at the project site by CWC, these issues no longer survive and the compliance of Government of Telangana is also on the same lines. With regard to apportionment of water between two successor States, it is felt that the process of apportioning the water between the two States should be pursued through the mechanism of Godavari River Management Board and from the compliance report submitted by State of Telangana under para 6, it is seen that the State of Telangana is not averse to such process.

For Godavari basin area of the State of AP and Telangana, there is no agreement which is admitted by both States. Therefore for such situation, the CWC Guideline of 1996 provides for following the cautious and judicious approach particularly with regard to water

utilization under the project. As planned utilization from the project is much below the 75 % dependable net yield at Kaleshwaram Project, therefore, in accordance with said guidelines for examination of projects, the DPR of Kaleshwaram project can be considered acceptable from inter-State angle.

This issues with the approval Member, WP & P, CWC

Subject:- Submission of DPR Vol-III of Kaleshwaram project -regarding.

Kindly refer your letter no 25/2/2016-PA(S)/620 dated 26.05.2017 vide which comments on project planning were sought.

INTRODUCTION

1. Initially, a lift irrigation scheme namely, Pranhita Chevella Lift Irrigation Scheme (PCLIS) was formulated for irrigation of 16.4 Lakh acres in seven districts of Telengana by diverting 160 TMC feet of water from Pranhita river at Tummidihatti by constructing a diversion structure with pond level at 152m. However, this proposal was abandoned due to various compelling reasons.
2. Subsequently, a new proposal is formulated in which a diversion structure, with pond level at EL 100m, is proposed at Medigadda village below the point of confluence of Pranhita and Godavari river. The brief objective of the proposals are as below:
 - a) Diversion of 180 TMC of Godavari water to Sripada Rao Yellampally project (SRSP) and subsequently to Mid Manair Reservoir by lifting it to the lands on higher contour which is found to be economically viable, to bring large extents of lands in the basin under irrigation.
 - b) To create an additional ayacut of about 18.25 lakhs acres in Adilabad, Karimnagar, Medak, Nalgonda, Nizamabad and Ranga Reddy district including drinking water to Hyderabad and Secunderabad and industrial requirements.
 - c) To stabilize shortfalls in planned utilization, under SRSP Stage-I & Stage-II, Flood Flow Canal, Singur project and Nizam Sagar.
 - d) To restore the ground water level to its original state by the way of shifting from usage of groundwater for irrigation to usage of surface water and conjunctive use of groundwater for the same.

DD

The vol.-III of DPR has been examined and following are the comments:-

1. Initial proposal of Pranhita Chevella Lift Irrigation Scheme (PCLIS) was good for diverting the water due to its higher elevation. However, this proposal was abandoned due to various compelling reasons.
2. The current location i.e. Medigadda village where water availability to divert is shown as 180 TMC, is at lower elevation hence it requires substantial lifting of water. Further, it is about 200 KM d/s of SRSP.
3. As there is also proposal for irrigating 2 Lakh acres of Adilabad district by constructing a barrage at Tummidihatti as envisaged in the Pranahita-Chevella project with pond level of EL 148m by lifting about 20 TMC of water for it. In view of this, net availability at Medigadda will reduce by 20 TMC, which in turn require higher pumping capacity equivalent to about 200 TMC.

In view of above, it is observed that current location of project appears to be good for harnessing Pranhita river water but it requires a higher lifting of water due to its lower elevation. Further, this location is about 200 km d/s of SRSP which has forced to construct two intermediate reservoirs namely, Annaram Barrage and Sundila Barrage to transfer water to SRSP. The construction of two intermediate barrages and higher lifting of water are increasing the cost of the project. However, it is written in the report that such lifting is economically viable.

Sub: Kaleshwaram Project, Telangana (New CCA 738851 ha & stabilization of existing CCA 762028 ha) - Examination of Cost Estimates-reg.

**Ref: (i) CWC No. 6/231/2017/PA(S)/180-92 dated 28.02.2017
(ii) CE/KPH/DCE/DEE-3/AEE-9/CWC/camp/2017 dated 27.11.2017**

The cost estimate of the project cited above for Rs. 80704.84 Cr. at SOR 2015-16 was received from Project Authorities vide letter under reference no. (ii) above for examination of cost aspects. After examination of estimates and compliances submitted by the State Govt. on various observations/ clarifications sought by this directorate and also detailed discussion/ consultation with the project authorities, cost of the project has been finalised for Rs. 80190.46 Cr (at SOR 2015-16), out of which an expenditure of Rs. 23,022.74 Cr has been incurred up to December-2017 according to details submitted by the competent authority of the project. It was further informed by the State Govt. that during the period of Jan.'18 to March'18 an expenditure of Rs.7630.98 cr was incurred and total expenditure on the project is Rs. 30653.72 Cr. up to March, 2018 vide their letter dated 25.04.2018.

The finalized cost is subject to correctness of detailed surveys and investigations, approved final alignments of distribution system and final drawings and designs submitted by the project authorities, quantities considered in the estimate with supporting documents provided and duly certified by the project authorities as also the acceptance of the project by the other concerned directorates of CWC and other associated central agencies.

Further, it is important to note that it was intimated vide the D.O. letter no.6/231/2017-PA(S)/1602-1605 dated 22.12.2017 addressed to the Principal Secretary (Irrigation & CAD), Govt. of Telangana from the Chief Engineer (PAO), CWC that estimate should be realistic and need not to be revised in next three years at least. In response to this, Principal Secretary (Irrigation & CAD), Govt. of Telangana vide his D.O. letter no. 1/Spl.CS(Irr)/2018 dated 6.01.2018 has given the targeted dates of completion for the project components through its packages as December, 2018 as the latest. The abstract of cost of the proposal is enclosed herewith for necessary action.

This issues with the approval of Chief Engineer (PAO), CWC.

Encl: As Above

Sub: Kaleshwaram Project, Telangana - reg.

Ref.: State Govt. of Telangana Lr. No. CE/KPH/DCE/DEE-3/AEE-9/CWC/IP/2018/camp-1, dated 10.05.2018

The point-wise replies to the comments on BC Ratio issued vide this Directorate's letter dated 04.05.2018 alongwith B C Ratio computation of Kaleshwaram Project have been received from the State Govt. of Telangana vide their letter under reference above. The same has been examined and observations thereon are as under.

1. In respect of vetting of quantum of annual energy requirement for surface and ground water estimated as 13829.33 million units (MU) by the project authorities from the concerned State Electricity Department, the project authorities have submitted a certificate from TSTRANSCO indicating the energy requirement for the Kaleshwaram Project approximately as 13558 MU. It has been further stated by the project authorities that the energy requirement estimated as 13829.33 MU by them is close to the energy requirement assessed by the TSTRANSCO. In view of this, no further comments to offer.
2. In respect of the rate of energy charges for estimation of cost of energy per annum for surface and groundwater use, the project authorities have again submitted the letter from TRANSCO which states that the rate of energy charges @ Rs. 3 per unit is subject to acceptance by Telangana State Electricity Regulatory Commission. The energy charges for the purpose of BC Ratio at present accordingly have been considered @ Rs. 3 per unit. As the acceptance in respect of rate of energy charges is subject to Telangana State Electricity Regulatory Commission, the project authorities may ensure the above mentioned rate of energy charges required at their end for the project. No further comments.
3. (a) In respect of the crop yields per ha considered in post project scenario for some of the crops higher than the yields considered in the pre project scenario, the project authorities have replied that the project is in dry and upland areas where rain fed agriculture is being practiced. Moreover, the rainfall is not only low but also very skewed in spatial variation as such the combined of these two factors leads to very low agricultural productivity in pre-project situation. In the post-project scenario, the agriculture will improve significantly in given situation of assured irrigation and optimal input for crop production.

- (b) In respect of the cost of cultivation (viz. seeds, fertilisers, labour charges etc.) per ha considered in post project condition less than the same considered in the pre project condition, the project authorities have replied that the rates have been revised in consultation with State Agriculture Department.

In above aspects, it has been further stated that the agricultural yield in pre-project and post project scenario as well as the input cost has been re-examined in view of CWC comments and the revised statements covering all these aspects have been duly approved by the concerned and verified by the Director of Agriculture, Telangana. The revised details in the prescribed format duly vetted by the Director of Agriculture, Telangana have been appended with the replies by the project authorities.

In view of the above submission by the project authorities, no further comments to offer in above respect. However, PAO, CWC may consider the views of Ministry of Agriculture & Farmers Welfare, GoI in above respect.

4. It has been stated that the average water charges for drinking and industrial supply have been provided by the HMWSSB as Rs. 15 & Rs. 90 / cum respectively. However, the levy charges for raw water @ Rs. 9 / cum for drinking (40 TMC) and Rs. 84 / cum for industrial supply (16 TMC) have been considered in the revised B. C. Ratio calculation after deducting average cost for treatment, transmission and distribution charges etc. as Rs. 6 / cum each for drinking and industrial supply from the average rates of water charges for these sectors provided by the HMWSSB.

With the above mentioned replies and details, the BC Ratio for the project has been worked out by the project authorities as 1.511. Subject to correctness of the information and details provided by the project authorities as mentioned above, the arithmetic calculations of BC Ratio have been examined and found to be in order.

Ministry of Water Resources, River Development & Ganga Rejuvenation
Central Water Commission

**SUMMARY RECORD OF DISCUSSIONS OF THE 136th MEETING OF THE
ADVISORY COMMITTEE FOR CONSIDERATION OF TECHNO-
ECONOMIC VIABILITY OF MAJOR & MEDIUM IRRIGATION, FLOOD
CONTROL AND MULTIPURPOSE PROJECT PROPOSALS HELD ON
WEDNESDAY, JUNE 6th, 2018 AT CENTRAL WATER COMMISSION, NEW
DELHI**

The 136th meeting of the Advisory Committee of Ministry of Water Resources, River Development & Ganga Rejuvenation (MoWR, RD&GR) for consideration of techno-economic viability of major & medium irrigation, flood control and multi-purpose project proposals was held under the Chairmanship of Shri U.P. Singh, Secretary to the Government of India, MoWR, RD & GR on Wednesday, 6th June, 2018 at Central Water Commission, New Delhi. The list of members of the Committee or their representatives/ nominees/ Special Invitees and Officers from various Ministries/ Organizations and representatives of State Governments who attended the meeting is at Annexure-I.

At the outset, the Secretary (WR, RD & GR) and Chairman, Advisory Committee welcomed the participants. Thereafter, the agenda items were taken up one by one:

(i) Confirmation of the minutes of 135th meeting of the Advisory Committee

CE (PAO), CWC and Member Secretary of Advisory Committee stated that the 135th meeting of the Advisory Committee of MoWR, RD&GR on Irrigation, Flood Control and Multi-purpose Projects was held on 12.03.2018. Summary Record of Discussions was circulated vide letter No. 16/27/2017-PA (N)/380-407 dated 23.03.2018. As no comments on the Summary Record were received, Advisory Committee confirmed the Summary Record as circulated.

(ii) Follow up action after the 135th meeting of the Advisory Committee

1. Noa Dihing Dam Project, Arunachal Pradesh, National Project (Estimated Cost Rs. 1291.93 Crore @ Price Level May 2017, B.C. Ratio 1.41:1)

The project was last considered in the 135th meeting of Advisory Committee of MoWR, RD & GR held on 12.03.2018. As the ownership of the project and the source of funding were not clear and overall economic viability of the project had not been established the Advisory Committee had then decided that the project may be deferred

After detailed deliberations, the proposal was accepted by the Advisory Committee. However, the acceptance of the proposal by the Advisory Committee of MoWR, RD & GR does not guarantee any eligibility towards release of fund under any existing scheme of MoWR, RD & GR such as PMKSY, RRR, FMP etc.

2 Kaleshwaram Project, Telanagana (New, Major, Irrigation; Estimated Cost Rs. 80190.46 Crore @ PL 2015-16, B.C. Ratio 1.51:1)

A presentation on the Project was made by the Project Authority/ consultant. It was informed that Kaleshwaram Project, Telengana comprises main barrage at Medigadda Village, below the point of confluence of Pranahita and Godavari River about 20 Km d/s of Kaleshwaram village. Two more barrages i.e Annaram and Sundilla have been proposed for the purpose of lifting of required quantum of water from Godavari River and to link it to Sripada Rao Yellampally Project, subsequently diverting the water to Mid Manair reservoir and other reservoirs. The project is having Culturable Command Area (CCA) of 738851 Ha & annual irrigation of 961497 Ha with intensity of irrigation as 130.13%. Further, this Project will stabilize 762028 Ha of land under different projects of the State. In addition to this, this Project will provide 40 TMC (1133 MCM) of drinking water to Hyderabad, Secunderabad and villages enroute and 16 TMC (453 MCM) of industrial water. It is to provide irrigation in Karimnagar, Rajanna Sircilla, Siddipet, Medak, Yadadri-Bhongir, Nalgonda, Sangareddy, Nizamabad, Jagityal, Kamareddy, Nirmal, Medchal and Peddapalli (13 Nos.) districts of Telengana State. The cost of the present Project has been estimated to be Rs. 80190.46 Crore (Price Level 2015-16) including 15 years of Operation and Maintenance period for the lift system and 5 years for the civil works with benefit cost ratio as 1.51:1.

The Project Authority informed that one package having about 2,00,000 acre in the Command Area will be having piped irrigation as a pilot project keeping in view the importance of evaporation losses as the area concerned is drought prone. Members of the Committee expressed their concern about the annual R&M of the project and annual power requirement is of 4627 MW with annual energy of 13,829 MU. Secretary (WR, RD & GR) advised that State Government shall provide necessary funds and electricity for the success of the project and construction and maintenance should be on turnkey basis. Engineer-in-Chief, Telangana explained that provision for the same had already been incorporated in the estimate. Members felt that although the annual cost of the project was considerably high, most of the command of the Project being located in drought prone areas with no water available for the cultivation, the Project was very important for the development of the State.

In view of the above, the Project was accepted by the Committee. However, the acceptance of the proposal by the Advisory Committee of MoWR, RD & GR does not guarantee any eligibility towards release of fund under any existing scheme of MoWR, RD & GR such as PMKSY, RRR, FMP etc.

B. Flood Control Projects

1. Mahananda Flood Management Scheme Phase-II, Bihar (Estimated Cost Rs. 791.066 Crore @ 2016 PL, B.C. Ratio 1.50:1)

A presentation on the proposal was made by the Project Authority. It was informed that this scheme is proposed to protect an area of 114000 Ha with a population of 46.18 lakh from Mahananda, Ratwa and Nagar Rivers in Purnia, Kathiar, Kisanganj, Araria districts of Bihar. The proposed scheme envisages construction of 5 nos. embankments having a total length of 198.37 km, 366 nos. ramps, 45 nos. turning platforms, 10 nos. of new Anti Flood Sluices.

It was also informed that this is Phase II of the Mahananda Flood Management Scheme which was earlier accepted in 91st meeting of Advisory Committee of MoWR, RD&GR for Rs. 603.88 Crore held on 07.11.2007. In a meeting between Chairman, GFCC and State Government officers held on 27.10.2009, it was decided to bifurcate the "Mahananda scheme for raising and strengthening of left and right embankment and construction of new embankment" into (a) raising and strengthening and (b) new construction.

Now the Phase-II of the project has been proposed by the Project Authority and the estimated cost has been finalized as Rs. 791.066 Crore (PL 2016) by GFCC. The techno-economic appraisal has been done by GFCC and the scheme has been found to be techno-economically viable.

On a query regarding land acquisition, it was informed by the Project Authority that an amount of Rs 341 Crore (approximately) had already been deposited with Land Acquisition Department.

After detailed deliberation, the Advisory Committee accepted the proposal. However, the acceptance of the proposal by the Advisory Committee of MoWR, RD & GR does not guarantee any eligibility towards release of fund under any existing scheme of MoWR, RD & GR such as PMKSY, RRR, FMP etc.

S No	Information Sought for	Reply
1	I have learnt from available papers/articles that the CWC submitted a report for construction of the Tipaimukh Multipurpose Hydroelectric Project (On Barak river at Manipur, India), which is probably submitted in 1984. I need a copy of this report/ proposal for the construction of the project. This information under RTI Act is needed for research purpose.	No any report for construction of Tipaimukh Multipurpose Hydroelectric Project (On Barak River at Manipur, India) is submitted in 1984.Hence the information in this regard may be treated as Nil as far as WP&P wing of CWC is concerned.
