Respite as inflows into Himayat Sagar dip

Authorities were gearing up to open gates following heavy rains

CITY BUREAU

Hyderabad

The inflows into Himayat Sagar gradually dipped on Monday compared to the previous day. According to officials, while the inflows on Sunday stood at 1,666 cusecs, by Monday evening this came down to 277 cusecs. Due to the downpour in the city and surrounding areas for almost a week, water bodies had received copious inflows and authorities were gearing up to open the gates of the Himayat Sagar if the rains continued.

It was after a decade that the gates of the reservoir were opened twice in October 2020 following floods. Authorities were planning to open the gates if the rains continued. Residents in downstream areas of Bandlaguda and Sun City Colony were also alerted about the same. With the dip in inflow, the need to open the gates

On Monday evening, the water level at the reservoir was recorded at 1,762.60 feet against the FTL of 1,763.50 feet. — Photo: Surya Sridhar

might not arise unless the city and its surrounding receive more heavy rains in the coming days.

On Monday evening, the water level at the reservoir was recorded at 1,762.60 feet against the FTL of 1,763.50 feet. The HMWSSB issues a red alert when the water level touches 1,762.75 feet and then opens the gates if the level goes up to 1,763 feet. The reservoir capacity is 2.97 TMC, and by Monday water level stood at 2.715 TMC. Meanwhile, inflows

into the other two major water bodies too dipped. Osman Sagar and Hussain Sagar did not receive much inflow on Monday as per HMWSSB data. Water board officials said they were taking appropriate measures after assessing the situation.

“In case of heavy rains, measures to maintain the inflow and outflow of water in reservoirs will be taken up. Arrangements are already in place,” an HMWSSB official said.

Water row: TS for logical solution

Obtaining legal opinion on Centre's Gazette notification

STATE BUREAU

HYDERABAD

State government is pursuing all options and obtaining legal opinion on the Centre's Gazette notification finalising the jurisdictions of river management boards of Krishna and Godavari. Chief Minister K Chandrashekhar Rao is consulting legal experts to come up with a logical solution to the issue, Agriculture Minister S Niranjan Reddy said. He demanded that the Centre revoke the anti-people notification immediately.

He said instead of supporting the State in construction of irrigation projects, the Union government wants to take over irrigation projects being constructed by the State government with much planning and difficulty. He accused the Centre of creating hurdles against development of Telangana State with a political motive.

"This is a life and death problem for people of Telangana whose fight for a separate State was rooted in discrimination in river water sharing. Telangana will not accept such unilateral and unconstitutional decisions of the Central government. But if the Centre decides to force its deci-

Agriculture Minister S Niranjan Reddy addressing mediapersons in Hyderabad on Monday.

sion on people of Telangana, the time will give a befitting answer," he said.

The Minister said the so-called national parties have failed to fight for the cause of Telangana State and instead, were trying to wash of their hands by blaming the State government. He demanded the Parliament members of BJP and Congress to speak out their stand to the people of the State on the notification.

Responding to the misleading reports over his remarks on the unemployment in the State, Niranjan Reddy said his statements were twisted and partially published on the social media in a misleading manner. He said his statement over the TS government

procuring paddy through paddy procurement centres using Hamalis, was misleadingly linked to unemployment problem of youth. However, he offered his sincere apologies to those who got carried away by the misinformation campaign that had hurt their sentiments.

He demanded to know whether the Congress and BJP MPs from the State were willing to take the responsibility and fight for filling over seven lakh job vacancies under the Union government. The Minister, along with a team of officials, will visit Delhi on Tuesday and meet Minister for Fertilisers and others seeking release of the monthly share of fertilisers due to the State.

TS plans waterfront tourism along KLIS

STATE BUREAU

Hyderabad

State government has sought the Centre's support to develop a mega tourism project near the prestigious Kaleshwaram Lift Irrigation Scheme (KLIS). Medak MP Kotha Prabhakar Reddy raised the matter in Lok Sabha on Monday under Rule 377.

In his appeal, the TRS MP said the State government had completed the Kaleshwaram project, which ensured full flow of water in River Godavari, and was also studying the possibility of creating an ambience to improve tourism by providing recreation facilities. Subsequently, it proposed to operate cruise boats, in-

troduce water sports and gliding facilities, among other activities, on the 22-km stretch along the backwaters between Kaleshwaram temple town and Laxmi Barrage which is also known as Medigadda Barrage.

'Develop other sites'

"Tourists look for night life at the waterfront. There is need to develop other tourism sites at related reservoirs including Mid Manair, Annapurna, Sri Ranganayaka Sagar, Sri Komaravelli Mallanna Sagar, Kondapochamma projects etc," he said. He urged the Union Tourism Minister to consider the proposals for development of waterfront tourism.

Withdraw river order, TS leaders tell Centre

KCR is using Krishna issue as fodder for Huzurabad polls

DC CORRESPONDENT
HYDERABAD, JULY 19

Leaders cutting across political lines, besides retired irrigation engineers, demanded that the central government withdraw its gazette notification taking control of all irrigation projects on Krishna and Godavari rivers.

The leaders were participating in a round-table organised by Telangana Journalists Adhyayana Vedika at the Press Club here on Monday. Those who addressed the meeting included former Lok Sabha member Konda Vishweshwar Reddy, Dasoju Sravan of

Congress, Prof. Kodandaram (TJS), Ravula Chandrashekar Reddy (TTDP), and Dr Prakash Reddy (BJP), among others.

The meeting unanimously adopted a resolution asking the centre to review its decision of issuing the gazette notification.

Kodandaram called upon all parties to come together by setting aside their political agendas and launch a joint struggle, so that Telangana could get its rightful share of Krishna and Godavari rivers. He said Chief Minister K. Chandrashekar Rao's inefficiency has led to the situation

wherein centre has issued a gazette notification taking control of all projects on the two major rivers.

Dasoju Sravan accused the CM of raking up Krishna water issue all of a sudden to whip up regional passions with an eye on upcoming Huzurabad by-poll. He pointed out that Chandrasekhar Rao had kept silent for over a year on AP's illegal projects on Krishna by colluding with AP Chief Minister Jagan Mohan Reddy. "Now, KCR is raising a hue and cry as though the AP government has launched Rayalaseema Lift Irrigation Scheme only now."

Vishweshwar Reddy lashed out at Chandrashekar Rao for taking up construction of projects in an "unscientific manner" in the name of redesigning projects, including Pranahitha-Chevella, which has harmed the interests of Rangareddy district.

However, BJP leader Prakash Reddy maintained that the centre's gazette notification is in interests of both TS and AP, as no state will now be able to construct illegal projects on Krishna and Godavari.

He felt the notification will ensure each state gets its rightful share of water without any trouble.

Centre: KRMB told TS to stop Srisaillam water release

New Delhi, July 19: The Krishna River Management Board (KRMB) has requested Telangana to stop further release of water through Srisaillam Dam, Nagarjunasagar Dam and Pulichintala project, as it has been agreed that the amount drawn for power generation is incidental to irrigation and drinking water needs, Union minister Bishweswar Tudu said on Monday.

The development comes after Andhra Pradesh Chief Minister Y.S. Jaganmohan Reddy wrote to the Union jal shakti minister on July 5, saying, "Telangana continues to unilaterally operate hydel power generation from Nagarjunasagar project without placing indent

● THE JAL

Shakti Ministry on July 15 notified the Godavari and the Krishna river management boards, giving them more teeth to administer, regulate, operate and maintain projects listed on these two rivers in Telangana and Andhra Pradesh.

before KRMB and in violation of the protocol for water drawals."

In a written response to a question in the Rajya Sabha, Tudu, who is the minister of state in the Jal Shakti Ministry, said, "The Krishna River Management Board (KRMB) vide its letter dated 15.07.2021 has requested the Telangana State GENCO authorities

to stop further release of water through Srisaillam Dam (Left Power House), Nagarjunasagar Dam and Pulichintala Project, as it is agreed that quantum of water drawn for power generation purpose is incidental to irrigation and drinking water needs."

The Jal Shakti Ministry on July 15 notified the Godavari and the Krishna river management boards, giving them more teeth to administer, regulate, operate and maintain projects listed on these two rivers in Telangana and Andhra Pradesh. The notification is expected to reduce the friction in the area of water management between the two states, the ministry had said last week.

Govt to design a world-class drainage system for Delhi: CM

OUR CORRESPONDENT

NEW DELHI: In a review meeting the Lieutenant Governor Anil Baijal and Chief Minister Arvind Kejriwal took stock of the preparation done by the various departments to enhance the drainage system in the Capital.

In the meeting the CM said that he will enhance the city's drainage system and make it world class. Officials from various departments like PWD and DJB showed presentations of the work done and initiatives taken by all the departments.

The CM called for enhancing the city's drainage system to make it world class and appreciated the officers for curbing water-logging at the Minto Bridge which in the previous years would be water-logged during the monsoon season.

"I am pleased with the work done by our agencies, and we can see the proof of their work at Minto Bridge. There's a folklore-benchmark in Delhi, it is said that the day Minto Bridge gets waterlogged, that day marks the onset of the monsoons. Minto Bridge this time is the talk of the town," he said.

PWD Minister Satyendar Jain, the Chief Secretary and various officers from their concerned departments were also present in the meeting. All officers and engineers across departments need to be available and alert 24x7 to combat water-logging, Jain said.

There are a lot of places in Delhi where drains of the Jal Board and the MCD converge, there is no coordination in them. "I would like to suggest that PWD acts as the nodal authority and undertakes

CM Kejriwal appreciated the officers from PWD and DJB for curbing water-logging at the Minto Bridge

an exercise to redesign Delhi's drainage system. If an excellent design is in place and all the agencies can work together on it, then we can implement it," Kejriwal said.

"In the next three days we are going to have excess rainfall, so we need to be fully prepared to handle the situation. We not only have to be alert during the day but extra alert during the night; we have over 1500 pump sets we should deploy them all," Jain said.

The work done by officials at the Minto Bridge has proven that the departments have the capacity to curb water-logging at all the vulnerable points where water gets logged in the city.

"We know of 147 such vulnerable points. If we conduct extensive mapping, we can enlist all possible vulnerable points. If solutions for all vulnerable points are planned and worked towards like the Minto Bridge, then we can bring Delhi freedom from water-logging," the CM added.

"Once such a system is in place, we would only require de-silting it once a year and the drainage system will be free of liability. So we should work on that prospect. We need to also popularise our grievance helpline numbers with the people of the city," the CM added.

Millennium Post- 20- July-2021

A usurpation?

The unilateral authorization of Godavari and Krishna River management boards to administrate the basin projects steals away the rights of respective states

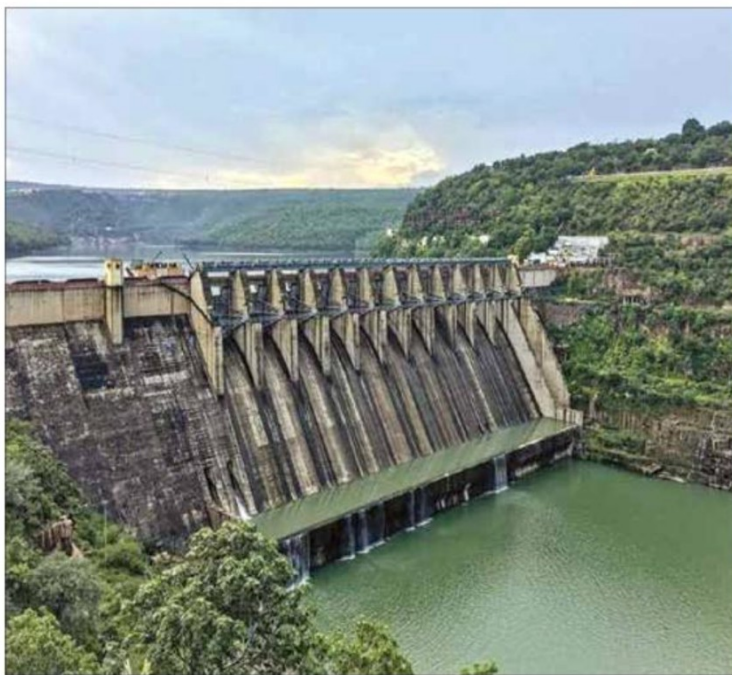

**VANAM JWALA
NARASIMHA RAO**

The Ministry of Jal Shakti of the Government of India, through gazette notification dated July 15, 2021, has notified the jurisdiction of Godavari River Management Board and Krishna River Management Board, providing the required authority and power to the two Boards in terms of administration, regulation, operation and maintenance of listed projects in Godavari and Krishna River basins in Andhra Pradesh and Telangana. According to the authorities, this step is expected to ensure judicious utilization of water resources in the two states, which is not true.

The Centre, while notifying the jurisdiction of Krishna and Godavari River Management Boards, transferred to them the operation of all projects, including generation of hydel power in the two river basins from October 14.

The imperatives of the notification are: 36 projects in the Krishna basin and 71 projects in the Godavari basin are proposed to be kept under the control of KRMB and GRMB respectively. This means both the river basins will be under the direct control of the Central Government. Both states will have to stop the works of unapproved ongoing projects immediately and obtain approvals within six months of this notification. If approvals are not obtained within the stipulated time, such completed unapproved projects shall cease to operate.

Palamuru-Rangareddy Lift Irrigation Scheme (PRLIS), Dindi Lift Irrigation Scheme, Sitarama, 3rd TMC works of Kaleshwaram, Bhakta Ramadasu Lift Irrigation Scheme, Thummilla Lift Irrigation Scheme are some of the projects which fall under this category of unapproved ongoing and completed projects. All the sanctioned posts, including work-charged staff in the notified projects, shall come under the jurisdiction of boards. Both the states shall completely hand over the jurisdiction of the projects to the boards. Plants, machinery, equipment and stores of

Many projects categorised as 'unapproved' will cease to operate in six months if they fail to get approval

the projects shall come under the jurisdiction of boards. Office premises, equipment, furniture, vehicles, records and documents of the notified projects shall also come under the jurisdiction of boards.

Within 60 days, both the governments shall deposit Rs 200 crore each, totalling Rs 400 crore. Matters relating to power generation, transmission, and distribution shall be implemented by the states as per the directions of the boards. Both the state governments shall be responsible for the management of natural calamities like drought and floods, as per the advice of the boards.

In this context, it is of utmost importance to recall the Telangana stand on the notification of jurisdiction of KRMB. Telangana Chief Minister K Chandrasekhara Reddy expressed the stand of his government in the Second Apex Council held on October 6, 2020, saying "unless water sharing is finalised by the Tribunal under Section 3 of Inter-State River Water

Disputes Act (ISRWD Act) 1956, the question of notification of jurisdiction of boards should not arise."

He further stated: "Tribunal matter is pending in the Supreme Court and the matter is sub-judice, hence on this account also the matter cannot be deliberated". A similar opinion was also expressed in the first Apex Council Meeting held on September 21, 2016. The opinions of the Chief Ministers were well recorded in the minutes of Apex Council meetings. Despite the difference of opinions of the member states on the issue of jurisdiction, the Ministry of Jal Shakti issued the gazette notification on July 15, 2021 unilaterally without communicating the Draft Notification to the member states for their remarks and comments, which is undemocratic and against the spirit of cooperative federalism. It literally means usurping the rights of states by the Centre.

The notification has far-reaching implications and impacts on Telangana. The

said notification declared some of the ongoing and completed projects which were sanctioned in the combined state of Andhra Pradesh as unapproved projects and these projects shall be stopped forthwith till permissions are obtained in six months.

Projects which serve in basins, drought-prone and fluoride-affected areas namely Palamuru-Rangareddy, Dindi, Sitarama, Kalwakurthy, Nettekoppa, SLBC etc. have to be stopped as per the clauses of this notification. Telangana has been pleading for water allocations for these basin projects in the ongoing Krishna River Dispute Tribunal II. To facilitate the Ministry of Jal Shakti to refer TS complaint to the Tribunal under Section 3 of ISRWD Act, 1956, Telangana withdrew its case pending in the Supreme Court and informed the ministry.

Telangana state wants the Government of India to keep the gazette notification issued on July 15 in abeyance and seeks that the opinions,

remarks and amendments from the member states be invited. Notification may be issued after examining the remarks of the member states with consensus and with amendments suggested by the member states.

Refer the complaint of Telangana state to the existing Krishna Water Dispute Tribunal II for early finalization of water shares for both the states in Krishna River to end the present water disputes within the stipulated time frame. Till the finalization of shares by the Tribunal, temporary water-sharing between AP and Telangana shall be in a 50:50 ratio from the current water year. Telangana has been asking the Government of India to implement this ratio since 2018.

As there are no common projects or water sharing disputes in Godavari Basin, Notification of jurisdiction for GRMB is not necessary. The combined state of AP allocated 967 TMC to the projects of Telangana as per the Godavari Water Dispute Tribunal Award. Telangana is constructing projects for the utilization of its share. Then why a separate board?

A River Management Board does not belong to the Central Government alone. Member states have equal rights in the deliberations. By issuing this notification unilaterally, and taking all the projects in the two river basins into the control of river boards which have nothing to do with interstate disputes, can be termed as an encroachment into the state subject. The unilateral action of the Central Government may be described as the 'nationalization of rivers'. The rights of states on river waters are taken away with this notification. Constitutional and engineering experts believe that this notification is against the spirit of the Constitution and the federal nature of the Indian Union.

With inputs from Sridhar Rao Deshpande. The writer is the Chief Public Relations Officer to the CM of Telangana. Views expressed are personal

The Centre, while notifying the jurisdiction of Krishna and Godavari River Management Boards, transferred to them the operation of all projects, including generation of hydel power in the two river basins in AP and Telangana, to be effective from October 14

The Tribune- 20- July-2021

Heavy rain warning today

TRIBUNE NEWS SERVICE

SHIMLA, JULY 19

The local Met office has issued an orange warning of thunderstorm, lightning and heavy to very heavy rain at isolated places in 10 districts barring Kinnaur and Lahaul and Spiti on July 20 and a yellow warning of thunderstorm, lightning and heavy rain on July 21.

Moderate to very heavy rain lashed several parts of the state. Palampur with 245 mm of rain was the wettest followed by Dharamsala 119 mm, Bilaspur 104 mm, Mandi 86 mm, Hamirpur 77 mm, Paonta Sahib 72 mm, Una 71 mm, Dalhousie 69 mm, Nahan 68 mm, Solan 64 mm, Nalagarh 39 mm, Kufri

Commuters walk during rainfall in Shimla on Monday. PHOTO AMIT KANWAR.

35.5 mm, Bajura and Naina Devi 35 mm each and Shimla 31 mm.

As many as 252 roads were blocked due to rain-related

incidents in the past 24 hours. A maximum of 148 roads were closed in the Mandi zone, 54 in the Kangra zone and 43 in the Shimla zone.

प्रदेश में मानसून मेहरबान: कई स्थानों पर 150 से 200 मिमी तक बारिश

21 साल बाद साहबी नदी में पानी, चंबल उफान पर

पत्रिका न्यूज नेटवर्क
patrika.com

स्टेट डेस्क . प्रदेश में दो दिन से मानसून मेहरबान है। अधिकांश जिलों में दो दिन से बारिश हो रही है। कई स्थानों पर भारी व अति भारी बारिश हुई। अलवर जिले के नीमराणा व बहरोड़ में दो दिन में 200 मिमी से अधिक बारिश हो चुकी है। अच्छी बारिश के कारण अलवर जिले में स्थित साहबी नदी में 21 साल बाद पानी आया है। बरसात से साहबी नदी में 8 मीटर पानी आया। साल 1999 के बाद नदी में पानी आया है। वहीं चम्बल नदी के उफान पर आने से झरेल के बालाजी के पास रपट पर तीन फीट पानी पहुंच गया। इससे खातौली से सवाईमाधोपुर का सम्पर्क कट गया। बारिश के कारण कई जिलों में अधिकतम तापमान 30 डिग्री से नीचे पहुंच गया।

1991 के बाद पहली बार 8 मीटर पानी

अलवर. साहबी नदी में करीब 21 साल बाद आया पानी।

परिसंचरण तंत्र का प्रभाव समाप्त

जयपुर मौसम विभाग के अनुसार राज्य पर बने परिसंचरण तंत्र का प्रभाव समाप्त हो गया है। अगले तीन दिन व्यापक स्तर पर तेज या भारी बारिश की संभावना नहीं है।

केवल कुछ स्थानों पर हल्की या मध्यम दर्जे की बारिश होगी। 23 जुलाई से एक बार पुनः कुछ स्थानों पर बारिश की गतिविधियों में बढ़ोतरी होगी।

कहां कितनी वर्षा

जिला	स्टेशन	बारिश
अलवर	सोडावास	270
अलवर	नीमराणा	218
अलवर	बहरोड़	210
अलवर	बानसूर	162
अलवर	मंडावर	154
झुंझुनू	बुहाना	117
करौली	सुरोथ	110
कोटा	खटौली	104
कोटा	लाडपुरा	101
कोटा	पीपलदा	80
भरतपुर	उच्चैन	75
भरतपुर	बयाना	67

(पिछले 24 घंटे में दर्ज मिमी बारिश)

Haribhoomi- 20- July-2021

2015 के बाद एक दिन में सबसे ज्यादा बरसात का नया रिकॉर्ड बना

मूसलाधार बारिश से राजधानी जलमग्न

हरिभूमि न्यूज ॥ नई दिल्ली

मानसून के देरी से पहुंचने के बावजूद रविवार-सोमवार को रिकॉर्ड बारिश दर्ज हुई जिसके चलते राजधानी दिल्ली पानी पानी हो गई। दिल्ली में कई इलाके ऐसे रहे जहां रिकॉर्ड तोड़ 100 मिमी से ज्यादा तक बरसात दर्ज हुई है। पूरी दिल्ली में सुबह 8 बजे से पहले सफ़रदर्ज ऑब्जर्वेटरी (वेधशाला) ने 70 मिलीमीटर बारिश दर्ज की जो 2015 के बाद एक दिन में सबसे ज्यादा बरसात का नया रिकॉर्ड है। इससे पहले 11 जुलाई 2051 को 93.8 मिमी बारिश दर्ज की गई थी।

बात अगर ओवर ऑल रिकॉर्ड की करें तो दिल्ली में 24 घंटे की बारिश के लिए 1958 के नाम अब तक का सबसे अधिक रिकॉर्ड दर्ज है, उस समय 24 घंटे में राजधानी में कुल 226.2 मिलीमीटर बारिश दर्ज की गई थी। रविवार देर रात से शुरू हुई मूसलाधार बारिश सोमवार देर रात तक रह रहकर होती रही। जिसके चलते जगह जगह जलभराव से राजधानी की गति थम सी गई। कई अंडरपास लंबालब होने से उन्हें बंद करना पड़ा। लेकिन इस बार अजुबा भी देखने को मिला कि हर बार डूबने वाला मिंटो ब्रिज जलभराव से अछूता रहा।

सबसे ज्यादा नरेला में 104 मिमी वर्षा, पारा 10 डिग्री लुढ़का

दिल्ली में रविवार रात से सोमवार सुबह 8.30 बजे तक कई इलाकों में 100 मिमी से ऊपर तक बारिश दर्ज हुई है, वहीं पारे में भारी गिरावट दर्ज हुई है। मौसम विभाग के अनुसार सबसे ज्यादा पानी नरेला क्षेत्र में

खास बातें

■ जलभराव से राजधानी की रफ्तार थमी, कई अंडरपास पानी से लंबालब भरने पर करने पड़े बंद

■ रविवार देर रात को शुरू हुई मूसलाधार बारिश सोमवार तक रह रहकर होती रही

लुटियन दिल्ली से लेकर ग्रामीण क्षेत्रों तक पानी ही पानी, कई बाजार भी डूबे

अब तक बारिश को तरसती रही दिल्ली महज 24 घंटे की बारिश में जलमग्न दिखने लगी। पुल प्रहलाद को जलभराव के चलते बंद करना पड़ा, जबकि इसमें एक व्यक्ति के डूबने से मौत हो गई। मूसलाधार बारिश के चलते लुटियन दिल्ली से लेकर ग्रामीण क्षेत्र तक पानी पानी नजर आए। दिल्ली की कई छोटी बड़ी मार्केट में एक एक फुट तक पानी खड़ा हो गया। सबसे बुरी हालत देहात का बड़ा बाजार कहा जाने वाला नजफगढ़ का रहा। यहां की मुख्य बाजार की अधिकांश दुकानों में पानी भर गया जिससे नुकसान भी उठाना पड़ा। इसी प्रकार, लाजपत राय मार्केट, कश्मीरी गेट, खारी बावली, पहाड़गंज, बड़ सड़क, गांधी नगर, करेला, गीता कॉलोनी, इंदिरा सुरंज, मजनुपुरा, सोलमपुर, पुराना शाहदरा, आजादपुर, बुराड़ी मार्केट आदि शामिल हैं।

बरसा है जहां 104 मिमी बारिश दर्ज की है। जबकि दूसरे नंबर पर पालम एरिया रहा जहां वेधशाला ने 99 मिमी बरसात दर्ज की। जबकि नजफगढ़ 95 मिमी, सफ़रदर्ज 70 मिमी और लोधी रोड 62 मिमी बारिश दर्ज की गई। इस बार एक जुलाई से 18 जुलाई तक कुल 102.7 मिमी बारिश हो चुकी है। जबकि जुलाई महीने में नार्मल रूप

से 180.6 मिमी तक बरसात होती है। रविवार तक करीब 43 मिमी कम बरसात दर्ज हुई थी जो अब लगभग पूरी होती दिख रही है। मौसम विभाग के अनुसार बारिश के चलते पारा 10 डिग्री लुढ़क गया है। जहां रविवार को अधिकतम पारा 36 डिग्री सेल्सियस रहा वहीं बारिश के बाद सोमवार को लुढ़कर 26 डिग्री सेल्सियस रह गया।

आज भी हो सकती है झमाझम बारिश, रेलो अलर्ट जारी

रविवार रात-सोमवार को हुई बारिश के बाद मौसम विभाग का चेनो अलर्ट है कि मंगलवार को भी अच्छी बारिश दर्ज होने की प्रबल संभावनाएं हैं। उसके बाद यानी बुधवार से अगले तीन दिनों तक भारी बारिश से राहत मिलेगी और कहीं कहीं हल्की बुदबुदाती दर्ज होने की संभावना है। करीब 16 की देरी के बाद दिल्ली में मेहरबाज हुर मानसून ने 13-14 जुलाई को अच्छी बारिश दर्ज की थी। लेकिन उसके बाद से बरसात ने दिल्ली वालों से मानो मुंह फेर लिया हो। अब रविवार देर रात से मेहरबाज हुर मानसून के दूसरे चक्र ने जबरदस्त पानी बरसाया है जिससे दिल्ली वाले परेशान हो गए हैं।

45 जगह जलभराव, 20 जगह पेड़ तो 6 स्थानों पर गिरे भवनों के हिस्से

दिल्ली में सोमवार आई बारिश के दौरान दिल्ली में 45 जगह जलभराव हुआ, 20 जगह पेड़ गिरे और 6 जगह भवनों के हिस्से गिरने की सूचना दिल्ली के तीनों नगर निगमों (दक्षिणी, उत्तरी व पूर्वी) के नियंत्रण कक्षों का प्राप्त हुई। दक्षिणी निगम प्रशासन ने बताया कि दक्षिणी निगम क्षेत्र में 37 जगह जलभराव, 19 जगह पेड़ गिरे और 6 जगह भवनों के हिस्से गिरने की सूचना दर्ज की गई। वहीं, उत्तरी निगम क्षेत्र में 6 जगह जलभराव की शिकायत मिली। जबकि पूर्वी निगम क्षेत्र में 2 जगह जलभराव और एक जगह पेड़ गिरने की शिकायत निगम प्रशासन ने बताई। संबंधित निगम प्रशासन ने बताया कि जलभराव की शिकायतों का घंटे भर में समाधान कर दिया गया था।

नालों से निकली गाद फिर नालों में ही चली गई

दिल्ली में कुछ दिन पहले नाले और नालियों से निकली गाद न उठने से सोमवार को हुई बारिश के कारण वह वापस नालों में चली गई। गौरतलब है कि मानसून की तैयारियों के चलते नालों और नालियों की सफाई का काम किया गया। लेकिन सूखने के बाद भी कई जगहों पर गाद नहीं उठायी गई। गौरतलब है पूर्वी दिल्ली के विकास मार्ग पर वॉशिंगटन मॉल के सामने नाले की सफाई कुछ दिन पहले की गई। नाले से निकली गाद दो तीन दिन पहले ही सूख गई थी। लेकिन मानसून आने की मविष्यवाणियों के बाद भी गाद नहीं उठायी गई। अधिकार सोमवार को बारिश में बह कर गाद वापस नाले में चली गई। यह सिर्फ वॉशिंगटन मॉल के सामने की बात नहीं ऐसा पूरी दिल्ली में कई जगह हुआ। अगर समय से गाद उठ जाती तो नाले की सफाई का काम कारगर साबित होता और जलभराव कम होता।

बदहाल डीटीसी बस स्टैंड बने परेशानी का सबब

सोमवार को आई तेज बारिश के चलते डीटीसी यात्रियों को भी भारी परेशानी का सामना करना पड़ा। सिंगु बॉर्डर से मुकरबा चौक की तरफ आने वाले मार्ग पर अधिकतर बस स्टैंड की छतें नहीं हैं और यदि हैं तो उनकी हालत बदहाल है। जिसके चलते यात्रियों को बारिश में भीगने का मजबूर होना पड़ रहा है। यात्रियों का कहना है कि कई बस स्टैंड ऐसे हैं जहां जलभराव होने के चलते यात्री बसों में चढ़ ही नहीं पाते हैं। इसके साथ ही उन्होंने यह भी बताया कि आजादपुर बस टर्मिनल को जलभराव के कारण डीटीसी की लॉफ़्टोर बसों में पानी भर गया।
