# **BRIEF NOTE ON LIVE STORAGE STATUS OF 146 RESERVOIRS IN THE COUNTRY (WITH REFERENCE TO RESERVOIR STORAGE BULLETIN OF 22.06.2023)**

## **1. ALL INDIA STATUS**

Central Water Commission is monitoring live storage status of 146 reservoirs of the country on weekly basis and is issuing weekly bulletin on every Thursday. Out of these reservoirs, 18 reservoirs are of hydro-electric projects having total live storage capacity of **34.960 BCM**. The total live storage capacity of 146 reservoirs is **178.185 BCM** which is about **69.11%** of the live storage capacity of 257.812 BCM which is estimated to have been created in the country. As per reservoir storage bulletin dated **22.06.2023**, live storage available in these reservoirs is **46.231 BCM**, which is **26%** of total live storage capacity of these reservoirs. However, last year the live storage available in these reservoirs for the corresponding period was **50.033 BCM** and the average of last 10 years live storage was **41.235 BCM**. Thus, the live storage available in 146 reservoirs as per **22.06.2023** Bulletin is **92 %** of the live storage of corresponding period of last year and **112%** of storage of average of last ten years.

As per Table-01, the overall storage position is **less than the** corresponding period of last year in the country as a whole but is **better than the** average storage of last ten years during the corresponding period.

## **2. REGION WISE STORAGE STATUS:**

### **a) NORTHERN REGION**

The northern region includes States of Himachal Pradesh, Punjab and Rajasthan. There are 10 reservoirs under CWC monitoring having total live storage capacity of **19.663 BCM**. As per Reservoir Storage Bulletin dated **22.06.2023**, the total live storage available in these reservoirs is **7.709 BCM** which is **39%** of total live storage capacity of these reservoirs. The storage during corresponding period of last year was **26%** and average storage of last ten years during corresponding period was **30%** of live storage capacity of these reservoirs. Thus, storage during current year is better than the corresponding period of last year and is also better than the average storage of last ten years during the corresponding period.

### **b) EASTERN REGION**

The Eastern region includes States of Jharkhand, Odisha, West Bengal, Tripura, Nagaland and Bihar. There are 21 reservoirs under CWC monitoring having total live storage capacity of **20.091 BCM**. As per Reservoir Storage Bulletin dated **22.06.2023**, the total live storage available in these reservoirs is **3.512 BCM** which is **17%** of total live storage capacity of these reservoirs. The storage during corresponding period of last year was **16%** and average storage of last ten years during corresponding period was **23 %** of live storage capacity of these reservoirs. Thus, storage during current year is better than the corresponding period of last year but is less than the average storage of last ten years during the corresponding period.

**c) WESTERN REGION**

The Western region includes States of Gujarat and Maharashtra. There are **49** reservoirs under CWC monitoring having total live storage capacity of **37.130 BCM**. As per Reservoir Storage Bulletin dated **22.06.2023**, the total live storage available in these reservoirs is **8.507 BCM** which is **23 %** of total live storage capacity of these reservoirs. The storage during corresponding period of last year was **24%** and average storage of last ten years during corresponding period was **20%** of live storage capacity of these reservoirs. Thus, storage during current year is less than the storage of last year but is better than the average storage of last ten years during the corresponding period.

**d) CENTRAL REGION**

The Central region includes States of Uttar Pradesh, Uttarakhand, Madhya Pradesh and Chhattisgarh. There are 26 reservoirs under CWC monitoring having total live storage capacity of **48.227 BCM**. As per Reservoir Storage Bulletin dated **22.06.2023**, the total live storage available in these reservoirs is **15.513 BCM** which is **32%** of total live storage capacity of these reservoirs. The storage during corresponding period of last year was **29%** and average storage of last ten years during corresponding period was **26%** of live storage capacity of these reservoirs. Thus, storage during current year is better than the storage of last year and is also better than the average storage of last ten years during the corresponding period.

**e) SOUTHERN REGION**

The Southern region includes States of Andhra Pradesh, Telangana, AP&TG (2 combined projects in both states), Karnataka, Kerala and Tamil Nadu. There are 40 reservoirs under CWC monitoring having total live storage capacity of **53.074 BCM**. As per Reservoir Storage Bulletin dated **22.06.2023**, the total live storage available in these reservoirs is **10.990 BCM** which is **20.71%** of total live storage capacity of these reservoirs. The storage during corresponding period of last year was **35%** and average storage of last ten years during corresponding period was **20.62%** of live storage capacity of these reservoirs. Thus, storage during current year is less than the storage of corresponding period of last year but is better than the average storage of last ten years during the corresponding period.

The region wise and reservoir wise details are given in the following pages of the Bulletin.

## **BROAD ANALYSIS OF OTHER TABLES IN THE BULLETIN**

- Normal storage means average storage of last ten years, Close to normal storage means where shortfall is upto 20% of normal, deficient storage is where shortfall is more than 20% of the normal and upto 60% of the normal, highly deficient means where shortfall is more than 60% of normal.
- In the table on page 13, better than normal storage is available in Ganga, Indus, East Flowing Rivers between Pennar & Kanyakumari, Pennar, West Flowing Rivers of Kutch & Saurashtra including Luni, Narmada, Tapi, Sabarmati, Godavari, Mahanadi and Cauvery . Close to Normal in Brahmaputra, Mahi, Krishna, & West Flowing Rivers from Tapi to Tadri. Deficient in Subernarekha, Barak & Others, Brahmani & Baitarni, East Flowing Rivers between Mahanadi & Pennar and West Flowing Rivers from Tadri to Kanyakumari, and Highly Deficient in Nil.
- Table on page 14-16 of the bulletin. The numbers of reservoirs having storage more than last year are **52** and reservoirs having storage more than average of last ten years are **67**. The numbers of reservoirs having storage less than or equal to 20% with respect to last year is **15** and having storage less than or equal to 20% with reference to average of last ten years is **11**. The number of reservoirs having storage less than or equal to 50% with respect to last year are **38** and having storage less than or equal to 50% with reference to average of last ten years are **29**.

States having better storage (in %) than last year for corresponding period: Himachal Pradesh, Punjab, Rajasthan, Jharkhand, Odisha, Madhya Pradesh & Chhattisgarh.

States having equal storage (in %) to last year for corresponding period: Gujarat & Nagaland.

States having lesser storage (in %) than last year for corresponding period: West Bengal, Tripura, Bihar, Maharashtra, Uttar Pradesh, Uttarakhand, AP&TG (Two combined projects in both states), Andhra Pradesh, Telangana, Karnataka, Kerala & Tamil Nadu.

### **3. LIVE STORAGE AVAILABLE IN THE COUNTRY:**

Based on the data available for 146 reservoirs as per Reservoir Storage bulletin dated **22.06.2023**, the total live storage of the country has been estimated to be **65.270 BCM** against 257.812 BCM which is estimated to have been created in the country.

\*\*\*\*\*

**Disclaimer:** The Data contained in this Bulletin is as received from the State Government/Project Authorities.

**STORAGE STATUS OF 146 IMPORTANT RESERVOIRS IN THE COUNTRY**
**AS ON : 22.06.2023**

- 1 Central Water Commission is monitoring storage status of 146 important reservoirs spread all over the country, in which 18 are of hydro-electric projects having total live storage capacity of 34.960 BCM. These reservoirs are identified thus(\*) in the enclosed weekly report.
- 2 The total live storage in 146 important reservoirs in different parts of the country, monitored by CWC as on **22.06.2023** is **46.231** BCM ( **26** percent of the live storage capacity at FRL ).The current year's storage is nearly **92** percent of last year's storage and **112** percent of the average of last ten years.

**3 Region wise storage status:-**

**4 Basin wise storage position:**

**Better than normal:** Ganga, Indus, East Flowing Rivers between Pennar & Kanyakumari, Pennar, West Flowing Rivers of Kutch & Saurashtra including Luni, Narmada, Tapi, Sabarmati, Godavari, Mahanadi and Cauvery

**Close to normal:** Brahmaputra, Mahi, Krishna, & West Flowing Rivers from Tapi to Tadri

**Deficient:** Subernarekha, Barak & Others,Brahmani & Baitarni, East Flowing Rivers between Mahanadi & Pennar and West Flowing Rivers from Tadri to Kanyakumari.

**Highly deficient:** NIL

5 Out of 146 reservoirs, **87** reservoirs reported more than 80% of normal storage & **59** reservoirs reported 80% or below of normal storage. Out of these **59** reservoirs **29** are having storage upto 50% of normal storage.
