Successful diversion of Chenab River achieved

A major milestone has been achieved at the 850 MW Ratle HE Project (J&K) with the diversion of Chenab River through Diversion Tunnels at Drabshalla on January 27 at 11:30 AM. The River Diversion will enable the isolation of Dam Area at river bed for starting the excavation/construction of Dam which is a critical activity. It shall expedite the project construction activities and help in minimising delays so as to facilitate all efforts being made by Project to achieve scheduled commissioning date of May 2026.

Chalk out plan on drinking water: CM

Directs officials to utilise water from new reservoirs

STATE BUREAU
HYDERABAD

Chief Minister A Revanth Reddy on Tuesday asked officials to prepare an action plan to address drinking water shortage in the ensuing summer. In addition to River Krishna and River Godavari, officials were asked to utilise water from the newly constructed reservoirs for drinking water needs and prepare plans accordingly.

This would aid in comfortable supply of drinking water to the surrounding villages from the reservoirs at a low cost, he said.

"The newly constructed Mallanna Sagar, Kondapocamma Sagar and Ranganayaka Sagar reservoirs should be utilised for drinking water requirements," Revanth Reddy said at a meeting with Panchayat Raj and Rural Development Department officials here on Tuesday. Asking for measures to tide over the drinking water crisis in the summer, he said Rs 1 crore should be spent exclusively for drinking water needs from the Rs 10 crore Special Development Fund sanctioned to each Assembly constituency. Water available in all the projects and reservoirs in the State was to be utilised for drinking water needs on priority, he

Chief Minister A Revanth Reddy addressing Panchayat Raj and Rural Development Department officials during a meeting in Hyderabad on Tuesday.

“As the term of sarpanches ends by the end of this month, officials should take up the responsibility of drinking water supply in villages

— A REVANTH REDDY, Chief Minister

said, also directing officials to entrust the responsibility of drinking water supply management in every village to sarpanches.

The Mission Bhagiratha wing should be entrusted with the task supplying safe drinking water in the villages, he said. Maintenance of drinking water supply network, taps and pipelines in villages should be entrusted separately to the Sarpanches. Calling for a comprehensive survey to identify villages and habita-

tions that are facing drinking water issues, he said the new proposals should be prepared for sending them to the Centre to seek funds under the Jal Jeevan Mission.

"As the term of sarpanches ends by the end of this month, officials should take up the responsibility of drinking water supply in villages," the Chief Minister directed.

Stating that the government would pay special focus on strengthening the Self Help Groups, the Chief

Minister suggested that women SHGs should be given work orders of stitching uniforms for students in government schools, Gurukuls, hostels and police. If required, the women groups should be provided training, he said.

When officials informed that 422 Gram panchayats and 3177 habitations lacked road connectivity, the Chief Minister directed them to lay black top roads in such villages. If required, the employment guarantee scheme funds should be linked to the road development works, he said, asking them to prepare proposals for allotment in the budget.

Panchayat Raj and Rural Development Minister D Anasuya, Roads and Buildings Minister Komatireddy Venkat Reddy and senior officials were present.

Delhi govt asks for 12 weeks to demarcate Yamuna's floodplain

Jasjeev Gandhiok

jasjeev.gandhiok@hindustantimes.com

NEW DELHI: Experts have long held that there is a simple reason why the Delhi government has been unable to protect the Yamuna floodplains — they have never been demarcated and defined.

After the National Green Tribunal (NGT), in October, pushed the administration to do so by setting up a panel for the task, the Delhi government, in a submission to the body on January 29, has sought 12 weeks to complete the virtual demarcation of the floodplains, and a physical demarcation on the ground through signage and pillars.

Floodplains are a critical ecosystem — they are a natural barrier against floods, serve as an ideal recharge mechanism (for rainwater especially), and provide a home to diverse flora and fauna. But they are usually neglected, and often encroached upon — often with disastrous consequences for not just the river, but also human habitations along its banks.

Floods such as the one last year which saw the Yamuna water level rise to an all-time high of 208.66 metres on July 13, with the river's waters almost reaching the Supreme Court and besieging the Red Fort, can be directly attributed to abuse of the floodplains, experts say.

NGT, in October, took cognizance of a media report and formed a committee headed by the Delhi chief secretary to identify, demarcate and notify the floodplains of the Yamuna as per the River Ganga (Rejuvenation, Protection and Management) Authorities Order, 2016.

It added that the delineation of Yamuna was required to prevent illegal developments in the floodplains.

The committee also comprises a nominee from Delhi Development Authority, the Secretary (Environment); the Secretary (ministry of Jal Shakti); executive director, National Mission for Clean Ganga (NMCG); and commissioner, Municipal Corporation of Delhi (MCD).

"The committee will get the spot inspection done and ensure demarcation of flood plains of

In October, NGT said that delineation of Yamuna was required to prevent illegal developments.

HT ARCHIVE

Yamuna in the area concerned and suggest measures to prevent and remove the encroachment and unauthorized constructions falling within the flood plains," NGT said in its order dated October 17, 2023.

In a submission on January 29, the environment department of the Delhi government told the tribunal that it will take two weeks for the remote determination of the floodplain area, followed by another two weeks to prepare high-resolution images using Geospatial Delhi Limited (GSDL), a company that maintains and update spatial data through mapping and surveys, and four weeks for on-ground verification of the same area, after which physical demarcation on the ground will commence.

In its submission, the Delhi government added: "The committee has deliberated at length the timelines required for the exercise and found that the operation needs massive interdepartmental collaboration, collection of data, ground surveys, verification and on-ground demarcation to ensure effective implementa-

tion of this Tribunal's directions and thus requires more time. It is prayed further a time of 12 weeks may be granted to the concerned agencies to complete the exercise and ensure compliance."

HT has reviewed a copy of the submission.

Ground situation

The submission added that DDA estimates the so-called Zone O of the Yamuna to be 9,700 hectares with the area occupied by the river itself being around 1,146 hectares.

Of the balance, land available for development is 3,493 hectares (1,647 hectares of this is with DDA); the remaining 5061 hectares is with other department and agencies, and also home to 94 unauthorised colonies.

The Delhi government department also said that DDA carried out a floodplain area demarcation, based on a 2015 NGT order that sought the demarcation keeping in mind a possible "1-in-25 year flood" (a rare occurrence with a 4% chance of occurring every year).

That exercise (done in association with the Indian Institute of Technology, Delhi), however, has been questioned by the National Mission for Clean Ganga (NMCG), which, in January 2022, directed the demolition of structures in the floodplains noting that the DDA demarcation was "inappropriate" and "not done properly".

In the draft master plan for 2041, which is yet to be notified, DDA split this zone into Zone O1 and Zone O2, with regulated development being allowed in the latter.

What happens now

To determine the area with other agencies and government departments along the floodplains, the NGT-appointed committee has directed GSDL to procure high-resolution images of the floodplain area and coordinate with different departments and agencies for the preparation of a detailed map, the submission stated.

"The committee stressed on the granularity of data required from DDA on this exercise, which included a detailed

department-wise/agency-wise break-up of area in terms of ownership and land use. ...Also directed DDA to submit the area which is clearly free from encroachment and encumbrances and also enquired from DDA about the area under private ownership," the submission added, stating that each government department or agency owning land along the floodplains has to appoint a nodal officer and share information with GSDL within four weeks.

Experts said until the demarcation is done, unauthorised colonies and structures cannot be removed.

"DDA has said it has done a 1-in-25 year floodplain demarcation in the past, but we don't see any bollards or markings in the Yamuna, barring a few limited places, like Baansera. The O-zone also exists on paper and until there is clear demarcation of floodplain area, how can we stop projects from taking place on floodplain land?" asked Bhim Singh Rawat, a Yamuna activist and member of the South Asia Network on Dams, Rivers and People (SANDRP).

Deccan Chronicle - 31- January-2024

Revanth seeks to aid water supply

DC CORRESPONDENT
HYDERABAD, JAN. 30

Chief Minister A. Revanth Reddy instructed officials to prepare an action plan to meet the increased demand for drinking water in the summer, including making village administrations responsible to supply water in their areas. Mission Bhagratha had failed to fulfil its purpose, he said.

Revanth Reddy asked officials to utilise water from the newly constructed reservoirs like Mallannasagar, Kondapochammassagar and Ranganyakasagar apart from the projects on the river

Krishna and Godavari for the purpose.

He explained during a review meeting on panchayat raj and rural development department affairs that it would be easier and less expensive to supply drinking water to the surrounding villages from the reservoirs.

He said that the previous BRS government's claim of the supplying safe drinking water to every household had not helped the state. Due to this, the state could not get funds under the Jal Jeevan Mission from the Centre.

■ Page 2: CM asks officials to finalise water issues

CM asks officials to finalise water issues

FROM PAGE 1

He cautioned officials against projecting the state as being 'rich' — something that the BRS government did — by suppressing facts. People were still facing drinking water problems in tandas, gudems and agency areas. He recalled that in Khanapur village, people had told him of a drinking water shortage.

Mission Bhagiratha has been asked to take the responsibility of supplying safe drinking water to the villages. The CM said that sarpanchs should be entrusted with ensuring that drinking water supply reaches every hold in the villages. He directed officials to finalise procedures for this. Maintenance of drinking water supply, taps and the pipelines in the villages should be entrusted separately to the sarpanchs.

With the tenure of sarpanchs coming to an end at the end of the month, the CM asked the authorities to take the responsibility of drinking water supply in the villages. Engineers were asked advised to visit all villages and prepare a list of habitations without a proper drinking water supply facility. New proposals for funding to accomplish the last mile connectivity will be made and sent to the Centre to seek funds under the Jal Jeevan Mission, Revanth Reddy said.

Revanth Reddy said no one was paying attention to the intra-village works and house-to-house tap water supply under Mission Bhagiratha. The CM directed that a comprehensive survey be conducted to identify villages and habitations which are short of drinking water. For the summer, he directed officials to use ₹1 crore of the ₹10 crore Special Development Fund given to each Assembly segment for drinking water needs.

On other issues, he said the government would lay special focus on strengthening the self-help groups (SHGs) by providing financial support. The CM suggested that the SHGs be given the work of stitching the uniforms for students of government schools, Gurukuls, hostels and the police.

The groups will be provided the required training. Revanth Reddy directed officials to develop a road network in the villages and connect all habitations after officials informed him that 422 gram panchayats and 3,177 habitations still do not have road connectivity. He ordered officials to lay black top roads in the villages. The employment guarantee scheme funds will be linked, if necessary, for road development works. Revanth Reddy asked officials to prepare proposals for funds in the new Budget.

The Statesman - 31- January-2024

Gusty winds & drizzle likely today, says IMD

Minimum temperature may settle around 10 degrees Celsius, says weatherman

STATESMAN NEWS SERVICE
NEW DELHI, 30 JANUARY

With the weather witnessing fluctuations these days, the national capital is likely to witness moderate to dense fog on Wednesday morning with minimum temperature settling around 10 degrees Celsius, the India Meteorological Department (IMD) said.

The weatherman on Tuesday said that a generally cloudy sky with light rain or thundershowers accompanied with 'Gusty Winds' is likely for Wednesday towards evening.

On Tuesday, the city woke up to shallow fog during the morning hours, while minimum temperature settled at 8.7 degrees Celsius, which was a notch below the season's average.

The sun, which was there for sometime during the day provided a little comfort,

and the maximum temperature here touched 21.4 degrees Celsius, which was a point below the season's normal, the weather agency said. Relative humidity during the day pegged between 80 to 100 per cent, as per the weather department.

However, towards the evening the mercury again

witnessed a drop and the calm but cold winds at a speed of around 7.4 km per hour made the people feel the winter chills.

According to the Indian Institute of Tropical Meteorology (IITM), the predominant surface wind is likely to be coming from Southeast directions in Delhi with wind

speed 12-20 kmph, generally cloudy sky and very light rain/drizzle on 01.02.2024.'

Meanwhile, the city's average air quality on Tuesday reeled under the 'very poor' category, according to the Central Pollution Control Board (CPCB). Air Quality Index (AQI) of the city on Tuesday was 357.

The IITM forecast for the coming days suggest that the AQI may improve due to the change in weather with rainfall on the cards.

"The air quality is likely to be in Very Poor category on 30.01.2024. The air quality is likely to improve gradually. The air quality is likely to be in Very Poor category on 31.01.2024 and Poor category from 01.02.2024 to 02.02.2024. The outlook for subsequent 6 Days: The air quality is likely to remain in the Poor Moderate category owing to rainfall activity," the IITM bulletin for air quality said.

SBI to Down-sell ₹11,000-cr Exposure to Ganga Expressway Project

NaBFID, REC, PFC and Union Bank have shown interest in buying the debt from SBI: Sources

Shilpy Sinha

Mumbai: More than a year after disbursing loans to Adani Group's Ganga Expressway project, State Bank of India (SBI) is in the process of down-selling half of the nearly ₹11,000-crore loan exposure to the longest tolled road-project in the country.

The lender is in talks with financial institutions, such as the National Bank for Financing Infrastructure and Development (NaBFID), Punjab

National Bank (PNB) and some power finance companies, to down sell half of its exposure.

"SBI is down-selling Ganga Expressway loans to banks and financial institutions and is in the last leg of the process," a banking industry source told ET. "SBI underwrote the entire amount with a view of down-selling part of it. It is up to the bank's risk management team to decide on how much to keep and how much to down-sell."

It is a standard practice in the infrastructure financing space for

FILE PHOTO

banks to downsell portions of large loan exposures.

At least four lenders have shown interest in buying the debt from SBI, inclu-

ding National Bank for Financing Infrastructure and Development (NaBFID), REC, PFC and Union Bank of India, another banking source said.

The loan, which is long term, fits well with the portfolio of NaBFID, an infrastructure-focused financier, as it seeks to sanction up to ₹1 lakh crore by March 2024. So far, it has disbursed ₹21,000 crore of loans, another source said.

SBI refrained from selling down a portion of the loan in the previous year. The bank may decide to proportionately sell down the loan to all lenders based on their sanctions, the source added.

Spokespersons of SBI, NaBFID and REC did not immediately respond to

requests for comment, while Union Bank of India could not be immediately reached.

The Ganga expressway in Uttar Pradesh, which will connect Meerut with Prayagraj, is going to be India's longest expressway implemented on a toll basis. In 2021, Adani had won contracts from the Uttar Pradesh government to build three stretches of the 594-km Ganga Expressway while the fourth section was awarded to IRB Infrastructure. Of its 594-km length, the Adani group is building 464 km from Budaun to Prayagraj, which comprises 80% of the expressway project.

Punjab Kesari - 31- January-2024

ईआरसीपी से फिर बहेगी बाणगंगा, सांवा, दूढ़ नदी

खेतों में फिर से लहलाहाने लगेंगी फसलें, कुओं में फिर से चलने लगेंगे लाव, चड़स, पंप और इंजन

बैराज की पहाड़ियों से निकलने वाली इस नदी को परियोजना से जोड़ा जाएगा। जिससे अलवर, दीसा, भरतपुर जिले के सैकड़ों गांवों में सिंचाई के साथ साथ पीने के पानी की समस्या को दूर करेगी।

रिचार्ज होगे जलाशय

नदी के समीपवासी गांवों के कुएं, तालाब, बोरिंग जो सूख गए हैं वे फिर से रिचार्ज हो जाएंगे। जिले की सांवा नदी भी बहने लगेगी। इससे मवेशियों को चारा भी उपलब्ध हो सकेगा। जो किसान पानी की कमी के चलते अपने गांवों से पलायन कर शहरों में मजदूरी करने को मजबूर हो गए। वे फिर से गांवों में लौट कर अपनी खेती-बाड़ी संभाल कर खुशी के साथ जीवन बसर करने लगेंगे।

40 हजार करोड़ की स्कीम

भारत सरकार की मेगा परियोजना ईआरसीपी-पीकेसी (संशोधित पार्वती काली सिंह चंबल लिंक परियोजना) को राष्ट्रीय परियोजना घोषित किए जाने के लिए संशोधित डीपीआर को मूर्त रूप दिए जाने पर योजना में करीब 40 हजार करोड़ खर्च होने की संभावना है और इस राशि का 90 प्रतिशत हिस्सा केंद्र सरकार वहन करेगी।

एमओयू के बाद लोगों में जमीनी उम्मीद: इस परियोजना का एमओयू होने

रोजगार के अवसर बढ़ेंगे

योजना के पूरा होने पर रोजगार के अवसर बढ़ेंगे और किसान समृद्ध हो सकेंगे। पानी की कमी के चलते दम तोड़ चुके जिले के उद्योग-धंधे एक बार फिर फलने-फूलने लगेंगे। युनन में भले ही यह सपना सा लगता है। कोई इस राजनीतिक बता रहा है। लेकिन सूर्य की माने तो एमओयू में इस प्रोजेक्ट में क्षेत्र में बहने वाली इन नदियों को जोड़ने का भी साफ उल्लेख है। एमओयू में दीसा जिले में बहने वाली बाणगंगा नदी, सांवा नदी और दूढ़ नदी में पानी डालने का भी उल्लेख है। दूढ़ नदी जयपुर जिले से होते हुए सर्वाड माधोपुर के मोरल बांध को पानी से लबरेज करेगी। जिससे जिले के अन्य क्षेत्रों को भी सिंचित किए जाने की योजना है।

के बाद जिले के लोगों में उम्मीद जगी है। उनको खुशी का कोई ठिकाना नहीं है। जो लोग अपनी जमीन बेच कर गांव से पलायन करने को सोच रहे थे। उनमें भरोसा जगाने लगा है। वे अब अपने अच्छे दिन आने के सपने देखने लगे हैं। अब देखना यह है कि प्रधानमंत्री नरेंद्र मोदी और प्रदेश की भाजपा सरकार इस भागीरथी योजना को भरातल पर उतार कर लोगों के सपनों को कब साकार कर पाती है।

ईआरसीपी पर चर्चा के दौरान हंगामा

एमओयू की प्रति सदन में नहीं रखने पर विपक्ष ने जताया विरोध, राजस्थान के हिस्से का पानी कम करने का आरोप

जयपुर, 30 जनवरी (ब्यूरो): राज्य विधानसभा में मंगलवार को शुभकाल के बाद पूर्वी राजस्थान कैनेल प्रोजेक्ट (ईआरसीपी) पर विरोध चर्चा हुई। इस दौरान विपक्ष के सदस्यों ने मध्यप्रदेश के साथ हुए एमओयू की प्रति सदन में नहीं रखी जाने पर हंगामा किया। वहीं विपक्षी सदस्यों ने राज्य सरकार पर राजस्थान के हिस्से से समझौता करने का आरोप लगाया। विपक्षी सदस्यों ने कहा कि ईआरसीपी के मूल स्वरूप के मुकाबले राजस्थान को कम पानी मिलेगा। निर्दलीय युनूस खान और कांग्रेस के रोहित बाहुरा ने कहा कि यह ईआरसीपी नहीं बल्कि पार्वती-काली सिंध-चंबल नदी जोड़ने की परियोजना है। साल 2004 में अटल सरकार के समय यह रिपोर्ट तैयार की गई थी। बिना विश्लेषण, बिना सोचे समझे अब इस पर एमओयू किया गया है। वहीं आरएलडी के हनुमान बेनीवाल ने कहा कि इस योजना से मिलने वाला पानी सिर्फ पीने के काम आएगा। जनता चाहती है कि इससे पीने का पानी और

एमओयू में कहीं नहीं लिखा कि कितना पानी मिलेगा : युनूस खान

इस दौरान निर्दलीय युनूस खान ने कहा कि एमओयू में कहीं नहीं लिखा कि राजस्थान को कितना पानी मिलेगा। पूर्वी राजस्थान इस एमओयू से सिंचाई का सपना देखना बंद करें। बिना पड़े ईआरसीपी पर समझौता किया गया है। युनूस खान ने तब कसते हुए कहा कि इस पर कार्यरत तो करावो दो, ताकि इन लोगों को पता चले ईआरसीपी क्या है। किरोड़ीलाल मोणा को युनूस खान ने कहा कि किरोड़ीलाल मोणा को मोने के पिछले में बंद कर दिया नहीं तो वे शेर पहले देहाइला था। राज्य और केंद्र के नेताओं में ब्रेक लेने को हॉट मची हुई है, जबकि राजस्थान के हिस्से का पानी कम हुआ है। पहले 3900 एमसीक्यू पानी मिलता, लेकिन अब 1400 एमसीक्यू कम मिलेगा। नए एमओयू से 2.80 लाख हेक्टेयर में सिंचाई नहीं हो सकेगी ना ही पर्याप्त पेयजल मिल सकेगा और ना ही डीएमआईसी का पानी मिल पाएगा फिर इस एमओयू को उपेक्षा किता क्या है।

सिंचाई का पानी जनता को मिले। चर्चा में भाग लेते हुए आरएलडी के सुभाष गर्ग ने कहा कि सदन में ईआरसीपी के एमओयू को कांपी भी नहीं रखी गई। क्या इस एमओयू से 3500 से अधिक एमसीक्यू पानी मिलेगा। इसके जवाब में डॉ. किरोड़ीलाल मोणा ने कहा कि पिछली सरकार राष्ट्रीय परियोजना घोषित करने की मांग कर रही थी जबकि 2015 से किसी योजना को नहीं राष्ट्रीय परियोजना का दर्जा नहीं दिया गया है ऐसे में केंद्र ने बहुत अच्छा रास्ता निकाला है। चर्चा को शुरूआत करते हुए कांग्रेस के मुरारी लाल मोणा ने कहा कि सरकार ने यह नहीं बजाया कि कितना एमसीक्यू पानी राजस्थान को मिलेगा। आप सिर्फ 26 बांधों को पानी से भरने की बात कर रहे हो, एमओयू से सिर्फ 2000 एमसीक्यू पानी मिलेगा। इस एमओयू से 13 जिलों में एक बंद सिंचाई नहीं हो पाएगी।

Samachar Jagat - 31- January-2024

केंद्रीय जलशक्ति मंत्री बोले-पूर्वी राजस्थान के 13 जिलों के लिए वरदान होना ये प्रोजेक्ट

‘पीकेसी-ईआरसीपी से 100% भरेगा बीसलपुर बांध’

पिछली सरकार के प्रोजेक्ट से चार गुना अधिक पानी राजस्थान को मिलेगा

समाचार जगत ब्यूरो

अजमेर, केंद्रीय जलशक्ति मंत्री गजेन्द्र सिंह शेखावत ने कहा कि पार्वती-कालीसिंध-चंबल-इंस्टन राजस्थान कैनेल प्रोजेक्ट (पीकेसी-ईआरसीपी) लिंक परियोजना भविष्य में पूर्वी राजस्थान के अजमेर समेत 13 जिलों के लिए वरदान साबित होगी। इस परियोजना

के बाद बीसलपुर बांध हर साल सौ प्रतिशत भरेगा। 35 से ज्यादा छोटे-बड़े बांध और तालाब भी इस परियोजना के माध्यम से भरे जाएंगे। मंगलवार शाम पत्रकारों से बातचीत

में केंद्रीय मंत्री शेखावत ने कहा कि पूर्वी राजस्थान के 13 जिलों में पानी का संकट है। इसके स्थाई समाधान का मार्ग केवल ईआरसीपी बनने से होता है।

अब 90% बांध केंद्र से मिलेगी

शेखावत ने कहा कि प्रधानमंत्री जी ने पीकेसी-ईआरसीपी के रास्ते को दृढ़ करने में अपने अनुभव से बहुत बड़ी भूमिका का निर्वहन किया है। क्योंकि यह अंतरराज्यीय नदी जोड़ने की परियोजना है और केन-बेतवा लिंक प्रोजेक्ट में प्रधानमंत्री जी ने 90% ग्रांट भारत सरकार देगी, इसका मार्ग प्रशस्त किया है। मुझे पूरा भरोसा है कि इस प्रोजेक्ट के लिए भी प्रधानमंत्री जी अनुग्रह करके हमें 90% धनराशि उपलब्ध कराएंगे। इससे राजस्थान और मध्य प्रदेश को सम्मिलित रूप से मात्र 4000 करोड़ रुपये खर्च कर 5000 एमसीक्यू पानी मिलेगा।

हम युवाओं को दिलाएंगे न्याय

केंद्रीय मंत्री शेखावत ने भर्ती घोटाले और पेपर लीक की जांच के लिए एसआईटी गठित करने के लिए मुख्यमंत्री भजनलाल शर्मा का आभार जताया। उन्होंने कहा कि एक भी ऐसा व्यक्ति, अपराधी या आपराधिक गिरोह, जो पेपर लीक घोटाले में लिप्त था, उसे अपने किए की सजा भुगतना पड़ेगी। एक भी ऐसा अपराधी शेष न रहे और राजस्थान में इस तरह की परिस्थिति दोबारा न बने, इसको सुनिश्चित करने के लिए एसआईटी के माध्यम से और एसआईटी से आगे यदि आवश्यकता पड़ती है तो केंद्रीय जांच एजेंसी से जांच कराकर हम युवाओं को न्याय दिलाएंगे।
