# Monsoon arrives, Palampur wettest with 110 mm rainfall

MeT issues yellow warning, predicts heavy rain, thunderstorm today

TRIBUNE NEWS SERVICE

SHIMLA, JUNE 24

Widespread rain lashed Himachal Pradesh today. Parts of Mandi and Kangra districts experienced heavy rains, as the southwest monsoon hit the state five days in advance — the normal date of the arrival of the monsoon is June 29.

Palampur was the wettest in the state with 110 mm rain while Jogindernagar, Baijnath and Dharamsala received 96 mm, 93 mm and 92 mm rain, followed by Gaggal 87 mm, Shimla 37 mm, Sarahan and Kumarsein 33 mm, Nagrota Surian 31 mm, Kothi 28 mm, Jubbarhatti 27 mm, Dalhousie and Kharapthar 25 mm, Salooni 21 mm, Mandi and Kufri 26 mm and Keylong 20 mm.

The state received 59.9 mm average rainfall from June 1 to June 24, a deficit of 25 per cent, but Kangra and Una districts received 10 per cent and 13 per cent excess rain. The MeT office has predicted above normal rainfall this year.

The rain brought down temperatures; Una was the hottest with 32°C while Shimla and Keylong recorded 22°C degree and 19.8°C. The MeT office has issued a yellow alert of heavy rainfall, thunderstorm, lightning and gusty winds blowing with a speed of 30 to 40 kmph at isolated places in middle hills tomorrow and predicted rain and thunder-showers in mid and lower hills over the next six days from tomorrow.

## Uprooted tree brings traffic to halt

PALAMPUR, JUNE 24

Vehicular traffic on the Palampur bypass that connects Mandi to Dharmshala areas remained suspended for around 40 hours after an uprooted tree fell on it. A car driver passing through the bypass had a narrow escape, though his car was damaged in the incident.

The police diverted traffic through Palampur town. Long queues of vehicles were seen in the congested markets of the town. Power supply and telecommunication lines were also damaged, resulting in a power

A car trapped under an uprooted tree in Palampur.

cut in several parts of the town since last evening. The field staff of Himachal Pradesh State Electricity Board Limited (HPSEBL) had been making efforts to restore power supply but

heavy rain hampered the restoration work.

The Executive Engineer, HPSEBL, Palampur, said that the power lines feeding Palampur town, Ghuggar and Aima had suffered extensive damage, leaving these areas without power supply. He added that efforts were being made to repair the lines and reinstall damaged poles.

Besides, the telecommunication services were also hit, and internet services were disrupted, which were restored in the afternoon. — OC

# 7 days to fix Amphan relief anomalies

**PRANESH SARKAR**

**Calcutta:** Mamata Banerjee on Wednesday gave seven days' time to administrative officials to include the names of all people affected by Cyclone Amphan in the list of beneficiaries of schemes announced by the Bengal government to provide compensation and put the same up on the notice boards of respective block development offices.

The chief minister has set the deadline after complaints surfaced at an all-party meeting at Nabanna that many genuine victims had been deprived of government compensations.

"I am giving seven days' time to include all genuine people in the list of beneficiaries. The lists have to be put up at BDO offices within the time-frame," Mamata said after the meeting.

While a section of officials think the step would bring transparency to the entire process of delivering the cyclone compensation, another group of bureaucrats said the chief minister's directive had shown that the government was in a spot over thousands of complaints over selection of the beneficiaries.

"I had received 2,100 complaints and I took steps on each of them. I am issuing an instruction to officials through the chief secretary to attend to each of the complaints and ensure that no genuine person is left out," said Mamata.

On May 29, the chief minister had announced a Rs 6,800 crore compensation package for people who had suffered

**Destruction caused by Cyclone Amphan at Serampore in Hooghly district. File picture**

losses in the cyclone.

"There were several schemes for farmers, fishermen and others who suffered losses. But the majority of the complaints were coming up against the selection of beneficiaries of the scheme to repair damaged houses. Thousands of people lodged complaints that they had been deprived of the benefits," said an official.

At the all-party meeting, Opposition parties accused Trinamul Congress-led gram panchayats of ignoring genuine beneficiaries, sources said.

"As the scheme ensures Rs 20,000 to each person whose house had been damaged, local leaders of the ruling party were pushing names of their close aides. Genuine victims are denied the money in that way," a leader of an Opposition party said at the meeting.

Much to the discomfiture of the state government, Opposition parties have been stoking protests for weeks across

the Amphan-hit districts of South 24-Parganas, North 24-Parganas, East Midnapore, Nadia and Hooghly over irregularities related to distribution of compensation.

The string of protests has compelled district administrations to put on hold disbursement of compensation at many places to correct anomalies in the list of beneficiaries.

Mamata's seven-day deadline is seen as a ploy to assuage discontent simmering in the rural belt.

A Trinamul insider said the chief minister did not hesitate to send a stern message to both ruling party leaders and officials that she would not tolerate any malpractice.

## Sunderbans plan

The chief minister said the state government would approach the Niti Ayog to send a team to the Sunderbans to prepare a master plan to save the delta from natural calamities.

The move was based on a decision taken at the all-party meeting.

# Furore over soil theft near river

**SUBHASISH CHAUDHURI**

**Santipur:** Angry residents in Balirchar village of Nadia's Santipur grabbed two mechanised boats and sank one in the Hooghly river on Wednesday morning when they found men with sharp-edged weapons illegally extracting soil from the river bank and piling it on the boats.

Illegal soil extraction erodes the embankment, putting farmland and homes at risk of flooding, farmers said.

A big stretch of farmland in the village got submerged in the Hooghly earlier this week triggering panic among 500-odd families in the area. Residents blamed random and illegal extraction of earth for the inundation.

Criminals allegedly supply soil to brick kilns that have mushroomed on the other side of the river under Kalna subdivision of East Burdwan.

On Wednesday, villagers chased the boats laden with illegally extracted soil. The men in boats jumped in the river and swam off to escape. Villagers sank one boat in anger. They pulled another ashore

**A boat caught by villagers at Balirchar. (Abhi Ghosh)**

and called the police.

The police have assured the villagers of increasing vigilance along the river bank.

An officer of Santipur police station said: "The area is isolated and that helps the soil mafia. We will deploy civic volunteers to work in coordination with the villagers. We will also take up the matter with district officials, requesting them to urge the East Burdwan administration to take action against soil theft."

An officer of Nadia district land and land reforms department said they would continue with their raids to stop illegal excavation of soil, otherwise land erosion would increase.

# Monsoon reaches Delhi-NCR early

Jayashree Nandi

■ letters@hindustantimes.com

**NEW DELHI:** The south-west monsoon arrived in the Delhi-National Capital Region (NCR) on Wednesday, marking only the sixth early onset of the season in 20 years, heralding an intense spell of rain in the next couple of days and, in the medium term, holding out the promise of a bountiful summer harvest.

Weather scientists held off on a declaration of the monsoon in the capital until Thursday because there had been no rain until 8:30 am on Wednesday, the threshold time for measurement of the precipitation. It will be declared after the rainfall between 8.30 am Wednesday and 8:30 am Thursday is measured.

On Wednesday, Delhi's Safdarjung Observatory had received 14.6 mm of rain, which is in the moderate category. "Monsoon has reached Delhi-NCR. It has covered several parts of western Uttar Pradesh on Tuesday night. We will officially declare monsoon over Delhi on Thursday based on rainfall data collected from 8.30 am on Wednesday to 8.30 am on Thursday," said Kuldeep Shrivastava, head of the

**A GOOD MONSOON, WHICH ACCOUNTS FOR 70% OF INDIA'S ANNUAL RAINFALL, IS CRITICAL FOR THE FORTUNES OF THE AGRICULTURAL SECTOR**

Regional Weather Forecasting Centre of the India Meteorological Department (IMD). A good monsoon, which accounts for 70% of India's annual rainfall, is critical to the fortunes of the agricultural sector on which at least 700 million people in India are dependent for a livelihood.

In the past 20 years, it has arrived earlier in the capital than its expected date five times. In 2001, it arrived on June 24; in 2008 on June 15; in 2011 on June 26; in 2013 on June 16 and in 2015 on June 25. The normal arrival date of the monsoon over Delhi is June 27. "We are expecting very good rains over north-west India this monsoon. Monsoon is setting in in Delhi, but it can be declared on Thursday after collating the 24-hour rainfall data," said Mru-tunjay Mohapatra, director general, IMD.

# Humidity levels rise in city

DC CORRESPONDENT  
HYDERABAD, JUNE 24

An inadvertent pause in rainfall has made sure that mercury levels rise in the city.

The relative humidity is only adding to the heated situation, as the real feel temperature as per accuweather in the city on Wednesday was 40 degrees celsius. The maximum

● **THE MAXIMUM** temperature recorded on Wednesday was 35.8 degrees celsius, a good three degrees higher than the normal 32 degrees Celsius for this time.

temperature recorded on Wednesday was 35.8 degrees celsius, a good three degrees higher than the normal 32 degrees

Celsius for this time.

According to officials of the Indian meteorological department (IMD), the rains would only make a comeback around June 27.

Speaking to *Deccan Chronicle*, IMD director, K. Naga Ratna, said, "We do not foresee any widespread rainfall for the city for the next three days. There is no depression or any activity that could

trigger rains. A gap in the rainfall during the monsoon is to be expected, especially when there is no weather system in the Bay of Bengal to promote rainfall."

However, the city witnessed a spell of sporadic rain on Wednesday. The highest the rain gauges measured was two centimetres, which was recorded at Patancheru.

# किसानों को मिली राहत, शहरवासियों की आई आफत

## बरसात

पायनियर समाचार सेवा। फरीदाबाद

मानसून की पहली हल्की बरसात 22 जून को आने के बाद लगातार बढ़ी गर्मी ने किसानों की चिंताएं बढ़ा दी थी। वहीं मौसम विभाग द्वारा 24 से 26 जून को बारिश की घोषणा की गई थी। बुधवार की सुबह हुई बरसात से किसानों को राहत मिली। वहीं दूसरी सड़कों पर जलभराव ने लोगों को परेशानियों में डाल दिया। वहीं अनाज मंडियों में भी पानी भर गया।

### आफत बनी यह बरसात

शहर के अधिकांश हिस्सों में तेज

बरसात हुई, तो वहीं कुछ हिस्सों में काफी कम वर्षा हुई।

बरसात ने कई इलाकों को जलमग्न कर दिया। सड़कों पर जगह-जगह भरे पानी ने निगम प्रशासन के द्वारा किए गए लॉकडाउन के कारनामों की पुरी पोल खोल दी कि किस तरह से सौवरेज की सफाई की गई है। करीब

डेढ़ घंटे की बरसात से जहां लोगों को गर्मी से राहत मिल गई।

### बिजली ठप

कोरोना के कारण घरों से बाहर निकलने के लिए मनाही है। वहीं दूसरी तरफ बरसात के कारण कई इलाकों में घंटों बिजली कट की समस्या रही। जिससे न तो बच्चे टीवी देख पाए और घरों के अंदर

गर्मी के कारण लोग परेशान रहे। तेज आंधी के चलते बिजली सप्लाई बंद कर दी गई थी। जो बारिश रुकने के बाद ही शुरू की गई है। लेकिन कुछ इलाकों में बरसात और आंधी के कारण फास्ट होने से लोगों को कई घंटों तक बिजली न होने की समस्या का सामना करना पड़ा।

## Monsoon clouds reach Delhi, onset to be declared today: IMD

PTI

NEW DELHI, 24 JUNE

The national capital recorded light rains on Wednesday as the monsoon reached the doorstep of the city.

The precipitation brought the mercury down. However, the humidity levels shot up to 100 percent due to the rains, causing inconvenience to the residents. The Safdarjung Observatory, which provides representative figures for the city, recorded 14.6 mm rainfall and a maximum of 34.6 degrees Celsius, three notches below normal.

"Monsoon clouds are at the doorstep of Delhi. A few places witnessed rains. As predicted, the

onset of the monsoon in the city will be declared on Thursday," IMD Director General Mrutunjay Mohapatra said.

Kuldeep Srivastava, the head of the regional forecasting centre of the India Meteorological Department, said monsoon clouds led to rains in parts of Delhi on Wednesday. However, the onset will be declared on Thursday only.

Rainfall data from all weather stations for the last 24 hours ending 8.30 am is required to declare the onset of monsoon, he said.

The Met department also predicted heavy rainfall at isolated places in the national capital on Thursday. Normally, the wind system reaches Delhi on June 27.

## Monsoon reaches city with light rains

**New Delhi:** The national capital recorded light rains on Wednesday as the monsoon reached the doorstep of the city. The precipitation brought the mercury down. However, the humidity levels shot up to 100 percent due to the rains, causing inconvenience to the residents. The Safdarjung Observatory, which provides representative figures for the city, recorded 14.6 mm rainfall and a maximum of 34.6 degrees Celsius, three notches below normal. "Monsoon clouds are at the doorstep of Delhi. A few places witnessed rains. As predicted, the onset of the monsoon in the city will be declared on Thursday," IMD director general Mrutunjay Mohapatra said. Kuldeep Srivastava, the head of the regional forecasting centre of the India Meteorological Department, said monsoon clouds led to rains in parts of Delhi on Wednesday. However, the onset will be declared on Thursday only. Rainfall data from all weather stations for the last 24 hours ending 8.30 am is required to declare the onset of monsoon, he said. The Met department also predicted heavy rainfall at isolated places in the national capital on Thursday. Normally, the wind system reaches Delhi on June 27. According to weather experts, the earlier than usual arrival of the monsoon in Delhi can be attributed to a cyclonic circulation which moved towards southwest Uttar Pradesh on June 19 and June 20, helping monsoon advance further. With rains expected over the next three days, the mercury is likely to hover around 36 degrees Celsius in the city. — PTI

[ Reaping Benefits ]

# Godavari water reaches Yadadri

Two gates of Kondapochamma Sagar lifted to release water; 37 tanks to be filled

STATE BUREAU  
SIDDIPET

Reaping the benefits of the Kondapochamma Sagar, constructed as part of the Kaleshwaram Lift Irrigation Scheme (KLIS) near Markook in Siddipet, Government Whip Gongidi Sunitha and Forest Development Corporation Chairman Vanteru Prathap Reddy have released water from Kondapochamma Sagar through a canal.

The canal, which flows through Erravelly and Jagadevpur to reach Yadadri-Bhongir district, would impound 28 irrigation tanks in Jagadevpur of Gajwel and 9 tanks in Yadadri-Bhongir. Kondapochamma Sagar, which was having 15 tmcft capacity, was having 2 tmcft of water now.

The water is being pumped into the project lifting from Ranganayaka Sagar. Government has planned to impound 521 minor irrigation tanks in Siddipet and Yadadri-Bhongir districts with an aim to get over 60,000 acres under irrigation. During the first phase, the irrigation department has decided to fill 37 irrigation tanks in these two districts. Chief Minister K Chandrababtu Naidu had released the water to Kondapochamma Sagar by switching on lift irrigation pumps at Markook and Akkaram Pump houses on May 29. Gongidi Sunitha has said that people of her district would be grateful for Chief Minister since he had realised their dream in a short time.

Water being released into the canal from Kondapochamma Sagar at Markook in Siddipet district on Wednesday. — Photo: Bingi Srinivas

## Irrigation needs of Alair solved, says MLA

YADADRI-BHONGIR:

For the first time, irrigation tanks in Alair will be filled with Godavari waters following the lifting of two gates at the Kondapochamma Sagar project on Wednesday.

This will be the first time that farmers in Alair Assembly constituency, downstream of Kondapochamma Sagar, will get to use Godavari water. Kondapochamma Sagar is part

**Thousands of acres under the irrigation tanks in the Assembly constituency will get water for the Vaanakalam crop season**

of the complex Kaleshwaram Lift Irrigation Scheme (KLIS). Thousands of acres under the irrigation tanks in the Assembly constituency will get irrigation facility for the Vaanakalam crop season.

Five irrigation tanks in Thurkapally mandal and

six irrigation tanks in Bommalaramam mandal will receive Godavari waters through Thurkapally canal in two days.

In view of the release of water to the canal from the project, feeder channels of the irrigation tanks have been already restored

under MGNREGS works. In addition to these tanks, there is every possibility of irrigation tanks at Ramaswamy thanda, Chikati-mamidi, Thimmapuram, Peraram and Solipet in Alair Constituency also getting filled.

Alair MLA and Government Whip Gongidi Sunitha said Kondapochamma Sagar will soon solve the irrigation problem in Alair Assembly constituency.

Telangana Today 25-Jun-2020

# Hyd receives surplus rainfall in June so far

Against normal rainfall of 69.6mm for the month, city records 146.8 mm

Hyderabad is likely to receive light to moderate rainfall in the next three days. — Photo: Anand Dharmana

SUNNY BASKI  
Hyderabad

With still over a week left for the end of June, Greater Hyderabad region has already recorded surplus rainfall on monthly average in the south-west monsoon.

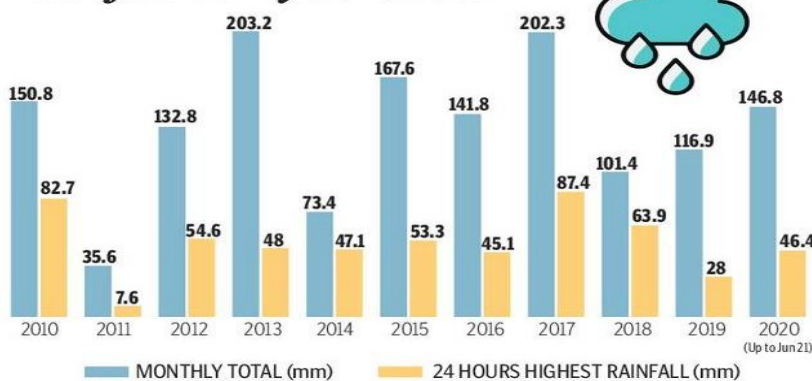

This, despite the fact that the onset of monsoon was officially declared on June 11 by Meteorological Centre, Hyderabad. Delayed by almost a week, this year's monsoon has showered good amount of rainfall in the city and rest of the State.

The weather data with Meteorological Centre shows that against a normal rainfall of 69.6mm from June 1 to 21, Hyderabad recorded as much as 146.8 mm rainfall. Similarly, Rangareddy and Medchal-Malkajgiri received a rainfall of 117.7 mm and 125.6 mm for a normal rainfall of 63.1 mm and 72.1 mm, respectively.

The monthly total normal rainfall in Hyderabad alone stands at 116.9 mm and it already recorded excess rainfall. In fact, from June second week, the city has received moderate to heavy rainfall at regular intervals.

According to Met Department officials, the city which received surplus rainfall in June

## Rainfall in Hyderabad

would record more rains in July and August as the intensity of rainfall across the State is expected to be high during these two months.

Between June 1 and 21, Hyderabad has recorded a 24-hour highest rainfall on June 10 after receiving 46.4 mm rainfall while the all-time record for this month was reported to be 122.7 mm in June 26, 1914.

Among all parts in the State, Peddapalli has, so far, received highest rainfall at 256 mm in the first three weeks of June, followed by Jayashankar Bhupalapally (212.8 mm), Mahabubabad

(199.7) and Warangal Urban (191.9). The average rainfall for June in the entire Telangana stands at a surplus of 63 per cent. Against a normal rainfall of 83.2 mm till June 21, the State has received 135.3 mm.

### Light to moderate rains

Parts of Hyderabad are likely to receive light to moderate rainfall in next three days with maximum temperatures expected to be in the range of 33 degree Celsius to 35 degree Celsius while minimum temperatures could hover between 23 degree Celsius and 25 degree Celsius.

The Hans 25-Jun-2020

# Monsoon to reach Delhi today

**New Delhi (IANS):** South-west monsoon advanced in some parts of Rajasthan, Uttar Pradesh, Chandigarh, Punjab and hilly states of Himachal Pradesh, Uttarakhand and Jammu and Kashmir, the India Meteorological Department said on Wednesday afternoon.

The weather bureau had issued an 'orange' alert for northern states. Delhi will have to wait until Thursday for the onset of the monsoon, said Mahesh Palawat of the

Skymet Weather, a private weather forecasting agency.

Monsoon rains are critical for farmers in India as the majority of the country's net-sown area does not have any form of irrigation. Farmers wait for the rains to begin for sowing of crops.

"Southwest Monsoon has further advanced in some parts of Rajasthan, Chandigarh and North Punjab, most parts of Uttar Pradesh and Himachal Pradesh and entire Uttarakhand and Jammu and Kashmir,

Ladakh, Gilgit-Baltistan and Muzaffarabad," the IMD stated in its afternoon bulletin.

The IMD, in its long-range monsoon forecast, had predicted good rains at 107 per cent of the long-period average (LPA) in north-west India. The LPA of the monsoon season rainfall over the country between 1951 and 2000 is 89 cm. It is kept as a benchmark while forecasting the quantitative rainfall for the monsoon season every year.

Rajasthan Patrika 25-Jun-2020

## 17 साल: तय समय से एक दिन पहले दी दस्तक मानसून का श्रीगणेश...

जयपुर, प्रदेश में मानसून ने श्रीगणेश कर दिया। तय समय 25 जून से एक दिन पहले बुधवार दोहपर 12 बजे बाद दक्षिणी जिलों से प्रवेश किया और पश्चिम में बढ़ा। दक्षिण-पश्चिमी मानसून ने पहले ही दिन आधे प्रदेश को भिगो दिया। मौसम विभाग के अनुसार दक्षिणी जिलों बांसवाड़ा, डूंगरपुर, झालावाड़ होते मानसून तेजी से पश्चिमी जिलों बाड़मेर, जालोर होते हुए जैसलमेर और पाली तक पहुँच गया। पूर्वी 12 जिलों सिरोंही, राजसमंद, उदयपुर, डूंगरपुर, बांसवाड़ा, चित्तौड़गढ़, प्रतापगढ़, झालावाड़, कोटा, बून्दी, बारां और भीलवाड़ा के रास्ते अजमेर और सवाईमाधोपुर जिलों के कुछ भागों में भी दस्तक दी।

### आसार और असर →

आसार: मौसम विभाग के निदेशक शिव गणेश के अनुसार सामान्य से अधिक बारिश होगी। औसत 107 फीसदी रहेगा। अभी 28 जून तक दौर चलेगा। बंगाल की खाड़ी में लो प्रेशर एरिया के कारण 4 दिन तेज बारिश होगी।

टिड्डी पर असर: बारिश में टिड्डी 300 तक अंडे देगी। संख्या बढ़ना संभव।

खेती: जमीन में 4 इंच तक नमी होने तक किसानों को फसल नहीं बोनी चाहिए।

# मानसून का स्वागत...आधा घंटे में 28 एमएम बरसात

भरतपुर. आखिर पिछले दो दिन से हो रहा इंतजार बुधवार शाम खत्म हुआ। शहर समेत जिलेभर के ग्रामीण इलाकों में आधा से एक घंटे तक हुई मानसून की पहली बारिश ने गर्मी से राहत दी। शहर में करीब 28 एमएम बारिश हुई है। इसके अलावा शहरी व ग्रामीण क्षेत्रों में स्थित निचले इलाकों में भी पानी भर गया।

# दिल्ली में मौसम विभाग ने किया ऑरेंज अलर्ट जारी

» हल्की बारिश से मिली राहत, जगह-जगह लगा जाम

हरिभूमि न्यूज.नई दिल्ली

मानसून के चलते मौसम विभाग में दिल्ली एनसीआर के लिए ऑरेंज अलर्ट जारी कर दिया है। ऑरेंज अलर्ट भारी बारिश के लिए किया जाता है। मौसम विभाग का कहना है कि अगले 24 घण्टे में मानसून दिल्ली में दस्तक देगा इसकी पूरी संभावना बनी हुई है।

बुधवार को दिल्ली के कई इलाकों में हल्की बूदाबांदी हुई। एक दो जगह ठीक बारिश की भी खबर है। उसके बाद दिन में अलग अलग जगह रह रहकर हल्की बारिश दर्ज की गई। बारिश के चलते कुछ हिस्से के लोगों को गर्मी से राहत मिली लेकिन बाकी दिल्ली में लोगों को उमस भरी गर्मी का सामना करना पड़ा। मौसम विभाग के अनुसार दिल्ली एनसीआर के कुछ इलाकों में आने वाले 2 दिनों में बारिश होगी।

## दिल्ली में मानसून के बादलों ने दी दस्तक, कई इलाकों में जमकर बारिश

राष्ट्रीय राजधानी में मानसून के बादलों की दस्तक के साथ ही बुधवार को कई इलाकों में जमकर बारिश हुई। शहर के कई इलाकों और प्रमुख चौराहों पर पानी भरने से यातायात भी बाधित हुआ। भारत मौसम विज्ञान के महानिदेशक मृत्युंजय महापात्रा ने कहा कि मानसून के बादलों ने दिल्ली में दस्तक दे दी है। कई स्थानों पर बारिश हुई है। पूर्वानुमान के अनुरूप बृहस्पतिवार को मानसून के आगमन की घोषणा की जाएगी।" भारत मौसम विज्ञान विभाग (आईएमडी) के क्षेत्रीय पूर्वानुमान केन्द्र के प्रमुख कुलदीप श्रीवास्तव ने कहा कि मानसून के बादलों के कारण ही शहर के कई हिस्सों में बारिश हुई।

Jansatta 25-Jun-2020

# मानसूनी फुहारों से भीगी दिल्ली

जनसत्ता संवाददाता  
नई दिल्ली, 24 जून।

मानसून उत्तराखंड, हिमाचल, लद्दाख, जम्मू कश्मीर को पार करते हुए हरियाणा के उत्तरी हिस्सों और दिल्ली तक आ गया है। दिल्ली में मानसून की दस्तक के साथ ही बुधवार को कई इलाकों में जमकर बारिश हुई। शहर के कई इलाकों और प्रमुख चौराहों पर पानी भरने से यातायात बाधित हुआ।

भारतीय मौसम विज्ञान विभाग के महानिदेशक ने कहा है कि मानसून ने दिल्ली में दस्तक दे दी है। पूर्वानुमान के अनुरूप गुरुवार को मानसून के आगमन की घोषणा की जाएगी। भारत मौसम विज्ञान विभाग के क्षेत्रीय पूर्वानुमान केंद्र के प्रमुख

**मौसम** विभाग आज करेगा मानसून के पहुंचने का आधिकारिक एलान।  
**26 जून** तक उत्तर भारत के ज्यादातर हिस्सों में बारिश का अनुमान।

कुलदीप श्रीवास्तव ने कहा कि मानसून के बादलों के कारण ही शहर के कई हिस्सों में बारिश हुई। उन्होंने कहा कि मानसून आने की घोषणा गुरुवार को की जा सकती है। श्रीवास्तव ने कहा कि मानसून के आगमन की घोषणा करने के लिए

सभी मौसम केंद्रों से पिछले 24 घंटे का (सुबह साढ़े आठ बजे तक) बारिश का आंकड़ा चाहिए होगा। आम तौर पर दिल्ली में मानसून 27 जून को पहुंचता है।

मौसम विभाग ने गुरुवार को दिल्ली में भारी

बारिश की संभावना जताई है। मौसम वैज्ञानिकों के अनुसार अगले तीन दिनों तक बारिश के साथ तापमान के 36 डिग्री सेल्सियस के आसपास रहने की संभावना है।

दक्षिणी राजस्थान में भी मानसून ने दस्तक दे दी है। दक्षिण-पश्चिम मानसून लगातार दूसरे दिन बुधवार को आगे बढ़ा और पश्चिम में गुजरात को पार करते हुए दक्षिणी राजस्थान के कुछ भागों में दस्तक दी। मध्य भारत में मध्य प्रदेश में लगभग सभी क्षेत्रों को कवर कर लिया है। उत्तर प्रदेश के अधिकांश इलाकों में मानसून का आगमन हो चुका है। मानसून उत्तराखंड, हिमाचल, लद्दाख, जम्मू कश्मीर को पार करते हुए हरियाणा के उत्तरी हिस्सों तक आ गया है। दक्षिणी राजस्थान में भी मानसून ने दस्तक
