# Waste plants fail, NEERI steps in to clean Yamuna

Priyangi.Agarwal @timesgroup.com

New Delhi: After common effluent treatment plants (CETPs) failed to comply with the prescribed standards for around two years, National Environmental Engineering Research Institute (NEERI) has proposed shortterm and long-term plans for improving the performance of CETPs. The central monitoring committee (CMC), which is monitoring the progress of the Yamuna-related projects, has said in a report that the short-term plan is removal of large amounts of sludge, while the long-term plan is upgradation of CETPs.

Delhi Pollution Control Committee (DPCC) issued directions for closure to 1,065 water polluting industries in the 17 industrial areas connected to 13 CETPs last month. DPCC in July had given directions to all the 13 CETPs for ensuring compliance to the norms or they would be closed down.

The monitoring panel in its report said, "Special Commissioner (Industries), Delhi informed that there is no plan for closure of CETPs and NE-ERI has been engaged for improvement of performance of CETPs. Short-term plan is for removal of large amounts of deposited sludge. The Treatment, Storage and Disposal facility (TSDF) site for hazardous waste is going to start soon and all sludge will be moved to TSDF site and performance of CETPs will improve. Long-term plan is for upgradation of CETPs. Recently, NEERI has given options for upgradation of three CETPs, which is under examination. Accordingly, instructions will be given to all CETP societies for upgradation of CETPs at the earliest."

It was also suggested that DPCC has to notify the outlet parameters for industries that are permissible as per inlet norms for CETP. Further, as some of the effluents are being discharged into the storm water drains, therefore, on a pilot basis, it was proposed to treat wastewater in a drain from Wazirabad in the CETP.

"However, NOC from DJB is awaited in this regard. ED (Tech), National Mission for Clean Ganga stated that NEERI has taken too much time in technical appraisal for upgradation of CETPs. Director General, NMCG highlighted that since the beginning of monitoring by CMC in January 2020, same status has been

reported with regard to upgradation of the CETPs. Industries have to follow the norms. Unless the closing down of the member industrial units of the CETPs takes place, no improvement of CETP performance is possible. It was suggested that NEERI should complete the study in a time-bound manner," said the report.

According to monthly analysis reports show 12 CETPs have not been meeting prescribed water quality standards in terms of biochemical dissolved oxygen, total dissolved solids, total suspended solids, chloride and sulphide for around two years. According to the monthly progress report filed by the environment department, 33,690 industrial units situated in 17 industrial units are connected to these CETPs. Thirteen CETPs are operational in Delhi with a total capacity of treating effluent of 212.3 MLD.

### Flood disaster massive in MP, death toll rises to 24: Nath

#### PRESS TRUST OF INDIA

MADHYA PRADESH, 7 AUGUST

Congress president Kamal Nath on Saturday said floods have caused an "unprecedented" massive damage in Gwalior and Chambal divisions and asked the state government to not play politics. As per the state government, more than 1,250 villages were affected in the north MP by the deluge following heavy rains earlier this week. The fatality count in rain-related incidents increased to 24, officials said on Saturday.

Gwalior, Shivpuri, Sheop-ur, Datia, Ashok Nagar, Guna, Bhind and Morena districts were battered by heavyrains.

"I have never seen such a disaster in life", Nath told reporters here after conducting an aerial survey of the flood-affected areas in Sheopur and visiting some other districts. "I saw 80

per cent of the people on rooftops. Enormous damage was caused to the land and crops due to the flood," he said. Responding to a query, Nath said the Shivraj Singh Chouhan government has made a slew of announce-ments, but "this is not the time of (playing) politics. We are extending help. The Congress will continue to help," he said. Nath said Congress will raise questions on the damaged bridges, loss of crops etc. The fatality count in rain-related incidents in flood-rayaged Gwalior and Chambal divisions of Madhya Pradesh increased to 24, officials

said on Saturday. "The death toll in the rain-related incidents in the flood-hit parts of the state has risen to 24. These fatalities were recorded between August 1 and 7," Revenue Secretary Gyaneshwar Patil Millennium Post - 08- August -2021

## Death toll in north MP's rain fury & floods rises to 24

#### **OUR CORRESPONDENT**

BHOPAL: The fatality count in rainrelated incidents in flood-ravaged Gwalior and Chambal divisions of Madhya Pradesh increased to 24, officials said on Saturday.

The authorities said the flood situation is slowly improving and at present "no life-threatening" scenario exists in the region, where rescue and relief work is currently on.

The death toll in the rain-related incidents in the flood-hit parts of the state has risen to 24. These fatalities were recorded between August 1 and 7, Revenue Secretary Gyaneshwar Patil said. Till Friday, officials pegged

the number of deceased at 12.

The flood situation in north Madhya Pradesh had turned grim earlier this week, where more than 1,250 villages were affected by the deluge following heavy rains. Gwalior, Shivpuri, Sheopur, Datia, Ashok Nagar, Guna, Bhind and Morena districts were affected as the region was being pounded by rains since Sunday.

However, from Thursday, the intensity of rainfall in the two divisions started going down.

"No life-threatening situation due to flooding exists in Gwalior and Chambal divisions at present," Divisional Commissioner Ashish Saxena said.

### Death toll...

Addressing 'Anna Utsav' programme earlier in the day, state Chief Minister Shivraj Singh Chouhan said 8,832 people were rescued from the flood-hit parts of the state, while 29,280 others have been shifted to safer places from these areas so far. Saxena added that around 50 people, who were stuck in flooded areas of Ashok Nagar district in Gwalior division, have been moved to safety.

Teams of the National Disaster Response Force (NDRF) and Indian Air Force (IAF) have reached Ashok Nagar for the rescue operation, he said, adding that Army columns are also scheduled to reach the affected areas. Millennium Post - 08- August -2021

## Shekhawat, Baghel review implementation of Jal Jeevan Mission in Chhattisgarh

State government will take all necessary steps to accelerate pace of the implementation of the Jal Jeevan Mission, says CM Baghel

NEW DELHI: Union Jal Shakti Minister Gajendra Singh Shekhawat and Chhattisgarh Chief Minister Bhupesh Baghel jointly reviewed the implementation of the Jal Jeevan Mission in the state at Raipur on Saturday, a statement said.

The chief minister assured the visiting Union minister that the state government will take all necessary steps to accelerate the pace of the implementation of the Jal Jeevan Mission and provide tap water supply to the remaining 39.59 lakh households in Chhattisgarh by September 2023, it said.

Shekhawat also assured the chief minister of all support to the state to achieve the 'Har Ghar Jal' target, the statement said. The chief minister assured that the state will undertake an intensive monthly review to provide assured tap water supply to every rural household in adequate quantity of prescribed quality on regular and long-term basis, it said.

Ravindra Chaube, Minister of Water Resources, Parliamentary Affairs, Law and Legal Affairs, Agriculture and Biotechnology, and Animal Husbandry and Fisheries; Guru

Rudra Kumar, Minister of Public Health and Engineering and Village Industries; Amitabh Jain, Chief Secretary, Chhattisgarh; Bharat Lal, Additional Secretary in the Jal Shakti Ministry and Mission Director, National Jal Jeevan Mission, and other senior officers from the Jal Shakti ministry and Chhatisgarh were present during the review meeting, the statement said.

At the time of the launch of the Jal Jeevan Mission, out of a total of 45.48 lakh households in Chhattisgarh, only 3.20 lakh (7 percent) households had tap water connections.

In 23 months, despite the COVID-19 pandemic and lockdown disruptions, 2.69 lakh households have been provided with tap water connections. As a result, now, 5.89 lakh households (13 percent) in villages of Chhattisgarh have tap water supply, the statement said. To become 'Har Ghar Jal', the state has planned to provide tap water connections to 22.14 lakh households in 2021-22, 11.37 lakh tap water connections in 2022-23 and remaining 6.29 lakh tap water connections in 2023-24, it said.

### Tomar faces anger of flood-hit MP constituency

EXPRESS NEWS SERVICE @ Bhopal

NARENDRA Singh Tomar, the Union agriculture minister and local BJP MP, faced mass protests by local residents in the flood-hit Sheopur town of Mad-hya Pradesh during his visit there on Saturday.

The protestors also tried to push and shove Tomar while he was walking through crowded streets.

The police had a tough time in laying a protective cordon around the union minister, sources in Sheopur told this

The angry residents tried to block the passage of the minister's motorcade, and threw black flags, broom and mud on it. They have alleged that the flood situation in the Amral and Seep rivers was mismanaged, causing the entire She-

### Toll rises to 24 in Gwalior-Chambal

The official toll due to floods and rain-related mishaps in eight districts of the Gwalior-Chambal region has risen to 24. So far 1,250 villages in eight districts have been affected by rains and floods in the region and 9,000 people have been rescued

opur town to be marooned.

Tomar said the anger of the people is understandable. "We are committed to rehabilitation of people and rebuilding of infrastructure. Four officials have been deployed in Sheopur alone to take care of the district," he said. Residents, mainly traders

and families in the Ganesh Bazar area, have suffered substantial losses after flood wa-

ters inundated their shops. Ganesh Bazar is the town's main market.As many as six deaths have been reported in the Sheopur district due to floods and rain-related mis-haps since July 28. Its direct road to the Baran and Sawai Madhopur districts of Rajasthan has been cut off.

Residents had staged similar protests in Sheopur town on Thursday too.

## Risk mgmt plan in place to cope with floods, but there's scope to do better

### Decentralise flood forecasting for regional accuracy: experts

SHRUTHI H M SASTRY BENGALURU, DHNS

Soon after taking charge, Chief Minister Basavaraj Bommai took stock of the flood situation. At least 13 districts have been hit by floods over the past few weeks, making it the top priority for the new government.

top priority for the new government.

This is the fourth consecutive year that Karnataka has faced floods. Last year, Karnataka declared 23 districts and 130 taluks as flood-hit.

The distribution of rainfall has become erratic in the past few years, a prominent reason for floods.

Floods in Krishna and Cauvery Basin of Karnataka is primarily due to riverine floods (outflows greater than the carrying capacity of the river). Although not much has changed with overall

Although not much has changed with overall rainfall, showers meant for over a month are now occurring in a few days, causing floods, Karnataka State Disaster Management Authority (KSD-MA) officials say.

KSDMA commissioner Manoj Rajan says the state was able to mitigate the crisis to a large extent this time as it was ready with the Karnataka State Action Plan for Flood Risk Management, 2021.

This plan provided information on river basin-wise vulnerable villages. A flood forecast cell was also constituted at Karnataka State Natural Disaster Monitoring Centre (KSNDMC) to regularly update information on inflow and outflow of reservoirs.

WhatsApp groups of all officials concerned were created for Almatti, Narayanapura, Bhima, Cauvery and Tungabhadra reservoirs ensuring good coordination, he says.

At present, 100 relief camps are operational in Belagavi, Bagalkot and Uttara Kannada, sheltering 48,995 people. The government has

A file picture of the floods in River Bhima in Jewargi taluk of Kalaburagi district. The distribution of rainfall has become erratic in the past few years, a prominent reason for floods.

announced Rs 660 crore for flood relief works.

Not only have the floods affected crops and livelihood apart from causing several casualties over the last four years, it has also led to a huge financial drain on the state amid the pandemic.

Last year, Karnataka had pegged losses owing to floods at Rs 25,000 crore, while the estimated losses in 2019 were Rs 35,000 crore.

Although Karnataka has put in place several measures, they are inadequate to avert the annual crisis, experts say.

"The government has taken several measures over the last few years, but we can do way better," environmentalist Vishwanath Srikantaiah says, emphasising on better interstate dialogue, coordination among officials managing various received and better data eathering.

reservoirs and better data gathering.
"The KSNMDC has done a good job with the weather station in Bengaluru. This should be replicated across the state." he says.

According to Himanshu Thakkar, coordinator, South Asia Network on Dams, Rivers and People, the flood forecasting system needs an overhaul.

At present, the Central Water Commission does flood forecasting. There has to be account-

ability for this data.

It should also be decentralised at the state level for regional accuracy. The rainfall forecast system, too, should be river basin-wise, instead of generic forecast for a region based on "heavy or moderate" rainfall, he adds, insisting on making all the data available to the public promotly.

all the data available to the public promptly.
According to Madikeri MLA Appachu Ranjan,
who comes from a place that is prone to floods,
the government is yet to desilt water bodies that
got clogged after the 2018-19 floods.

"As a result, the river's course has changed and runs into agricultural lands now," he explains, highlighting poor follow-up of measures at the ground level. Admittedly, government officials too believe much more can be done.

An official involved in disaster management told *DH* that the government's 'early warning system' needed improvement.

It also needs to increase the number of gauging stations and assess rainfall and water flow from upper to lower catchment areas.

A "flood plain zonation" has to be created, mapping a region to understand the impact in relation to the water released, the official says. Telengana Today - 08- August -2021

### Stop illegal water drawals of AP: TS

Writes to KRMB seeking immediate action at Pothireddypadu

STATE BUREAU

HYDERABAD

Telangana has requested the Krishna River Management Board (KRMB) to direct Andhra Pradesh to immediately stop drawal of water from the Pothireddypadu Head Regulator so that the committed utilisations at Nagarjunsagar will not be affected.

In a letter to KRMB Chair-man MP Singh on Saturday, Special Chief Secretary for Irrigation Dr Rajat Kumar objected to the illegal drawing of water through the Pothireddypadu Head Regulator by Andhra Pradesh to serve unapproved ayacuts outside the Krishna basin.

He said as per inter-State agreement of 1976/1977 and the Planning Commission clearance of 1981, Andhra Pradesh is entitled to draw only 15 tmc for the Chennai

Water Supply Scheme and 19 tmc for the SRBC through Pothireddypadu from July to October.

However, Andhra Pradesh has been regularly drawing excessive amounts of water in violation of sanctions. Sources said 179 tmc and 129

tmc were drawn during the last two years itself. "As per our information, AP has already drawn about 25 tmc as on August 7, 2021, against their entitlement of 10.48 tmc," KRMB Chairman MP Singh said.

(SEE PAGE 2)

#### Telangana A Today

### Stop illegal water drawals...

To continue to draw water illegally, AP has even requested the KRMB to direct Telangana to stop hydel Telangana to stop hydel power production at Srisailam, which is primarily a hydro-electric project meant for producing power during the course of release of waters to Nagarjunsagar. Due to its typical terrain, agriculture in Telangana is dependent on the operation of nearly 30 to 35 lakh borewells in the State and the lifting of river waters to

borewells in the State and the lifting of river waters to fill various projects constructed by the State.

"Since kharif operations are now in full swing, there is an urgent need for us to produce our full capacity of hydel power," he said. In the process of power generation at Srisailam, water is released to the Nagarju-

nasagar project, which has been designed with a mas-sive capacity of 405 tmc to cater to irrigation, industrial

cater to irrigation, industrial and drinking water needs of both Telangana and AP.
As per Bachawat Award, a quantity of 280 tmc has to be released from the Srisailam reservoir for storage at Nagarjunasagar to meet the above important needs of both the States. In addi-tion, 16.5 tmc is taken from Nagarjunsagar to meet drinking water needs of Hy-derabad. To meet these im-portant requirements, it is essential to release the water to Nagarjunsagar dur-ing the monsoon months. In view of these facts, there is an urgent need to stop ille-gitimate drawals through Pothireddypadu Head Regulator, he said.

### यूपी में बाढ़ का कहर, 760 लोगों को सेना ने बचाया

#### कानपुर | हिन्दुस्तान टीम

बुन्देलखण्ड और सेंट्रल यूपी के कई जिलों में बाढ़ का कहर जारी है। पानी में मामूली उतार के बाद भी यमुना खतरे के निशान से साढ़े चार मीटर ऊपर बह रही है। उरई में बाठ क्षेत्र में फंसे 760 लोगों को सेना ने रेस्क्यू कर बचाया। भयावह स्थिति को देखते हुए शनिवार को जलशक्ति मंत्री महेंद्र सिंह ने उरई और हमीरपुर के बाढ़ क्षेत्रों का हवाई सर्वे किया।

यमुना में 12 घंटे में आठ सेमी की मामूली कमी दर्ज की गई जबकि बेतवा का पानी तेजी से चढ़ रहा है। इससे उरई, हमीरपुर समेत कई जिलों में दहशत बरकरार है। अभी भी सैकड़ों परिवार टापू बने गांवों बाढ़ के बीच फंसे हैं।

#### बक्सर से भागलपुर तक गंगा लाल निशान के पार

पटना। पटना में गंगा नदी का बढ़ना अब भी जारी है। शनिवार को इस नदी का जलस्तर बक्सर से भागलपुर तक ऊपर चढ़ा। चार जगहों पर लाल निशान से ऊपर बह रही है। पुनपुन ने तेजी से घटना शुरू किया है लेकिन यह अब भी लाल निशान से काफी ऊपर है।

#### वाराणसी में शनिवार को वरुणा नदी का जलस्तर बढ़ने के बाद लोगों को निकाला गया।

#### झारखंड में वज्रपात से १६ लोगों की मौत

रांची। झारखंड में आसमानी बिजली गिरने से 16 लोगों की मौत हो गई। अधिकांश मामले ग्रामीण क्षेत्रों के हैं। खेतीबारी का समय होने के कारण लोग खेतों में काम करने गए थे। इसी दौरान हुए वज्रपात से ज्यादातर की मौत हुई मस्नेवालों में हजारीबाग के वो चवेरे भाई-बहन और गिरिडीह की दो सगी बहनें शामिल हैं। कई लोग घायल हुए है। Hindustan - 08- August -2021

## यूपी पर १५० करोड़ का पर्यावरण हर्जाना

नई दिल्ली | प्रभात कुमार

गंगा और उसकी सहायक निदयों में तय सीमा के भीतर शोधन के बगैर सीवेज के प्रवाह रोकने में विफल रहने पर केंद्रीय प्रदूषण नियंत्रण बोर्ड (सीपीसीबी) ने यूपी सरकार पर 150 करोड़ रुपये का पर्यावरण हर्जाना लगाया है। इतना ही नहीं, समय सीमा के भीतर 44 सीवेज शोधन सयंत्र का काम पूरा नहीं किए जाने के बदले में भी सीपीसीबी ने यूपी सरकार पर करीब 26 करोड़ का पर्यावरण हर्जाना लगाया है। इसका खुलासा एनजीटी में पेश ओवरसाइट कमेटी की रिपोर्ट में किया गया है।

एनजीटी प्रमुख न्यायमूर्ति ए.के. गोयल की अगुवाई वाली पीठ के समक्ष पेश इस रिपोर्ट में कहा गया है कि एनजीटी ने सरकार को गंगा और उसकी सहायक

### कार्रवाई

निदयों से जुड़े सभी ड्रेनों/नालों में 01 जुलाई, 2020 तक शोधन के बगैर सीवेज का पानी बहाने से रोकने का आदेश दिया था। आदेश का पालन नहीं होने पर प्रति माह प्रति नाले 10 लाख रुपये जुर्माना लगाने का आदेश दिया गया था। रिपोर्ट में कहा गया है कि प्रदेश के कुल 311 ड्रेनों/नालों में 115 ड्रेनों के जरिए शोधन के बगैर ही सीवेज का पानी निदयों में जा रहा है। सिमिति ने कहा कि सीपीसीबी ने आदेश का पालन नहीं किए जाने पर उत्तर प्रदेश सरकार पर 150 करोड़ रुपये का पर्यावरण हर्जाना लगाया है। साथ ही इस बारे में नोटिस भी जारी किया है।

पूर्व न्यायाधीश न्यायमूर्ति एस.वी.एस. राठौड़ की अगुवाई में गठित ओवरसाइट कमेटी ने पीठ को बताया कि 44 सीवेज शोधन सयंत्र का काम पूरा नहीं किए जाने पर भी सीपीसीबी ने प्रदेश सरकार पर 26.4 करोड़ का पर्यावरण हर्जाना लगाया है। सरकार ने अभी हर्जाने की रकम जमा नहीं कराई है। हर्जाने की रकम 01 जुलाई 2020 से 31 दिसंबर 2020 तक की है।

कुल 311 नाले हैं जो गंगा और सहायक नदियों में गिरते हैं। पहले चरण में 86 में से 38 ड्रेनों अनटैप्ड है यानी बगैर शोधन के सीवेज का पानी जा रहा है। दूसरे चरण में 215 में से 96 ड्रेनों से बगैर शोधन के सीवेज का पानी जा रहा है। Rajasthan Patrika - 08- August -2021
