Advisory Forecast for Chembarabakkam, Poondi Reservoir and Rivers in Chennai

Date: 04/12/2020

Chembarambakkam Reservoir in river Adyar basin with a intense rainfall 04/12/2020 06:00 hrs to 04/12/2020 18:00 hrs is likely to get a maximum instantaneous flow of 300 cumces (10593 cusecs). Release if any may be made after giving necessary alerts to authorities and people in downstream areas for preparedness.

As rainfall activity is occurring in Adayar basin outside the catchment area of Chembarambakkam reservoir such as west Tambaram, oragadam, Padappai, Mannivakkam, the significanat rise in water level in river is expected. It is advised that authorities to be on **very high alert** and may **alert people in banks of River Adyar in Sriperumbudur, Tambaram Taluk and in Chennai city.**

Poondi Reservoir in river Kosasthalai basin with a intense rainfall 04/12/2020 06:00 hrs to 04/12/2020 18:00 hrs is likely to get a maximum instantaneous flow of 250 cumces (8827 cusecs). Release if any may be made after giving **necessary alerts to authorities and people in downstream areas for preparedness.**

As intense rainfall activity is increasing in Chennai city and suburban areas and Redhills tank is also likely to get significant inflows. **Release if any may be made after giving necessary alerts to authorities and people in downstream areas for preparedness.**

Airport authorities are advised to maintain strict vigil in the rise of river level as it passes under runway in Chennai airport.
