# Soon, separate pipes for drinking, recycled water

## DUAL PIPE SYSTEM

Two separate pipes from DJB source will carry water to homes.

→ One will carry water that can be used for drinking, bathing and washing.

→ The second will carry treated water which can be used for flushing and gardening

### Why have the system?

We treat more water of drinking standards than we need. Water used for flushing, landscaping, irrigation, and numerous other works, does not need to be treated to drinking water quality.

**500mgd** Total recycled water

**200 mgd**

The amount of recycled water that is used by various corporations

**300 mgd**

The amount of recycled water wasted daily

MGD = million gallons a day; 1 gallon = 3.78 litres

### What does 300 million gallons of water mean?

It takes **660,000** gallons to fill an Olympic-sized swimming pool

X

**455**

pools can be filled with water

**750L** Estimated daily consumption per house

**1.5 mn**

households can get drinking water

## IMPACT

Mallica Joshi

mallica.joshi@hindustantimes.com

**NEW DELHI:** The Delhi Jal Board (DJB) is planning to write to the Delhi government's Department of Urban Development, suggesting that a dual pipe system be made mandatory for all new constructions in the city.

Reacting to HT's series Dry Daze, the DJB said it was important that we use treated water for non-drinking purposes.

"We are going to write to the urban development department to incorporate the change in their bylaws. We also have to ensure treated water reaches colonies," said DJB CEO, SS Yadav.

The DJB currently has water with two different water quality parameters. One is

the water it treats for drinking purposes which is then supplied to homes.

The other is the water that is treated from sewage waste. This water is currently given to civic agencies for horticulture purposes. It is this treated water that will flow through the second pipe.

To make the project work, houses have to make sure that there are two separate pipes, one that supplies water to the flushes and the other for the rest of the water.

The DJB is also in the process of installing new sewage treatment capacities to improve the quality of water treated.

In other nations that have implemented dual pipe system, the water that has been used for bathing and washing is collected in domestic tanks. A filtration system purifies this water which is then supplied to the house for flushing and gardening.

### **TAVLEEN MEHENDIRATTA**

Rajouri Garden resident

I must admit, I enjoyed reading your article on save water but at the same time, felt deeply concerned about the drive-home points you mentioned.

#### **HERE'S WHAT I HAVE TO SAY:**

- You have the power to save 7.5 litres of water per day.
- Simply step out of your home, search for a brick used in construction, come back and place in your toilet flush.
- The brick in the flush would displace water, every time you flush, lesser water would be used. It has the power to save 7.5 litres of water per person per day and about 200 litres of water in a week for a family of 4!
- The magnitude of savings would be really high and the simplicity of the move would make it applicable across homes
- I am doing this as we speak

### **RAKESH DASS**

Civil Lines resident

It is a difficult task to change our water usage habits which are largely careless. We must look to China and Japan for lessons in river water management. If we can do what the two countries have done, there will no shortage of drinking water.

Our government should have thought of it decades ago but who cares?

There needs to be more pressure on the government through your write-ups so that the government is compelled to do something. The government may initiate new projects for the rivers and canals in the interest of the future generations of the country.

In another eight years, water will be dearer than petrol? Look where our population graph is rising to.

You have to help. Thanks.

### **ARUN BANERJEE**

Dwarka resident

Dwarka has started supply of potable water to various colonies in the sub-city. Numerous illegal water connections established in Mahavir Enclave. Now after DJB's initiative all illegal connections are coming out in the open. This is total wastage of precious potable water and also non-revenue water as majority of these connections are illegal. The DJB needs to stop this theft and register all illegal water connections.

### **RAMESH AILAWADI**

Janakpuri resident

If water wastage is stopped there will be no need to tap groundwater. I live in Janakpuri. In my colony and adjoining areas I see thousands of gallons of water being wasted mercilessly by washing cars and verandas using hose pipes and being flushed down the drain. One person is using 100 litres of water only for brushing teeth!

### **R SINCH**

Civil engineer from Punjab University, Chandigarh

Thank you for highlighting the pathetic state of Delhi's lifeline — Yamuna. I think media is playing the role that the government should be playing. Yamuna should be the most important issue for the government.

The reason the Yamuna Action Plans are a failure is lack of will power and deep-rooted corruption.

The only way out is to float a global tender inviting international firms that have implemented such projects.

Global players have a commitment because of their reputation. I am sure there is no dearth of funds since World Bank and JICA are willing to give more funds for the Yamuna project.

# Maharashtra minister sows the way in suicide belt

Rathod works with farmers in fields to extend moral support, says physical and financial help would be provided to 3,600 families that have seen farmer suicides

**SHUBHANGI KHAPRE**  
MUMBAI, JULY 4

THE FARMERS in Ichori village had unusual company last Wednesday when they went to work in their fields. The small village in Yavatmal suddenly sprang to life when the locals found in their midst the district's Guardian Minister and Maharashtra Minister of State for Revenue Sanjay Rathod, who took the reins of a bullock cart, ploughing the field and sowing seeds. He spent the day — from noon to 3.30 pm — with the families of farmers who committed suicide in the last few years.

As Rathod hopped from one field to another, he tried to convey the message that villagers should not resort to taking the extreme step. Instead, he said, they should know there were people ready to lend support in their daily struggle.

Speaking to *The Sunday Express*, Rathod said he wanted to do something on July 1, observed as Krishi Din (Agriculture Day) in Maharashtra, and thought it

Maharashtra MoS for Revenue Sanjay Rathod works in a field in Yavatmal district of Vidarbha. *Express*

would be better if he worked with farmers in their fields rather than delivering speeches from stage. "Farmers reeling under depression after losing family members or fellow villagers would surely not find the speeches meaningful any more," he said.

In Yavatmal, there have been almost 3,600 cases of farmer suicides in the last few years. Under its "zero suicide" mission, the Maharashtra government has decided to adopt a different strategy to tackle the agrarian crisis, and its biggest challenge is to win

the confidence of people. Hence, apart from reforms in the form of easy agriculture loans and water conservation projects, the focus is on assuring the farmers that the government is with them in their hard times.

Chief Minister Devendra Fadnavis had called upon his ministerial colleagues and elected members from all parties to help in the mission.

Taking a step forward in this direction, Rathod, along with Shiv Sena workers, decided to visit the families that have seen

farmer suicides. From July 1 to 27, Sena leaders, along with local villagers and officials from administration, will visit all such households to provide help in agriculture activities. Rathod visited some villages on Sunday too and met several families.

On January 26, Ankush Vinayak Khadke, a middle-aged farmer reeling under financial burden compounded further by crop loss due to hailstorm, hanged himself in Ichori village.

Khadke's family was among those Rathod met on July 1. He interacted with the deceased farmer's wife Anusaya and their school-going son Kunal.

"Khadke's wife said she had never worked in fields. She didn't know the nitty-gritties of farming," said the minister.

In another case, the family had no bullock, while yet another family said they didn't know how to procure fertilisers.

"Our initiative is to mobilise the party workers to lend all help, even at personal level at least to households that have lost the head of the family. We have a list of 3,600 families. We will reach out to one and all," said Rathod.

# Nobel laureates call for action on climate change

**Vanita Srivastava**

• vanita.srivastava@hindustantimes.com

**LINDAU (GERMANY):** Ahead of the Paris meet on climate change, Nobel laureates have stressed on the need for urgent action to limit global emissions and protect the climate.

The 65th Nobel Laureates Meet in Lindau, Germany, ended with a declaration on climate change and an agreement that there was overwhelming evidence that greenhouse gas emissions cause global warming.

On the final day of the meet, the laureates signed the Mainau Declaration, 2015, on climate change that made an emphatic appeal for climate protection.

**ON THE FINAL DAY  
OF THE PARIS MEET, THE  
LAUREATES  
SIGNED THE MAINAU  
DECLARATION, 2015,  
ON CLIMATE CHANGE**

Following the latest climate policy resolutions adopted by the G7 countries and the climate-oriented encyclical *Laudato si'* issued by Pope Francis, the declaration by the scholars is another urgent warning of the consequences of climate change.

This is the first time since 1955 that Nobel laureates used the platform to take a stand on social policy

issues. "The nations of the world must take the opportunity at the United Nations Climate Change Conference in Paris to take decisive action to limit future global emissions," the declaration said.

Brian P Schmidt, Nobel laureate and a spokesperson for the Mainau Declaration said, "With this declaration, we outline the scale of the threat of climate change and we provide the best possible advice." He added that if left unchecked, the ever-increasing demand for food, water and energy would eventually overwhelm the Earth's ability to satisfy the needs of humanity.

(The journalist is in Lindau on an invitation from the German Research Foundation-DFG)

...the first all-India of transgenders.

# Tamil Nadu moves SC for security force to guard Mullaperiyar

Krishnadas Rajagopal

**NEW DELHI:** The Supreme Court on Friday sought a response from Kerala on a plea by Tamil Nadu to replace Kerala police personnel with a Central force to guard the disputed Mullaperiyar dam.

Tamil Nadu has referred to a September 2014 'Industrial Security Inspection Report' of the Intelligence Bureau saying that the Mullaperiyar project, being a vital installation involved in production of power generation, was "vulnerable" to terror threats.

Though the report said there was no specific inputs of terror threats to vital installations, it mentions Pakistan-sponsored pan-Islamist terror outfits, "remnant cadres of LTTE" and Naxals to advise that "all precautionary measures are necessary".

The report is the basis of the Tamil Nadu Chief Secretary's letter to the Ministry of Home Affairs on May 12, 2015, seeking deployment of a "professional security force" like the Central Industrial Security Force or the Central Reserve Police Force, instead of Kerala police to guard the dam and its appurtenant structures.

A Bench led by Chief Justice of India H.L. Dattu asked the Kerala government to file its reply within two weeks even as senior advocate Rajeev Dhawan, appearing for Kerala, argued that it is "our [Kerala] duty to protect the dam".

The apex court also asked Kerala to respond to an additional affidavit by the Tamil Nadu government, represented by senior advocate Rakesh Dwivedi and advocate G. Umamathy, to stop any unilateral move by Kerala to con-

struct a new dam on the Mullaperiyar site, saying such a step would be virtually in contempt of the Supreme Court judgment of May 7, 2014.

The affidavit quoted the May 2014 judgment observing that no such offer of a new dam can be thrust on Tamil Nadu, and both States have to act in agreement.

It has sought a direction to the Union Environment Ministry to withdraw the clearance granted to Kerala by the Standing Committee of the National Board for Wildlife on December 3, 2014, to conduct an environment impact assessment study.

In an application filed in May 2015 in the apex court, Tamil Nadu had accused Kerala of "stealthily" bringing drilling machinery to work on the new dam. It had said that

the Kerala government had submitted a proposal for construction of new dam and the Standing Committee of the National Board of Wild Life considered its proposal and had accorded permission only to conduct survey and investigation without in any way affecting any other legal and administrative clearances required for the new Mullaperiyar dam located in the Periyar Tiger Reserve.

The application had contended that the proposal for a new dam was an attempt to "deprive" Tamil Nadu its right to the waters of the Mullaperiyar dam.

"This is a continuing saga. This has to stop somewhere," Mr. Dhawan submitted in court.

"That's correct, but where?" asked the Chief Justice, posting the case after four weeks.

## Met says it may rain on Monday

**NEW DELHI:** The city saw a hot and humid day on Saturday as the maximum temperature was recorded as 38.1 degrees Celsius, two degrees above normal.

The minimum was recorded

as 26.6 degrees Celsius, a degree below the normal.

Rain has largely evaded the city this monsoon so far with July getting no rain so far. According to the weatherman, while the city

is going to see a partly cloudy sky on Sunday, the skies may open up on Monday. Sunday's maximum and minimum temperatures are expected to be between 38 and 27 degrees.

# Hunting for solutions to v

**LOOKING AHEAD HT**  
invited experts to suggest  
ways to ensure every  
Delhiite gets clean water

**Mallica Joshi**

mallica.joshi@hindustantimes.com

**NEW DELHI:** Dry Daze, Hindustan Times' month-long series on Delhi's grave water situation raised pertinent questions and concerns around water shortage and contamination and suggested the way ahead.

As part of the campaign, HT invited a panel of four experts who work on water issues in different capacities to look for possible solutions to ensure every Delhi resident gets his or her share of water.

The panel included Delhi Jal Board (DJB) CEO SS Yadav, who, taking note of the series, announced that the board had proposed to set up a Bureau of Water Efficiency to rate bathroom and kitchen fittings.

Acknowledging that Delhi should not hope to get any more water in the coming 10 years at least, Yadav said the water utility was looking at reduction targets to the tune of 10 litres per person in the coming 10 years.

The series saw the National Green Tribunal taking suo moto cognisance of a report on water contamination and sought a response from the Delhi government regarding contamination in piped water as well as ground water.

On June 19, the bench issued notices to the Delhi government, DJB, Central Ground Water Authority (CGWA), Delhi Pollution Control Committee (DPCC), Central Pollution Control Board (CPCB) and the four municipal corporations, asking them to submit a status report on the quality of water being supplied.

HT had highlighted the disparity in water supply in various areas of the city, which the tribunal also took note of.

"The status report shall reveal before us the quantity of water received from supply lines to various locations in a day. The status report shall place before us the facts regarding the quality of groundwater available through the community borewells and hand pumps," the bench said.

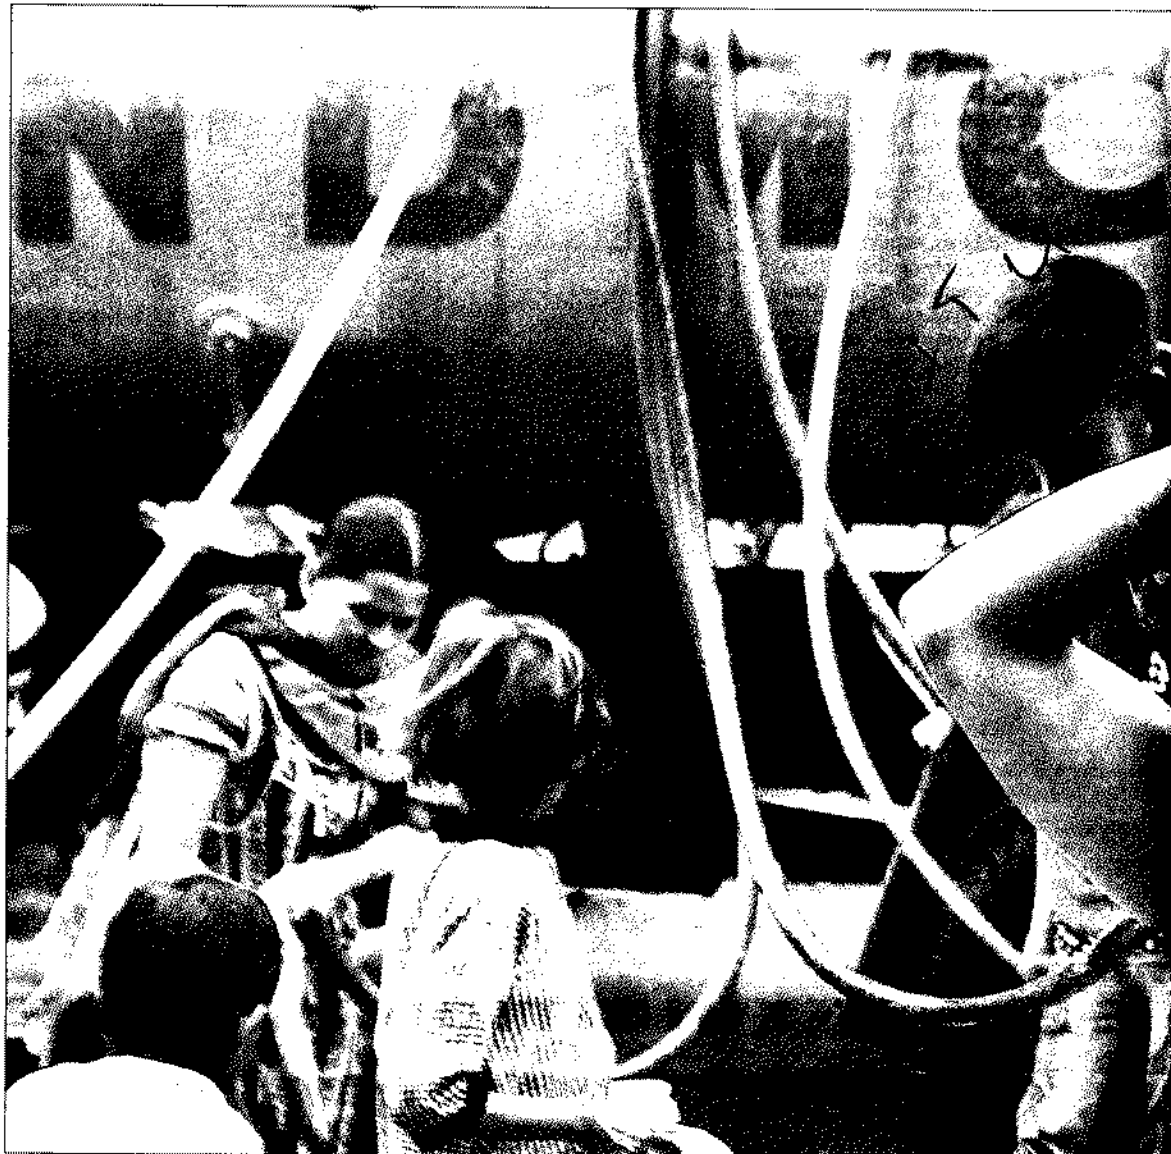

HT's series prompted residents of Dwarka to write to the DJB to crack down on illegal connections to stop water theft.

The series didn't just highlight problems in water supply and management but gave workable suggestions, speaking to experts related to the field.

Among the most common suggestions to come out of the discussion was the immediate need to take rainwater harvesting and water conservation seriously.

Delhi, the experts said, needed to become self sufficient to make sure it can meet the rising water demand.

While the government is responsible for policy, it is ultimately the people who have to understand the message of conservation and apply it to their lives, experts said.

■ The series on water has highlighted the disparity in water supply in various areas of the city, which the National Green Tribunal has taken

## THE WAY OUT OF WATER CRISIS

Issues related to the water crisis were discussed by a panel of experts at HT office. Here is what they suggested:

- Set up decentralised rainwater harvesting plants as extraction is also decentralised
- Set up well-defined targets to reduce consumption to return water to Yamuna
- Reduce water consumption and bring it to 135 litres per person per day from the existing 172 litres per person per day
- Development policy should follow water availability
- Reducing the quantum of non-revenue water from 45% to 15% (water flowing through DJB's system which it can't bill owing to free water supply in non-piped areas, leakage and theft)
- Setting up a nodal agency to bring together all stakeholders connected with water in the national capital including Flood and Irrigation Department, Delhi Jal Board, Delhi Development Authority and municipal corporations
- Address industrial waste water pollution
- Make sure all houses are connected to a sewage network in the capital city
- Encourage people's participation and make them partners in water conservation efforts
- Reuse and recycle water

## DJB'S COMMITMENT

- Setting up a Bureau of Water Efficiency to rate bathroom fittings according to water usage efficiency
- Using water treated from sewage for various non-drinking purposes
- Setting up small decentralised sewage treatment plants
- Reduce water consumption by 10 litres per person per day in the coming 10 years
- Expand DJB's water and sewer network in the coming five years
- Introduce an online water accounting system that can be accessed by public
- Banning the use of drinking water for construction purposes
- Building check dams in the ridge areas to harness the area's rainwater harvesting potential

# Heavy rain feared, alert sounded in Uttarakhand

TRIBUNE NEWS SERVICE

DEHRADUN, JULY 5

With the State Meteorological Centre forecasting moderate to heavy rain in next 72 hours, Uttarakhand Chief Minister Harish Rawat has directed the District Magistrates of Uttarkashi, Chamoli, Almora, Pithoragarh, Champawat, Rudrapur, and Pauri to remain alert to deal with any natural calamity.

The officials have been directed to deploy additional State Disaster Response Force (SDRF), and police personnel in the disaster-prone areas of the state. Rawat also instructed them to make zones and sectors in their respective districts to ensure speedy rescue work. He warned the officials of a strict action in case of laxity.

The Chief Minister also instructed the officials to keep JCBs and bulldozers ready at landslide and mudslide-prone areas of the state. He told them to take swift action to reopen blocked routes in the mountainous

## Kedarnath yatra disrupted

The pilgrimage to the Kedarnath shrine was disrupted from Gaurikund and Jangalhatt pedestrian routes due to mudslide. The vehicular movement was also affected adversely at Lambagad on the Rishikesh-Badrinath national highway. However, the Rishikesh-Gangotri-Yamunotri route remained open on Sunday.

areas and ensure that no vehicular movement took place at night in those areas.

Rawat instructed the Chamoli District Magistrate to camp at Joshimath to monitor the Char Dham Yatra. He directed the district administration to regularly monitor the flow of the rivers to act swiftly in case of flood.

Additional Chief Secretaries Rakesh Sharma and S Raju, Secretary Anandvardhan, Garhwal Commissioner CS Napalchayal, and Secretary R Meenakshi Sundaram were present during the meeting.

A biker wades through a waterlogged street in Guwahati. PTI

## Flood situation grim in Assam

GUWAHATI, JULY 5

The flood situation in Assam turned grim over the past 24 hours due to incessant rains with over 65,000 people being affected in 125 villages across the state.

Assam State Disaster Management Authority (ASDMA) said in its flood report that more than 65,000 persons were affected in Dhemaji, Bongaigaon and Sonitpur districts.

With 40,000 persons, Bongaigaon district was the

most affected followed by Dhemaji with almost 25,000 people being affected at present, it said.

More than 3,800 hectares of crop areas were under water currently, the report mentioned.

Authorities have opened four relief camps in Bongaigaon, where 2,870 persons were taking shelter.

The flood waters have also damaged a road and breached an embankment in Sonitpur. — PTI

POLYTHENE BAN IN HARIDWAR AND RISHIKESH 1755

# Towards clean Ganga

STATESMAN NEWS SERVICE  
Dehradun, 3 July

Polythene, a major pollutant of environment, has been banned in Haridwar and Rishikesh. The ban has been imposed by the National Green Tribunal (NGT) on a complaint filed before it in this regard.

The decision on the other pollutants along the banks of Ganges, however, would be taken up in the next hearing of the NGT on 22 July.

The National Green Tribunal has intimated the district administration and Nagar Nigam in this regard and given instructions for the ban. Anyone found involved in the sale of polythene would be fined upto

₹5000. The local residents have expressed happiness over this decision of the NGT.

A complaint was filed before the NGT on the

increasing use of polythenes across the state, polluting the Ganges.

The NGT's local commissioner Sharik Zaidi confirmed of the ban and

added that the district administration and Nagar Nigam have been asked to impose it effectively.

However the decision on the garbage management, encroachment at the Ganga ghats and hotels along the banks of the Ganges would be taken in the next hearing of the NGT on 22 July.

In the complaint to the NGT these issues related to Haridwar and Rishikesh were raised.

It is believed that the NGT might also take some strong decisions in this regard as well which would turn out to be a boon for the duo holy cities along the banks of the Ganges and will also be helpful in keeping the river clean.

## Monsoon active, heavy rain in state

### TRIBUNE NEWS SERVICE

SHIMLA, JULY 5

Several parts of Himachal experienced widespread rain as the monsoon remained active in the state. Bijahi had 69 mm of rain while Una and Sundernagar recorded 42 mm and 34 mm rain, followed by Bharwara 32 mm, Kalatop 16 mm, Gaggal and Dharamsala 13 mm, Bharwara 12 mm, Shimla 11 mm, Jogindernagar 9 mm, Dalhousie 6 mm and Jubbarhatti 5 mm.

The weather office has warned of heavy rain at isolated places over the next three days in Chamba, Hamirpur, Kangra, Mandi, Shimla and Una districts and heavy to very heavy rain at isolated places in Kinnaur and Mandi districts on July 7.

The maximum day temperatures fluctuated marginally

Visitors enjoy heavy rainfall in Shimla on Sunday. TRIBUNE PHOTO

and Una was hottest in the region with a high of 37.7°C, followed by Bhuntar 35°C, Kangra 31.5°C, Sundernagar 31.2°C, Nahan 29.8°C, Dharamshala 29.4°C, Solan 29°C, Manali 28°C, Kalpa 27.4°C and Shimla 22.6°C.

There was no change in the minimum temperatures and Keylong in tribal Lahaul and Spiti was the

coldest at night with a low of 13.4°C, followed by Kalpa 14°C. The key tourist resorts of Manali, Dharamsala, Dalhousie and Shimla recorded a low of 14.6°C, 16.6°C, 17.1°C and 19.1°C, respectively.

Una was warm at night with minimum temperature at 22.4°C, followed by Solan 22.5°C and Sundernagar 23.4°C.

# Monsoon closer home, Met sees clouds of hope over north

Expect heavy rain in parts of Uttarakhand, Punjab and Haryana

**VIBHA SHARMA**  
TRIBUNE NEWS SERVICE

NEW DELHI, JULY 4

Passing through a weak phase because of intensifying tropical storms in western Pacific, the southwest monsoon is expected to revive from July 6 (Monday).

The Met Department has predicted heavy to very heavy rain in Uttarakhand and at "isolated places" in Himachal Pradesh, Jammu and Kashmir, Uttar Pradesh, Bihar and northeast beginning Monday.

Subsequently on July 7 and 8, the IMD has forecast heavy rain over "parts" of hills and plains of the northwest India, including Punjab, Haryana, Chandigarh and Delhi.

Private forecaster Skymet says that the current "weak" phase of the monsoon can be "attributed to all tropical storms becoming typhoons in the western Pacific".

During the past 24 hours, the monsoon has been normal over West Bengal, Sikkim and coastal Karnataka, resulting in heavy to very heavy rain over isolated places in Assam and Meghalaya, Arunachal Pradesh and coastal Karnataka. Though the countrywide performance is still above normal (seven per cent), many parts of the country, including Punjab, Haryana, Delhi and

## Northwest rain deficient

■ Private forecaster Skymet says the current weak phase of the monsoon can be "attributed to all tropical storms becoming typhoons in the western Pacific"

■ The northwest comprising Punjab, Haryana, Himachal Pradesh, Uttarakhand, Jammu and Kashmir, east and west UP and east and west Rajasthan has received 17% rains so far.

■ Punjab is running 16% deficient, while the meteorological subdivision comprising Haryana, Delhi and Chandigarh is 23% below the normal. Himachal Pradesh is also showing a deficit of 18%

A couple clicks a selfie in heavy rain in Mumbai. Monsoon has been progressing well over central India. PTIFILE

Chandigarh are showing a deficit. The northwest comprising Punjab, Haryana, Himachal, Uttarakhand, Jammu and Kashmir, east and west UP and east and west Rajasthan has received 17 per cent rains so far. Punjab is running 16 per cent deficient, while the meteorological subdivision comprising Haryana, Delhi and Chandigarh is 23 per cent below the normal. Himachal Pradesh is also showing a deficit of 18 per cent.

The above normal rains registered by the northwest are largely because of 60 per cent surplus rains in Jammu and Kashmir, 54 per cent in West Rajasthan and 39 per cent in east Rajasthan.

In fact, many parts of Central India and South Peninsula are in red. However, monsoon is expected to gain strength from July 6 onwards. Parts affected between July 6 and 8 will be north and northwest India. Subsequently on

July 9 and 10, Central India, including east Madhya Pradesh, Vidarbha, Marathwada, Goa and Kerala will receive monsoon showers.

East and northeast India will continue to receive "moderate to heavy" rains due to a persisting monsoon along foothills and sub-Himalayan West Bengal. The only areas left out during the coming pulse will be Madhya Maharashtra, Gujarat and South Rajasthan, says the Skymet.

# न राज्यों को जोड़ेगा बीजापुर के तिमेट में बन रहा पुल

पत्रिका - 6-7-15

पुल बनने के बाद तेलंगाना आंध्र से रिश्ते होंगे मजबूत, हैदराबाद, नागपुर, वारंगल, निजामाबाद से संपर्क आसान

बीजापुर @ पत्रिका

patrika.com/state

महाराष्ट्र और छग को जोड़ने के लिए इंदरावती नदी पर तिमेट में 200 करोड़ रुपए की लागत से बनने वाले पुल का शुरुवाती काम चालू हो गया है। नदी में पानी कम होने पर दीपावली के बाद ही बेस का काम शुरू हो जाएगा। पुल बनने में करीब तीन साल लग जाएंगे। तब तक नाव के सहारे लोगों को नदी पार करना पड़ेगा।

लम्बे इन्तजार के बाद छत्तीसगढ़ से आन्ध्रप्रदेश व महाराष्ट्र को जोड़ने वाले तिमेट पुल का निर्माण कार्य शुरू कर दिया गया है। बारिश के

पहले तिमेट में ड्रिलिंग के कार्य को पूरा किया गया है। जल्द ही पुल निर्माण के लिए बेस का कार्य शुरू कर दिया जाएगा तिमेट नदी पर 200 करोड़ से अधिक लागत से बनने वाले इस पुल के निर्माण के लिए अस्थायी तौर पर नदी के दोनों ओर पुलिस कैम्प स्थापित किए जा रहे हैं। इस पुल के निर्माण के लिए कंपनी को तीस महीने की समय सीमा दिया गया है। विदित हो कि कई साल से इस पुल के निर्माण की योजना ठण्डे बस्ते में पड़ी रही। इस पुल के निर्माण के बाद छत्तीसगढ़, तेलंगाना व महाराष्ट्र से सीधे जुड़ जाएगा और इसका लाभ बीजापुर

अब मोटरबोट की व्यवस्था

हर साल नगर पंचायत से घाट की नीलामी होती है। नाव का किराया तय है लेकिन नाविक अपने हिसाब से किराया लेते हैं। ज्यादा पानी होने पर कभी 50 तो कभी 100 रुपए लिए जाते हैं। यात्रियों की मजबूरी

का फायदा नाविक उठाते हैं। पहले पत्तवार से नाव चलाई जाती थी लेकिन अब इसमें मोटर लगाया गया है। इसमें एक बार में 25 लोग बैठ सकते हैं। नाविक 8-10 यात्री होने पर भी नाव लेकर जाते हैं।

को व्यापारिक व औद्योगिक दृष्टिकोण से सीधे तौर पर मिलने लगेगा। पुल निर्माण का कार्य महाराष्ट्र सीमा से शुरू किया जाएगा जो छग सीमा पर तिमेट स्थित मंदिर के पास जुड़ेगा। पुल निर्माण के दौरान सुरक्षा व्यवस्था के लिए तिमेट में महाराष्ट्र व छत्तीसगढ़ सीमा पर अस्थायी तौर

पर कैम्प स्थापित किया जाएगा। राष्ट्रीय राजमार्ग 63 जगदलपुर से निजामाबाद के लिए तिमेट का पुल बनने से पूरे इलाके के लोगों को इसका लाभ मिलेगा। मई में ठेकेदार ने काम करना शुरू किया था। लेकिन बारिश आने के बाद काम बंद कर दिया गया है। अभी कुछ

मशीनें ही लाई गई हैं। समझा जाता है कि दीपावली के बाद काम में तेजी आएगी। इस दौरान सभी मशीनें यहां लाई जाएंगी।

सिरोंचा से आ रही थी बस और टैक्सियां : गर्मी में डेढ़ माह तक सिरोंचा से भोपालपटनम तक मिनी बस चलने से स्थानीय लोगों में काफी खुशी थी क्योंकि इस रास्ते, यहां के बारिशद वारंगल, हैदराबाद, नागपुर, निजामाबाद एवं अन्य शहरों की ओर जाते हैं। बारिश के कारण सिरोंचा के बस संचालन बंद कर हो गया। वर्षाकाल के बाद सिरोंचा से टैक्सियों का संचालन नियमित रूप से होता है।

अभी इस तरह नदी पार कर जाना पड़ता है ग्रामीणों को।

# चीन में भूकम्प से 6 मरे, 48 घायल

पंजाब-4-7-15

## आफत

शिनजियांग प्रांत में दर्ज  
किया गया 6.5 तीव्रता  
का जलजला : 10  
किलो मीटर की गहराई  
में था केन्द्र

बीजिंग, (भाषा): चीन के पश्चिमोत्तर शिनजियांग प्रांत में 6.5 तीव्रता का भूकंप आया जिससे छह व्यक्तियों की मौत हो गई और 48 अन्य घायल हो गए। चाइना अर्थक्वेक नेटवर्क सेंटर (सीईएनसी) ने बताया कि भूकंप शिनजियांग के होतान प्रीफैक्चर में आया। सीईएनसी ने बताया कि सुबह करीब नौ बजकर सात मिनट पर पिशान काउंटी में आए इस भूकंप का केंद्र 10 किमी की गहराई पर था। नागरिक मामलों के ब्यूरो ने बताया कि भूकंप से छह व्यक्तियों की जान चली गई और लगभग 3,000 घर या अन्य मकान ध्वस्त हो गये या उन्हें नुकसान पहुंचा है। सरकारी समाचार एजेंसी शिन्हुआ ने 48 लोगों के घायल होने की खबर दी है। इसके बाद स्थानीय प्रशासन

शिनजियान, चीन में आए 6.5 तीव्रता के भूकंप में क्षतिग्रस्त हुए भवनों से लोगों को निकालने की कोशिश करते बचावकर्मी और स्थानीय नागरिक।

ने भूकंप के लिए दूसरे स्तर की आपात प्रतिक्रिया जारी की। पिशान में एक सरकारी फार्म में काम करने वाले ली हुआ ने शिन्हुआ को बताया कि वह चौथी मंजिल पर स्थित अपने मकान में था कि उसे तीव्र भूकंप महसूस हुआ और यह स्थिति करीब एक मिनट तक रही। उसने कहा 'मुझे चक्कर सा आ रहा है।' सीईएनसी के अनुसार, भूकंप के बाद 3.0 से

4.6 तीव्रता के कई हल्के झटके इलाके में महसूस किए गए। शिनजियांग के दक्षिणी हिस्से में स्थित पिशान उरुमकी की क्षेत्रीय राजधानी से करीब 1,800 किमी दूर है और इसके अंतर्गत 39,700 वर्ग किमी का भूभाग आता है। यहां की 258,000 की आबादी में बड़ी संख्या उइगुर मुस्लिमों और अन्य मूलनिवासी अल्पसंख्यकों की है।

प्रदेश के बड़े हिस्से में जल संकट के आसार

6-7-15

## पंजाब ने गंगनहर में पानी घटाया

पानी घटकर 1620 क्यूसेक हुआ, आईजीएनपी भी चपेट में

श्रीगंगानगर @ पत्रिका

patrika.com/state

बांधों से पानी की आवक घटने के मद्देनजर नदियों के पानी के वितरण पर आनुपातिक नियम (प्रोपर्टी) लागू कर दिया गया है। हालांकि गंगनहर पर यह नियम लागू नहीं होता लेकिन पंजाब ने अपनी नहरों में अधिक पानी लेने के लिए इसे गंगनहर पर थोप दिया। आरडी 45 से बीकानेर कैनाल (गंगनहर) में पानी की आपूर्ति 300 क्यूसेक कम कर दी। इससे सिवपुर हैड पर गंगनहर में 1620 क्यूसेक पानी ही पहुंचने लगा है। रावी-व्यास नदियों के बांधों से पानी की कुल निकासी 25 हजार क्यूसेक की जगह घटकर 22500 क्यूसेक हो गई है। बांधों से पानी

हरिके बैराज पर पहुंचता है जहां से पंजाब और राजस्थान की नहरों को पानी दिया जाता है। पानी बैराज तक पहुंचने के दौरान 2 हजार क्यूसेक की क्षीयता हो जाती है।

### हम पर जबरन थोपा

सिंचाई मामलों के अधिकारता सुभाष सहगत के अनुसार प्रोपर्टी अंशद्वी के बाद बनी सिंचाई परियोजनाओं पर लागू होता है। यदि बांधों में पानी की आवक कम होती है तो अतिरिक्त पानी से बनी योजनाओं पर प्रोपर्टी लागू होता है। यही राजस्थान की आईजीएनपी और पंजाब की अंशद्वी के बाद की नहर परियोजनाओं के पानी में कमी के अनुपात में कटौती होनी चाहिए।

### गंगनहर पर यह असर

फिरोपुर फीडर से गंगनहर और पंजाब की ईस्टर्न कैनाल को पानी मिलता है। 900 क्यूसेक पानी की कटौती होने पर पंजाब ने आरडी 45 से गंगनहर को दिए जाने वाले 2300

क्यूसेक पानी से घटाकर 2000 क्यूसेक कर दिया है। ऐसे में सिवपुर हैड पर पानी 1900-2000 क्यूसेक की जगह अब 1620 क्यूसेक ही पहुंच रहा है।

## नर्मदा से ज्यादा पानी लाने के प्रयास तेज

कंसल्टेंट की नियुक्ति कर 36 लाख का बजट आवंटित

पत्री @ पत्रिका

patrika.com/state

नर्मदा का पानी सिरोही और पाली के साथ ही बाड़मेर और जालोर के अन्य हिस्सों तक पहुंचाने के लिए सरकार ने प्रयास तेज कर दिए हैं। पांच दिन पहले ही इसके लिए कंसल्टेंट की नियुक्ति का बजट आवंटित हुआ है। यह कंसल्टेंट फर्म रिपोर्ट तैयार कर सरकार को देगी। इसके बाद सर्वे किया जाएगा।

पेयजल के लिए जहां पाली जवाई पुनर्भरण के लिए संघर्ष कर रहा है तो दूसरी ओर सिरोही में पानी के लिए अनशन हो रहे हैं। जालोर और बाड़मेर में नर्मदा आ तो गई, लेकिन अब भी काफी हिस्सा इसके पानी से अछूता है। इन सभी समस्याओं के समाधान के लिए सरकार ने एक कदम बढ़ाया है। नर्मदा नदी का पानी वर्तमान कैमिसिटी से अधिक संख्या में राजस्थान में लेने के लिए कंसल्टेंट की नियुक्ति होगी। इसके लिए सरकार ने 36 लाख का बजट भी

मिल सकती है राहत

कंसल्टेंट सभावनार् तलाशेंगे कि नर्मदा का अतिरिक्त पानी राजस्थान को मिल सकता है या नहीं। सकारात्मक परिणाम आते हैं तो चार जिलों को राहत मिल सकती है।

- देवराज सोरंकी, अतिरिक्त अधीक्षक, जवाई पहाड़ लाइन परियोजना, पाली

### यह है चुनौती

राजस्थान माही का पानी जिला गुजरात को देता है, बदले में उतना ही पानी नर्मदा के रूप में गुजरात से लेता है। यह संधि नर्मदा पानी वितरण के लिए बने दिव्यनल ने की है। इस दिव्यनल में राजस्थान, मध्यप्रदेश और गुजरात शामिल है। यदि कंसल्टेंट यह बात स्पष्ट कर देता है कि नर्मदा का अधिक पानी राजस्थान को मिल सकता है तो इस रिपोर्ट को राजस्थान सरकार इस दिव्यनल के समक्ष रखेगी।

आवंटित किया है। ये कंसल्टेंट आगामी छह माह में इसकी सभावनाएं तलाश कर रिपोर्ट प्रस्तुत करेगा।

# बारिश से हो सकती है सप्ताह की शुरुआत

नई दिल्ली | प्रमुख संवाददाता

दिल्ली में सोमवार की सुबह बारिश के साथ हो सकती है। मौसम विभाग के अनुसार तेज हवा और तूफान के साथ हफ्ते की शुरुआत होगी। जिसके कारण अधिकतम तापमान में सामान्य से तीन डिग्री सेल्सियस तक की कमी हो सकती है। जबकि न्यूनतम तापमान 28 डिग्री सेल्सियस तक रहने का अनुमान है।

दिल्ली में 25 जून से ही मानसून ने दस्तक दे दी है। मगर तेज बारिश अभी तक दिल्ली को भिगो नहीं पाई है। अगला हफ्ता संभवतः इस उम्मीद पर खरा

उतरेगा। मौसम विभाग के वैज्ञानिक डीपी यादव ने बताया कि छह से 11 जुलाई के बीच राजधानी में तेज बारिश होगी। तेज हवा के साथ कई जगह धूल भरी आंधी चलने का अनुमान है तो कई जगह बारिश के बौछारे मौसम को कुछ ठंडा करेंगी।

**मौसम में बदलाव करेगा बीमार:** चाचा नेहरू बाल चिकित्सा के चिकित्सा अधीक्षक डॉ. अनूप मोहता ने बताया कि मौसम में आया बदलाव बच्चों की सेहत के लिए नुकसान दायक हो सकता है। गर्मी और उमस की वजह से पेट गड़बड़ हो सकता है। साथ ही वायरल बुखार भी आ सकता है।

## आज चल सकती है आंधी !

■ **मौसम, नई दिल्ली :** दिल्ली वालों को सोमवार से गर्मी से थोड़ी राहत मिल सकती है।

मौसम वैज्ञानिकों के मुताबिक, सोमवार से बुधवार के बीच दिल्ली और आस-पास के इलाकों में बारिश हो सकती है। इससे मैक्सिमम टेम्परेचर नॉर्मल से 3 से 4 डिग्री सेल्सियस गिर सकता है। फिलहाल आज

मैक्सिमम टेम्परेचर 38 डिग्री सेल्सियस के आस-पास रहने की उम्मीद है, साथ ही उमस भी गर्मी महसूस हो सकती है।

शनिवार को दिनभर बादल छाए रहे और लोगों को उमस भी गर्मी का सामना करना पड़ा। ह्यूमिडिटी 74 परसेंट और मैक्सिमम टेम्परेचर नॉर्मल से 2 डिग्री ज्यादा के साथ 38.1 डिग्री दर्ज हुआ।

नवभारत टाइम्स | नई दिल्ली | शनिवार, 4 जुलाई 2015

## देश-विदेश

सामान्य से ज्यादा बारिश का प्रतिशत भी 27 से गिरकर 10 पर आया

मौसम एजेंसी ने भी ऐसी ही भविष्यवाणी की है। वैसे, मौसम से जुड़ी प्राइवेट एजेंसी स्काइमेट का अब भी कहना है कि जुलाई के शुरुआती दिनों में बारिश कम होने के बावजूद बाद में अच्छी बारिश होगी। पिछले साल भी मॉनसून गड़बड़ा गया था और इसका असर खरीफ फसलों के उत्पादन पर पड़ा था।

गत वर्ष उत्पादन में करीब 90 लाख टन की कमी आई थी। वहीं इस साल मॉनसून कमजोर रहने से पैदा होने वाले हालात से निपटने के लिए केंद्र सरकार ने आपात योजना तैयार की है। इसके तहत खेतों की सिंचाई के लिए डीजल में सब्सिडी दी जाएगी। किसानों को बीज खरीदने के लिए भी सब्सिडी दी जाएगी। साथ ही सूखा प्रभावित इलाकों में किसानों को मुफ्त बिजली देने की भी योजना है। इसके साथ खाद की कमी न होने देने के भी निर्देश दिए गए हैं।

क्षेत्र	वास्तविक	सामान्य	कमी या अधिकता
पूरा देश	198.3	180.7	10%
पूर्वी और उत्तर-पूर्वी भारत	370.1	381.1	-3%
उत्तर-पश्चिमी भारत	97.3	79	23%
मध्य भारत	211.4	183.1	15%
दक्षिणी प्रायद्वीप	194.5	173.1	12%

## 6 जुलाई से बारिश के संकेत

**अभी मध्य** भारत, देश के पश्चिमी राज्यों के कई इलाकों और उत्तर भारत के बहुत से क्षेत्रों में मौनसून में ठहराव आ गया है। दिल्ली और आसपास के इलाकों में भी बारिश नहीं हो रही है। यहाँ 6 जुलाई से बारिश होने के संकेत हैं। कर्नाटक और दक्षिण के कई और इलाकों में बारिश में कमी आ गई है। अभी पश्चिम बंगाल, ओडिशा, असम और उत्तर-पूर्व के कुछ इलाकों में बारिश हो रही है। इस बीच, मौसम

विभाग जहाँ जुलाई और अगस्त में कम बारिश की आशंका जता रहा है, वहीं स्काइमेट का कहना है कि जुलाई में भी अच्छी बारिश होगी, बेशक उसकी शुरुआत कुछ धीमी हो। बहरहाल, सैटेलाइट तस्वीरें बता रही हैं कि अरब सागर से भारत की ओर आने वाले बादलों की रफ्तार में कमी आई है। मौसम वैज्ञानिकों का कहना है कि अरब सागर से बादलों की रफ्तार में कमी की वजह अल नीनो प्रभाव हो सकता है।
