# NBT - 26 मई 2016 आज भी हो सकती है बारिश वीकेंड पर भी तेज हवाओं के साथ बारिश का अनुमान

■ नगर संवाददाता, नई दिल्ली

दिल्ली और आसपास के इलाकों में शनिवार से मंगलवार तक एकबार फिर मौसम का मिजाज बदल सकता है। मौसम वैज्ञानिकों के मुताबिक, इस दौरान आंधी के साथ बारिश होने की संभावना है।

इस दौरान, मैक्सिमम टेम्परेचर 40 से 41 डिग्री के आसपास रहने की संभावना है। बुधवार को दिनभर आसमान में बादल छाए रहे। मौसम विभाग ने अपने बुलेटिन में कहा कि गुरुवार को भी हल्की बारिश होने की संभावना है। बारिश के साथ आंधी चल सकती है। इस दौरान मैक्सिमम टेम्परेचर 40 डिग्री और मिनिमम टेम्परेचर 25 डिग्री सेल्सियस रहने का अनुमान है। सफदरजंग में तापमान नॉर्मल से दो डिग्री सेल्सियस कम के साथ 38.6 डिग्री दर्ज किया गया। मिनिमम टेम्परेचर नॉर्मल से एक डिग्री ज्यादा के साथ 27.4 डिग्री सेल्सियस दर्ज किया गया। हवा में ह्यूमिडिटी का स्तर 76 पर्सेंट था।

बुधवार शाम दिल्ली में 0.4-1 मिमी

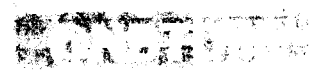

बारिश दर्ज की गई। आया नगर में 5.3 मिमी, स्पोर्ट्स कॉम्प्लेक्स में शाम 5:30 बजे तक 1 मिमी बारिश दर्ज की गई। पालम में भी बीते दो दिनों से मौसम के बदलते मिजाज का असर नजर आ रहा है। पालम में अधिकतम तापमान 39.8 डिग्री

दर्ज किया गया। सुबह से शाम तक दिल्ली के कई इलाकों में बारिश हुई। इसी तरह का मौसम गुरुवार को भी रहने की संभावना है। स्काइमेट के मौसम वैज्ञानिक महेश पलावत ने बताया कि दिल्ली में अभी पूर्वी दिशा से हवाएं चल रही हैं। इस कारण हवा

सुबह से शाम तक  
दिल्ली के कई इलाकों  
में बारिश हुई

में नमी ज्यादा है। अगले दो दिनों के दौरान नमी का स्तर बढ़ सकता है। इसके बाद शनिवार से मंगलवार के बीच एकबार फिर हल्की बारिश और आंधी की स्थिति बन सकती है। दिल्ली से सटे राज्यों के पास चक्रवाती हवाओं का सिस्टम बनने की उम्मीद है। साथ ही वेस्टर्न डिस्टर्बेंस भी उत्तर भारत में दस्तक देगा।

## Heatstroke kills boy in Gujarat; rain lashes several states

NEW DELHI, PTI & DHNS: Heat conditions prevailed in several parts of the country with Gujarat reporting another death due to heatstroke even as rain lashed several parts of Punjab, Haryana, Delhi and West Bengal on Tuesday.

A 14-year-old boy in Bhavnagar district succumbed to heatstroke. Temperature in several parts of Gujarat came down a wee bit with maximum mercury levels falling below 42 degrees Celsius. There was respite from heatwave conditions in Delhi and most parts of Punjab and Haryana as overnight rain, lightning and thundering, brought the mercury down in the region. The weather in West Bengal also remained pleasant with some parts having received good amount of rainfall since last evening.

## Rain in Maddur

Heavy rain accompanied by gusty winds lashed parts of taluk on Tuesday evening, reports DHNS from Maddur (Mandya district).

A few houses were damaged while roofs of several houses were blown away. A banyan tree was uprooted, killing a cow tied to it.

# In Akola village, everyone loves this farmer's dam

## Cultivators Allege Delay In Approval Of Many Projects

Bhavika Jain@timesgroup.com

**Mumbai:** The state government has announced several schemes for water conservation, but their implementation has been questioned by many. Many of the schemes don't even cover a fraction of the cost of the project, leaving the farmer to bear the rest; there have also been complaints of delays in approving projects.

The government officials of the district agriculture department helped Sanjay Tidke with expertise on how and which type of dam to construct. But other government officials began harassing him over the sand he was using for the project and filed police complaints against him for allegedly buying sand illegally. The construction of the dam started in March and after completion in the next 2 weeks will be ready to hold water this monsoon.

"On one hand the government is spending crores of rupees

**ONE-OF-ITS-KIND:** The village will benefit from Sanjay Tidke's project

to undertake water conservation projects, and on the other hand when a farmer is spending money from his own pocket to something for the village, the government officials still create problems," said Tidke.

After word spread about the dam being constructed, many farmer groups started visiting the site and helped him deal with the issues that government

officials would raise. The site has become very popular with farmers and government officials visiting it.

"It's a one-of-its-kind project. Not only Tidke, but the entire village will benefit from the project. Farmers will be able to grow a second crop using the water in the dam," said Santosh Gawai, member of a farmers' group from the neighbouring taluka.

## Children, women from tribal villages help water conservation

**MUMBAI:** In a unique initiative, village children, youngsters and women in tribal villages living around six tiger reserves in central India came out to provide water for wildlife.

Under the banner of Satpuda Foundation, they seek to clean and de-silt around 76 existing waterholes, build 38 new check dams and construct seven new waterholes.

"We have been regularly doing this since 2005. But with our spread in the Satpuda Landscape with the financial assistance of Born Free Foundation, the activity has taken a shape of community movement now after 11 years," Kishor Rithe, President of Sat-

puda Foundation, said.

"A total of 38 check dams were built during 2015-16 using locally available materials. These dams, mostly built on streams, help retain water and recharge the water table. Some of them provide drinking water to domestic animals and those close to forest provide water to wild animals," he stated further.

Volunteers comprising adult villagers, members of SHGs that we had mentored and children from village schools started building check dams after November 2015, Rithe said.

Anoop Awasthi, Assistant Director (Conservation) told that the foundation's water

conservation programme has also addressed the issue of human health and cleanliness.

"We dug a total of 45 soak pits across the landscape. The soak pits, dug next to wells/hand pumps in villages, collect spillover and run-off water and help recharge the water table, thereby addressing the human health and human-wildlife conflict issues," he said.

The foundation teams have been working in more than 120 buffer villages of Tiger Reserves like Pench Maharashtra, Pench Madhya Pradesh, Navegaon-Nagzira, Satpuda, Tadoba-Andhari and Kanha Tiger Reserve spread across the Satpuda landscape.

# Monsoon cheer as Australia signals end of El Nino

This could cause  
monsoon to spill over  
to October: Officials

**SPECIAL CORRESPONDENT**

**NEW DELHI:** Australia's weather bureau said the withering El Nino — among the strongest in history and responsible for two years of consecutive droughts and record summer temperatures in India — had ended.

While that bodes well for the monsoon, weather officials in India said this could also be a precursor to floods during August and September and monsoon possibly spilling over to October.

The Australian Bureau of Meteorology said on Tuesday

Met officials said it could also lead to floods. — PHOTO: AFP

that there was "...little chance of [sea surface temperatures] returning to El Niño levels, in which case mid-May will mark the end of the 2015-16 El Niño." Typically, an El Niño — marked by above-average temperatures in the Pacific — that begins to cool is followed by a neutral phase before transitioning into La Nina.

FROM PAGE ONE

## Australia signals end of El Nino

La Nina is a converse phenomenon of below-normal temperatures in the same region. The latter brings heavy rain over India. "Changes in the tropical Pacific Ocean and atmosphere, combined with current climate model outlooks, suggest the likelihood of La Nifia forming later in 2016 is around 50%," said the agency's press statement. "It's good news...there is a good chance that La Nina conditions will begin to show up in the second half of the monsoon. August could mean heavy rain and we might see some monsoon rain in October also," said Madhavan Rajeevan, Secretary, Ministry of Earth Sciences.

### Gains for agriculture

Private weather agency Skymet said on Wednesday that it expected all of the monsoon months, except June, to record rains well above what's usual and would translate into gains for agriculture.

"In 2016, the total area

under kharif food grains is expected to increase by 15 to 20% over last year. Accordingly, the kharif food grains production is expected to be around 129 to 130 million tonnes. Area under oilseeds including soybean, groundnut, pulses and rice may increase. Area under cotton may reduce marginally while total agricultural land under sugarcane may remain the same as the previous year."

According to the IMD's latest update, the monsoon is likely to set in on June 7 over Kerala. This was partly due to a depression in the Bay of Bengal that morphed into cyclone Roanu and brought heavy rains to Andhra Pradesh, Tamil Nadu and killed at least 20 in Bangladesh.

The monsoon-rain-bearing systems were yet to gain enough force to coast over India and though the El Nino was gone, it would take some time for its effect to spill over into the atmosphere and aid the monsoon, said Mr. Rajeevan.

## NGT wants report on Yamuna

Seeks reply from Art of Living, which held an event on the floodplains

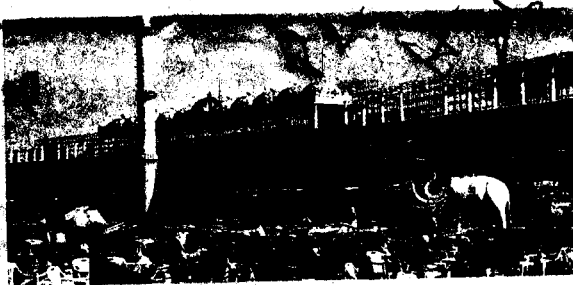

**BINDU SHAJAN PERAPPARAN**

**NEW DELHI:** The National Green Tribunal (NGT) has directed the principal committee — constituted to look into the rejuvenation of Yamuna's ecologically sensitive floodplains, after a three-day festival was organised there by the Art of Living foundation earlier this year — to inspect the site and submit a final report within two weeks.

A bench headed by NGT Chairperson Justice Swatanter Kumar on Wednesday also asked the foundation to file its reply within three days on an application, which had alleged that the spiritual guru had termed its earlier order as "politically motivated".

### No compensation yet

The bench asked Art of Living if it had deposited the environment compensation as directed by it on March 9 for damaging Yamuna's biodiversity. The counsel for the foundation said that it was ready to furnish the amount as bank guarantee

**COSTLY SHOW:** The Art of Living was fined Rs. 5 crore for organising a cultural event near the Yamuna. FILE PHOTO

instead of "payment of balance amount".

"Keep your bank guarantee with you," the bench said, while posting the matter for next hearing on August 2.

### Fragile ecosystem

On March 9, the green panel had given a go-ahead for the cultural extravaganza, but had imposed a fine of Rs. 5 crore on it as environmental compensation.

It had slapped a fine of Rs. 5 lakh on the Delhi Development Authority (DDA) and Rs. 1 lakh on the Delhi Pollution Control Committee (DPCC) for not discharging statutory functions.

The Tribunal's order had come on the pleas by NGOs and environmentalists, who had sought cancellation of the festival on the ground that it would seriously endanger the fragile ecosystem on the riverbed.

Meanwhile, the principal committee was constituted by the Tribunal for implementation of 'Mail' se Nirmal Yamuna Revitalisation Project 2017' and is headed by Secretary of Ministry of Water Resources.

It also comprises three experts members: Professor C R Babu, Professor A K Gossain and Professor Brij Gopal.

## NGT to panel: Assess damage to floodplain

HT Correspondent

■ hreporters@hindustantimes.com

**NEW DELHI:** The National Green Tribunal on Wednesday directed the principal committee, constituted for the rejuvenation of the Yamuna, to inspect the site on river floodplains where a three-day festival was organised by Art of Living.

The World Culture Festival in March had triggered a huge controversy. The foundation was accused of causing extensive damage to the eco-sensitive floodplain and the river while building the stage for the three-day extravaganza.

A bench headed by NGT chairperson Justice Swatanter Kumar ordered the committee to assess the damage caused to Yamuna floodplains and submit a final report within two weeks.

The committee was constituted by the tribunal for implementation of Maili se Nirmal Yamuna Revitalisation Project 2017 and is headed by secretary of ministry of water resources. It also has three experts members — Professor CR Babu, professor AK Gosain and professor Brij Gopal.

The green court asked the foundation to file its reply within three days on an application which had alleged the spiritual guru had termed its earlier order as "politi-

cally motivated".

A foundation spokesperson said the Art of Living was ready with replies to applications on enzymes and alleged statements by Sri Sri to a section of media.

"The NGT gave three more days to file the replies. The allegation by Manoj Misra regarding Sri Sri's comment on the NGT order are baseless. The petition was based on unverified newspaper reports. The Art of Living has the video of the speech that clearly shows that no such comment was made by Sri Sri. It was yet another malafide attempt by Misra to malign and tarnish his image by false claims," the statement said.

The tribunal asked whether the foundation has deposited the environment compensation as directed on March 9 for damaging Yamuna's biodiversity. The Art Of Living counsel replied that it was ready to furnish the amount as bank guarantee instead of "payment of balance amount".

"Keep your bank guarantee with you," the bench said, while posting the matter for August 2.

On March 9, the NGT ordered an initial "environmental compensation" of ₹5 crore on Art of Living. The rest of the fine amount, it said, would have to be decided after a committee assessed the damage to the floodplain.

## Met predicts rain over weekend

TIMES NEWS NETWORK

**New Delhi:** After a good spell of rain and thunderstorms that brought down Delhi's temperature by about 9 degrees over the last few days, the Met department has predicted another spell of rain over the weekend. Meanwhile, parts of the city saw light rain on Wednesday evening while IGI Airport reported a squall between 4.45 pm and 5.30 pm with wind speed of about 90 kmph.

"We have predicted that

thunderstorms, accompanied with squall, are likely to occur at isolated places over Punjab, Haryana, Delhi and Uttar Pradesh over the weekend," said a Met official.

For Delhi, a partly cloudy sky with possibility of rain and thunderstorm are in the pipeline even in the beginning of next week. "From May 26, the partly cloudy sky will start becoming mainly clear. The mainly clear sky will start becoming partly cloudy from May 28 onwards. Dust

storm and thunderstorm are likely to occur between Saturday and Tuesday," said the Met department.

The maximum and minimum temperatures are expected to rise by 1-2 degrees over north-west and central India over the next two days. Wednesday's maximum temperature was 38.6 degrees Celsius, two degrees below normal while the minimum was 27.4 degrees Celsius, one degree above normal. Humidity ranged between 39% and 76%.

## जल संकट दूर करने को खुद ही बांध बनाया

मुंबई। महाराष्ट्र के अकोला जिले के एक किसान संजय तिडके ने जल संकट को दूर करने के लिए न सिर्फ अपना 10 एकड़ खेत बेच दिया, बल्कि अपनी बची जमीन पर अपने ही पैसे से बांध तैयार किया है। सरकारी बांधाओं से निपटते हुए बनाए गए इस बांध के पानी का इस्तेमाल अब गांव के किसान करेंगे और पशु-पक्षी भी अपनी प्यास बुझा पाएंगे।

जिले के सांघवी दुर्गवाड गांव के रहने वाले 42 वर्षीय संजय राज्य सरकार की जलयुक्त शिवार योजना से प्रभावित हुए थे। उन्होंने बाघजाली स्थित अपनी 40 एकड़ जमीन में से 10 एकड़ जमीन बांध बनाने के लिए बेच दी। इससे मिले 55 लाख में से 20 लाख रुपये बांध पर खर्च किए। बांध की 15 फुट ऊंची और 250 फीट लंबी दीवार खड़ी हो गई है। बांध फीसदी काम बचा हुआ है, जो इस साल बारिश होने से पहले पूरा हो जाएगा। (वि.सं.)

## Rains lash Capital, max temp 38.6

ST-26  
P-2

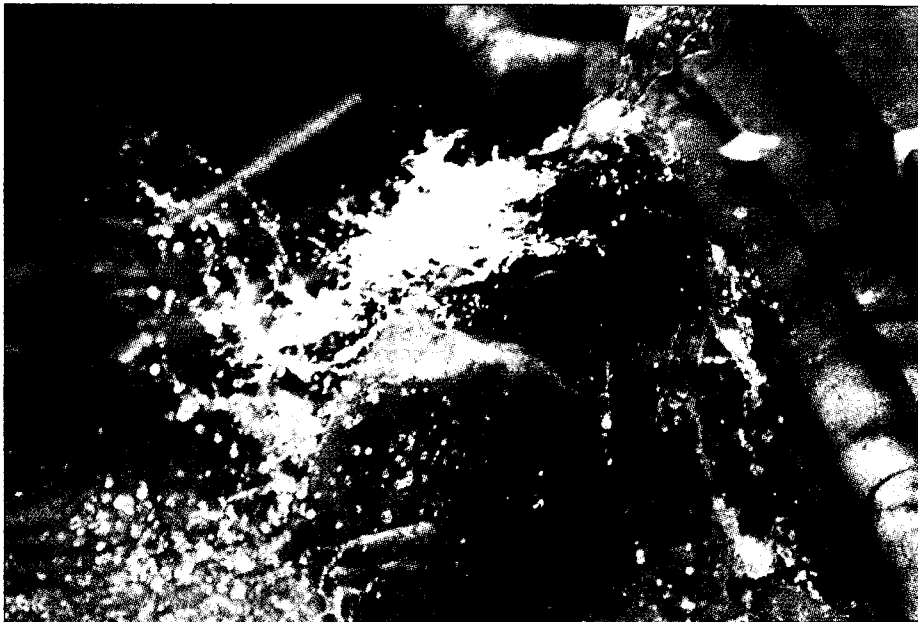

### PRESS TRUST OF INDIA

New Delhi, 25 May

Rains accompanied by a thunder squall lashed the national capital this afternoon while hailstorm was reported from one area of the city as the maximum temperature settled at 38.6 degrees Celsius.

According to the MeT department, the Safdarjung weather station, the figure of which is considered the official figure for the city, recorded 0.4 mm rainfall while areas under Palam, Ayana-gar and Ridge observatories recieved 0.8 mm, 8.9 mm and 0.4 mm rainfall respectively till 5.30 PM.

The weather station at Lodhi Road recorded traces of rainfall in the same period. The showers were accompanied by strong winds measuring up to 60 km per hour at the Safdarjung observatory and 92 km per hour at Palam, said a MeT

A child takes bath in the Capital on Wednesday. \* Ayush Goyal

department official.

He further informed that a hailstorm occurred in south Delhi's Aya Nagar

area from 6.45 PM which lasted till 6.52 PM.

"The maximum and minimum temperatures in the

national capital were recorded at 38.6 and 27.4 degrees, respectively," said the official.

## बारिश ने ठंडे किए गर्मी के तेवर <sup>RR-P.6</sup>

**नौतपा : पहला दिन**  
ग्वालियर, जबलपुर,  
सतना और बालाघाट  
जिलों में आंधी-तूफान  
के साथ ओलावृष्टि

भोपाल. भीषण गर्मी से बेहाल प्रदेश में नौ तपा के पहले ही दिन बादलों ने जहां भोपाल समेत कई शहरों में सूरज को तमतमाने से रोक दिया। वहीं, ग्वालियर, जबलपुर, सतना, बालाघाट में आंधी-तूफान के बाद हुई बारिश और ओलावृष्टि ने नौतपा के तेवर ठंडे कर दिए। तो वहीं बालाघाट जिले में तेज आंधी-तूफान के साथ ओलावृष्टि हुई। पेड़ गिरने से तार व खम्भे टूटकर गिर गए। जिसकी वजह से जिला मुख्यालय में पांच घंटे से भी अधिक समय तक विद्युत आपूर्ति ठप रही। वहीं तीन ग्रामीण घाल्य हो गए।

### विजली गिरने से 3 बच्चों की मौत

सतना. विध्य क्षेत्र में बुधवार को आंधी-तूफान ने सिंगरौली से पन्ना तक तबाही मचाई। बिजली गिरने से सीवा में तीन बच्चों की मौत हो गई। पन्ना, सतना, सीवा, सीधी से लेकर सिंगरौली तक आंधी ने बहुत नुकसान पहुंचाया है।

#### होशंगाबाद में बादल छाप

आसमान में बादल छाप रहे, तेज हवा भी चली। बादलों के चलते पारे में मामूली उछाल दर्ज किया गया। अधिकतम तापमान 41.5 डिग्री दर्ज हुआ।

#### जबलपुर में एक की मौत

दोपहर में आंधी के बाद जबलपुर सहित नरसिंहपुर, कटनी और दमोह में लगभग एक घंटे तक तेज बारिश हुई। कटनी जिले में एक मजदूर की मौत हो गई।

#### ग्वालियर में बारिश

ग्री मानसून एक्टिविटी के कारण बारिश हुई। तबल छाप रहे, जिससे लोगों को गर्मी से राहत मिली। अधिकतम तापमान लुढ़ककर 36 डिग्री पर पहुंच गया।
