

Lashed by rain, ship in Goa begins to sink

- A cruise vessel, docked near Mormugao Port Trust in Vasco town of Goa for repairs, ran aground on Wednesday following ingress of water due to heavy rains
- The MV QING, which can hold over 800 passengers, is a cruise ship which belonged to the Sahara Group and was brought to the local port in Vasco in 2014
- It was to be converted into a floating hotel
- The vessel was chartered to Trinity Leisure, which had berthed it at Western India Shipyard for repairs
- The ship's agent Sunil Prabhu said the authorities swung into action as the ship began tilting precariously
- "We were about to shift the ship to some other shipyard for repairs and conversion into a floating hotel after this monsoon," he said
- Coast Guard DIG Manoj Badkar said: "I believe that it was brought for some repairs which never started and since Tuesday evening the ship started reporting water ingress."

Efforts are on to salvage the cruiseliner ship 'MV QING' of Sahara India Pariwar that started sinking at Western Shipyard Limited at Mormugao Harbour in Vasco, Goa, on Wednesday. PTI

Gusty winds uproot trees; two killed

The house of 4-year-old Jeevan (inset) who died when a tree fell on him at Viveknagar on Monday. DH PHOTO

nounced a compensation of Rs one lakh each to the families of both the victims.

30 trees crash

The BBMP was flooded with complaints about 30 trees falling across the city as winds blew at a speed of 59 km per hour on Monday afternoon.

Officials of the India Meteorological Department attributed the phenomenon to local factors such as rise in the temperature and humidity. "Normally, such a thing occurs during pre-monsoon showers when the winds are dry. But occurrence of such winds is not a rare phenomenon during monsoon showers. The rain on Monday was just 8mm. This wind will have no impact on the rains, clouding and monsoon," IMD Bengaluru Director-in-charge, S M Metri said.

Tree uprooting was reported at Jeevan Bima Nagar, Rajarajeshwari Nagar, Mahalakshmi Layout, Richmond Circle, Basavanagudi, Koramangala and other areas.

DH News Service

Gusty winds, from Page 1

"Swamy has blunt injuries. He has injuries to the shoulder joint and abdomen. He is being treated in the emergency ward. He is doing fine and is kept under observation," he said. The patient would be discharged on Tuesday, he added.

Police said the tree fall could have been more deadly had it happened seconds before when a jam-packed BMTC bus left there. The accident jammed traf-

fic for almost an hour. Vehicular movement was restored only when the tree was removed.

Second incident

In another incident, a child died after sustaining massive head injuries when the branch of a tree fell on him while he was playing in front of his house on Vivekanagar 7th main road around 12.30 pm. Jeevan was rushed to Nimhans where he succumbed to his injuries.

The state government has an-

Widespread, heavy rains batter state

BENGALURU, DHNS: With the monsoon gaining momentum, heavy rains continued to lash several parts of the state on Monday.

Copious rains lashed several parts of Shivamogga district. Shivamogga, Bhadravathi, Hosanagar, Sagar received good spell of rains throughout the day. Rainwater gushed into several houses in low-lying areas of the city. Shikaripur and Sorab also received good spell of rains. Water level in Linganamakki dam witnessed slight rise to 1,754.85 feet (maximum level: 1,819 feet)

Incessant rain lashed parts of Dakshina Kannada and Kodagu districts. Heavy rains coupled with gusty winds brought down a tree on a moving truck, killing a man at Odabai in Sullia. In the last 24 hours, DK district recorded 52.5 mm of rainfall. Sea erosion has intensified in Ullal and Uchchila region. As many as 23 houses are facing the threat in the region.

Kodagu district received moderate rains. With Talacauvery region experiencing good rainfall, water-level at Sangama in Bhagamandala has increased by one foot. Heavy rains lashed Kalasa in Chikkamagaluru. There was moderate rains in Mysuru.

There were reports of intermittent rains in Uttara Kannada

(Above) Coconut trees washed away due to sea erosion at Ullal in Dakshina Kannada district. (Left) Children struggle on a waterlogged road in Hosapete, in Ballari district.

district. However, Karwar received uninterrupted rains for more than two hours. In the last 24 hours, the district recorded 589 mm of rains.

There was widespread rain

in Haveri district. Several roads in Haveri town were waterlogged as stormwater drains have been clogged.

Heavy rains lashed Dharwad and surrounding areas towards

noon, throwing normal life out of gear. It rained for more than two hours in Hubballi. There was only a drizzle in Belagavi and surrounding areas.

It rained heavily in Hosapete for more than two hours. Water had stagnated on several roads affecting movement of vehicles. Students had to wade through knee-deep water to reach their houses. Raichur received heavy rains for about 45 minutes in the noon.

Gusty winds uproot trees; two killed

BENGALURU: Two people were killed and another injured in separate incidents in the city as a tree, uprooted by gusty winds and rain, crashed on them on Monday.

Fairoz Pasha, a mid-day meal contractor, died on the spot when a tree fell on his motorcycle in Malleswaram.

He was riding to the local Block Education Office to clear pending bills when a tree near the footpath of Kendriya Vidyalaya at Malleswaram 18th Cross got uprooted and fell on his two-wheeler, police said. The crash was so powerful that

Pasha's helmet broke into two.

In the second incident, Swamy, who was driving to Malleswaram, sustained injuries as the tree fell on his car. Both men were taken to the KC General Hospital. Pasha's body was handed over to his relatives after the post-mortem.

Dr Manjunath, medical superintendent of the hospital, said one of the victims was brought dead, while the other sustained minor injuries.

Meanwhile, a child died after a branch fell on him in Viveknagar.

Jams clog city's roads as rains wreak havoc

■ HMR work, weather and lack of monitoring add to commuter woes

DC CORRESPONDENT
HYDERABAD, JUNE. 28

Overnight heavy rain followed by continuous drizzling on Tuesday caused traffic jams on many roads in the city. The ongoing works of Hyderabad Metro Rail, closure of junctions with a provision for U-turn a furlong ahead, rain water stagnation on some of the roads and lack of monitoring by traffic police at the junctions added to traffic jams.

It was literally a gridlock as vehicular traffic came to a complete halt from Afzalgunj to High Court Road, having its impact on surrounding corridors too. "We are stuck in the traffic jam for more than an hour. There was no prior information that the traffic is being diverted due to protest by lawyers at the high court. I am a lawyer, too. We have been put to inconvenience, which could have been avoided," said an advocate stuck up in traffic jam near the high court.

A long row of cars stood in queue up to the high court from Madina crossroads. Only those whose cases were listed were allowed into the court premises, that too after checking their identity. The queue of cars increased, adding to the gridlock. DCP (traffic) AV Ranganath who was personally involved in clearing traffic jams at high court road said they cleared the traffic jam by afternoon.

Meanwhile, vehicular traffic moved at snails pace in Kukatpally, Hitec City Road and Sangeet Crossroads to Begumpet and to Jubilee Hills. "God knows when this metro rail works would be over. The pillars are on the middle of the road narrowing down the carriage way. The mud from the dug-up area for installation of metro pillars is extending to the road. There is a risk of vehicles skidding, and one has to ride very carefully during the rainy season," said KS Goud, a medical representative and resident of Mayur Marg.

The roads dug up by various agencies like Hyderabad Metropolitan Water Supply and Sewerage Board and APTransco at Minister's Road, Srinagar Colony and other places in the city only added to the woes of motorists.

Commuters avoid potholes filled with water as they wait for buses in the city. Two days of heavy rain have brought the city to a standstill as widespread chaos was reported from several area

No new water cuts, but rain yet to reach catchment area

Tue Downpour Again Hits Rail & Road Traffic

Richa.Pinto@timesgroup.com

Mumbai: Heavy rain and potholed roads created severe traffic snarls on major roads across the city on Tuesday, with delayed trains especially on Central Railway adding to commuters' woes. Despite rain in the city, water stocks in the catchment areas are yet to rise significantly, though the good news is that the BMC has decided not to increase the 20% water cuts for now.

BMC imposed a 20% water cut last August owing to a poor monsoon. This year, the monsoon is yet to pick up in catchment areas of Bhatsa, Tansa, Middle Vaitarna and Modak Sagar, most of which are in Nashik. "Parts of Madhya Maharashtra like Nashik, Pune, Malegaon are yet to record heavy rains. So far the Konkan and Goa belt is receiving good showers," said V K Rajeev from IMD Mumbai.

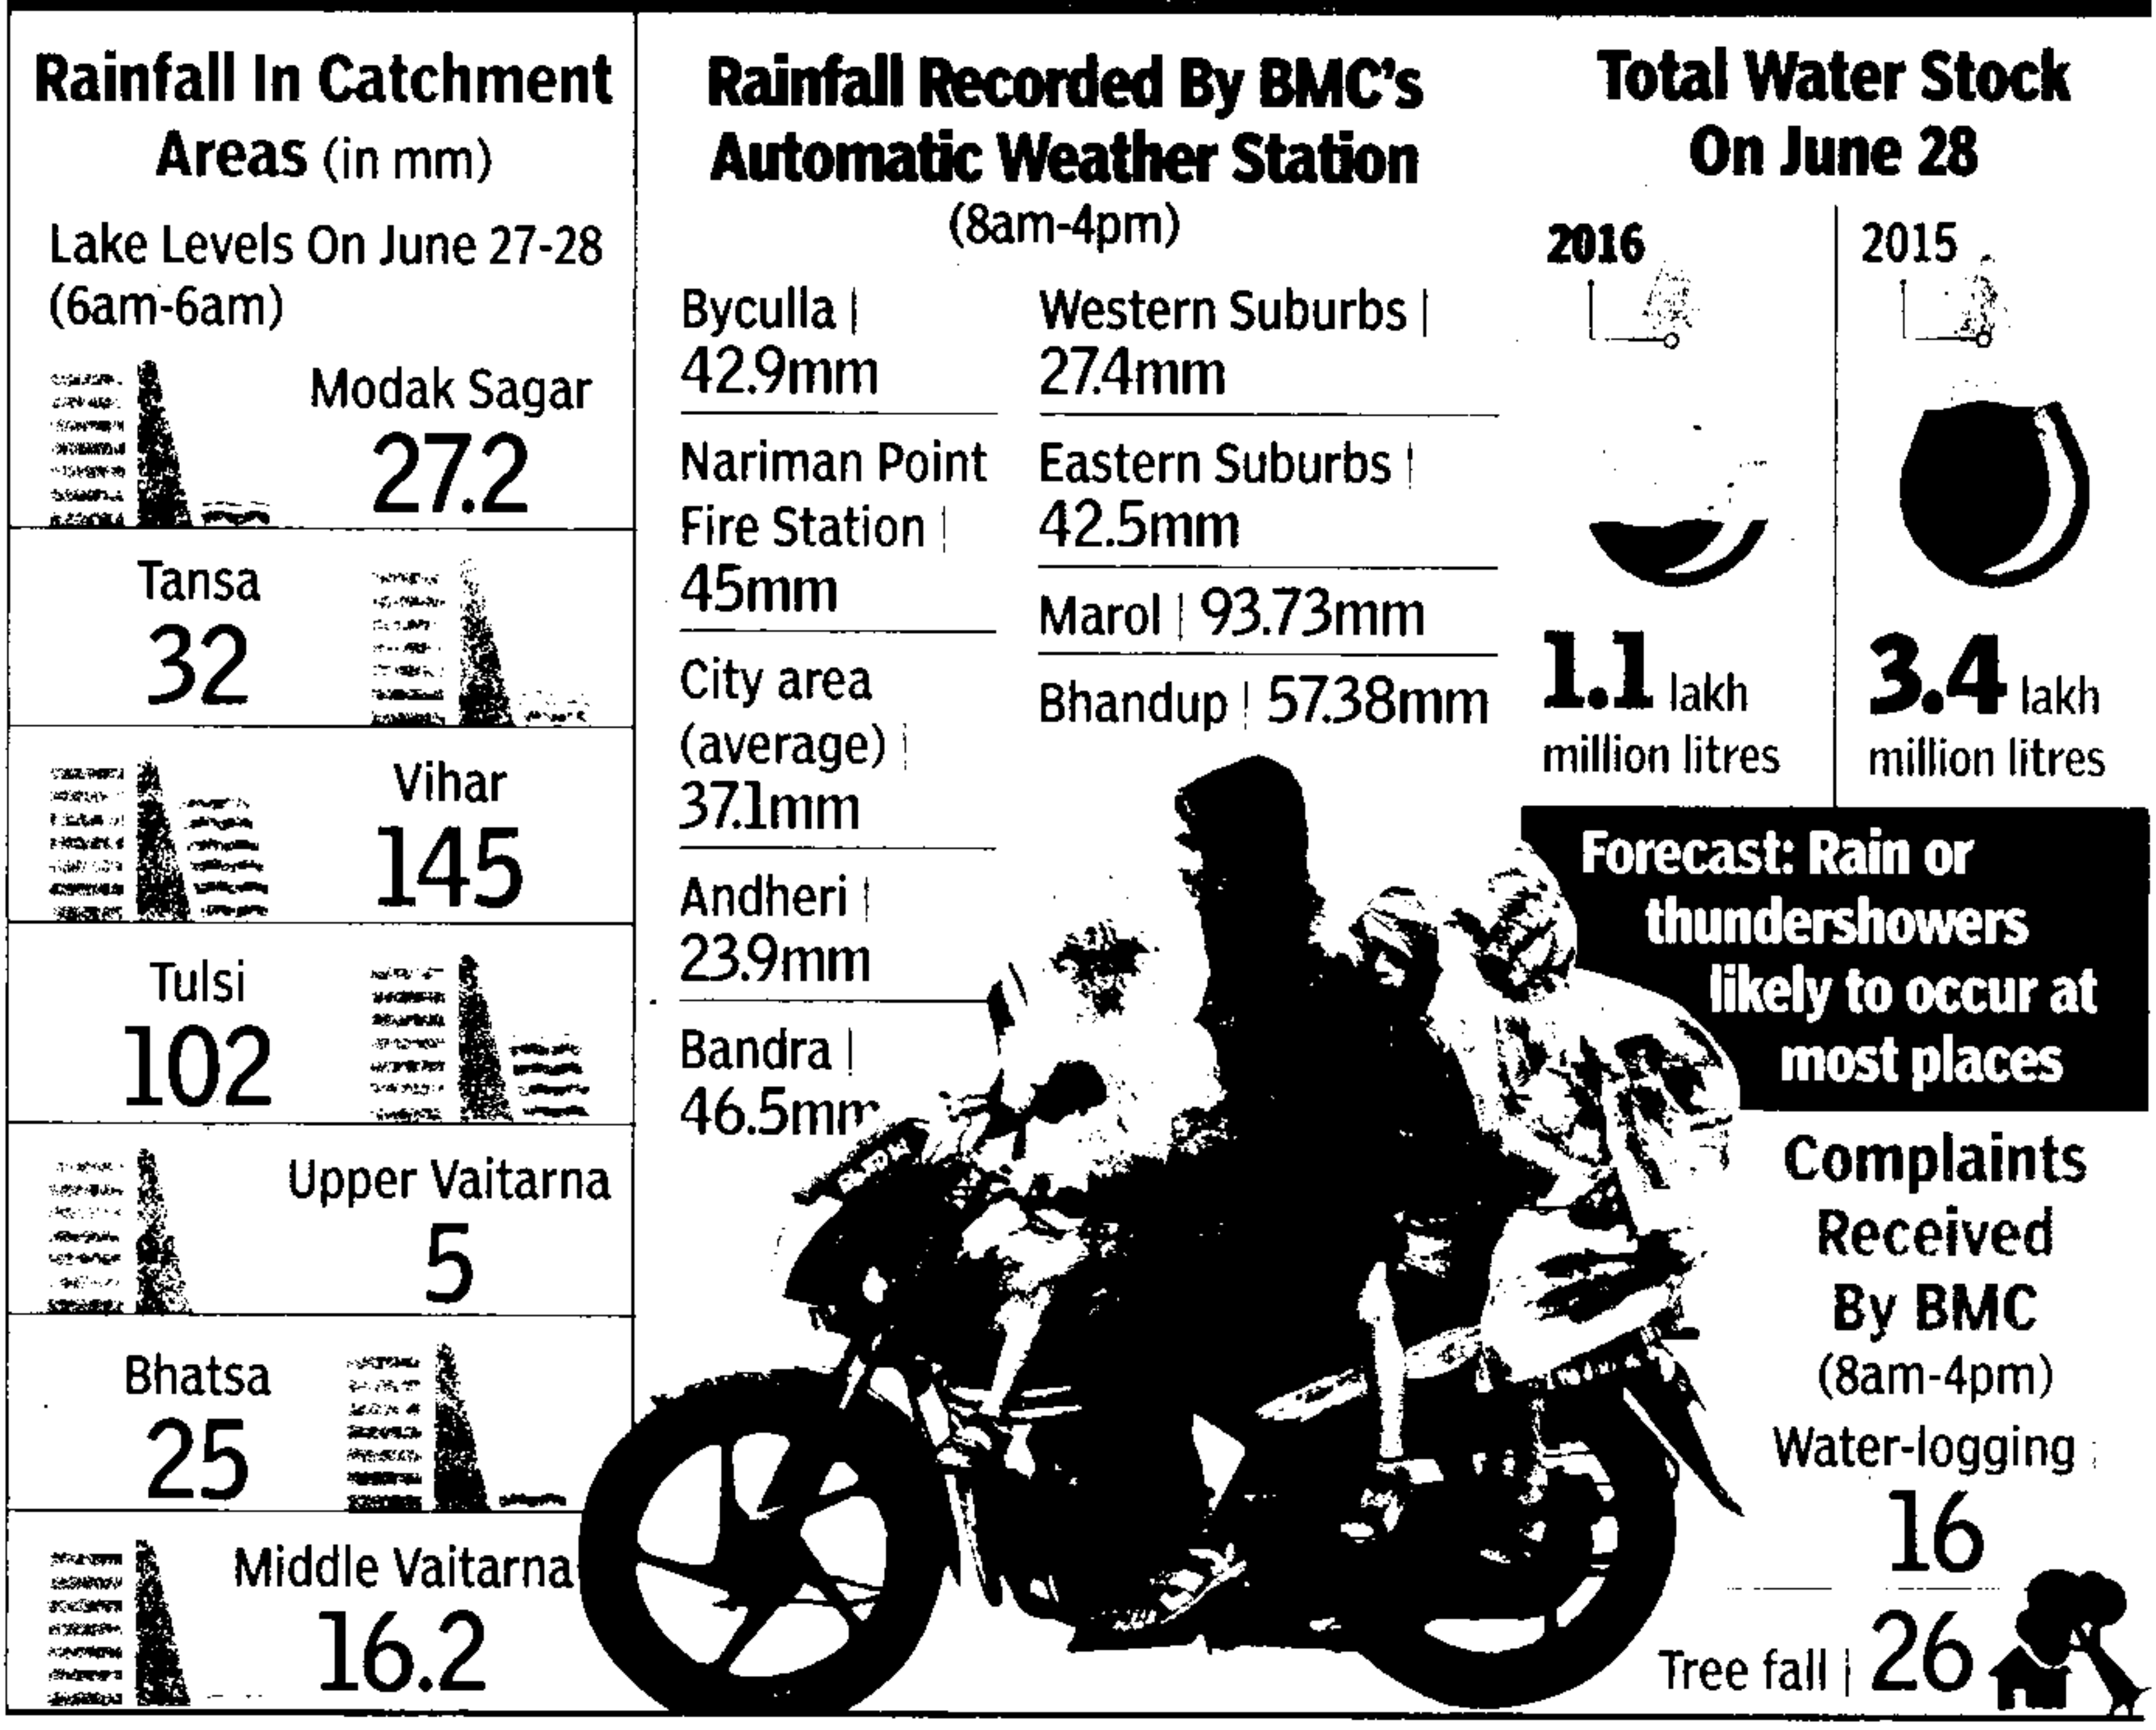

Deputy municipal commissioner Sudhir Naik said, "There are no instructions from the municipal commissioner yet on water cuts. We hope rain over the lakes will improve in coming days."

Total rainfall recorded so far by the IMD Santa Cruz observatory from the beginning of the month has been 577.8 mm which is 108.4mm above normal. But the Colaba observatory received 432.3 mm, which is 76.6 mm less than what should have been recorded so far.

Tuesday's rain affected train services on all lines and a commuter who took a CST-bound train from Dadar said there were no fast trains for at least half an hour. Another commuter from Navi Mumbai said trains on the Harbour line were running late and virtually crawled between Kurla and Reay Road stations. On Western Railway too, commuters said trains ran around 30 minutes late. However, the Railways denied any delays and said all services were operated

Tree fall affects trains to Gujarat

A tamarind tree fell on the tracks between Kelwe and Palghar stations, affecting long-distance trains on Tuesday evening as the OHE was damaged. Trains towards Surat were hit like the Rajdhani Express, Saurashtra Janta, Flying Rane and the Valsad Passenger. TNN

The roads offered no respite and congestion was reported on Western Express Highway, Santacruz-Chembur Link Road, Andheri-Kurla Road, Eastern Express Highway

Negligible rain in Nashik, 86 talukas

Eighty-six talukas across Maharashtra got between 0-25% rainfall, with Nashik among the worst affected as 10 talukas there received negligible rainfall. A large quantum of Mumbai's water supply comes from Nashik district. The state's reservoirs have only 9% water stock. TNN

near Sion, Dadar TT to King's Circle flyover, Sion-Bandra Link Road, Bharatmata signal, Eastern Freeway, Khetwadi from Bhuleshwar to Girgaum Chowpatty, Saki Vihar

Road, SV Road from Khar to Bandra, GPO junction, Hindmata to Sion, Linking Road towards Bandra and JJ flyover.

"Loose paver blocks, potholes and uneven surface on JVL towards SEEPZ is slowing traffic," a motorist tweeted at 8am. "It took 25 minutes to drive from Kandivli (E) to Malad (E), a distance of 3km," a homemaker said. In the evening, it took over 40 minutes to cover the distance from Goregaon to Andheri on the WEH as broken down vehicles led to snarls. Residents said potholes were being filled on WEH during heavy traffic movement.

Monsoon to hit Punjab, Haryana in 2 to 3 days: IMD

NEW DELHI: The Southwest Monsoon is likely to hit the national capital, Punjab and Haryana in next 2-3 days as it picks up pace and advances further to parts of northwest India, the IMD said on Wednesday.

A deep depression in the Arabian Sea off Gujarat coast had affected the pace of the southwest monsoon and taken away a lot of moisture.

"But the depression will not have a long term impact on monsoon. Even Gujarat has started receiving good rains now.

Over the next 2-3 days, monsoon will again spread to parts of northwest India. This include Haryana, Punjab, Delhi and a large part of Rajasthan. The progress of

monsoon will be speedy now," Director General of India Meteorological Department (IMD) Laxman Singh Rathore said.

So, monsoon is expected to arrive in the national capital in next 2-3 days now. The normal date for monsoon to hit Delhi is June 29.

The Northern Limit of Monsoon (NLM) now passes through Dwarka, Vallah Vidyanagar, Sawai Madhopur, Gwalior, Lucknow, Pantnagar, Dehradun, Una and Jammu, the IMD said.

Meanwhile, overall rainfall deficiency in the country has reduced to 13 per cent. Deficiency in east and northwest India hovers around 26 per cent while in central India it is around 23

per cent.

However, the positive side is formation of a low pressure area in the Bay of Bengal. This is expected to bring in more rains along the eastern coast.

The IMD has also forecast heavy to very heavy rainfall in several parts of the country.

"Heavy rain very likely at isolated places over MP, Odisha, CAP, Telangana, North and south interior Karnataka and Andaman & Nicobar Islands during next 24 hrs. Heavy to very heavy rain very likely at isolated places over Vidarbha, Chattisgarh, Konkan & Goa, Coastal Karnataka and Kerala during next 24 hrs (sic)," the IMD tweeted. - PTI

उत्तराखंड में बारिश, भूस्खलन

देहरादून. उत्तराखंड में भारी बारिश एवं भूस्खलन की वजह से कई सड़क मार्ग अवरुद्ध हो गए हैं। अवरुद्ध मार्गों में केदारनाथ राजमार्ग और बस्तीनाथ राजमार्ग शामिल हैं। यहां यातायात सुचारु करने की कोशिशें जारी हैं। क्योंकि इनके बंद होने से चार धाम यात्रा के कई तीर्थयात्री फंसे हुए हैं। अल्मोड़ा, पौड़ी, उत्तरकाशी, देहरादून, चंपावत और नैनीताल में अलर्ट है।

मानसून ने पकड़ी रफ्तार

नई दिल्ली, (भाषा): दक्षिण पश्चिमी मानसून अगले दो-तीन दिन में राष्ट्रीय राजधानी पहुंच सकता है क्योंकि मानसून ने अब गति पकड़ ली है और उत्तर पश्चिमी भारत की तरफ बढ़ रहा है। गुजरात के तट के पास अरब सागर में गहरे दबाव का क्षेत्र बनने से दक्षिण पश्चिमी मानसून की गति प्रभावित हुई थी और काफी नमी खत्म हो गई।

भारतीय मौसम विभाग के महानिदेशक लक्ष्मण सिंह राठौर ने कहा, "लेकिन दबाव का मानसून पर ज्यादा लंबा प्रभाव नहीं पड़ेगा। गुजरात में भी अब अच्छी बारिश रही है। अगले दो-तीन दिन मानसून फिर उत्तर पश्चिम भारत की तरफ अग्रसर होगा। इसमें हरियाणा, पंजाब, दिल्ली और राजस्थान बड़ा हिस्सा शामिल है।"
