1.0 Rainfall Situation

Chief Amount of rainfall recorded at 0830 hours IST of today (50 mm or more) as per IMD

Name of Place(State)	Rainfall (in mm)
NIL	NIL

2.0 SYNOPTIC SITUATION: as per IMD dated: 08.10.2019

In view of the likely persistence of an anticyclonic circulation in the lower tropospheric level over northwest India, gradual reduction in moisture in the lower & midtropospheric levels and reduction in rainfall, conditions are becoming favourable for commencement of withdrawal of Southwest Monsoon from some parts of northwest India during next 2 days.

The trough from interior Odisha to Telangana now runs from Telangana to Comorin area across Rayalaseema & Tamilnadu and extends upto 0.9 km above mean sea level.

The cyclonic circulation over Odisha & neighbourhood now lies over south coastal Odisha & neighbourhood and extends upto 4.5 km above mean sea level.

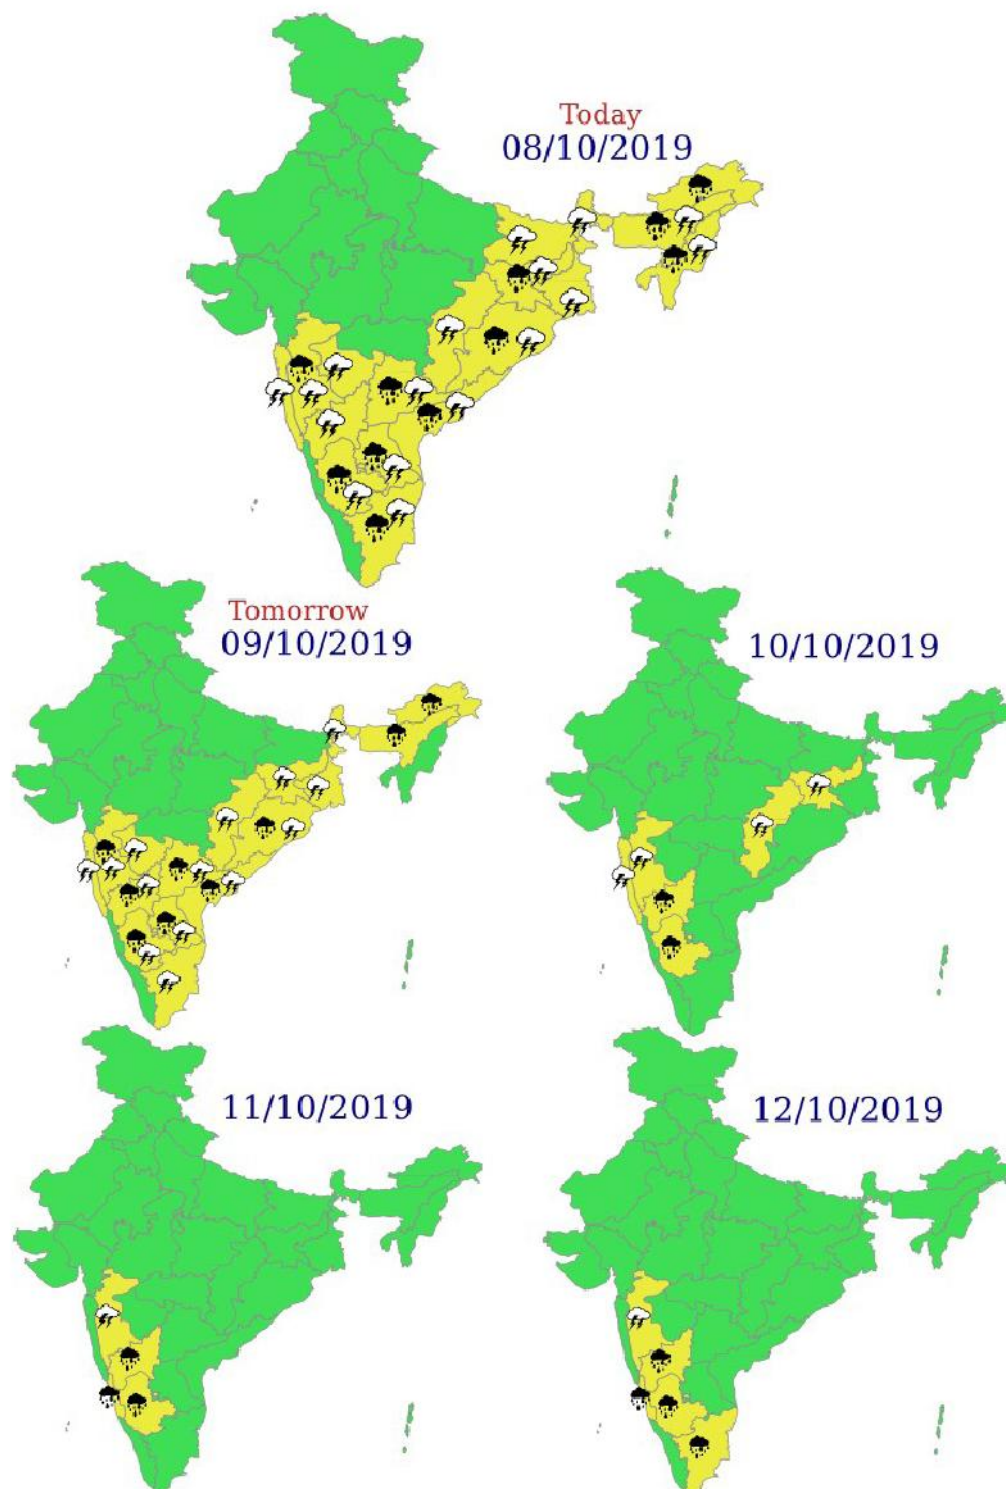

The cyclonic circulation over interior Odisha & neighbourhood has merged with above cyclonic circulation over south coastal Odisha & neighbourhood.

The Wind Discontinuity from south Kerala to Madhya Maharashtra across interior Karnataka at 1.5 km above mean sea level has become less marked.
