### CWC Inference:-

**QPF as received from IMD is given above. Light rainfall (11-25 mm) is predicted in sub catchments of Upper Godavari, Manjira, Purna, Lower Godavari on Day 1, Upper Godavari, Indravathi and Sabari on Day 2, Indravathi on Day 3, Upper Godavari and Indravathi Day 4, Upper Godavari Day 5 of Godavari Basin.**

**Moderate rainfall (26.0-37.0 mm) is predicted in sub catchments of Middle Godavari, Maneru, Indravathi and Sabari on Day 1 of Godavari Basin.**

**Remaining catchments will receive very light rainfall (0.1-10mm) for the remaining days.**

***Waterlevels may rise slowly from Day 1 to Day 5 due to rainfall in sub catchments of Godavari Basin. As PVNRaoKantapally (Sammakka Barrage), is passing (7,50,000 Cusecs) water due to inflows into the barrage, the same will reach downstream and water levels of downstream sites will rise, hence it is advised that the sites from Perur to Dowlaiswaram to be watchful. Some of the sites may cross Warning Level by tomorrow morning.***
