

# **Central Water Commission Daily Flood Situation Report cum Advisories** 15-09-2021

#### **Rainfall Situation** 1.0

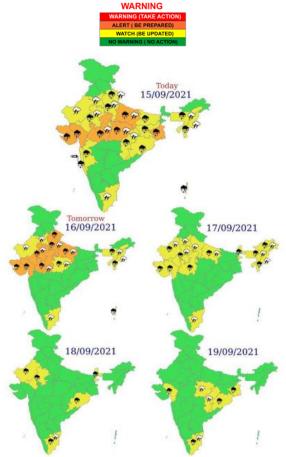

Notes: a) Small figures indicate actual rainfall (mm), while bold figures indicate Normal rainfall (mm)

b) Percentage departures of rainfall are shown in brackets

#### 1.2 Rainfall forecast for next 5 days issued on 15th September, 2021 (Midday) by IMD

Very Heavy Rainfall over Gujarat State, West Madhya Pradesh and East Uttar Pradesh on 15th&16th; East Madhya Pradesh and Gangetic West Bengal on 15th; over Uttarakhand, East Rajasthan & West Uttar Pradesh on 16th September 2021.

#### 2.0 Flood Situation and Advisories

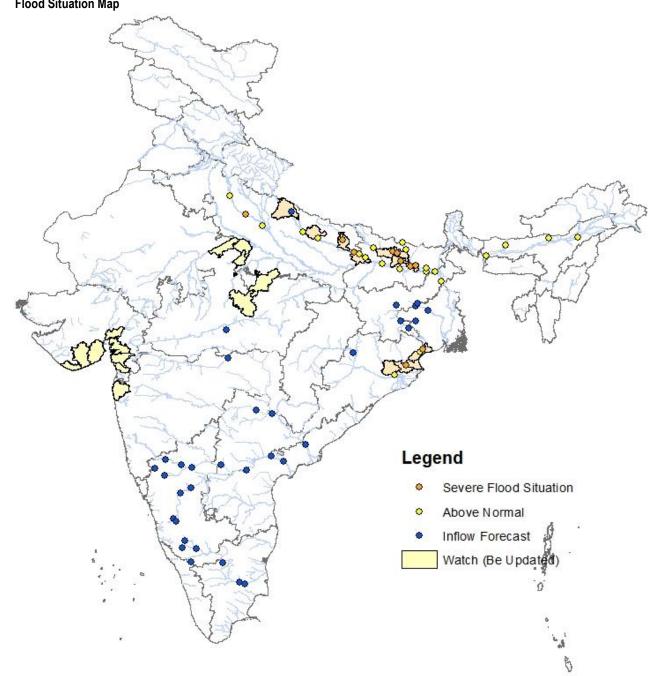

#### 2.1 Summary of Flood Situation as per CWC Flood Forecasting Network

On 15th September, 2021, 11 Stations (6 in Bihar, 3 in Uttar Pradesh, 2 in Odisha) are flowing in Severe Flood Situation and 21 stations (9 in Bihar, 4 each in Assam & Uttar Pradesh, 2 in Odisha and 1 each in Jharkhand & West Bengal) are flowing in Above Normal Flood Situation. Inflow Forecast has been issued for 34 Barrages & Dams (13 in Karnataka, 5 in Jharkhand, 4 in Andhra Pradesh, 3 each in Tamilnadu & Telangana, 2 in West Bengal and 1 each in Madhya Pradesh, Maharashtra, Odisha & Uttar Pradesh).

PART - I: LEVEL FORECAST							
S.No.	S.No. Flood Situations						
Α	Extreme Flood Situation: (Site (s) where the previous Highest Flood Level (HFL) is exceeded or equalled)	0					
В	Severe Flood Situation:  (Site (s) where water level is touching or exceeding the Danger Level but below Highest Flood Level (HFL))	11					
С	Above Normal Flood Situation:  (Site (s) where water level is touching or exceeding the Warning Level but below Danger Level)	21					
Total number of sites above Warning Level ( A+B+C)							
PART - II: INFLOW FORECAST							
Number of (Where Infle	34						

Details are given at link: http://cwc.gov.in/sites/default/files/cwcdfb-15.09.2021\_5.pdf

# 2.1.1 Flood Situation Map

## 2.2 CWC Advisories

# 2.2.1 Brahmani, Baitarni, Subernrekha, Damodar, Mahanadi & Godavari Basins

## 2.2.1.1 West Bengal

Water level rise is expected in the rivers such as Kasai, Damodar, Silai, Ajoy, Subernarekha, etc. Hence alert may be kept in districts **Birbhum**, **Puruliya**, **Bankura**, **Pashchim Medinipur**, **East Medinipur**, **Jhargum & Pashchim Bardhaman**.

#### 2.2.1.2 Odisha

Since the low pressure system has travelled past Odisha, rainfall has reduced considerably over the region and hence water level in rivers such as Brahmani, Baitarni, Mahanadi are in deceasing trend. Currently, river Jalka of **Subarnarekha basin in Balasore** district and river **Baitarni in Bhadrak** district are flowing in severe flood situation with steady/falling trend. River **Mahanadi** in **Cuttack** district is flowing in above normal flood situation with falling trend.

#### 2.2.1.3 Chhattisgarh

Water levels of river Mahanadi and its tributaries are still in rising condition in most of the districts. Since rainfall has deceased over the regions it is expected that Mahanadi river will also start falling in next one or 2 days. Godavari river and its tributaries are in falling condition.

## 2.2.2 West Flowing Rivers from Tapi to Tadri, Tapi, Damanganaga

#### 2.2.2.1 Maharashtra

Independent rivers originating from Western Ghats: IMD has predicted strengthening of monsoon current due to presence of low pressure area and hence heavy rainfall are expected over Western Ghats. Hence, there is likelihood of water level rise in rivers originating from Ghat regions such as Gad, Kajvi, Khadapar, Madai, Savitri, Kal, Vashisti, Bav, Wagh & Bogeshwari in next 2 days. Alert may be kept in **Palghar** district.

<u>Daman Ganga Basin:</u> Alert may be kept in **Nasik** district.

## 2.2.2.2 **Gujarat**

<u>Daman Ganga Basin:</u> Madhuban dam is expected to receive heavy inflows. Alert may be kept in district **Navsari.** 

Tapi basin: Increased flows are expected in forthcoming days in lower Tapi basin, hence, alert may be kept in district Surat & Tapi.

Independent Rivers of Saurashtra: Due to the presence of low pressure area over Gujarat, heavy rainfall alert has been issued by IMD in Saurashtra region. Hence alert may be kept in districts **Gir Somnath, Amreli, Bhavnagar districts**. Water levels are expected to rise in rivers Machhundri, Hiren and Shterunji.

Mahi & Narmada Basin: Alert may be kept in lower Mahi basin in district **Anand** and Lower Narmada basin in district **Bharuch**. Tawa reservoir (Narmada Basin) in Hosangabad district has reached its FRL, hence, it should be operated as per SOP after advance information to downstream areas.

# 2.2.3 Ganga Basin- Uttar Pradesh, Bihar, Jharkhand & West Bengal

# 2.2.3.1 Sindh, Betwa, Tons- Madhya Pradesh

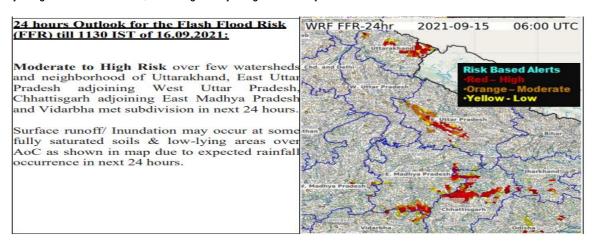

Rainfall is expected to decrease over the region as the pressure system has become well marked low pressure area from depression. Alert may be kept in districts **Bhind**, **Datia**, **Morena** (Sindh basin); **Chhatarpur**, **Sagar** (Betwa basin); **Rewa**, **Satna** (Tons basin). Heavy inflows are expected in the major storages in the above said districts. Hence releases from dams may be done as per SOP after informing downstream districts/ states.

# 2.2.3.2 Uttar Pradesh, Bihar, Jharkhand & West Bengal

Flooding situation in Northern tributaries of Ganga in Uttar Pradesh & Bihar has receded considerably and fallen below danger level. In coming days, it is expected to recede further. As per numerical weather prediction models of IMD increased rainfalls are expected in Nepal and Eastern U.P. mainly in Ghagra, Rapti and Gandak basin hence increased flows are expected in the said rivers in coming days.

## 2.3 Flash Flood Guidance

IMD has issued Flash Flood Guidance of Moderate to high risk over few watersheds and neighborhoods of Uttrakhand, East Uttar Pradesh adjoining West Uttar Pradesh, Chhattisgarh adjoining East Madhya Pradesh and Vidharbha met subdivisions in next 24 hours.

3.0 Storage Position in Dams where Inflow forecast is being issued by CWC as on 15<sup>th</sup> September, 2021
Reservoirs shown in red are having gross storage capacity more than 90% and those in orange are having gross storage greater than 70%. Close watch is to be maintained at these reservoirs whenever Very Heavy Rainfall (Orange) and Extremely Heavy Rainfall (Red) warning in next 120 hours are given below:

Storage above 90%								
Storage above 75%		QPF categories (mm)	0 0.	1-10 11-	5 26-37	38-50	51-75	76-100
