

Central Water Commission Daily Flood Situation Report cum Advisories 17-08-2021

1.0 Rainfall Situation

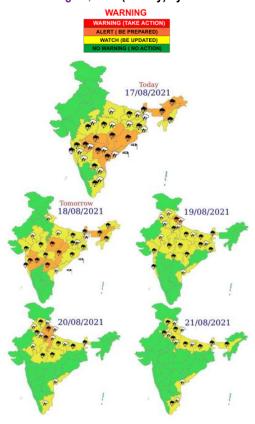

1.1 Basin wise departure from normal of cumulative and daily rainfall

Notes: a) Small figures indicate actual rainfall (mm), while bold figures indicate Normal rainfall (mm)

b) Percentage departures of rainfall are shown in brackets.

1.2 Rainfall forecast for next 5 days issued on17th August, 2021 (Midday) by IMD

Very heavy rainfall over Coastal Andhra Pradesh, Odisha, Vidarbha & Arunachal Pradesh on 17th; over Sub-Himalayan West Bengal & Sikkim, Assam & Meghalaya, Chhattisgarh, Marathawada and Telangana on17th-18th; over East Madhya Pradesh & Madhya Maharashtra on 18th; over Uttarakhand on 19th & 20th and over West Uttar Pradesh on 20th August, 2021.

2.0 Flood Situation and Advisories

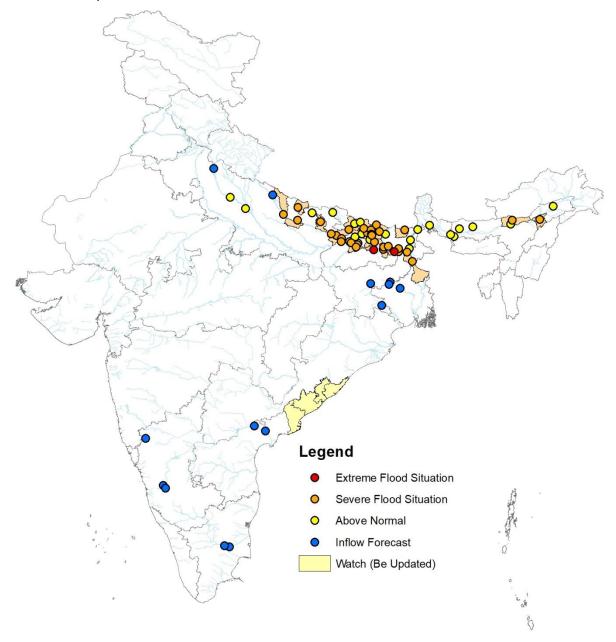

2.1 Summary of Flood Situation as per CWC Flood Forecasting Network

On 17th August, 2021, 2 stations in Bihar are flowing in Extreme Flood Situation, 31 Stations (21 in Bihar, 6 in Uttar Pradesh, 2 in Assam and 1 each in Jharkhand & West Bengal) are flowing in Severe Flood Situation and 22 stations (11 in Bihar, 6 in Assam, 4 in Uttar Pradesh and 1 in West Bengal) are flowing in Above Normal Flood Situation. Inflow Forecast has been issued for 14 Barrages & Dams (4 in Jharkhand, 3 in Karnataka, 2 each in Andhra Pradesh, Tamilnadu & Uttar Pradesh and 1 in West Bengal).

PART - I: LEVEL FORECAST						
S.No.	S.No. Flood Situations					
A	Extreme Flood Situation: (Site (s) where the previous Highest Flood Level (HFL) is exceeded or equalled)	2				
В	Severe Flood Situation: (Site (s) where water level is touching or exceeding the Danger Level but below Highest Flood Level (HFL))	31				
С	Above Normal Flood Situation: (Site (s) where water level is touching or exceeding the Warning Level but below Danger Level)	22				
Total number of sites above Warning Level (A+B+C)						
PART - II: INFLOW FORECAST						
Number of sites for which inflow forecasts issued: (Where Inflows are equal or exceed the specified Threshold Limit for a particular reservoir / barrage)						

Details are given at link: http://www.cwc.gov.in/sites/default/files/cfcrcwcdfb-17.08.2021-2_5.pdf

2.1.1 Flood Situation Map

2.2 CWC Advisories

2.2.1 Ganga basin- Uttar Pradesh, Bihar, Jharkhand & West Bengal

Water level of River Ganga has fallen below warning level upto Buxar (Bihar). Downstream stations from Balia (UP) to Patna Gandhighat are flowing above Danger level but with falling trend. At Hathidah in Patna, it is flowing in extreme flood situation with falling trend. At Munger, it is flowing above danger level with falling trend. At **Bhagalpur**, it is flowing above HFL with steady trend. Stations downstream of Bhagalpur viz. Kahalgaon (Bhagalpur), Sahibganj in Jharkhand, Maldah/Murshidabad in West Bengal on main Ganga are flowing in severe flood situation with slowly rising trend. Alert may be kept in districts **Balia (U.P), Patna, Munger, Bhagalpur (Bihar), Sahibganj (Jharkhand) and Malda & Murshirabad (West Bengal)**. Propagating peak inflow will further increase the water level of main Ganga stem in Bihar, Jharkhand and West Bengal in **next 2 to 3 days**.

Middle reaches of Ganga river in districts such as **Badaun**, **Farrukhabad** and **Ghazipur** (**Uttar Pradesh**) are in above normal flood situations. River **Ghaghra** in **Barabanki**, **Ayodhya & Ballia** (**Uttar Pradesh**) and **Siwan** (**Bihar**) districts are flowing in severe flood situations with rising trend. River Rapti is flowing in above normal to severe flood situations in **Balrampur**, **Siddharth Nagar & Gorakhpur districts** (**U.P**). River Sone & Punpun are flowing in severe flood situation in **Patna**.

Currently the flood originated in tributaries of Yamuna last week is passing through Ganga and it may take another 3 to 4 days to pass through completely; in such situation further runoff created due to intense rainfall in the catchments of north tributaries of Ganga may not stream into Ganga easily. The flooding situation in districts such as **Ballia (U.P)**, **Saran**, **Bhagalpur**, **Khagaria**, **Vaishali**, **Katihar (Bihar)** may get accentuated.

Currently River Kosi in Supaul, Khagaria & Katihar districts in Bihar, River Bagmati in Sitamarhi, Muzzafarpur & Darbhanga district in Bihar, River Gandak in Kushinagar & Muzaffarpur (U.P.) & Vaishali (Bihar) districts, River Adhwara in Darbhanga District, Rivers Kamla & Kamlabalan in Madhubani district, River Burhi Gandak in Samastipur & Khagaria districts, River Parman in Araria, River Mahananda in Purnia & Katihar districts are flowing in above normal to severe flood situations. Flood situations may exist in the lower reaches of these rivers in the coming days.

2.2.2 Brahmaputra and its tributaries – Assam, West Bengal, Sikkim, Arunachal Pradesh & Meghalaya

IMD has predicted very heavy rainfall in the catchment of Brahmaputra and its tributaries for next 2 days, hence, alert may be kept in North West Bengal, Assam, Sikkim, Arunachal Pradesh & Meghalaya, mainly in districts **Kokrajhar, Chirang, Baksa, (Assam).** Alert to be kept in the basins of Champabati, Aie, Gurang, Manas, Teesta, Raidak, Jaldhaka, Rangpochu, Rangit, Torsa, Beki, Pagladiya, Puthimari, Subansiri, Disang, Simsang, Digaru, Myntdu rivers and in all other tributaries of Brahmaputra.

Currently, due to past 3 to 4 days rainfall, rivers in Brahmaputra basin viz. Jia-Bharali in **Sonitpur** district, river Sankosh in **Dhubri** & Brahmaputra in **Dibrugarh**, **Jorhat**, **Sonitpur** & **Dhubri** are flowing in above normal to severe flood situations.

2.2.3 Godavari and Krishna basins - Telangana, Andhra Pradesh, Karnataka

Due to formation of Low Pressure Area in Bay of Bengal heavy rainfall is expected in Sub-catchments of middle & lower Godavari such as Sabari, Indravati, Waiganga, Pranhita, Penganga, Middle Godavari, Manjira & Maneru. In lower Krishna heavy rainfall is expected Munneru & Palleru sub-basins. Hence, alert may be kept in districts Vishakhapatnam, Vizianagaram, East Godavari (Andhra Pradesh); Adilabad, Nirmal, Kumaram Bheem, Mancherial, Jagtial, Nizamabad, Karimnagar, J. Bhupalpally(Telangana).

Most of the dams in Upper Krishna Basin are also having storage above 95%. Hidkal Dam, Almatti Dam and Tungabhadra Dam are filled to their full capacity. Narayanpur and Bhadra Dams are 98% filled up. Malaprabha Dam on River Malaprabha is filled to 93% of its full capacity. Dams Koyana, Warna & Veer are also having high storage. Heavy to very heavy rainfall is forecasted in Maharashtra during the next 2 days. Due to this there is likelihood of rise in water levels in Upper Krishna Basin in the upstream of Almatti Dam. Round the clock watch has to be maintained for proper reservoir operation and information to all downstream Districts as well as to lower riparian States well in advance.

It is advised that close watch has to be maintained for increased inflows likely during the next 2-3 days. Releases from any of these reservoirs may be done as per rule curve and standard operating procedure.

3.0 Storage Position in Dams where Inflow forecast is being issued by CWC as on 18thAugust, 2021
Reservoirs shown in red are having gross storage capacity more than 80% and those in orange are having gross storage greater than 60%. Close watch is to be maintained at these reservoirs whenever Very Heavy Rainfall (Orange) and Extremely Heavy Rainfall (Red) warning in next 120 hours are given below:

orage above 85%	OPP - I ()		0.140	44.00	A/ A#	20.50		B(400	. 100
Storage above 60%	QPF categories (mm)	0	0.1-10	11-25	26-37	38-50	51-75	76-100	>100

	Storage above 60%			(
