2.1.1 Flood Situation Map

2.2 CWC Advisories

2.2.1 Ganga and its tributaries - Uttarakhand, Uttar Pradesh, Bihar, Jharkhand & West Bengal

River Ganga is flowing in severe to above normal flood situation with falling trend in Budaun & Farrukabad districts of Uttar Pradesh. Towards lower reaches, Ganga is flowing in above normal flood situation in Patna (Bihar) with steady trend. In Sahebganj (Jharkhand) and Murshirabad (West Bengal) Ganga is flowing in above normal flood situation with rising trend. The said rise in lower reaches of Ganga is mainly due to runoff contribution from Ghagara from northern side.

River Ghagara is in severe to above normal flood situation with falling trend now. Flooding situation in Northern tributaries of Ganga in Bihar such as Gandak, Burhi Gandak, Bagmati, Adhwara, Kamalabalan and Kosi have receded from severe to above normal in most of the districts.

Due to existence of upper air cyclonic circulation over West Bengal rainfall is expected in almost all districts of Gangetic West Bengal. Hence alert may be kept in rivers Kangsabati, Damodar, Silai, Hugli, Mayurakshi, Hinglow, Subernarekha and its tributaries.

3.0 Storage Position in Dams where Inflow forecast is being issued by CWC as on 20th September, 2021
Reservoirs shown in red are having gross storage capacity more than 90% and those in orange are having gross storage greater than 75%. Close watch is to be maintained at these reservoirs whenever Very Heavy Rainfall (Orange) and Extremely Heavy Rainfall (Red) warning in next 120 hours are given below:
