1.2 Rainfall forecast for next 5 days issued on 29th September, 2021 (Midday) by IMD

[-19% to 19%)

 Extremely/Very Heavy Rainfall over Gujarat Region, north Madhya Maharashtra, north Konkan, Gangetic West Bengal, Odisha and Jharkhand on 29th; Saurashtra & Kutch on 29th & 30th; Bihar on 01st & 02nd October, 2021

2.0 Flood Situation and Advisories

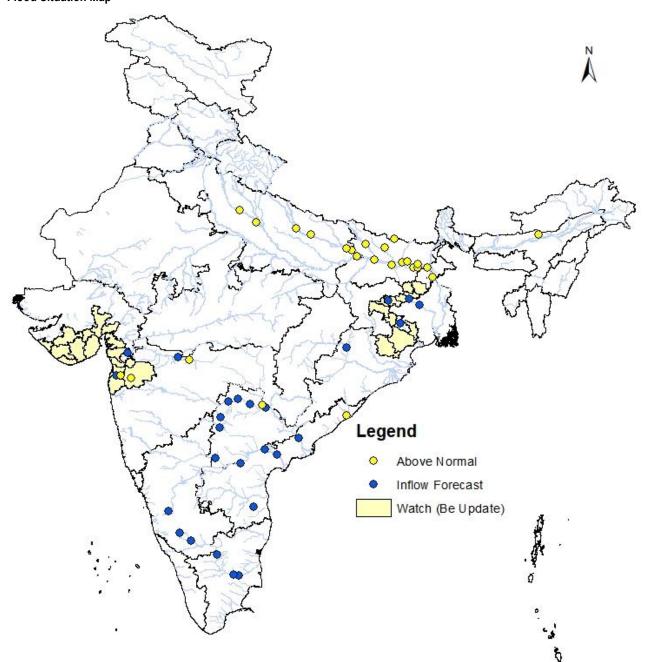

2.1 Summary of Flood Situation as per CWC Flood Forecasting Network

On 29th September, 2021, 24 stations (11 in Bihar, 5 in Uttar Pradesh, 2 in Maharashtra and 1 each in Assam, Andhra Pradesh, Gujarat, Jharkhand, Telangana & West Bengal) are flowing in Above Normal Flood Situation. Inflow Forecast has been issued for 27 Barrages & Dams (7 in Telangana, 4 in Andhra Pradesh, 3 each in Jharkhand, Tamilnadu & Karnataka, 2 each in West Bengal, Maharashtra & Gujarat and 1 in Odisha).

Odisha).							
PART - I: LEVEL FORECAST							
S.No.	.No. Flood Situations						
А	Extreme Flood Situation: (Site (s) where the previous Highest Flood Level (HFL) is exceeded or equalled)	0					
В	Severe Flood Situation: (Site (s) where water level is touching or exceeding the Danger Level but below Highest Flood Level (HFL))	0					
c	Above Normal Flood Situation: (Site (s) where water level is touching or exceeding the Warning Level but below Danger Level)	24					
	24						
PART - II: INFLOW FORECAST							
Number of (Where Inflo	27

2.1.1 Flood Situation Map

2.2 CWC Advisories

2.2.1 Rivers of Saurashtra, West Banas, Sabarmati, Mahi, Narmada, Tapi & Damanganga,- Gujarat, Maharashtra

2.2.1.1 Gujarat

Alert may be kept in districts Navsari, Valsad, Dangs, Surat, Tapi, Bharuch, Anand, Bhavnagar, Ahmedabad, Botad, Amreli, Rajkot, Junagadh, Porbander, Somnath, Jamnagar, Dwarka & Kuchchh for the rivers such as Mahi, Sabarmati, Watrak, Tapi, Narmada, Danmanganga and other small rivers in north & south Gujarat regions. Water level rise is expected in rivers of Saurashtra such as Sani, Madhiwati, Ozat, Bagod, Bhadar, Machhu, Malan, Shetrunji and other small rivers in the area. Ukai, Kadana, Madhuban, Shetrunji dams and other storages in the region are more than 90%, hence, releases may be done as per SOP after informing downstream areas in advance.

2.2.1.2 Maharashtra

Since the pressure system has moved past the region, there is drastic reduction in rainfall. But the runoff created due to said event is flowing down the rivers Tapi, Damanganga, Vashisti and rivers in middle Konkan. Alert may be kept in districts **Nasik & Palghar**.

2.2.2 Ganga, East Flowing Rivers Between Mahanadi & Pennar, Brahmani & Baitarni, Subarnarekha, Godavari, Krishna & Cauvery

2.2.2.1 Jharkhand, Odisha and adjoining West Bengal

Currently due to the well marked low pressure area over Gangetic West Bengal and adjoining Jharkhand, heavy rainfall have been predicted over Jharkahnd, Odisha and West Bengal. Alert may be kept in districts **Kendujhar, Mayurbhanj (Odisha**), **Saraikala, Ranchi, Ramgarh, Bokaro, Dhanbad, Jamtara, Deogarh, Dumka (Jharkhand)** and **Jhargram (West Bengal)**. Water level rise is expected in rivers Ajoy, Barakar, Kangsabati, Subarnarekha, Brahmani-Baitarni, Burhabalang, etc and its tributaries.

2.2.2.2 Andhra Pradesh

Even though rainfall has decreased in most of the districts of the state, due to increased runoff contribution from upper regions of rivers such as Godavari, Krishna and its tributaries in Maharashtra, the abatement of water levels in above said rivers are not expected in coming 2 days. Gotta Barrage, Thottapalli project, Srisailam, Pulinchinthala, Prakasam projects may receive increased inflows. Releases may be done as per SOP after advance information to downstream areas. Currently river Nagavalli is flowing in above normal flood situation with falling trend in district **Srikakulam.**

2.2.2.3 Telangana

Rainfall has drastically decreased over the state. Due to increased rainfall contribution from upper regions of rivers such as Godavari, Krishna and its tributaries in Maharashtra and adjoining Karnataka, the abatement of water levels in above said rivers are not expected in next 2 days. Major stoarges in Godavari basin such as Singur, Nizamsagar, Sriramsagar, Kaddam, Sripadayellampalli, Nagarjunasagar, etc are presently getting increased inflows and they are having storages in the range 80 to 100%, hence, releases have to be done as per SOP after informing downstream areas. Currently river Godavari is flowing in above normal flood situation with falling trend in district **J. Bhupappally**.

2.2.2.4 Maharashtra

Since the pressure system has moved past the region, there is drastic reduction in rainfall. But the runoff created due to said event is flowing down the rivers Upper Godavari & Krishna. Alert may be kept in districts **Nasik**.

2.3 IMD Flash Flood Guidance

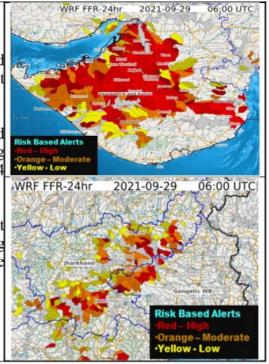

IMD issues warning of high risk over few watersheds and neighborhood of Madhya Saurashtra and moderate risk over few watersheds and neighborhood of Jharkhand adjoining West Bengal in next 24 hours.

24 hours Outlook for the Flash Flood Risk (FFR) till 1130 IST of 30.09.2021:

High Risk over few watersheds and neighborhood of Saurashtra met subdivision in next 24 hours.

Moderate Risk over few watersheds and neighborhood of Jharkhand adjoining West Bengal met subdivisions in next 24 hours.

Surface runoff/ Inundation may occur at some fully saturated soils & low-lying areas as depicted in map due to the expected rainfall in next 24 hours.

3.0 Storage Position in Dams where Inflow forecast is being issued by CWC as on 29th September, 2021

Reservoirs shown in red are having gross storage capacity more than 90% and those in orange are having gross storage greater than 75%. Close watch is to be maintained at these reservoirs whenever Very Heavy Rainfall (Orange) and Extremely Heavy Rainfall (Red) warning in next 120 hours are given below:

		ODE esteroire (mm)	Δ.	0.1.10	11.05	26.27	20.50	E1 7E	7(100	>10
		Qrr categories (mm)	V	0.1-10	11-25	20-37	38-30	31-/3	/0-100	>100
