

**Central Water Commission**  
**Daily Flood Situation Report cum Advisories**  
**30-07-2020**

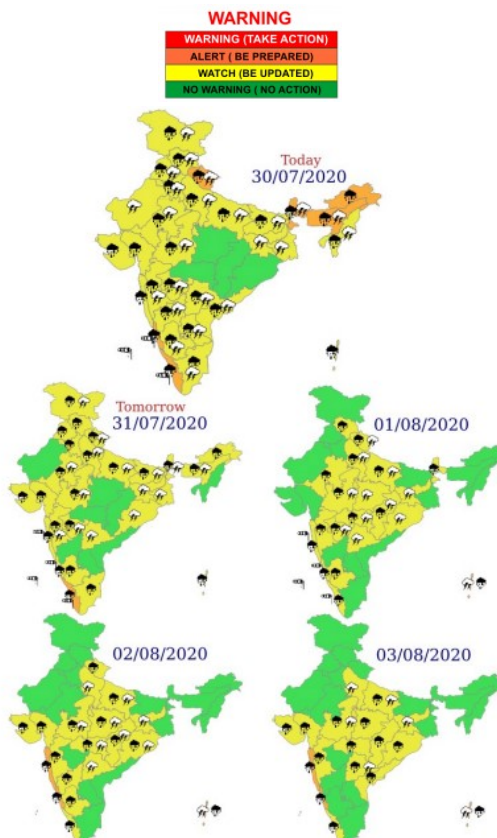

**1.0 IMD information**

**1.1 Basin wise departure from normal of cumulative and daily rainfall**

Notes: a) Small figures indicate actual rainfall (mm), while bold figures indicate Normal rainfall (mm)  
 b) Percentage departures of rainfall are shown in brackets.

**1.2 Rainfall forecast for next 5 days issued on 30<sup>th</sup> July 2020 (Midday) by IMD**

## 2.0 CWC inferences

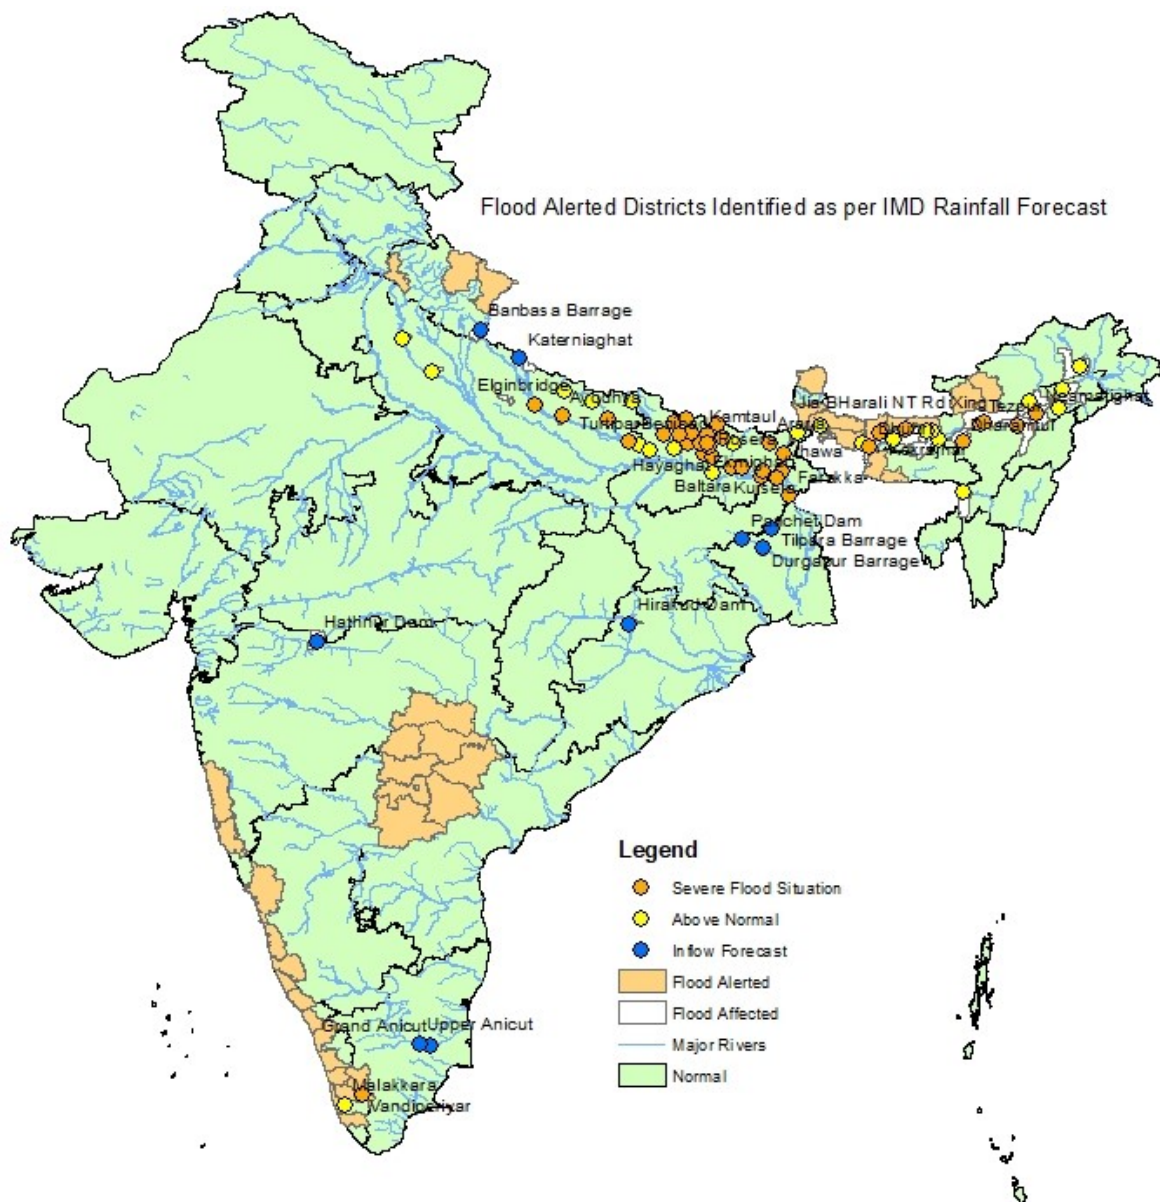

### 2.1 Flood Situation on 30<sup>th</sup> July 2020

On 30<sup>th</sup> July 2020, 36 Stations (21 in Bihar, 8 in Assam, 4 in Uttar Pradesh and 1 each in Kerala, Jharkhand and West Bengal) are flowing in Severe Flood Situation and 23 stations (9 in Assam, 6 in Bihar, 5 in Uttar Pradesh and 1 each in Kerala, West Bengal and Arunachal Pradesh) are flowing in Above Normal Flood Situation. Inflow Forecast has been issued for 9 Barrages and Dams (2 in Tamil Nadu, 2 in West Bengal and 1 each in Uttarakhand, Uttar Pradesh, Jharkhand, Maharashtra and Odisha).

PART - I: LEVEL FORECAST		
S.No.	Flood Situations	Numbers of Forecasting Sites
<b>A</b>	Extreme Flood Situation: (Site (s) where the previous Highest Flood Level (HFL) is exceeded or equalled)	0
<b>B</b>	Severe Flood Situation: (Site (s) where water level is touching or exceeding the Danger Level but below Highest Flood Level (HFL))	36
<b>C</b>	Above Normal Flood Situation: (Site (s) where water level is touching or exceeding the Warning Level but below Danger Level)	23
Total number of sites above Warning Level ( A+B+C)		59
PART - II: INFLOW FORECAST		
Number of sites for which inflow forecasts issued: (Where Inflows are equal or exceed the specified Threshold Limit for a particular reservoir / barrage)		9

#### 2.1.1 Summary of Flood Situation as per CWC Flood Forecasting Network

## 2.2 CWC Advisories

- The western end of the monsoon trough lies near to its normal position; however its eastern end is still to the north of its normal position. Convergence of lower level winds from Arabian Sea over Northwest India is very likely to continue during next 2-3 days. Under the influence of these meteorological conditions, Widespread rainfall with isolated heavy to very heavy falls very likely over Uttarakhand, Sub-Himalayan West Bengal & Sikkim and heavy rainfall over Jammu Division, Himachal Pradesh, Uttar Pradesh, Punjab, Haryana, Chandigarh & Delhi, East Rajasthan, South Gujarat, West Madhya Pradesh, Bihar and Maharashtra & Goa during next 2-3 days.
- Due to convergence of strong lower level winds over the west coast, widespread rainfall with isolated heavy to very heavy falls are likely over Konkan & Goa and Ghat areas of Madhya Maharashtra during 01<sup>st</sup> - 03<sup>rd</sup> August, 2020.

Based on the above rainfall forecast the following advisories are issued by CWC for various States:

### 2.2.1 Bihar, Jharkhand and Gangetic West Bengal

Heavy rainfall is likely to occur over Bihar in the Districts of Purb Champaran, Sitamarhi, Madhubani, Supaul, Araria and Kishanganj and over Sub-Himalayan West Bengal & Sikkim during next 2-3 days. River levels in most of the north bank tributaries of Ganga are likely to continue in Severe Flood Situation with slow falling trend for next 3-4 days.

River Parman in Araria District, Mahananda in Katihar & Purnia Districts, River Kosi in Khagaria & Katihar Districts, River Adhwara in Darbhanga District, River Bagmati in Darbhanga, Sitamarhi and Muzaffarpur Districts, Rivers Kamla & Kamalabalan in Madhubani District, River Burhi Gandak in Purbi Champaran, Khagaria, Muzaffarpur & Samastipur Districts, River Ganga in Bhagalpur District and River Gandak in Gopalganj District are flowing in Severe Flood Situation. Above rivers are flowing in Above Normal flood situation in many of the downstream location.

### 2.2.2 North Eastern States, Sub-Himalayan West Bengal & Sikkim

Widespread rainfall with isolated heavy to very heavy rainfall is likely to occur over Sub-Himalayan West Bengal & Sikkim during next 2-3 days. Due to this, the river levels are likely to continue in Above Normal to Severe Flood Situation for another 1-2 days.

River Brahmaputra is flowing in Above Normal to Severe Flood Situation with falling trend all along the course from Dibrugarh to Dhubri the levels are expected to fall slowly.

Rivers Jia-Bharali in Sonitpur District, Gaurang in Kokrajhar District, Beki in Barpeta District, Kopili in Morigaon District and Dhansiri (South) in Golaghat District in Brahmaputra Basin are flowing in Severe Flood Situation. The levels are expected to fall slowly.

### 2.2.3 Himachal Pradesh, Uttarakhand & Uttar Pradesh

Due to ongoing heavy to very heavy rain in parts of Uttarakhand and Uttar Pradesh and the forecasted rainfall in the next 2-3 days, there is chance of rise in water levels in Alaknanda, Mandakini, Bhagirathi, Ramganga, Ganga, Sharda, Sarju, Ghaghra, Rapti rivers. River Ghaghra in Barabanki & Ballia Districts and River Rapti in Gorakhpur District are flowing in Severe Flood Situation. **There is low to moderate risk of flash floods in Himalayan regions of Himachal Pradesh and Hilly regions of Uttarakhand during next 24 to 48 hours.**

### 2.2.4 Kerala

Heavy to very heavy rainfall has been forecasted in the Districts of Alappuzha, Kottayam, Ernakulam, Idukki, Malappuram, Kozhikode, Kannur and Kasargode in Kerala during the next 2 days. Due to ongoing rainfall, the river levels have started rising in many of the rivers. River Manimala at Kallopara in Pathanamthitta District of Kerala is flowing in Severe flood situation with falling trend and River Achankovil at Thumpamon in Pathanamthitta district is flowing in above normal flood situation. Due to ongoing heavy rainfall in Kottayam, Ernakulam and Pathanamthitta Districts, some increase in inflows is likely in many of the reservoirs. However, most of the reservoirs in Kerala are having storage around 30 to 60% of their full capacity, the present spell of rainfall will aid in increasing the storage of various dams and no spillage is expected.

### 2.2.5 Maharashtra, Goa & Karnataka

Widespread rainfall with isolated heavy to very heavy falls are likely over Konkan & Goa and Ghat areas of Madhya Maharashtra during 01<sup>st</sup> - 03<sup>rd</sup> August, 2020.

Due to forecasted heavy to very heavy rain in Coastal Districts and in Western Ghat areas of Karnataka for next 3-4 days, there is likely rise in levels of Rivers in Shivamogga, Chikmagalur, Hassan & Kodagu Districts and close watch is to be maintained.

**Harangi Dam in Cauvery Basin of Kodagu District is filled upto 94% of its full capacity. Similarly, Upper Tunga Project (Gajanur Dam) is at 100% of its capacity and Kabini Dam is filled upto 79% of its full capacity.**

**Present level at Harangi Dam is at 870.98 m today compared to its FRL of 871.42 m. Dam authorities have started releasing from yesterday night 2000 hrs and an average outflow of 738 cusecs has been released as on today**

morning. It is advised that close watch has to be maintained for increased inflows likely during the next 3-4 days in view of the heavy rainfall warning.

Presently, the reservoir level at Upper Tunga Project (Gajanur Dam) in Shivamogga District of Karnataka is at 588.24 m which is its FRL. Due to rainfall forecast in its upper catchment for next 3-4 days, releases should be accordingly increased.

Presently, the river level at Kabini Dam in Mysuru District of Karnataka is 694.04 m compared to its FRL of 696.16 m. Since there is forecast of heavy to very heavy rain in Wynad District of Kerala, the inflows into Kabini Dam are likely to rise. Necessary precautions may be taken for releases from dam after informing all downstream areas in Karnataka and lower riparian States.

### **Impact Based Actions**

Strict vigil is to be maintained in all the above States & Districts for next 2-3 days. Breaches in Embankment if any may aggravate further flood like situation which should be monitored and all efforts to fill any such breaches should be done at the earliest. Maximum vigil has to be maintained along the rail and road tracks and bridges on these rivers and regulate traffic suitably to avoid any incident. All district administrations can take effective measures taking into account the prevailing Covid19 situation in relief camps being set up in these districts.

### **3. Flood Affected Districts**

**Assam:** Jorhat, Golaghat, Sonitpur, Morigaon, Barpeta, Kokrajhar Dhubri  
**Bihar:** Araria, Purnia, Katihar, Madhubani, Darbhanga, Muzaffarpur, Purba Champaran, Khagaria, Sitamarhi, Gopalganj, Samastipur, Bhagalpur  
**Uttar Pradesh:** Gorakhpur, Ballia, Barabanki

### **4. Flood Alerted Districts**

**Uttarakhand:** Districts along rivers Alaknanda, Bhagirathi, Ramganga, Sharda, Sarju.  
**Karnataka:** Districts along West Flowing Rivers in Uttara Kannada, Dakshina Kannada, Udupi and Shivamogga.  
**Kerala:** Districts of Pathanamthitta, Idukki, Kottayam and Ernakulam Districts.
