2.1.1 Chambal Basin

As the rainfall has reduced in the basin, the releases from all the dams have also come down. However, river Chambal at Dholpur is flowing in Severe Flood Situation with rising trend. As all the upstream stations are falling, Dholpur is also likely to fall to Above Normal Flood Situation by tonight.

2.1.3 Advisory in connection with formation of a low pressure area off Odisha & Chhattisgarh

There is forecast of heavy rainfall in Odisha for next 48 hours and then increase in intensity from 2nd September onwards. This may lead to rise in Water Levels in basins of East Flowing Rives between Mahanadi and Godavari as well as over Subarnarekha, Burhabalang, Brahmani, Baitarni and Mahanadi Basins. Strict vigil shall have to be maintained at all dams which have attained almost near Full reservoir level (FRL) and releases if any have to be done after informing all downstream areas.
