MESSAGE

Central Water Commission (CWC) is the apex organisation in the country dealing with matters related to water resources development and management. The proper assessment of quantity and quality of water for conservation, assessment, planning and management of surface water resources endowed to our country need not be over emphasized. Accordingly, CWC is also committed towards the objective of collection/compilation of such data.

Hydro-meteorological data observation being a specialized scientific task, is being continued by Central Water Commission since 1948. The data thus collected is compiled and analysed for achieving various goals such as assessment of basin water availability, study of climate change, better flood forecasting, flood mitigation, reservoir inflow forecasting, water quality and sediment assessment, morphological studies, planning and design of water resources projects, assessment for navigational potential for inland waterways, infrastructure projects like roads, railways, electrical power transmission lines etc.

The above dataset is disseminated to stakeholders as per Hydro-meteorological Data Dissemination Policy, 2018 of the Ministry of Jal Shakti which helps them do further planning and research to achieve the intended benefits.

CWC published first meta-data book "Key Hydrological Observation Stations in India under Central Water Commission" in April 1991 having details of 570 sites. Thereafter, the meta-data books were prepared in 2004 (945 sites), 2011 (866 sites), and in 2012 (878 sites). The number of hydro-meteorological stations of CWC was further expanded to improve data availability for stated purposes based on recommendations of the report of working group of Planning Commission (now Niti Aayog) on "Water Database Development and Management for the 12th five-year plan (2012-2017), September 2011". The number of hydro-meteorological observation stations of CWC since 2021 is 1543, which covers the entire length and breadth of the Country.

I appreciate the efforts made by RM Wing Officials, particularly all Chief Engineers of CWC regional offices; Sh. D.P. Mathuria, Chief Engineer (P&DO) and Sh. Pankaj Kumar Sharma, Director, RDC-II and his team in publishing this meta-data book.

I hope this book, containing vast meta data, would be found extremely useful by all the offices of CWC, Central / State agencies / PSUs and other stakeholders, who are engaged in the planning and development of water resources in the country.

PREFACE

Data Collection is one of the primary functions of Central Water Commission. Central Water Commission has contributed substantially in collection of hydrological data all over the country through its well-established network of hydrological observation sites, covering 19 hydrological basins. The hydrological data so collected are then compiled and published in the form of publications for use by data indenters and public.

Development across / along rivers is a continuous phenomenon. Such development brings about changes in the river characteristics such as water flow regime, river morphology, carrying capacity of river etc. So, there is requirement of establishment and maintenance of hydrological observation network on that river depending upon such changes in river. The annual publication of a hydrological observation book gives an insight into meta-data of sites on important rivers across the country, which helps the publication of reports & assessment of water resources in a particular area of interest.

The system of publication of Hydro-Meteorological Observation Stations Book in CWC dates back to a few decades. The books on Hydrological Observation Stations in India under Central Water Commission were published in 1991, 2004, 2011, 2012, 2020, 2021 & the latest being in 2023.

This edition of hydrological observation book contains details of 1522 H.O. sites, operational in India as on 01.01.2023, out of which, there are 437-gauge sites, 394-gauge & discharge sites, 182-gauge, discharge and water quality sites, 34-gauge, discharge and sediment sites. 373-gauge, discharge, sediment and water quality sites & 102-gauge and water quality sites. In addition, 21 sites are at different stages of shifting and opening. As such, there are 1543 HO sites of CWC since 2021.

I appreciate the commendable efforts put by Sh. P. Karthigayan, Deputy Director, Shri Satish Jain, Deputy Director, Shri Anurag Verma and Shri Saurabh Kumar, Assistant Directors in bringing out the updated version of the book of Hydrological Observation Stations.

A. **Abbreviation and Notations for Hydrological Observation Station codes**

In the table depicting details of Hydrological Observation Stations, the different columns indicate as under: -

1. Column No. 1 gives the serial number of sites.
2. Column No. 2 gives name of the site.
3. Column No. 3 gives name of the State / Union Territory.
4. Column No. 4 'District' indicates the name of the district in which the site is located.
5. Column No. 5 indicates the name of the river / tributary / sub-tributary.
6. Column No. 6 'Type' indicates the type of site as:

G	Gauge
GD	Gauge & Discharge
GDS	Gauge, Discharge & Silt
GDSQ	Gauge, Discharge, Sediment & Water Quality
GQ	Gauge & Water Quality
GDQ	Gauge, Discharge & Water Quality

7. Column No. 7 indicates the date of start of observation in the same order as mentioned under the 'Type' column.
8. Column No. 8 indicates the Latitude (°N) of the site.
9. Column No. 9 indicates the Longitude (°E) of the site.
10. Column No. 10 'Catchment Area in Sq Km' of the site indicates the catchment area from the origin of the river up to the site in square kilometers.
11. Column No. 11 indicates 'Purpose code' shows the status of site as Hydrological Observation (HO)/ Flood Forecasting (FF)/ Hydrological (HOIW).
12. Column No. 12 indicates the site code.

Station Code for Stations / Sites of different agencies for WIMS platform

1. 1st & 2nd position of code will be two alphabets representing Agency.

e.g., for Central Water Commission: CW
