Introduction to Python Programming & Its Applications in Water Resources Sector
(19-23, September 2022)

Python is an open-source general purpose programming language that has a strong presence in the GIS industry. It is the primary scripting language for both licensed and opensource GIS software. Geo-Spatial technologies & Data analytics have great potential to address a variety of issues related to water sector. This training program is designed as a foundational course for water professionals who have some basic understanding of Programming, GIS & Remote Sensing

Program Format: Online lecture modules with flexi time approach through 'NWA e-Learning Portal. e-Certificate will be provided to successful trainees

Who can attend: NHP Implementing Agencies, Water Resources professionals from the Centre/State Government departments and all those interested in the subject

Fee: There is no course fee

Registration: Fill in the Google form using the link given below or by scanning QR Code on or before 15.09.2022
