

Annexures

AFC, Hyderabad

Annexure I.I

TERMS OF REFERENCE FOR ENVIRONMENTAL EVALUATION STUDY OF SINGUR PROJECT

The Terms of Reference (ToR) as indicated by the CWC for conduct of the present evaluation comprise studying the impact of the project on Resettlement and Rehabilitation, Socio-economic Environment, Agriculture, Irrigation and Drainage, Flora and Fauna, Land Use Pattern, Public Health, etc. The detailed Terms of Reference (ToR) for each of these components as given by the CWC are presented below:

Effects of Rehabilitation

The study would analyse the effects of construction of project on rehabilitation and resettlement of the affected villages. It shall include the status of allotments of land / plots to affected population including landless workers.

- a) Details of rehabilitation sites where rehabilitation has been carried out;
- b) Actual photographs of rehabilitation sites and houses and details thereof;
- c) Environment and sanitation status;
- d) Details of amenities and infrastructure facilities provided to the rehabilitated families;
- e) Progress of economic rehabilitation programmes;
- f) Details of the occupational training programmes conducted for project affected persons;
- g) Details about health status and health services provided in the project area;
- h) Response of the oustees to the process of rehabilitation and constraints
- i) Status and living standards of the oustees at new location and compare **it** to the pre project baseline.

Socio-economic impacts including changes in literacy, employment

- a) Details of status of schools / teaching staff, student turnover;
- b) Improvement in male- female literacy, evaluation of adult education programmes, provided if any;
- c) Response to education provisions and assessment of constraints;
- d) List of post project occupational options that have arisen in the region and also make a statement what occupations are attributable to project benefits;
- e) List all the new educational, cultural, recreational and commercial (markets, banks, etc.) institutions accessed that have come up in the post project situation and state how much of it is attributable to the project;
- f) Compare the incidence of some important diseases in post and pre project situations;
- g) Compare the health care infrastructure in the post and pre project situation;
- h) Compare the Human Development Index (to the extent that the data is available) in the post and pre project situations.

Effects on agriculture including

- a) Improvement in Production
- b) Changes in cropping pattern and improvement in cropping intensity due to the project on agricultural / horticulture / animal husbandry;
- c) Improvement in quality of livestock and poultry;
- d) Assess agriculture cooperative and agriculture finance programmes if initiated;
- e) Detail of the steps taken to prevent contamination of ground and surface water due to fertilizers, pesticides, run off, etc.
- f) Development of Industry in the command area;
- g) Overall development scenario in the command area.

Impact on Groundwater

- a) Impact on quality and quantity of groundwater
- b) Changes in groundwater table in recharge zones

Impact on drainage including identification of water logged or saline areas while undertaking this task, the consultant would also use Remote Sensed Data and would present the data in GIS

- a) Increase in the water logged area and mapping of specific area;
- b) Arriving at an understanding of how the water logging has increased;
- c) Estimation of increase in the salinity effected soils and mapping of the same;
- d) Arriving at an understanding of how the salinity has increased;
- e) Compare the drainage characteristics of pre and post project situations.

Impacts on archaeological monuments, economically important minerals and places of worship

- a) List of the archeological monuments and places of worship that are restored as a part of EMP, record their status and enlist reasons;
- b) List new places of worship and monuments that have come up during the post project period;
- c) List the new recreational opportunities that have come up in post project situation;
- d) List the pre project and post project status of economically important minerals and the means and activities of harnessing the same.

Impacts on forest including types of forests, forest cover, introduced species, changes in forest based livelihoods and list of endemic and endangered species if any

- a) Assess changes in the forest cover, forest types;
- b) Assess changes in Importance Value Index (IVI), Shannon diversity Index, relative abundance and density of key species;
- c) Assess effectiveness of forestry programs, contribution to sustaining local

- d) population needs (in eco development perspective);
- d) Contribution to economic activities related to medicinal plants in sustaining livelihoods of local population, if any;
- e) Status of endemic and endangered species and evaluation of conservation programs, if any.

Impacts on fauna including birds and aquatic life

- a) List terrestrial, avi and aquatic fauna
- b) Assess changes in terrestrial fauna and their migratory patterns, if any
- c) Assess changes in avi fauna and their migratory patterns, if any
- d) Assess fish life and aquatic ecology - benthic changes in terms of both macro benthoses - micro benthos, primary productivity of reservoir;
- e) Status of endemic and endangered species and evaluation of conservation programmes, if any;
- f) Assess effectiveness of wildlife conservation programs, pisciculture development programmes, and other activities contributing to sustaining local population livelihoods.

Impact on public health, drinking water supply, communications and quality of life in general

- a) Study the occurrences of diseases such as, typhoid, diarrhoea, malaria, jaundice and other water borne & water related diseases in pre and post project implementation scenario;
- b) Ascertain impacts due to reservoir impoundment, water logging and spread of such diseases, if any;
- c) Improvements in water supply provisions in pre and post implementation scenario;
- d) Improvements in communication and transportation facilities in post implementation scenario;
- e) Contribution of development in terms of provisions of infrastructure, facilities, amenities, economic compensation packages, etc., in improving quality of life;
- f) Effective implementation of EMPs in maintaining and improving quality of life of local population.

Changes in land use pattern

- a) Using image processing carry out land use / land cover classification and map on GIS;
- b) Using overlays identify new development triggering land use changes;
- c) Conduct ascertaining ground truths and physical investigations for validating such results;
- d) Map changes in land use / land cover before and after implementation of the project.

Assessment and Evaluation of implementation of Environmental Management Plan (EMP) if any

- a) Assess and evaluate R & R ,compensatory afforestation, green belt development, health systems, fish development, catchment area treatment, reservoir rim treatment, landscape restoration, muck disposal; ecological conservation, etc. in terms of
 - i) Schedule of activities, manpower requirements and performance indicators.
 - ii) Financial arrangements and returns - Cost Benefit Analysis (CBA) and wherever Return on Investment (ROI) was identified;
 - iii) Institutional arrangements suggested
- b) Evaluate the outcomes of EMP, assess its conformance to anticipated outcomes, understand the departures if any;
- c) Develop a modified EMP involving compensatory afforestation, green belt development, health systems, fish development , catchment area treatment, reservoir rim treatment, landscape restoration, ecological conservation, etc.
- d) Suggest any modifications / revisions to performance indicators and institutional measures;
- e) Identify needs in revisions to financial arrangements.

Status of implementation of Catchment Area Treatment (CAT) Plan

- a) Study the catchment area treatment measures suggested;
- b) Progress of the bioengineering and civil works carried out so far;
- c) Identify areas where soil erosion and sediment yield arrest has been successful;
- d) Identify areas where soil erosion and sediment yield arrest has not been successful, and thus evaluate and revise measures implemented to assess their effectiveness in local conditions;
- e) Assess CAT plan implementation expenditure and cost over runs, in non - functioning treatment measures;

Suggestions for Improvement

The suggestions for improvement may cover salient modifications to R&R Compensatory Afforestation, Green belt Development, Health systems, Fish development, Catchment Area Treatment, Reservoir Rim Treatment, Landscape restoration, Ecological conservation etc. However, the Consultant may:

- a) Prioritize the modifications based on the criteria that achieve improved stakeholder satisfaction
- b) Identify areas where implementation of EMPs require improvements in terms of

manpower deployment, financial arrangements, actors involved, technology deployed, etc.

- c) Suggest revised performance or success criteria

Recommendations for Improvements

The recommendations would cover each element of R&R, Compensatory Afforestation, Green belt development, Health systems, Fish development, Catchment Area Treatment, Reservoir Rim Treatment, Landscape Restoration, Ecological conservation etc. as in previous EIA, and state its present status against anticipated / desired outcome; potential causes for deviation; suggested modification; evaluation of suggested modification; costs and benefits; institutional requirements (roles/timelines/legislative); success criteria and success measures.

The evaluating agency would discuss the draft recommendations with CWC before discussing with stakeholders and experts. The opinions of and feedback from the stakeholders would be evaluated along with CWC before finalizing the recommendations of the evaluating agency. The recommendations of the evaluating agency may be considered for evaluation by the CWC and, if found pragmatic, may be taken up for implementation.

Salient Features of Singur Project

1	RIVER	Manjira	
2	VILLAGE	Singur	
	MANDAL	Pulkal	
	DISTRICT	Medak	
3	LOCATION		
	Latitude	17° - 45'	North
	Longitude	77° - 56'	East
4	CATCHMENT AREA		
	Maharastra	10472	sq.km
	Karnataka	4,015	sq. km
	Andhra Pradesh	1,610	sq. km
	Total	16,097	sq. km
5	RESERVOIR STANDARDS		
	a) FRL & MWL	523.6	m
	b) Gross storage capacity	846.83	MCM
	c) TBL	527.85	m
	d) Dead Storage Level	518.25	m
	e) Dead Storage Capacity	282.3	MCM
	f) Water spread area at FRL	164.38	sq.km
6	SPILLWAY		
	Design Flood	23,103	cumec
	Maximum of flood discharge	22084	cumec
	Lowest Bed level	500	m
	Crest Level	510.6	m
	Head of discharge	13	m
	Top of crest gates	523.6	m
	No. of radial gates Size 15 x 13 m.	17	Nos.
	Length of Masonry spillway	327	m
	Length of power blocks (non over flow portion of Masonry dam)	81.1	m
7	Earth Dam		
	i) T.B.L.	527.85	m

Annexure II.1

Salient Features of Singur Project

1	RIVER	Manjira	
	ii) Length of left flank	3993	m
	iii) Length of right flank	3120	m
	iv) Total length of earth dam	7113	m
8	Head Regulators		
	<i>i) Left Flank</i>		
	Sill Level	520	m
	Number of Vents	4	Nos
	Size of Vents	2.50 x 2.00	m
	<i>ii) Right Flank</i>		
	Sill Level	520	m
	Number of Vents	1	Nos
	Size of Vents	1.50 x 1.00	m
9	Command Area		
	<i>Total Area Proposed</i>	16,000	ha
	<i>Total Length of Canals</i>	60	km
	Left Canal		
	Length of canal proposed	48	km
	Ayacut proposed	15,000	ha
	Discharge Capacity	25.49	Cumec
	Right Canal		
	Length of canal proposed	12	km
	Ayacut proposed	1,000	ha
	Discharge Capacity	1.61	Cumec

Annexure VIII.1

List of trees and shrubs found in the catchment area.

Latin name	Vernacular name	Family
<i>Acacia auriculiformis</i>	Australian Wattle	Mimosaceae
<i>Acacia caesia</i>	Kirintha	Mimosaceae
<i>Acacia farnesiana</i>	Muriki thumma	Mimosaceae
<i>Acacia leucophloea</i>	Tella tumma	Mimosaceae
<i>Acacia nilotica</i>	Nalla tumma	Mimosaceae
<i>Acacia planifrons</i>	Godugu Thumma	Mimosaceae
<i>Acacia sundra</i>	Sundra	Mimosaceae
<i>Acaia holosericea</i>	Holosericea	Mimosaceae
<i>Acaia horrida</i>	Parikithumma	Mimosaceae
<i>Aegle marmelos</i>	Maredu	Rutaceae
<i>Ailanthus excelsa</i>	Peddamaanu	Simaroubaceae
<i>Alangium salvifolium</i>	Ooduga	Alangiaceae
<i>Albizia lebbek</i>	Dirisanam	Mimosaceae
<i>Alhagi camelorum</i>	Camel thorn	Fabaceae
<i>Annona squamosa</i>	Custard apple	Annonaceae
<i>Azadirachta indica</i>	Vepa	Meliaceae
<i>Azima tetracantha</i>	Tella Uppili	Salvadoraceae
<i>Bauhinia racemosa</i>	Aare chettu	Caesalpiniaceae
<i>Bauhinia variagata</i>	Mandari	Caesalpiniaceae
<i>Benkara malabarica</i>	Pedda manga	Rubiaceae
<i>Bombax ceiba</i>	Booruga	Bombacaceae
<i>Borassus flabellifer</i>	Taati / Taadi	Araceae
<i>Breynia retusa</i>	Chinna purugudu	Euphorbiaceae
<i>Breynia vitis-ideae,</i>	Nalla purugudu	Euphorbiaceae
<i>Butea monosperma</i>	Modugu	Fabaceae
<i>Callistemon citrinus</i>	Indian bottle brush tree	Myrtaceae
<i>Calotropis gigantea</i>	Tella Jilledu	Asclepiadaceae
<i>Calotropis procera</i>	Jilledu	Asclepiadaceae
<i>Canthium dicoccum</i>	Nalla balusu	Rubiaceae
<i>Canthium parviflorum</i>	Balusu	Rubiaceae
<i>Carissa spinarum</i>	Kalivi / Vaaka	Apocynaceae
<i>Cascabela thevetia</i>	Patcha ganneru	Apocynaceae
<i>Cassia auriculata</i>	Caesalpiniaceae	Caesalpiniaceae
<i>Cassia fistula</i>	Rela	Caesalpiniaceae
<i>Catunaregam spinosa</i>	Manga / Chinna manga	Rubiaceae
<i>Chloroxylon swietenia</i>	Billudu	Flindarsiaceae
<i>Cissus vitiginea</i>	Adavi Gummadi	Vitaceae
<i>Cocos nucifera</i>	Coconut	Araceae
<i>Cordia dichotoma</i>	Bankiriki	Cordiaceae
<i>Cosmostigma racemosum</i>	Adavitamalapaaku	Apocynaceae

Annexure VIII.1

List of trees and shrubs found in the catchment area.

Latin name	Vernacular name	Family
<i>Dalbergia sisso</i>	Sisso or Seesum	Caesalpiniaceae
<i>Decalepis hahiltonii</i>	Maredu kommulu	Periplocaceae
<i>Dendrocalamus strictus</i>	Bamboo / Veduru	Poaceae
<i>Desmodium pulchellum</i>	Deyyapu mokka	Fabaceae
<i>Dichrostachys cinerea</i>	Sara Thumma	Mimosaceae
<i>Diospyros chloroxylon</i>	Ulinda	Ebenaceae
<i>Diospyros melanoxylon</i>	Tunki	Fabaceae
<i>Dodonaea viscosa</i>	Bandedu	Sapindaceae
<i>Erythroxylon monogynum</i>	Dedaraaku	Erythroxylaceae
<i>Eucalyptus teretocronis</i>	Eucalyptus	Myrtaceae
<i>Eucalyptus hybrid</i>	Eucalyptus / Nilagiri	Myrtaceae
<i>Euphorbia caducifolia</i>	Brahma jemudu	Euphorbiaceae
<i>Ficus benghalensis</i>	Marri	Moraceae
<i>Ficus racemosa</i>	Medi	Moraceae
<i>Ficus religiosa</i>	Raavi	Moraceae
<i>Glycomis mauritiana</i>	Tanaka	Rutaceae
<i>Grewia flavescens</i>	Jaana	Tiliaceae
<i>Grewia hirsuta</i>	Jaani Chettu	Tiliaceae
<i>Grewia obtusa</i>	Jaana	Tiliaceae
<i>Grewia orbiculata</i>	Pedda Jaani	Tiliaceae
<i>Grewia tillifolia</i>	Pedda Jaana	Tiliaceae
<i>Grewia villosa</i>	Bantha	Tiliaceae
<i>Hardwickia binata</i>	Yepi	Caesalpiniaceae
<i>Hemidemus indicus</i>	Sugandhapala	Periplocaceae
<i>Holoptelia integrifolia</i>	Nemali naara	Ulmaceae
<i>Ipomoea carnea</i>	Rubber mokka	Convolvulaceae
<i>Lagerstroemia parviflora</i>	Chennangi	Lythraceae
<i>Lantana camara</i>	Lantana	Verbenaceae
<i>Leptadenia reticulata</i>	Mukkupala Teega	Asclepiadaceae
<i>Leucaena leucocephala</i>	Subabul	Mimosaceae
<i>Limonia acidissima</i>	Velaga	Rutaceae
<i>Mangifera indica</i>	Mamidi	Anacardiaceae
<i>Maytenus emarginata</i>	Danti	Celastraceae
<i>Mimosa polyancistra</i>	Thumma	Mimosaceae
<i>Mimosa rubicaulis</i>	Pariki kampa	Mimosaceae
<i>Mimosops elengi</i>	Pogada	Sapotaceae
<i>Morinda pubescens</i>	Togaru	Rubiaceae
<i>Moringa olivaefera</i>	Munaga	Moringaceae
<i>Muntingia calabura</i>	Wild cherry	Elaeocarpaceae
<i>Parkinsonia aculeata</i>	Jeeluga	Widespread

Annexure VIII.1

List of trees and shrubs found in the catchment area.

Latin name	Vernacular name	Family
<i>Peltophorum pterocarpum</i>	Konda chinta	Caesalpiniaceae
<i>Pergularia daemia</i>	Dustapa teega	Asclepiadaceae
<i>Phoenix sylvestris</i>	Eetha	Araceae
<i>Phyllanthus emblica</i>	Usiri	Euphorbiaceae
<i>Phyllanthus reticulatus</i>	Pulasari / Puliseru	Euphorbiaceae
<i>Pithecellobium dulce</i>	Seema chinta	Mimosaceae
<i>Plumeria alba</i>	Tella devaganneru	Apocynaceae
<i>Plumeria rubra</i>	Erra devaganneru	Apocynaceae
<i>Polyalthia longifolia</i>	Ashoka	Annonaceae
<i>Polyalthia pendula</i>	Asoka	Annonaceae
<i>Pongamia pinnata</i>	Ganuga	Fabaceae
<i>Prosopis juliflora</i>	English tumma	Mimosaceae
<i>Prosopis spicigera</i>	Jammi chettu	Mimosaceae
<i>Rauwolfia tetraphylla</i>	Bara Chandrika	Apocynaceae
<i>Samanea saman</i>	Nidrabhangi	Mimosaceae
<i>Sapindus emarginatus</i>	Kunkundu	Sapindaceae
<i>Spathodea campanulata</i>	Flame of the forest	Bignoniaceae
<i>Sterculia foetida</i>	Adavi badam	Sterculiaceae
<i>Syzygium cumini</i>	Neradu	Myrtaceae
<i>Tamarindus indica</i>	Chinta	Caesalpiniaceae
<i>Tecoma stans</i>	Patcha turai	Bignoniaceae
<i>Tectona grandis</i>	Teak / Teku	Verbenaceae
<i>Terenna asiatica</i>	Kommi	Rubiaceae
<i>Terminalia arjuna</i>	Tella maddi	Combretaceae
<i>Thespesia populnea</i>	Ganga Raavi	Malvaceae
<i>Tylophora indica</i>	Kukkapala teega	Asclepiadaceae
<i>Vitex negundo</i>	Vaavili	Verbenaceae
<i>Wattakaka volubilis</i>	Tummudu teega	Asclepiadaceae
<i>Ziziphus numularia</i>	Gotti	Rhamnaceae
<i>Ziziphus rugosus</i>	Regu	Rhamnaceae

Annexure VIII.2

List of grasses and sedges found in the project area.

Scientific name	Family	Importance
<i>Alloteropsis cimicina</i>	Poaceae	Fodder
<i>Andropogon jwarancusa</i>	Poaceae	Fodder grass
<i>Aristida depressa</i>	Poaceae	Fodder
<i>Aristida hystrix</i>	Poaceae	Fodder in early stages
<i>Aristida setacea</i>	Poaceae	Used for making brooms
<i>Bothriochloa pertusa</i>	Poaceae	Fodder grass
<i>Brachiaria cruciformis</i>	Poaceae	Fodder grass
<i>Brachiaria distachya</i>	Poaceae	Fodder grass
<i>Brachiaria mutica</i>	Poaceae	Fodder grass
<i>Brachiaria reptens</i>	Poaceae	Fodder grass
<i>Bulbostylis barbata</i>	Cyperaceae	Fodder
<i>Cenchrus ciliaris</i>	Poaceae	Fodder grass
<i>Chloris barbata</i>	Poaceae	Fodder grass
<i>Chloris montana</i>	Poaceae	Fodder grass
<i>Chrysopogon fulvus</i>	Poaceae	Fodder grass
<i>Cymbopogon coloratus</i>	Poaceae	Aromatic non palatable perennial grass
<i>Cymbopogon caesius</i>	Poaceae	Aromatic non palatable perennial grass
<i>Cynodon dactylon</i>	Poaceae	Palatable fodder and soil binder
<i>Cyperus aristatus</i>	Cyperaceae	Palatable sedge
<i>Cyperus iria</i>	Cyperaceae	Palatable sedge
<i>Cyperus rotundus</i>	Cyperaceae	Nut grass, a notorious weed
<i>Dactyloctenium aegyptium</i>	Poaceae	Palatable fodder and soil binder
<i>Dactyloctenium aristatum</i>	Poaceae	Palatable fodder and soil binder
<i>Dichanthium annulatum</i>	Poaceae	Palatable fodder gass
<i>Dichanthium caricosum</i>	Poaceae	Palatable fodder gass
<i>Digitaria abludens</i>	Poaceae	Palatable fodder grass
<i>Digitaria bicornis</i>	Poaceae	Palatable fodder grass
<i>Digitaria ciliaris</i>	Poaceae	Palatable fodder grass
<i>Digitaria setigera</i>	Poaceae	Palatable fodder grass
<i>Digitaria tomentosa</i>	Poaceae	Palatable fodder grass
<i>Dinebra retroflexa</i>	Poaceae	Palatable fodder grass
<i>Echinochloa colona</i>	Poaceae	Palatable fodder grass
<i>Echinochloa crus-galli</i>	Poaceae	Palatable fodder grass
<i>Eleusine indica</i>	Poaceae	Palatable fodder grass
<i>Eragrostis ciliaris</i>	Poaceae	Palatable fodder grass
<i>Eragrostis gangetica</i>	Poaceae	Palatable fodder grass
<i>Eragrostis maderaspatana</i>	Poaceae	Palatable fodder grass
<i>Eragrostis pilosa</i>	Poaceae	Palatable fodder grass
<i>Eragrostis tenella</i>	Poaceae	Palatable fodder grass
<i>Eragrostis tenuifolia</i>	Poaceae	Palatable fodder grass
<i>Eremopogon faveolatus</i>	Poaceae	Palatable fodder grass

Annexure VIII.2

List of grasses and sedges found in the project area.

Scientific name	Family	Importance
<i>Fimbristylis acuminata</i>	Cyperaceae	Fodder
<i>Fimbristylis dichotoma</i>	Cyperaceae	Fodder
<i>Heteropogon contortus</i>	Poaceae	Fodder when young
<i>Iseilema laxum</i>	Poaceae	Fodder grass
<i>Iseilema prostratum</i>	Poaceae	Fodder grass
<i>Kyllinga triceps</i>	Cyperaceae	Fodder
<i>Leptochloa chinensis</i>	Poaceae	Fodder grass
<i>Oryza sativa</i>	Poaceae	Paddy
<i>Panicum miliaceum</i>	Poaceae	Fodder grass
<i>Panicum miliare</i>	Poaceae	Fodder grass
<i>Panicum montanum</i>	Poaceae	Fodder grass
<i>Panicum psilopodium</i>	Poaceae	Fodder grass
<i>Panicum repens</i>	Poaceae	Fodder grass
<i>Panicum typheron</i>	Poaceae	Fodder grass
<i>Paspalidium flavidum</i>	Poaceae	Fodder grass
<i>Paspalum scrobiculatum</i>	Poaceae	Fodder grass
<i>Pennisetum typhoides</i>	Poaceae	Grown as a minor millet
<i>Perotis indica</i>	Poaceae	Fodder grass
<i>Scirpus barbatus</i>	Cyperaceae	Fodder
<i>Scirpus chinensis</i>	Cyperaceae	Fodder
<i>Scirpus squarrosus</i>	Cyperaceae	Fodder
<i>Setaria intermedia</i>	Poaceae	Fodder grass
<i>Setaria italica</i>	Poaceae	Fodder grass
<i>Setaria tomentosa</i>	Poaceae	Fodder grass
<i>Sporobolus coromandelianus</i>	Poaceae	Fodder grass
<i>Sporobolus diander</i>	Poaceae	Fodder grass
<i>Sporobolus indicus</i>	Poaceae	Fodder grass
<i>Tragus biflorus</i>	Poaceae	Fodder grass
<i>Urochloa panicoides</i>	Poaceae	Fodder grass
<i>Urochloa reptans</i>	Poaceae	Fodder grass

Annexure VIII.3**List of herbaceous plant resources found in the project area during the rainy season.**

Name of species	Family	Importance
<i>Abelmoschus esculentus</i>	Malvaceae	Vegetable
<i>Abrus precatorius</i>	Fabaceae	Medicinal
<i>Abutilon crispum</i>	Malvaceae	Non palatable weed
<i>Abutilon indicum</i>	Malvaceae	Non palatable weed
<i>Acalypha indica</i>	Euphorbiaceae	Medicinal
<i>Acalypha lanceolata</i>	Euphorbiaceae	Non palatable weed
<i>Acalypha paniculata</i>	Euphorbiaceae	Non palatable weed
<i>Achyranthes aspera</i>	Amaranthaceae	Medicinal
<i>Adhatoda vasica</i>	Acanthaceae	Medicinal
<i>Aerva lanata</i>	Amaranthaceae	Medicinal
<i>Aerva tomentosa</i>	Amaranthaceae	Medicinal
<i>Ageratum conyzoides</i>	Asteraceae	Non palatable weed
<i>Allamania longepedunculata</i>	Amaranthaceae	Fodder
<i>Aloe barbadensis</i>	Liliaceae	Leaf fiber and soil binder
<i>Aloe vera</i>	Liliaceae	Medicinal
<i>Alternanthera pungens</i>	Amaranthaceae	Leafy vegetable
<i>Alternanthera traindرا</i>	Amaranthaceae	Leafy vegetable
<i>Alysicarpus longifolius</i>	Fabaceae	Fodder legume
<i>Alysicarpus monilifer</i>	Fabaceae	Fodder legume
<i>Alysicarpus vaginalis</i>	Fabaceae	Fodder legume
<i>Amaranthus polygamus</i>	Amaranthaceae	Leafy vegetable
<i>Amaranthus spinosus</i>	Amaranthaceae	Non palatable weed
<i>Amaranthus tricolor</i>	Amaranthaceae	Grown as an ornamental
<i>Amaranthus viridis</i>	Amaranthaceae	Non palatable weed
<i>Ammania baccifera</i>	Lythraceae	Medicinal
<i>Andrographis echoioides</i>	Acanthaceae	Fodder
<i>Andrographis paniculata</i>	Acanthaceae	Medicinal
<i>Antigonon leptopus</i>	Polygalaceae	Wild ornamental climber
<i>Argemone mexicana</i>	Papaveraceae	Medicinal
<i>Aristolochia bracteata</i>	Aristolochiaceae	Medicinal
<i>Aristolochia indica</i>	Aristolochiaceae	Medicinal
<i>Aschynomene indica</i>	Fabaceae	Fodder legume
<i>Asystasia gangetica</i>	Acanthaceae	Medicinal
<i>Barleria cristata</i>	Acanthaceae	Wild prickly ornamental
<i>Barleria prionitis</i>	Acanthaceae	Grown as an ornamental
<i>Biophytum sensitivum</i>	Geraniaceae	Medicinal
<i>Blepharis repens</i>	Acanthaceae	Fodder
<i>Blepharis molluginifolia</i>	Acanthaceae	Fodder
<i>Blumea virens</i>	Asteraceae	Non palatable winter weed

Annexure VIII.3**List of herbaceous plant resources found in the project area during the rainy season.**

Name of species	Family	Importance
<i>Boerhaavia chinensis</i>	Nyctaginaceae	Fodder
<i>Boerhaavia diffusa</i>	Nyctaginaceae	Medicinal
<i>Borreria hispida</i>	Rubiaceae	Fodder
<i>Cajanus cajan</i>	Fabaceae	Red gram
<i>Capsicum frutescens</i>	Solanaceae	Chillies
<i>Cassia occidentalis</i>	Caesalpiniaceae	Non palatable legume
<i>Cassia tora</i>	Caesalpiniaceae	Non palatable legume
<i>Cassytha filiformis</i>	Lauraceae	Medicinal
<i>Catharanthus roseus</i>	Apocynaceae	Medicinal
<i>Celosia cristata</i>	Amaranthaceae	Fodder
<i>Centella asiatica</i>	Umbelliferae	Medicinal
<i>Cissus quadrangularis</i>	Ampelidaceae	Medicinal
<i>Citrullus colocynthis</i>	Cucurbitaceae	Medicinal
<i>Citrullus vulgaris</i>	Cucurbitaceae	Edible fruit
<i>Cleome aspera</i>	Capparidaceae	Non-palatable weed with medicinal properties
<i>Cleome gynandra</i>	Capparidaceae	Non-palatable weed with medicinal properties
<i>Cleome monophylla</i>	Capparidaceae	Non-palatable weed with medicinal properties Non-
<i>Cleome viscosa</i>	Capparidaceae	Non-palatable weed with medicinal properties
<i>Clitoria ternatea</i>	Fabaceae	Medicinal
<i>Coccinia cordifolia</i>	Cucurbitaceae	Medicinal
<i>Commelina benghalensis</i>	Commelinaceae	Fodder
<i>Commelinina undulata</i>	Commelinaceae	Fodder
<i>Conzya stricta</i>	Asteraceae	Non-palatable weed
<i>Corchorus aestuans</i>	Tiliaceae	Fodder
<i>Corchorus tridens</i>	Tiliaceae	Fodder
<i>Corchorus trilocularis</i>	Tiliaceae	Fodder
<i>Coriandrum sativum</i>	Umbelliferae	Coriander leaves and fruits are edible
<i>Cosmos bipinnatus</i>	Asteraceae	Ornamental
<i>Cressa cretica</i>	Convolvulaceae	Non-palatable weed
<i>Crinum asiiticum</i>	Amaryllidaceae	Ornamental
<i>Crotalaria medicaginea</i>	Fabaceae	Medicinal
<i>Crotalaria paniculta</i>	Fabaceae	Medicinal
<i>Crotalaria prostrata</i>	Fabaceae	Fodder
<i>Crotalaria verrucosa</i>	Fabaceae	Medicinal
<i>Croton bonplandianum</i>	Euphorbiaceae	Non-palatable weed
<i>Cuscuta chinensis</i>	Lythraceae	Stem parasite
<i>Cyanotis axillare</i>	Commelinaceae	Weed
<i>Cyanotis cristata</i>	Commelinaceae	Weed
<i>Datura innoxia</i>	Solanaceae	Medicinal

Annexure VIII.3**List of herbaceous plant resources found in the project area during the rainy season.**

Name of species	Family	Importance
<i>Datura metel</i>	Solanaceae	Medicinal
<i>Desmodium gangeticum</i>	Fabaceae	Non palatable weed
<i>Desmodium triflorum</i>	Fabaceae	Palatable weed
<i>Digera arvensis</i>	Amaranthaceae	Palatable fodder and Medicinal
<i>Dolichos biflorus</i>	Fabaceae	Palatable fodder
<i>Dolichos lablab</i>	Fabaceae	Horse gram
<i>Duranta repens</i>	Verbenaceae	Grown as a hedge plant
<i>Eclipta alba</i>	Asteraceae	Medicinal
<i>Eclipta prostrata</i>	Asteraceae	Medicinal
<i>Emilia sonchifolia</i>	Asteraceae	Winter weed
<i>Enicostemma hyssopifolium</i>	Gentianaceae	Medicinal
<i>Euphorbia heterophylla</i>	Euphorbiaceae	Ornamental
<i>Euphorbia hirta</i>	Euphorbiaceae	Fodder
<i>Euphorbia pulcherrima</i>	Euphorbiaceae	Ornamental
<i>Euphorbia thymifolia</i>	Euphorbiaceae	Fodder
<i>Evolvulus alsinoides</i>	Convolvulaceae	Medicinal and fodder
<i>Evolvulus nummularis</i>	Convolvulaceae	Fodder
<i>Glycine javanica</i>	Fabaceae	Medicinal
<i>Gomphrena decumbens</i>	Amaranthaceae	Fodder
<i>Gomphrena globosa</i>	Amaranthaceae	Fodder
<i>Gossypium arboreum</i>	Malvaceae	Cotton
<i>Gossypium barbadense</i>	Malvaceae	Cotton
<i>Gossypium herbaceum</i>	Malvaceae	Cotton
<i>Heliotropium curassavicum</i>	Boraginaceae	Medicinal
<i>Heliotropium indicum</i>	Boraginaceae	Medicinal
<i>Heliotropium ovalifolium</i>	Boraginaceae	Weed
<i>Hibiscus micranthus</i>	Malvaceae	Medicinal and ornamental
<i>Hyptis suaveolens</i>	Lamiaceae	Non-palatable aggressive weed
<i>Impatiens balsamiana</i>	Balsamiaceae	Ornamental
<i>Indigofera enneaphylla</i>	Fabaceae	Palatable legume
<i>Indigofera linifolia</i>	Fabaceae	Palatable legume
<i>Indigofera prostrata</i>	Fabaceae	Palatable legume
<i>Indigofera pulchella</i>	Fabaceae	Non-palatable legume
<i>Indigofera viscosa</i>	Fabaceae	Non-palatable legume
<i>Ipomea nil</i>	Convolvulaceae	Twining shrub in forests
<i>Ipomea purpurea</i>	Convolvulaceae	Perennial semi aquatic weed
<i>Ipomoea eriocarpa</i>	Convolvulaceae	Slender climber
<i>Ipomoea angulata</i>	Convolvulaceae	Perennial semi aquatic weed

Annexure VIII.3**List of herbaceous plant resources found in the project area during the rainy season.**

Name of species	Family	Importance
<i>Ipomoea carnea</i>	Convolvulaceae	Large perennial shrub
<i>Jasminum grandiflorum</i>	Oleaceae	Ornamental with scented flowers
<i>Jasminum rigidum</i>	Oleaceae	Ornamental with scented flowers
<i>Jasminum sambac</i>	Oleaceae	Ornamental with scented flowers
<i>Jatropha gossypifolia</i>	Euphorbiaceae	Medicinal
<i>Justicia glauca</i>	Acanthaceae	Common and grazed
<i>Justicia micrantha</i>	Acanthaceae	Common and grazed
<i>Justicia procumbens</i>	Acanthaceae	Common and grazed
<i>Justicia prostrata</i>	Acanthaceae	Common and grazed
<i>Justicia simplex</i>	Acanthaceae	Common and grazed
<i>Justicia trinervia</i>	Acanthaceae	Common and grazed
<i>Leucas aspera</i>	Lamiaceae	Medicinal weed
<i>Leucas hirta</i>	Lamiaceae	Weed
<i>Leucas lanata</i>	Lamiaceae	Weed
<i>Malvastrum coromandelianum</i>	Malvaceae	Non palatable weed
<i>Marremia emarginata</i>	Convolvulaceae	Soil binding runner
<i>Merremia tridentata</i>	Convolvulaceae	Medicinal
<i>Mimosa pudica</i>	Mimosaceae	Medicinal
<i>Mollugo nudicaulis</i>	Aizoaceae	Ruderal
<i>Mollugo pentaphylla</i>	Aizoaceae	Ruderal
<i>Neptunia indicum</i>	Mimosaceae	Weed
<i>Neptunia triquetra</i>	Mimosaceae	Weed
<i>Ocimum americanum</i>	Lamiaceae	Aromatic medicinal
<i>Ocimum basilicum</i>	Lamiaceae	Aromatic medicinal
<i>Ocimum gratissimum</i>	Lamiaceae	Aromatic medicinal
<i>Ocimum sanctum</i>	Lamiaceae	Aromatic medicinal
<i>Oldenlandia corymbosa</i>	Rubiaceae	Fodder
<i>Oldenlandia herbacea</i>	Rubiaceae	Fodder
<i>Oldenlandia umbellata</i>	Rubiaceae	Fodder
<i>Oxalis corniculata</i>	Oxalidaceae	Fodder and vegetable
<i>Oxalis latifolia</i>	Oxalidaceae	Fodder and vegetable
<i>Parthenium hysterophorus</i>	Asteraceae	Notorious allergic weed
<i>Peristrophe bicalyculata</i>	Acanthaceae	Weed
<i>Phaseolus aconitifolius</i>	Fabaceae	Fodder legume
<i>Phaseolus sublobatus</i>	Fabaceae	Fodder legume
<i>Phaseolus trilobus</i>	Fabaceae	Fodder legume
<i>Phyllanthus amarus</i>	Euphorbiaceae	Medicinal
<i>Phyllanthus simplex</i>	Euphorbiaceae	Fodder
<i>Phyllathus</i>	Euphorbiaceae	Fodder

Annexure VIII.3**List of herbaceous plant resources found in the project area during the rainy season.**

Name of species	Family	Importance
<i>maderaspatensis</i>		
<i>Physalis minima</i>	Solanaceae	Fodder and medicinal
<i>Polycarpea corymbosa</i>	Caryophyllaceae	Medicinal
<i>Polygala chinensis</i>	Polygalaceae	Medicinal
<i>Polygala eiroptera</i>	Polygalaceae	Fodder
<i>Polygala elongata</i>	Polygalaceae	Fodder
<i>Polygala persicariaefolia</i>	Polygalaceae	Medicinal
<i>Portulaca grandiflora</i>	Portulacaceae	Ornamental
<i>Portulaca oleracea</i>	Portulacaceae	Ornamental
<i>Portulaca quadrifida</i>	Portulacaceae	Fodder
<i>Rhynchosia mimima</i>	Fabaceae	Slender palatable climber
<i>Rhynchosia suaveolens</i>	Fabaceae	Non-palatable legume
<i>Rothia trifoliata</i>	Fabaceae	Fodder
<i>Ruellia tuberosa</i>	Acanthaceae	Very widespread plant with attractive flowers
<i>Rungia repens</i>	Acanthaceae	Fodder
<i>Sanseveria roxburghiana</i>	Liliaceae	Medicinal
<i>Scilla indica</i>	Liliaceae	Non-edible bulbs
<i>Scoparia dulcis</i>	Scrophulariaceae	Medicinal
<i>Senna uniflora</i>	Caesalpiniaceae	Most abundant weed
<i>Sesbania aculeata</i>	Fabaceae	Green manure
<i>Sesbania procumbens</i>	Fabaceae	Green manure
<i>Sida acuta</i>	Malvaceae	Non-palatable weed
<i>Sida cordifolia</i>	Malvaceae	Non-palatable weed
<i>Sida rhombifolia</i>	Malvaceae	Non-palatable weed
<i>Solanum anguivi</i>	Solanaceae	Medicinal
<i>Solanum melongena</i>	Solanaceae	Wild egg plant – medicinal
<i>Solanum nigrum</i>	Solanaceae	Egg plant – vegetable
<i>Solanum xanthocarpum</i>	Solanaceae	Medicinal
<i>Sonchus arvensis</i>	Asteraceae	Winter annual
<i>Sonchus oleraceus</i>	Asteraceae	Winter annual
<i>Sphaeranthus indicus</i>	Asteraceae	Medicinal
<i>Striga angustifolia</i>	Scrophulariaceae	Partial root parasite
<i>Striga asiatica</i>	Scrophulariaceae	Partial root parasite
<i>Tephrosia hirta</i>	Fabaceae	Non-palatable legume
<i>Tephrosia procumbens</i>	Fabaceae	Non-palatable legume
<i>Tephrosia roxburghiana</i>	Fabaceae	Non-palatable legume
<i>Tragia involucrata</i>	Euphorbiaceae	Medicinal
<i>Trainथेमा portulacastrum</i>	Ficoidaceae	Fodder and vegetable

Annexure VIII.3**List of herbaceous plant resources found in the project area during the rainy season.**

Name of species	Family	Importance
<i>Trianthema triquetra</i>	Ficoidaceae	Medicinal
<i>Tribulus terrestris</i>	Zygophyllaceae	Medicinal
<i>Trichodesma indicum</i>	Boraginaceae	Medicinal
<i>Tridax procumbens</i>	Asteraceae	Medicinal
<i>Triumfetta pilosa</i>	Euphorbiaceae	Medicinal
<i>Triumfetta rhomboidea</i>	Euphorbiaceae	Medicinal
<i>Uraria picta</i>	Fabaceae	Medicinal
<i>Urginea congesta</i>	Liliaceae	Common weed of shady places
<i>Urginea coromandeliana</i>	Liliaceae	Common weed of shady places
<i>Waltheria indica</i>	Sterculiaceae	Non-palatable weed
<i>Withania somnifera</i>	Solanaceae	Medicinal
<i>Xanthium strumarium</i>	Asteraceae	Medicinal
<i>Zinnia elegans</i>	Asteraceae	Ornamental
<i>Zornia gibbosa</i>	Fabaceae	Fodder

Annexure VIII.6

List of vertebrates other than birds found in and around the catchment area.

Common name	Scientific name	Local name
MAMMALS		
House shrew	<i>Suncus murinus tytleri</i>	Chuchu
Savi pygmy shrew	<i>Suncus etruscus micronyx</i>	Chuchu
Wild boar	<i>Sus scrofa</i>	Adavi Pandi
Three striped squirrel	<i>Funambulus palmarum</i>	Udatha
Indian crested porcupine	<i>Hystrix indica</i>	Mullapandi
Common Indian rat	<i>Rattus rattus refescens</i>	Yeluka
Common Indian rat	<i>Rattus rattus gangutrianus</i>	Yeluka
Home mouse	<i>Mus musculus tytleri</i>	Yeluka
Mouse	<i>Mus musculus homeurus</i>	Yeluka
Common Indian field mouse	<i>Mus booduga</i>	Yeluka
Indian bush rat	<i>Golunda ellioti myoethrix</i>	Yeluka
Bandicoot rat	<i>Nosokia indica indica</i>	Yeluka
Large bandicoot rat	<i>Bandicota indica</i>	Yeluka
Short-nosed fruit bat	<i>Cynopterus sphinx</i>	Gabbilam
Indian pygmy pipistrelle	<i>Pipistrellus mimus mimus</i>	Gabbilam
Greater yellow bat	<i>Scotophilus heathi heathi</i>	Gabbilam
Long-eared bat	<i>Plecotus auritus homochrous</i>	Gabbilam
Rhesus macaque	<i>Macaca mulatia</i>	Kothi
Common red fox	<i>Vulpes vulpes montana</i>	Nakka
Asiatic jackal	<i>Canis aureus</i>	Gunta Nakka
Indian grey mongoose	<i>Herpestes edwardsinyula</i>	Mungeesa
REPTILES		
Chameleon	<i>Chameleon zeylanicus</i>	Oosaravelli
Cobra	<i>Naja naja</i>	Naagu paamu
Common Indian Krait	<i>Bungarus caeruleus</i>	Katla paamu
Common Indian Monitor	<i>Varanus bengalensis*</i>	Udumu
Garden lizard	<i>Calotes versicolor</i>	Thonda
Giant Blind Snake	<i>Typhlops diardii</i>	Rendu talala paamu
Indian golden gecko	<i>Calodactylodes aureus</i>	Nalli keechu
Indian python	<i>Python molurus *</i>	Kond chiluva
Indian star tortoise	<i>Geochelone elegans</i>	Nakshatra taabelu
Rat snake	<i>Ptyas mucosa / Tripidonatuspisactor</i>	Jerri pothu
Russell's viper	<i>Vipera russelli</i>	Rakta pinjari
Saw scaled viper	<i>Echis carinatus</i>	Pinjari
Slender Blind Snake	<i>Typhlops porrectus</i>	---
Indian wall lizard	<i>Hemidactylus flaviviridis</i>	Balli
Tree Snake	<i>Chrysopelea taprobanica</i>	Pasirika paamu
Whip Snake	<i>Dryphis nasutus</i>	---
AMPHIBIANS		

Annexure VIII.6

List of vertebrates other than birds found in and around the catchmnet area.

Common name	Scientific name	Local name
Indian Burrowing frog	<i>Sphaerotheca breviceps</i>	Burada kappa
Green Pond Frog	<i>Rana hexadactyla.</i>	Kappa
Common Indian Toad	<i>Bufo melonosticatus</i>	Toad
Tiger Frog	<i>Hoplobatrachus tigerinus (Rana tigerina)</i>	Kappa
Tree Frog	<i>Hyla arborea</i>	Chettu kappa

Annexure VIII.7

Avian fauna of Singur reservoir and its surroundings up to a radius of 15 Km from the reservoir.

Migratory Status: LM = Local migrant; BR = Breeding; R = resident; WM = Winter migrant; and

SLM = summer local migrant

Abundance Status: C = Common; UC = Uncommon; O = Occasional and R = Rare.

Scientific Name	Common Name	Family	Migratory Status	Abundance Status
<i>Accipiter badius</i>	Shikra	Accipitridae	LM, BR	UC
<i>Elanus caeruleus</i>	Black-shouldered kite	Accipitridae	SLM	UC
<i>Milvus migrans</i>	Black kite	Accipitridae	R, BR	C
<i>Alcedo atthis</i>	Smallblue kingfisher	Alcedinidae	R, BR	C
<i>Ceryle rudis</i>	Lesser pied Kingfisher	Alcedinidae	R, BR	UC
<i>Halcyon smyrnensis</i>	White-Breasted King fisher	Alcedinidae	R, BR	C
<i>Anas poecilorhyncha</i>	Spot-billed duck	Anatidae	LM	C
<i>Dendrocygna javanica</i>	Lesser whistling-duck	Anatidae	WM	UC
<i>Ardea cinerea</i>	Grey Heron	Ardeidae	LM	C
<i>Ardeola grayii</i>	Pond Heron	Ardeidae	R	C
<i>Bubulcus ibis</i>	Cattle Egret	Ardeidae	R, BR	C
<i>Egretta garzetta</i>	Little egret	Ardeidae	LM	C
<i>Hierococcyx varius</i>	Brain fever bird	Ardeidae	R	UC
<i>Ixobrychus cinnamomeus</i>	Chestnut bittern	Ardeidae	SLM	UC
<i>Megalaima haemacephala</i>	Copper smith Barbet	Capitonidae	R, BR	R
<i>Vanellus indicus</i>	Red-wattled lapwing	Charadriidae	R, BR	C
<i>Prinia inornata</i>	Plain prinia	Cisticolidae	R, BR	O
<i>Prinia socialis</i>	Ashy prinia	Cisticolidae	R, BR	UC
<i>Columba livia</i>	Blue rock pigeon	Columbidae	R	C
<i>Streptopelia chinensis</i>	Spotted dove	Columbidae	R, BR	C
<i>Streptopelia decaocto</i>	Eurasian Collared-Dove	Columbidae	R, BR	UC
<i>Streptopelia tranquebarica</i>	Red Collared-Dove	Columbidae	R	C
<i>Streptopelia Senegalensis</i>	Little brown dove	Columbidae	R, BR	C
<i>Coracias benghalensis</i>	Indian roller	Coraciidae	R, BR	C
<i>Corvus splendens</i>	House crow	Corvidae	R, BR	C
<i>Dendrocitta vagabunda</i>	Indian tree pie	Corvidae	R, BR	O

Annexure VIII.7

Avian fauna of Singur reservoir and its surroundings up to a radius of 15 Km from the reservoir.

Migratory Status: LM = Local migrant; BR = Breeding; R = resident; WM = Winter migrant; and

SLM = summer local migrant

Abundance Status: C = Common; UC = Uncommon; O = Occasional and R = Rare.

Scientific Name	Common Name	Family	Migratory Status	Abundance Status
<i>Eudynamys scolopace</i>	Asian koel	Cuculidae	R, BR	C
<i>Lanius excubitor</i>	Great grey shrike	Daniidae	R, BR	UC
<i>Dicaeum erythrorrhynchos</i>	Tickell's flower pecker	Dicaeidae	R, BR	C
<i>Dicrurus macrocercus</i>	Black drongo	Dicruridae	R, BR	C
<i>Aegithinia tiphia</i>	Common Iora	Irenidae	LM	O
<i>Hydrophasianus chirugus</i>	Pheasant tailed Jacana	Jacanidae	LM, BR	UC
<i>Merops orientalis</i>	Small Bee eater	Meropidae	LM, BR	C
<i>Motacilla alba</i>	White wagtail	Motacillidae	LM	C
<i>Motacilla flava</i>	Yellow wagtail	Motacillidae	SLM	C
<i>Motacilla maderaspatensis</i>	Large pied wagtail	Motacillidae	LM	UC
<i>Terpsiphone paradisi</i>	Asian paradise-flycatcher	Muscicapidae	SLM	UC
<i>Nectarinia asiatica</i>	Purple sunbird	Nectariniidae	R, BR	C
<i>Nectarinia zeylonica</i>	Purple-rumped sunbird	Nectariniidae	R, BR	C
<i>Athene brama</i>	Spotted owlet	Noctuidae	R, BR	UC
<i>Oriolus oriolus</i>	Eurasian golden oriole	Oriolidae	SLM	UC
<i>Passer domesticus</i>	House sparrow	Passeridae	R, BR	O
<i>Phalacrocorax carbo</i>	Large Cormorant	Phalacrocoracidae	LM	R
<i>Phalacrocorax niger</i>	Little cormorant	Phalacrocoracidae	R, Br	C
<i>Centropus sinensis</i>	Greater coucal	Phasianidae	R, Br	C
<i>Pericrocotus cinnomomeus</i>	Small Minivet	Phasianidae	LM	C
<i>Psittacula cyanocephala</i>	Blossom headed Parakeet	Psittacidae	R, BR	C
<i>Psittacula krameri</i>	Rose-Ringed Parakeet	Psittacidae	R, BR	C
<i>Pycnonotus cafer</i>	Red-vented bulbul	Pycnonotidae	R, BR	C
<i>Fulica atra</i>	Coot	Rallidae	WM	O
<i>Gallinula chloropus</i>	Indian Moorhen	Rallidae	R, Br	C
<i>Porphyrio porphyrio</i>	Purple moorhen	Rallidae	R, BR	O

Annexure VIII.7

Avian fauna of Singur reservoir and its surroundings up to a radius of 15 Km from the reservoir.

Migratory Status: LM = Local migrant; BR = Breeding; R = resident; WM = Winter migrant; and SLM = summer local migrant

Abundance Status: C = Common; UC = Uncommon; O = Occasional and R = Rare.

Scientific Name	Common Name	Family	Migratory Status	Abundance Status
<i>Amaurornis phoenicurus</i>	White-breasted waterhen	Recurvirostridae	R, BR	C
<i>Himantopus himantopus</i>	Black-winged stilt	Recurvirostridae	LM	R
<i>Acridotheres tristis</i>	Common myna	Sturnidae	R, BR	C
<i>Sturnus pagodarum</i>	Brahminy starling	Sturnidae	WM	R
<i>Turdoides caudatus</i>	Common babbler	Timalinae	R, BR	C
<i>Saxicoloides fulicata</i>	Indian robin	Turdinae	R, Br	C
<i>Upupa epops</i>	Common hoopoe	Upupidae	SLM	C

Annexure VIII.8

Checklist of butterflies and moths trapped from the study area.

Scientific Name	Common Name
Family – Nymphalidae	
Subfamily – Satyrinae	
<i>Melanitis leda leda</i> Drury	Common Evening Brown
<i>Ypthima asterope maharatta</i> Moore	Common Three – ring
Subfamily -Acraeinae	
<i>Acraea violae</i> Fabricus	Tawny Coster
Subfamily -Danainae	
<i>Danaus chrysippus chrysippus</i> Linnaeus	Plain Tiger
<i>Danaus genutia genutia</i> Cramer	Striped Tiger
<i>Euploea core core</i> Cramer	Common Crow
<i>Hypolimnas bolina jacintha</i> Drury	Great Egg fly
<i>Hypolimnas misippus</i> Linnaeus	Danaid Egg fly
<i>Phalanta phalantha phalantha</i> Drury	Common Leopard
<i>Precis ontami ontami</i> Linnaeus	Peacock Pansy
<i>Precis hirta hirta</i> Fabricus	Yellow Pansy
<i>Precis lemonias lemonias</i> Linnaeus	Lemon Pansy
<i>Precis orithya ocyale</i> Hubener	Blue Pansy
<i>Symphaedra nais</i> Froster	Baronet
Family -Lycaenidae	
Subfamily -Cretinae	
<i>Curetis bulis</i> Westwood	Bright Sunbeam
Subfamily Polymmatinae	
<i>Castalius rosimon rosimon</i> Fabricus	Common Pierrot
<i>Chilades laius</i> Cramer	Lime Blue
<i>Everes lacturnus syntala</i> Cantlie	Indian Cupid
<i>Freyeria trochylus</i> Freyer	Grass Jewel
<i>Jamides celeno aelianus</i> Fabricus	Common Cerulean
<i>Tarucus nara</i> Kollar	Rounded Pierrot
Family -Pieridae	
Subfamily -Pierinae	
<i>Anaphaeis aurota aurota</i> Fabricus	Pioneer
<i>Colotis danae danae</i> Fabricus	Crimson Tip
<i>Colotis etrida</i> Boisduval	Small or Little Orange Tip
<i>Colotis eucharis eucharis</i> Fabricus	Plain Orange Tip
<i>Delias eucharis</i> Drury	Common Jezebel
<i>Ixias ontamin</i> Cramer	White Orange Tip
<i>Ixias pyrene sesia</i> Fabricus	Yellow Orange Tip
Subfamily -Coliadinae	
<i>Catopsilia contam</i> Fabricus	Common Emigrant

Annexure VIII.8**Checklist of butterflies and moths trapped from the study area.**

Scientific Name	Common Name
<i>Eurema hecabe contamin</i> Moore	Common Grass Yellow
Family -Hesperiidae	
Subfamily -Coeliadinae	
<i>Badamia exclamationis</i> Fabricus	Brown Awl
Subfamily -Hesperiinae	
<i>Borbo bevani</i> Moore	Bevan's Swift
Family -Papilionidae	
Subfamily -Papilioninae	
<i>Pachliopta hector</i> Linnaeus	Crimson Rose
<i>Papilio demoleus</i> Linnaeus	Lime Butterfly
<i>Papilio polytes polytes</i> Linnaeus	Common Mormon
<i>Papilio polytes stichius</i> Hubner	Common Mormon
ii. Heterocera (Moths)	Subfamily
<i>Entomogramma tortum</i> Guen.	Noctuidae
<i>Polytela gloriosae</i> Fab.	Noctuidae
<i>Spodoptera litura</i> (Fab.)	Noctuidae
<i>Spodoptera mauritia</i> Boisd.	Noctuidae
<i>Euproctis scintillans</i> Wlk.	Lymantridae
<i>Heracuala discivitta</i> Moore	Lymantridae
<i>Himala argentea</i> Wlk.	Lymantridae
<i>Eupterote mollifera</i> Wlk.	Eupterotidae
<i>Eupterote undata</i> Blanch.	Eupterotidae
<i>Hypsa alciphron</i> Cram.	Arctiidae
<i>Deopia pulchella</i> Linn.	Arctiidae
<i>Pericallia ricini</i> Fab.	Arctiidae
<i>Pericallia</i> sp.	Geometridae
<i>Macaria fasciata</i> Fab.	Geometridae
<i>Acherontia lachesis</i> Fab.	Sphingidae
<i>Acherontia styx</i> Westw.	Sphingidae
<i>Marumba dyras dyras</i> Wlk.	Sphingidae
<i>Protoparce convolvuli</i> Linn.	Sphingidae
<i>Actias selene</i> Hiibn.	Saturniidae
<i>Antheraea paphia</i> Linn.	Saturniidae
<i>Syntomoides microchilus</i> Hamp.	Syntomidae
<i>Syntomoides imao</i> Cram.	Syntomidae

Annexure VIII.9**List of aquatic / semi aquatic macrophytes found along the borders of the Reservoir, River, Tanks and ponds around the study area.**

Latin name	Family	Status
<i>Alternanthera philoxeroides</i>	Solanaceae	Predominant occasionally
<i>Aponogeton natans</i>	Aponogetonaceae	Common
<i>Azolla pinnata</i>	Azollaceae	Scattered and common
<i>Brachiaria mutica</i>	Poaceae	Sporadic
<i>Carex cruciata</i>	Cyperaceae	Occasional
<i>Centella asiatica</i>	Apiaceae	In localized patches
<i>Chrysopogon aciculatus</i>	Poaceae	Occasional
<i>Colocassia esculenta</i>	Araceae	Occasional
<i>Cynodon dactylon</i>	Poaceae	Extensive and widespread
<i>Cyperus arenarius</i>	Cyperaceae	Locally abundant
<i>Cyperus exaltatus</i>	Cyperaceae	Locally abundant
<i>Echinochloa colona</i>	Poaceae	Occasional
<i>Echinochloa stagnina</i>	Poaceae	Occasional
<i>Eichhornia crassipes</i>	Pontederiaceae	Extensive and widespread
<i>Hydrilla verticillata</i>	Hydrocharitaceae	Prevalent
<i>Ipomoea aquatica</i>	Convolvulaceae	Extensive and widespread
<i>Ludwigia perennis</i>	Onagraceae	Occasional
<i>Marsilia quadrifoliata</i>	Marsiliaceae	Very common Pteridophyte
<i>Nelumbo nucifera</i>	Nelumbiaceae	Very common
<i>Nymphaea nauchali</i>	Nymphaeaceae	Widely scattered
<i>Nymphaea stellata</i>	Nymphaeaceae	Widely scattered
<i>Nymphoides hydrophylla</i>	Nymphaeaceae	Scattered
<i>Nymphoides indica</i>	Nymphaeaceae	Scattered
<i>Ottelia alismoides</i>	Hydrocharitaceace	Widely scattered
<i>Oxalis corniculata</i>	Oxalidaceae	Occasional
<i>Paspalidium geminatum</i>	Poaceae	Common
<i>Phragmites karka</i>	Cyperaceae	Dominant along boundaries
<i>Pistia stratiotes</i>	Araceae	Widespread
<i>Salvinia cucullata</i>	Salviniaceae	Common
<i>Typha angustata</i>	Typhaceae	Extensive and widespread
<i>Vallisneria spiralis</i>	Hydrocharitaceae	Widespread

Annexure VIII.10

List of algal species found in the Singur reservoir, Manjira River, in paddy fields, wells and other water bodies of the around the Reservoir.

Names of Algae	Division
<i>Chlamydomonas sp.</i>	Chlorophyta or green algae
<i>Chlorella vulgaris</i>	Chlorophyta or green algae
<i>Chlorella pyrenoidosa</i>	Chlorophyta or green algae
<i>Chlorococcus sp.</i>	Chlorophyta or green algae
<i>Gonium pectorale</i>	Chlorophyta or green algae
<i>Pandorina sp.</i>	Chlorophyta or green algae
<i>Pandorina morum</i>	Chlorophyta or green algae
<i>Eudorina elegans</i>	Chlorophyta or green algae
<i>Volvox sp.</i>	Chlorophyta or green algae
<i>Hydrodictyon sp.</i>	Chlorophyta or green algae
<i>Pediastrum duplex</i>	Chlorophyta or green algae
<i>Pediastrum boryanum</i>	Chlorophyta or green algae
<i>Tetraspora sp.</i>	Chlorophyta or green algae
<i>Synedra acus</i>	Chlorophyta or green algae
<i>Scenedesmus acuminatus</i>	Chlorophyta or green algae
<i>Scenedesmus dimorpha</i>	Chlorophyta or green algae
<i>Scenedesmus obliquus</i>	Chlorophyta or green algae
<i>Scenedesmus quadricauda</i>	Chlorophyta or green algae
<i>Spirogyra sp</i>	Chlorophyta or green algae
<i>Ulothrix sp.</i>	Chlorophyta or green algae
<i>Oedogonium sp.</i>	Chlorophyta or green algae
<i>Cladophora sp.</i>	Chlorophyta or green algae
<i>Chaetophora sp.</i>	Chlorophyta or green algae
<i>Chara zeylanica</i>	Charophyta (Stone wort)
<i>Euglena proxima</i>	Euglenophyceae
<i>Euglena intermedia</i>	Euglenophyceae
<i>Euglena pisciformis</i>	Euglenophyceae
<i>Euglena polymorpha</i>	Euglenophyceae
<i>Euglena oxyuris</i>	Euglenophyceae
<i>Euglena viridis</i>	Euglenophyceae
<i>Vaucheria sp</i>	Bacillariophyceae
<i>Ankistrodesmus falcatus</i>	Bacillariophyceae
<i>Asterionella sp.</i>	Bacillariophyceae
<i>Navicula cuspidata</i>	Bacillariophyceae
<i>Navicula viridis</i>	Bacillariophyceae
<i>Navicula cryptocephala</i>	Bacillariophyceae
<i>Nitella sp.</i>	Characeae (Stone wort)
<i>Melosira granulata</i>	Bacillariophyceae
<i>Melosira various</i>	Bacillariophyceae
<i>Diatoma vulgare</i>	Bacillariophyceae

Annexure VIII.10

List of algal species found in the Singur reservoir, Manjira River, in paddy fields, wells and other water bodies of the around the Reservoir.

Names of Algae	Division
<i>Pinnularia sp</i>	Bacillariophyceae
<i>Cyclotella sp.</i>	Bacillariophyceae
<i>Triceratium sp</i>	Bacillariophyceae
<i>Chroococcus sp.</i>	Cyanophyceae
<i>Microcystis aeruginosa</i>	Cyanophyceae
<i>Gleocapsa sp.</i>	Cyanophyceae
<i>Gleotrichia sp.</i>	Cyanophyceae
<i>Anabaena constricta</i>	Cyanophyceae
<i>Rivularia sp.</i>	Cyanophyceae
<i>Lingbya sp.</i>	Cyanophyceae
<i>Oscillatoria limosa</i>	Cyanophyceae
<i>Oscillatoria tenuis</i>	Cyanophyceae
<i>Oscillatoria chlorina</i>	Cyanophyceae
<i>Oscillatoria princepes</i>	Cyanophyceae
<i>Oscillatoria chlorina</i>	Cyanophyceae
<i>Oscillatoria putrida</i>	Cyanophyceae
<i>Oscillatoria splendida</i>	Cyanophyceae
<i>Nostoc sp.</i>	Cyanophyceae

Annexure VIII.11

List of fishes either caught by the fisherman or reported from the Singur reservoir and Manjira River and its environs.

S.No.	Common name	Latin name
1	Catla	<i>Catla catla</i>
2	Rohu	<i>Labeo rohita</i>
3	Murrel	<i>Channa striatus</i>
4	Murrel	<i>Channa punctatus</i>
5	Wallago	<i>Wallago attu</i>
6	Cat fish	<i>Mystus vittatus</i>
7	Cat fish	<i>Hetyeropneustes fossilis</i>
8	Spiny eel	<i>Mastacembalus armatus</i>
9	Prawn	<i>Macrobrachium rosenbergii</i>
10	Prawn	<i>Macrobrachium malcolmsonii</i>
11	Giant prech	<i>Lates calcarifer</i>
12	Silonia	<i>Silonia silonia</i>
13	Pearl spot	<i>Etroplus suratensis</i>
14	Indian Mottled Eel	<i>Anguilla bengalensis</i>
15	Gobids	<i>Glossogobius giuris</i>
16	Gobids	<i>Platycephalus sp.</i>
17	Mrigal	<i>Cirrhinus mrigala</i>
18	Tilapia	<i>Oreochromis aureus</i>
19	Tilapia	<i>Oreochromis mossambicus</i>
20	Tilapia	<i>Oreochromis niloticus</i>
21	Tilapia	<i>Tilapia rendalli</i>
Benthic fish found / caught		
	Murrel	<i>Channa striatus</i>
	Murrel	<i>Channa punctatus</i>
	Spiny eel	<i>Mastacembalus armatus</i>
	Indian Mottled Eel	<i>Anguilla bengalensis</i>
	Cat fish	<i>Mystus vittatus</i>
	Cat fish	<i>Hetyeropneustes fossilis</i>

Annexure VIII.12

List of aquatic insects found in and around the upstream and downstream of the Singur Reservoir.

Order	Family	Latin name
Coleoptera	Dytiscidae	<i>Cybister confuses</i>
Coleoptera	Dytiscidae	<i>Cybister tripunctatus</i>
Coleoptera	Dytiscidae	<i>Eretes strictus</i>
Coleoptera	Dytiscidae	<i>Hydaticus vittatus</i>
Coleoptera	Dytiscidae	<i>Santrascottus dejeani</i>
Coleoptera	Dytiscidae	<i>Canhydrus laetabilis</i>
Coleoptera	Dytiscidae	<i>Laccophilus pravulus</i>
Coleoptera	Dytiscidae	<i>Agathus sp.</i>
Coleoptera	Dytiscidae	<i>Neopasternus sp.</i>
Coleoptera	Gyrinidae	<i>Dineulus indicus</i>
Coleoptera	Gyrinidae	<i>Gyrinus sp.</i>
Coleoptera	Hydroplidae	<i>Hydrous indicus</i>
Coleoptera	Hydroplidae	<i>Hydrous sp.</i>
Coleoptera	Hydroplidae	<i>Sternolophus rufipes</i>
Coleoptera	Hydroplidae	<i>Berosus sp.</i>
Coleoptera	Hydroplidae	<i>Enochorus sp.</i>
Coleoptera	Hydroplidae	<i>Laccobius sp.</i>
Hemiptera	Notonectidae	<i>Anisops bouvieri</i>
Hemiptera	Notonectidae	<i>Anisops breddini</i>
Hemiptera	Notonectidae	<i>Anisops walterensis</i>
Hemiptera	Notonectidae	<i>Anisops barbata</i>
Hemiptera	Notonectidae	<i>Anisops sardea</i>
Hemiptera	Notonectidae	<i>Nychia marshalli</i>
Hemiptera	Pleidae	<i>Plea frontalis</i>
Hemiptera	Nepidae	<i>Ranatra filiformis</i>
Hemiptera	Nepidae	<i>Ranatra elongate</i>
Hemiptera	Nepidae	<i>Ranatra digitata</i>
Hemiptera	Nepidae	<i>Ranatra varipes</i>
Hemiptera	Nepidae	<i>Laccotrephes griseus</i>
Hemiptera	Belostomitidae	<i>Diplonychus rusticum</i>
Hemiptera	Belostomitidae	<i>Spaerodema annulatum</i>
Hemiptera	Belostomitidae	<i>Belostoma indicum</i>
Hemiptera	Corixidae	<i>Micronecta scutellaris</i>
Hemiptera	Corixidae	<i>Micronecta quadristrigata</i>
Hemiptera	Corixidae	<i>Micronecta thyesta</i>
Hemiptera	Corixidae	<i>Micronecta albifrons</i>
Hemiptera	Corixidae	<i>Micronecta heliplides</i>
Hemiptera	Corixidae	<i>Corixa distorta</i>
Hemiptera	Corixidae	<i>Agraptocorixa sp.</i>
Odonata	Gomphidae	<i>Anax sp.</i>
Odonata	Libelluidae	<i>Macromia sp.</i>
Odonata	Libelluidae	<i>Libellula sp.</i>
Odonata	Libelluidae	<i>Bradinopygia geminata</i>

Annexure VIII.13

List of Annelids collected from the project area.

<i>Megascolex mauritii</i>	In damp loose soils with rich organic matter	Common in India
<i>Drawida sp</i>	In damp loose soils with rich organic matter	Common in India
<i>Branchiодrilus semperi</i>	Aquatic benthic form	Rare
<i>Myzostoma sp.</i>	Damp soils	Common
<i>Stelechopussp.</i>	Damp soils	Common
<i>Hirudinaria granulosa</i>	Aquatic, cattle leech	Very Common and wide
<i>Hirudinaria viridis</i>	Aquatic, cattle leech	Very Common and wide
<i>Hirudinaria javanica</i>	Aquatic, cattle leech	Very Common and wide
<i>Hirudinaria manillensis</i>	Aquatic, cattle leech	Very Common and wide
<i>Pheretima posthuma</i>	Common earthworm	Common in India
<i>Pheretima heterochaeta</i>	Common earthworm	Common in India
<i>Pheretima rubusta</i>	Common earthworm	Common in India
<i>Pheretima elongata</i>	Common earthworm	Common in India
<i>Pheretima compalata</i>	Common earthworm	Common in India
<i>Pheretima planata</i>	Common earthworm	Common in India
<i>Pheretima marrisi</i>	Common earthworm	Common in India

Annexure VIII.14

List of Mollusks (Snails) collected from the Singur reservoir and its surroundings.

<i>Pila virens</i>
<i>Bellamya dissimilis</i>
<i>Bellamya bengalensis</i>
<i>Indoplanorbis exustus</i>
<i>Melano striatella</i>
<i>Thiara lineatus</i>
<i>Thiara scabra</i>
<i>Lymnaea luteola</i>
<i>Lymnaea acuminate</i>
<i>Corbicula striatella</i>
<i>Lamillidens marginalis</i>
<i>Parreysia corrugata</i>

Annexure VIII.15

List of Zooplankton collected from the reservoir and its surroundings.

Copepoda	CLADOCERANS
<i>Heliodiaptomus virduuus</i>	<i>Diaphnosoma excisum</i>
<i>Heliodiaptomus contortus</i>	<i>Diaphnosoma sarsi</i>
<i>Heliodiaptomus kolleruensis</i>	<i>Pseudosida szalayi</i>
<i>Heliodiaptomus cinctus</i>	<i>Latonopsis australis</i>
<i>Neodiaptomus lindenbergi</i>	<i>Scapholeberis kingi</i>
<i>Troponodiaptomus informis</i>	<i>Simocephalus vetulus</i>
<i>Phyllodiaptomus blanci</i>	<i>Ceriodaphnia cornuta</i>
<i>Pseudodiaptomus benghami</i>	<i>Ceriodaphnia quadrangula</i>
<i>Pseudodiaptomus annadalei</i>	<i>Ceriodaphnia laticaudata</i>
<i>Acartia plumose</i>	<i>Moinodaphnia macleayi</i>
<i>Acartia major</i>	<i>Moina micrura</i>
<i>Acartia minor</i>	<i>Macrothrix spinosa</i>
Rotifera	
<i>Brachionus quadridentata</i>	<i>Illyocryptus spinifer</i>
<i>Brachionus calcyflorus</i>	<i>Pleuroxus aduncus</i>
<i>Brachionus rubens</i>	<i>Pleuroxus trigonellatus</i>
<i>Brachionus angularis</i>	<i>Chydorus ventricosus</i>
<i>Brachionus diversicornis</i>	<i>Chydorus borroisi</i>
<i>Brachionus falcatus</i>	<i>Chydorus parvus</i>
<i>Filinia longiseta</i>	<i>Dunhevedia crassa</i>
<i>Rotaria neptunia</i>	<i>Dadaya macrops</i>
<i>Monostyla sp.</i>	<i>Pseudochydorus globosus</i>
<i>Keratella tropica</i>	<i>Alona davidi</i>
	<i>Alona pulchella</i>
	<i>Kurzia longirostris</i>
	<i>Campoterus rectirostris</i>
	<i>Graptoleberis testudinaria</i>
	<i>Leydigia australis</i>
	<i>Biapertura karua</i>
	<i>Euryalona orientalis</i>

Annexure VIII.16

Suggested list of trees and shrubs for avenue, canal bank plantations and afforestation of the deforested catchment areas.

Botanical name	Local name	Importance
<i>Acacia auriculiformis</i>	Australian thumma	Avenue tree
<i>Ailanthus excelsa</i>	Pedda maanu	Tree borne oil
<i>Albizia lebbeck</i>	Dirisana	Shade, timber and scented flowers
<i>Azadirachta indica</i>	Vepa or Neem	Neem oil & neem products
<i>Bixa orellana</i>	Jabaru kaya	Grown for food colouring dye.
<i>Cassia fistula</i>	Rela	Ornamental and bark is a source of tannin
<i>Dendrocalamus strictus</i>	Bamboo	Bamboo products
<i>Casuarina equisetifolia</i>	Sarvi	Pulp and construction material
<i>Delonix regia</i>	Chitikesara	Ornamental avenue tree
<i>Eucalyptus spp.</i>	Eucalyptus	Pulp and construction material
<i>Ficus benghalensis</i>	Marri	Shade and a source of food for birds
<i>Ficus racemosa</i>	Medi	Edible fruits
<i>Ficus religiosa</i>	Raavi	Shade and a source of food for birds
<i>Gmelina arborea</i>	Gummadi teku	Timber
<i>Grewilia robusta</i>	Silver oak	Avenue tree
<i>Hardwickia binata</i>	Yepi	Fodder, fibre and timber
<i>Holoptelia integrifolia</i>	Nemali naara	Fibre and timber
<i>Leucaena leucocephala</i>	Subabul	Fodder and pulp wood
<i>Mangifera indica</i>	Mango	Edible fruit
<i>Mimosops elengi</i>	Pogada	Shade and edible fruit
<i>Muntingia calabura</i>	Singapore cherry	Umbrella shaped small tree
<i>Pongamia pinnata</i>	Gaanuga	Source of biodiesel
<i>Polyalthia pendula</i>	Ashoka	Majestic tree with drooping branches
<i>Polyalthia longifolia</i>	Ashoka	Avenue tree
<i>Samania saman</i>	Nidrabhangi	Shade, timber and fruits are a good live stock feed.
<i>Sapindus emarginatus</i>	Kunkudu	Soap nut tree
<i>Spathodea campanulata</i>	Flame of the forest	Ornamental avenue tree
<i>Syzygium cumini</i>	Neredu	Edible fruits
<i>Tamarindus indica</i>	Chinta	Tamarind fruit and leaf
<i>Tectona grandis</i>	Teak	Timber
<i>Terminalia arjuna</i>	Nallamaddi	Timber and shade tree
<i>Terminalia catappa</i>	Baadam	Edible nuts

Annexure IX.I

ANNEXURE – XIII.2

**DESIGN AND ESTIMATED COST OF STAGGERED CONTOUR TRENCHES
(For Horticultural Plantations)**

Slope of land	-	10% to 35%
Average depth of soil	-	0.90 m
Length of contour trench	-	5.00 m
Width of trench	-	45 cm
Depth of trench	-	50 cm
CS of trench	-	2.25 sq m
Spacing between the trenches in same row	-	3.30 m
Horizontal spacing	-	5.00 m
Continuous trench after every 5 rows of trenches, need to be provided to arrest excess run-off and silt. The trenches will be constructed across the slope and along the contour line to make it efficient System for conservation of soil and water.		
Total No. of trenches per ha	-	180 nos.
Total length of trenches per ha including 3 nos Continuous trenches.	-	1,200 m
Earth work involved	-	270.0 cum
Jungle area to be cleared @ 1 sq m throughout the length	-	1,200 sq m
Cost of Jungle clearing etc @ ` 0.5113 per sq m	-	` 613.56
Cost of excavation of trenches: 270.0 cum x ` .39.00-		` 10530.00
Total cost	-	` 11143.56
5% contingency	-	` 557.18
Grand Total	-	` 11701 per ha

ANNEXURE-XIII.3

ESTIMATED COST FOR EACH DOUBLE ROW POST BRUSH DAM

Average depth of gully	-	2.25 m
Average width of gully	-	6.00 m
Earth work for excavation of bed and abutments (sides) upto 15 cm depth for a width of 1.00 m = (12.36 m x 0.15 m x 1.00 m)	-	1.85 cum
No. of 12 cm diameter, 5.00 m long stakes	-	28 Nos.
Cost of earth work excavation @ Rs.39.00 per cum	-	` 72.15
Cost of 28 Nos. stakes @ Rs.42.00 each	-	` 1176.00
Cost of miscellaneous articles like galvanized wire, Repe etc. on lump sum basis	-	` 250.00
Labour charges for 1 day = (2 nos. @ 100.00 per day)	-	<u>` 200.00</u>
Total	-	<u>` 1698.15</u>
Contingency @ 5%	-	` 84.90
Grand Total	-	` 1783.05
Say	-	` 1783.00

ANNEXURE- XIII.4

ESTIMATE OF LOOSE BOULDER CHECK DAM
(Considering 10.00 m width and overall Length of 12.40 m)

1. Boulder Sausage

- a) Earth work in excavation including removing the spoils as directed upto a distance of 100 m including dressing, cambering, grading the surface etc complete as directed.
- b) Loose boulder above one man size or soil mixed with boulders above one man size or soft shale not requiring blasting.

Body wall side	$2 \times (\underline{0.30 \text{ m} + 1.20 \text{ m}}) \times 1.20 \text{ m}$	-	1.80 cum
	2		
Body wall foundation	10.00 m x 1.00 m x 0.30 m	-	3.00 cum
Down stream side apron	10.00 m x 0.90 m x 0.15 m	-	1.35 cum
Sub-Total :	@ 42.00 per cum	-	6.15 cum 258.30

2. Collection of hard river boulder at quarry size 23 cm to 30 cm (man size) of weighing not less than 40 kg free from dirt and dust and other foreign impurities.

Body wall bottom	10.00 m x 1.00 m x 0.30 m	-	3.00 cum
Body wall	$12.4 \text{ m} \times (\underline{1.0 \text{ m} + 0.3 \text{ m}}) \times 0.3 \text{ m}$	-	2.42 cum
	2		
Stepped wall	$2 \times 0.60 \text{ m} \times 0.30 \text{ m} \times 0.30 \text{ m}$	-	0.11 cum
	$2 \times 0.60 \text{ m} \times 0.60 \text{ m} \times 0.30 \text{ m}$	-	0.22 cum
	$2 \times 1.20 \text{ m} \times 0.90 \text{ m} \times 0.30 \text{ m}$	-	0.65 cum
Upstream apron	$2 \times 0.60 \text{ m} \times 0.30 \text{ m} \times 0.30 \text{ m}$	-	1.35 cum
Sub-Total :	@ 88.00 per cum	-	7.75 cum Rs.682.00
	(Forest royalty rate)		

ANNEXURE- XIII.4

Contd..

ESTIMATE OF LOOSE BOULDER CHECK DAM

(Considering 10.00 m width and overall Length of 12.40 m)

3. Cost of dumping of boulders and making 8.6 wire sausage wire cages including fixing and fitting and placing in position are :

Size of one cage 1.51 m x 1.51 m x 0.45 m - 1.03 m³

No. of cages Required	<u>Total quantity of boulders</u> Size of cage
--------------------------	---

Total Quantify 7.75 cum Say 8 Nos
As per item No.2 (1.51 m x 1.51 m x 0.45 m)

Cost per one cage comes to ` 1260/- - 11408.00

(As per SSR per CUM Rs 184 (7.75 x 184 =Rs 1426.00)

Total: - ` 12348.30

4. Add 5% contingency - ` 617.41

Grand Total: - ` 12965.72

Say - ` 12966/-

Average cost per running Rs.12966.00 - ` 1045.62

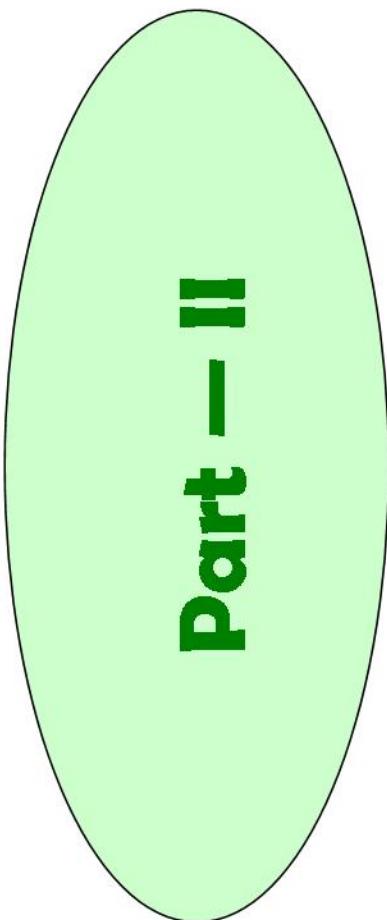

Meter length 12.40 m Say - ` 1046/- per meter

ANNEXURE XIII.5

TECHNICAL DETAILS OF MINI-PERCOLATION TANKS		
Sl.No	Description of Parameter	Dimension adopted
	Works involved	Earthwork excavation and formation of bank
1	Average length of mini-percolation tank	120 m
2	Top width of bank	2.0 m
3	Width at bottom	9.0 m
4.	Front side slopes	1 ½ : 1
5	Rear side slopes	2 : 1

Process of Resettlement and Rehabilitation:

Village community of Mantoor village (Fully submerged) was informed by project officials in advance with the terms and conditions about the project activity and details about evacuating the village which was going to be submerged under the project

The village community was reluctant to evacuate the area despite several attempts by officials to convince them. However, at the last moment, the authorities brought the lorries and forcibly evacuated them.

In the meanwhile, officials had carried out the village survey as well as identified the new settlement area. The house site plotting with size of plot had carried out and the choice was given to the affected families to select their house site plots. On an average 30x30 m & 40x55 m plots were carved out for allotment. In all there were

	No of Plots	Size
i)	72	30 x 30 m
ii)	360	40 x 35 m

The oustees could not recapitulate the rationale behind having two size plots which were allotted to them. Further, it was reported that – 72 families had occupied the house site while about 30 to 40 per cent families who were allotted 40 x 35 m size plots, migrated to other places and the rest occupied the allotted sites.

Each of the household was given `15000/- as compensation towards the cost of house construction. The land holding compensation was given @ `4000/Ac. It was promised to them that the land compensation would be paid in two installments. Accordingly the 1st installment was paid at the time of evacuation and the second installment was paid to about 40 per cent oustees only. About 60 per cent of them are still to be paid. According to then, full settlement of land compensation could not be settled due to legal complications.

Creation of infrastructural facilities in the new settlement The demarcation of house plotting is observed to be a planned one with lane, by lane roads as well as with open drainage facility. Street light and domestic power connectivity was provided. The colony has central drinking water supply facility. However, it is reported that the water supply is very irregular. The colony population, as reported, is depending on drinking water from the only bore well which is possessed by village Sarpanch.

With regard to health facilities, it is observed that –one PHC-Sub-centre building was constructed, which is presenting lying idle i.e., without doctor, amenities and equipments. Same is the case with veterinary services centre also.

The landless and rural artisans did not get any financial assistance from the project. The common prevalent diseases in the rehabilitated area, as reported, are Malaria, Chicken guinea and Typhoid.

Expectations from project as perceived by Oustees

- Drinking water supply be regularized
- Bus services to the rehabilitated village
- Lift irrigation be allowed from dam as bore wells have failed in the area
- * “Hamara Pani Hamein Nahi Mil Raha Hai” quoted by Participants
- Advice / guidance on Improved Agricultural practices including Horticulture

Process of Resettlement and Rehabilitation:

The Focus Group Discussions held with the members of oustees (Rehabilitated families) revealed that after apprising the villagers of old settlement (Submerged village) about the evacuation of the area, as the village was going to be submerged in due course and asking them to evaluate and settle at the new earmarked (new settlement/habitation) area. They were also informed that they would be paid for the agricultural lands they possessed @ ₹ 4000/Ac as well as free plot (30 x 40 mt) and ₹ 15000/- for house construction. Six months time was given to them for shifting. Further, the shifting was tagged with release of compensation installment. With much hesitation, ultimately oustees moved out and had made their own arrangements for shifting. It was further informed that about 25 percent of affected families (Evacuated) are yet to receive full and final compensation from the project which has been held up due to legal complexities.

Creation of infrastructural facilities in Rehabilitated Area: The new rehabilitated residential area is observed to be planned one. It has inner and outer road (metal) net working. The road and dwelling area are found to be having tree plantations which were planted by the oustees. Further, it is observed that though, at initial stage of rehabilitation in the dwelling area, a well planned open drainage lines were laid, these drainages have been silted and drain water is found to be over flowing. It is reported that laid drainage lines were very shallow, and in due course these drain lines got silted. Thus, the flowing drain lane affected the environment around.

The rehabilitated area has been found to be augmented with domestic tap water supply. The Satya Sai Trust is involved for the supply of drinking water. As per the dwellers, the supplied drinking water is not sufficient and hence, they depended on bore wells for the purpose.

There is no medical health and veterinary services available in the new settlement area and the oustees depended on mandal headquarters (Pulkal) for these services. However,

the ANM pays fortnightly visits, as reported, to the local Anganwadi. Malaria, Typhoid and Cough are the common diseases found in the area.

Among local animals, Foot and Mouth disease is reported found to be common in the area.

Sources of Irrigation: There is no tank irrigation in the new settlement area, however, there are about 10 bore wells which irrigate about 100 Acres of land, and otherwise, the farmers depend on rain water.

Crop grown: The major crops grown in the submerged area were Paddy, Green gram, Black gram, Red gram, Jowar and Cotton. In the new settlement the crops grown are found to be Green gram, Black gram, Red gram and Jowar. The paddy crop area in new settlement, as reported, has drastically been reduced. Major crop yields are presented in "Brief Sketch sheet attached.

Rural artisans and landless among oustees, did not get any financial assistance from project. No skill development training programs were conducted for oustees. No worship place found in the rehabilitated area, though it was promised to oustees by the project officials that new worship structures would be built in new settlement area.

Oustees expectations from project:

- Adequate drinking water supply
- De-siltation of drainage lines laid
- Medical and health as well as veterinary service
- Construction of worship place / s
- Construction of community hall
- Full settlement of compensation at an early date for those whose cases are still pending.

Brief Sketch of Peddareddypt		
Particulars	Before Project (old Settlement)	After Project (New Settlement)

Process of Resettlement and Rehabilitation:

In the old settlement (submerged village), there were about 300 families. The submerged village was located in the low-lying area. The oustees were briefed about the project and project activities and informed the villagers that in due course (1 to 2 years), the habitation and agricultural lands would be submerged when the process of impounding of water in the dam starts. As such, the oustees would be allotted alternative habitation site in the uplands @ (in the farm of house plots to each family as well as ` . 16000/- for construction of new house at the allotted site. Besides this, the land holders were be paid ` . 4000 per acre towards compensation for land. As such in the meanwhile, the process of house site plotting was carried out in a planned way. The oustees were given the choice for plot selection. Further, it was noted that the project officials had released the first installment of compensation for land as well as house construction for all oustees. In spite of this, the oustees were reluctant to shift their dwellings to new allotted site. In this situation, authorities stepped up and stopped all the essential facilities in the village which forced the people to evacuate the area. It is reported that about 200 families moved to new sites and about 100 families migrated to other places. The oustees had made their own arrangement for shifting. The FGD also revealed that a good number of oustees are yet to get full compensation from project authorities. The process of release of compensation has been held up due to legal litigations.

Creation of Infrastructural Facilities in the New Settlement Area:

In the new habitation, new roads net works (mostly metal road) were laid. Domestic and street light power connection was provided. Drinking water supply network has been laid. In this regard it is informed that initially it worked and later on it became defunct. At present, the new settlers mostly depend on bore-well water for the purpose. Pacca drainage line network has been laid in the area, and now most of it has been silted because of road widening.

With regard to medical facilities, it is informed that one PHC-Sub-Centre was planned for the village. At present, the habitant's depend on the PHC which is located at Sadasivpet mandal head quarters which is 20 km from the village. No water born disease reported from the village. Malaria and Typhoid are the common diseases observed in the village. The veterinary services are also not available in the village. The mobile unit of veterinary services visits the village once in three months. The bus service to this village was withdrawn. The new school building and community hall has been constructed in this new habitation. Seedlings were provided to the oustees and planting was done by oustees. The survival rate of plantation reported to be about 30 per cent.

Agricultural Lands: As mentioned earlier, land compensation was paid @ ` 4000/Ac. For purchasing agricultural lands in new settlement, as reported the oustees, ` 12000 to 14000/Ac. In this regard the FGD revealed that the possession of land holding by individual oustees drastically came down as compared to what they were having in old village – eg. 10 acre land holder could purchase 2-3 acres of land in the new settlement with the amount land compensation. The purchased lands, as reported are chalka lands (Sandy looms) which are unfertile.

Irrigation Sources: In the old settlement there are two big tanks, as told by oustees, which were providing irrigation to about 200 Ac of land. In the new settlement also, there are two tanks, as reported, are able to irrigate only about 50 Ac of land, other-wise rainwater is the only source for the purpose. It is further observed that few of the oustees have laid bore wells jointly (4-5 farmers together) and sharing the water for irrigation jointly.

Crop Yields: The FGD revealed that in the new settlement, the crop yields have reduced to larger extent, though the farmer started using chemical fertilizer. It is mainly due to, as told by the oustees, chalka lands and paucity of irrigation source. The details of crop-wise yields are presented in "Brief Sketch Sheet" attached to this. The maximum paddy yield in this new settlement reported to be 3500 kg / Ac. The agricultural extension officials, as reported, visit this new settlement once in about two months.

Oustees rural artisans and landless are not given any financial assistance from project site.

Expectation from project as prescence by oustees

- Extending lift irrigation facility from Singur dam
- Drinking water facilities to be reestablished by repairing water supply system
- Repair of village and inner road network (in line and by-lane of habitation) which is muddy now
- De-silting of drainage network
- Reestablishing of bus connectivity.

Appendix

Brief Sketch of Busireddypally village		
Particulars	Before Project (old Settlement)	After Project (New Settlement)
Village Condition		
- Drainage	Yes-deep	Laid new pacca drainage system, silted
- Electricity	No	Yes
- Road	Katcha & Shabby	Laid metal road lanes & by lanes
- Community Hall	Yes (bigger one)	Very small constructed by Panchayat
- Medical facilities	No	Sub-centre planned – now depended on Sadashivpet mandal flows
- Veterinary services	No	Mobile-once in 3 months
- Bus services	During winter and summer season only	Initial started now discontinued
Agricultural Scenario		
- Lands conditions	Fertile	Chalk and Rough surface
- Source of irrigation	2 big tanks-irrigated 200 acres	Two small tanks irrigates about 50 acres + borewells (few) be good yield
- Crop Yield levels / Acre		
• Paddy	20 to 25 Qtls	10 to 15 Qtls exception 3500 kg / Ac
• Greengram	3 to 5 Qtls	1 to 2 Qtls
• Blackgram	5 to 6 Qtls	2 to 3 Qtls
• Redgram	3 to 4 Qtls	2 to 3 Qtls
• Sugarcane	-	30 to 40 tonnes
• Cotton	-	8 to 10 Qtls
• Jower	4 to 5 Qtls	2 to 3 Qtls
• Chilies	7-8 Qtls	Not feasible
• Wheat	5 to 6 Qtls	Not feasible
- Livestock Population		
• Cattle	4 – 5 /HH	1 -2 / HH (Very few have milk cattle)
• Buffaloes	1 – 3 (about 50% HH)	1 -2 very few (7-8 HH)
• Sheep	20 units	1 – 2 units
• Goat	1-5 about 25 HH	1-3 very few HH LS
• Poultry		
- Culture Homogeneity	Good	Good
- Settlement pattern		
• Castewise	Mixed as well as caste-wise	Ward wise

Brief Sketch of Busireddy village		
Particulars	Before Project (old Settlement)	After Project (New Settlement)
• Religion	Religion-wise settlement	Religion-wise settlement
- Economic conditions		
• Percapita income	₹. 6000 / Ac (old rate 20 years back)	Now – 12000 – 14000 /Ac
• Indebtness	Very less (Money lender)	Majority have crop loans
• Sufficiency in Food grains (Home consumption)	Very happy	Difficult
• Housing condition	More plinth area pacca, mixed, pacca	Tilled rood – far all

Process of Resettlement and Rehabilitation:

Malikarjuna village was having both low lying area as well uplands. The low lying area was brought under the project which got submerged with the impounding of dam water. As reported, about 800 acres of agricultural land as well as habitation (residential area) got submerged due to project. The present habitation where the oustees have been rehabilitated is an undulated land patch (upland) of the same village (Malikarjuna). From FGD, it is revealed that oustees had their land holdings in low lying area (submerged one) as well as majority of them in the uplands (present one) also.

The oustees of submerged area were rehabilitated in the present upland area, where the project authorities had earmarked (with detailed plan) the area for residential purposes. All the oustees families were allotted housing plots their choice. From project side pacca drainage line network was laid and domestic and street light connectivity was provided. Drinking water facilities were also extended.

The rehabilitated colony which comes up in the area, as observed, is having different wards. These wards are based on religion, caste and occupation. In the opinion of oustees, the present residential setup is far better than the earlier one (submerged) Where the settlement was haphazard in nature.

The oustee's compensation at the time of evacuation was based on ` . 4000/Ac and ` .15000/- per household towards house construction, which they received in installments. It was told that majority of the oustees, compensation has been settled. There are few cases whose compensation yet to be settled. These cases, as informed, are held up due to legal complexities.

The FGD also revealed that, there are very few oustees, who have purchased agricultural land in the area, otherwise as stated earlier, majority of them owned agricultural lands in the upland area of the village.

The oustees shifted to the uplands (new residential area) when dam water started entering in to their old settlement and residential area. They had made their own arrangements for shifting.

Infrastructure created in New Rehabilitated Area:

As stated earlier, a good network of metal roads were laid which covers village main road as well as lane bylane in the residential area. Besides, the village has networking of pacca drainage lines. However, these drainage lines are observed to be very shallow. The new settlement has been equipped with power connectivity (domestic and street light) and drinking water supply. The habitation has bus connectivity. The new settlement has high school.

FGD also revealed about the lack of community hall, medical and health facility at the village level. To avail medical facility, people have to go to the Mandal headquarters.

With regard to veterinary services, it is observed that initially this facility was available at village level which was withdrawn later on.

Through FGD, it is learnt that the compensation received by oustees, was spent on marriages, religious and other function, recreation etc, by majority. However, some amount of it was used for house construction also.

Agricultural lands (Fields): The agricultural field in upland area is having salinity. The good numbers of fields, as reported are having Chalka lands (Sandy loom) as well as clay soils. According to farming community, earlier (old settlement) they were having fertile lands and the present lands are unfertile ones.

Irrigation sources: There are no water tanks in the new settlement area. The major source of irrigation is borewell. About 60-70 oustees are having borewells in their fields. The rest of agricultural fields are rainfed only.

Crops and Crop Yields: The crops raised in the new settlement, as reported, are greengram, redgram, blackgram, sugarcane, cotton, jowar and paddy. During discussion it was informed that due to poor land conduction in the new settlement, crop yields have come down as compared to submerged land. The crops grown and their yields, as reported, are presented in the "Brief Sketch" which is attached to it.

The FGD also revealed that oustees were not given any training either from project side or departmental side. Further, it is noted that rural artisans and landless did not receive any financial help from the project.

Oustees expectation from project

- Early settlement of compensation for those whose cases are pending
- Medical health facility at village level

- Veterinary services at village level
- Quantity of chemical fertilizers be made available as required
- Drinking water supply connectivity in the SC ward

Brief Sketch of Mallikarjunapally		
Particulars	Before Project (old Settlement)	After Project (New Settlement)
Village Condition		
- Drainage	Katcha drains	Pacca drainage lines laid – shallow-sited

Process of Resettlement and Rehabilitation:

The Allapur village (new settlement and rehabilitated area) is a part of old Allapur (Submerged-low lying area). The habitants of old village area were rehabilitated in the upland area of Allapur village. The project authorities identified an area in the uplands as the village for rehabilitation of the oustees. Two sizes of layout residential plots (a) x 13 x 10 mt and (b) 11 x 10 mt were prepared for rehabilitating the oustees. The ‘a’ sizes

plots are on the main road of the village and 'b' size plots are marked on the inner side of the rehabilitated area village. The plots were allotted to the oustees by their choice. `16000/- was paid in two installments to each of the households for the construction of house at the allotted plots. The FGD revealed that the paid amount was not sufficient for the construction of house. The oustees incurred a lot extra amount for the purpose as reported. They (land holders) had met this expenditure from the land compensation, which was paid to them @ `4000/- per acre. In case of landless, it was told that they were forced to borrow from others to meet the extra expenditure for construction of the new dwellings. As such they were trapped in indebtedness.

Further it is noted that the oustees paid heavy amount (`10,000 to 15,000 per Acre) for purchase of agriculture lands in the new settlement area. As a result of this, their land holding size is reduced against.

The FGD also revealed that they shifted the old settlement when dam water started entering in the village. They had made their own arrangements for shifting to new rehabilitated area. With regard to settlement of land compensation, as reported, about 90 per cent of cases have been fully settled and remaining cases are still pending due to legal complexities.

Infrastructure Created In Rehabilitated Area.

The project authorities laid a network of new metal road in the new rehabilitated area with pucca drainage lines. The drain lines as reported and observed, are very shallow and got silted in due course of time.

In the new rehabilitated area primary school building was constructed. This new school building in due course of time developed leakages and it is reported that it has become difficult to conduct class room sessions in rainy season.

Further, it is observed that the rehabilitated layout area is planned one having access to roads network (main, lane and bylane). Avenue plantation was carried out by oustees. The seedlings were provided by the Forest Department. 50 per cent survival of plantation is observed in the area. Electric power connections have been provided both for domestic as well as street lighting. Drinking water facilities is found to be functions satisfactorily.

For extending medical and health and veterinary service facilities, though two separate buildings have been constructed, these are found to be lying idle, without any service. Further it is noted that the concern ANM visits the village as scheduled. For medical and veterinary services, the habitants depend on mandal hqts services in this regard. Malaria, typhoid, arthritis and chicken gunea are the common diseases are reported from this area.

The bus connectivity, as reported, was initially introduced for this area which was disconnected later on.

Agriculture:

Land fertility: The land fertility in resettlement area, as reported, is very poor as compared to submerged lands. The present one is sandy loamy lands (Chalka), contains lot of clay and dry lands in nature.

Source of Irrigation: In the submerged area there were 3 water tanks, which were the main source of irrigation. The new settlement, lacks tank irrigation. About 10 oustees are having 10 bore wells which irrigate 30 to 40 acres of land, otherwise seasonal rains are the only source for agriculture activities.

Crop yields: The crop yields, as reported, have come down to the largest extent as compared to earlier ones (submerged). This is because of poor land fertility, land textures and lack of irrigation sources. The comparative crop yield levels (before and after the project) are depicted in 'brief sketch' sheet.

Further it is noted that landless and rural artisan oustees are not given any financial assistance as well as skill trainings for improving their livelihood.

Oustees exceptions

- Creation of irrigation facilities
- Help in improving land fertility
- New avenues for self employment for livelihood support
- Starting medical and veterinary services in the existing constructed buildings
- Re-establishing the bus services
- Extension guidance for improving crop yields
- Repairs to school building to check leakages

Brief Sketch of Allapur village		
Particulars	Before Project (old Settlement)	After Project (New Settlement)
Village Condition		
- Drainage	Katcha	Laid pacca – shallow – silted
- Electricity	Yes	Yes
- Road	Katcha, muddy	Pacca – lane by lane network
- Community Hall	Independent	Panchayat Hall being used
- Medical facilities	ANM visit	Building constructed, lying ideal ANM visit
- Veterinary services	No	Building constructed lying ideal No service
- Bus services	Yes	Initially – yes, later on discontinued
Agricultural Scenario		
- Lands conditions	Fertile, less use of chemical fertilizers	Mostly Chalka, - Non fertile
- Source of irrigation	Tanks	Borewell (10) rainfed, no tanks
