1.0 Introduction

1.1 Flood Forecasting Network of Central Water Commission (CWC)

1.1.1 Presently, a network of Hydro-meteorological (HM) sites is being operated by CWC across the country covering 20 river basins for gauge, discharge, sediment & water quality observations. The formulation of a forecast requires effective means of real time data communication network between the Forecasting stations, Base/Flood monitoring stations and Flood Control rooms. Annually, more than 8,000 flood forecasts are being issued by CWC during flood season. Rainfall-runoff modelling based 3-day advisory started in the year 2017 has been extended to 5-day advisory from 2021 and currently as 7-day advisory since 2023.

1.1.2 Presently, flood forecasts are issued by CWC at 340 stations (140 Inflow Forecast Stations + 200 Level Forecast Stations). The basin-wise and State-wise details of flood forecasting (FF) stations are given in **Table-1** and **Table-2**, respectively. The List with salient details of Flood Forecasting Stations and Flood Monitoring Stations is at **Annex-1.1**

Table-1: Basin-wise Flood Forecasting Stations

Sr. No.	Major Inter-state River Systems	No. of FF stations		
		Level	Inflow	Total
1	Indus and its tributaries	3	0	3
2	Ganga & its tributaries	96	43	139
3	Brahmaputra & its tributaries	39	6	45
4	Barak System	6	0	6
5	Subarnarekha (i/c Burhabalang)	4	3	7
6	Brahmani & Baitarni	3	2	5
7	East Flowing(Mahanadi to Pennar)	4	4	8
8	Narmada	4	6	10
9	Tapi	1	2	3
10	Mahi	1	4	5
11	Sabarmati	1	1	2
12	Mahanadi	3	3	6
13	Godavari	18	26	44
14	Krishna	5	19	24
15	West Flowing Rivers(Kutch &Saurashtra)	1	2	3
16	West Flowing Rivers(Tapi to Tadri))	2	1	3
17	Cauvery and its tributaries	4	9	13
18	Pennar	1	1	2
19	East Flowing Rivers(Pennar to Kanyakumari)	1	6	7
20	West Flowing River (Tadri to Kanyakumari)	3	2	5
	Total	200	140	340

1.2 Floods shall be monitored through a network of hydrological stations across the country. Meteorological data collected from CWC owned telemetry network as well as Automatic Weather Stations/Automatic Rain Gauges of India Meteorological Department(IMD) shall provide necessary inputs in formulation of flood forecasts. The transmission of data is done with the help of wireless as well as satellite based telemetry and VSAT systems apart from mobile/phone as a back-up/supplementary mode of communication.

Table-2: State-wise Flood Forecasting Stations

Sl. No.	Name of State/UT	Flood forecasting Stations(Nos)		
		Level	Inflow	Total
1	Andhra Pradesh	10	10	20
2	Arunachal Pradesh	3	1	4
3	Assam	30	0	30
4	Bihar	40	3	43
5	Chhattisgarh	1	2	3
6	Gujarat	6	8	14
7	Haryana	1	1	2
8	Himachal Pradesh	1	0	1
9	Jammu & Kashmir	3	0	3
10	Jharkhand	2	15	17
11	Karnataka	1	14	15
12	Kerala	4	2	6
13	Madhya Pradesh	2	12	14
14	Maharashtra	8	14	22
15	Odisha	12	7	19
16	Rajasthan	4	11	15
17	Sikkim	3	5	8
18	Tamil Nadu	4	11	15
19	Telangana	5	10	15
20	Tripura	2	0	2
21	Uttar Pradesh	39	5	44
22	Uttarakhand	4	5	9
23	West Bengal	12	4	16
24	Daman & Diu	1	0	1
25	NCT of Delhi	2	0	2
	Total	200	140	340

1.3 Flood Control Rooms of CWC

1.3.1 To monitor the flood situation during every monsoon, CWC operates 36 Divisional Flood Control Rooms (DFCRs) located in the various field Divisions of CWC and a Central Flood Control Room (CFCR) at CWC (HQ), New Delhi for providing flood related information to the Local Administration and User Agencies. The List of Divisional Flood Control Rooms (DFCR) is given at **Annex-1.2** The contact details of Nodal Officers at the CWC Headquarter as well as those of Executive Engineers (EE), Superintending Engineers (SE) and Chief Engineers (CE) in the field is given at **Annex-1.3**. This is also available in CWC website which is updated from time-to-time.

1.3.2 CFCR is located in Ground Floor, West Block-II, Wing-7, R. K. Puram, New Delhi. CFCR is headed by Director (Flood Forecast Monitoring). CFCR functions round the clock during every monsoon under the supervision of Chief Engineer (Flood Management), CWC and under the control of Member (River Management), CWC, New Delhi. It monitors the flood situation throughout the country. CFCR issues various types of Bulletins including daily Flood Bulletins to the User Agencies to keep them informed

about the flood situation in the country.

1.3.3 DFCRs become operational just before the onset of flood season (which varies from 1st May for NE Region and Jammu & Kashmir to 1st June for rest of India) and remain operational till the end of flood season (i.e. 31st October for regions under the influence of South-West Monsoon and 31st December for regions under the influence of North-East Monsoon). At times, DFCR operations may commence earlier than the stipulated dates depending upon IMD's forecast for pre-monsoon rainfall and may remain operational even after the designated flood season, should situations demand. The notification in this regard is given in **Annex-1.4**.

1.3.4 In order to provide an effective flood forecasting mechanism, a step-by-step specific Standard Operating Procedure has been formulated, which includes time lines for forecast dissemination, particulars of Nodal officers of Central and State/UT Government, and notification charts indicating flow of information. These notification charts identify the hierarchy of flow of information in a crisis situation, indicating who is to be informed, by whom and in what priority. A typical Notification chart for dissemination of flood forecast by CWC is given at **Annex-1.5**.

1.4 Modernization of Flood Forecasting Network of CWC

1.4.1 Telemetry equipment have been installed at 1121 stations in various basins for collection of flood data (Water Level and Rainfall) through sensors. Besides, 3 Earth Receiving Stations (ERS), that is, 1 each at Burla (Odisha), Jaipur (Rajasthan) & New Delhi and 27 Modelling Centres have been set up for transmission of flood data through Satellite for expeditious flood forecast formulation using rainfall-based mathematical models.

1.4.2 With a view to improve the comprehensive flood forecasting network in the country, CWC consults the State Governments and concerned agencies from time to time for further extension and modernization of its flood forecasting network.

1.4.3 An SOP for Maintenance and Upkeep of Telemetry Stations has been circulated to all concerned and the same is given at **Annex-1.6**.

2.0 Flood Forecasting Processes

2.1 The activity of flood forecasting comprises Level Forecasting and Inflow Forecasting. The forecasts are issued once the water level in a river touches or is expected to touch the pre-defined Warning Level (usually 1 meter below the Danger Level, but also dependent on the threat perception of the particular location). Level forecasts help the Local Administration and other Agencies in deciding mitigating measures such as evacuation of people and their movable properties to safer locations. Inflow Forecast is issued for various reservoirs/dams/Barrages once inflow to it exceeds a certain threshold value. Inflow Forecast enables Authorities to optimize reservoir operation for safe passage of flood downstream and to ensure adequate storage in the reservoirs for meeting the post-monsoon demands.

2.2. The process of flood forecasting consists of the following stages:

2.2.1 Data Collection – Central Water Commission collects hydro-meteorological data at its sites round the year. During non-monsoon season, gauge data is collected thrice a day and discharge data is collected once daily. However, during monsoon period, the river water levels (from gauges) are collected hourly, manually as well as through sensor based equipment. The concerned Project authority shall be responsible for

observation of reservoir related data.

2.2.2 Transmission of Data to the Flood Forecasting Division/Flood Forecasting Centre – The data collected from field stations is transmitted from the site to the concerned Flood Forecasting Centre/Modelling Centre/DFCR of CWC through wireless and/or telephone/mobile and satellite based telemetry system & VSAT. Under modernized network, data is transmitted to the Earth Receiving Station through Satellite and then to various Modelling Centres through VSAT Systems. The Nodal officer of the Dam/Reservoir shall share reservoir related data with CWC through uploading on Water Information Management System (WIMS) or sending through e-mail/SMS/Phone/Wireless etc.

2.2.3 Data entry - The hydro-meteorological data collected are entered on an hourly basis in WIMS, data entry utility, as and when received in the DFCR. The data entry system has provision to check for primary validation of data entered. Primarily, the dam/reservoir data is expected to be updated by the Project-specific Nodal officer before feeding into WIMS.

Formulation of Flood Forecasts – Under the conventional set up, the flood data received at the DFCR is analysed and flood forecasts are formulated, if required, for the flood forecasting Stations. The methodology used is generally either the basin persistence based mathematical/statistical techniques, co-axial graphs or mathematical models using rainfall data received from IMD or the rainfall data collected by CWC. The Level forecasts are issued whenever the water level at the CWC Flood Forecasting Station exceeds or is expected to exceed the Warning Level (which is usually 1.0 m below the Danger Level, but depends on the threat perception of the location) specified for the Flood Forecasting Station. **The succeeding forecast for any station must/shall be issued before the expiry of the preceding forecast. Duration of forecast can be used as travel time + 1hr.**

Besides, Inflow Forecasts are also formulated by CWC for 140 Dams/Reservoirs for regulation of outflows whenever the flows into the reservoir are above the threshold limit. Medium range forecast (upto 168 hours) on experimental basis shall be generated by Regional offices/HQ using rainfall based hydraulic model taking hourly hydrological & meteorological observed data as well as rainfall forecast from IMD and other agencies. Based on such results and other conventional techniques, the flood forecasting centres shall formulate the short range forecast (upto 24 hours) for the stations whose correlation graph based on long term data has not been developed.

As per present practice, the level and inflow forecasts are respectively being judged by single criterion of accuracy. For stage forecast, it is the actual level attained within $\pm 15\text{cm}$ of the forecasted value. For inflow forecast, it is the actual inflow/volume received in the dam/barrage within $\pm 20\%$ of the forecasted value.

Application will allow revising a forecast with the following criteria:

- i. If forecast is greater than 24 hrs-----Till 12 hrs of forecast time.
- ii. If forecast is equal to 24 hrs---Till 6 hrs of forecast time.
- iii. If forecast is greater than 12 hrs but less than 24 hrs---Till 3 hrs of forecast time.
- iv. If forecast is less than or equal to 12 hrs---Till 2hrs of forecast time.

2.2.4 Dissemination to the Local Administration/user Agency – The flood forecasts formulated by DFCR are disseminated to all stakeholders through updating of Flood Forecasting Website/FAX/E-mail/Telephone/SMS/facebook/Twitter. Every care is

taken for expeditious dissemination of flood forecasts to the local administration/user agencies. The flood forecast data are also uploaded in the Flood Forecasting Website <http://ffs.india-water.gov.in>. The link to this web site is available in CWC website <http://cwc.gov.in>.

2.2.5 DFCR also issues Daily Flood Bulletins on a daily basis indicating the Water Level (0800 hrs) and Rainfall (0830 hrs) at all Hydrological Observation Stations and Water Level, Rainfall and Flood Forecasts (if issued) at Flood Forecast Stations on daily basis at around 1100 hours.

2.2.6 CFCR monitors flood situation throughout the country by monitoring the data entry/FF formulation and issue of flood forecasts from all DFCRs through WIMS. CFCR also generates Daily Flood Bulletins and disseminates them to various stake holders including NDMA, MHA, Railway Board, IMD, NRSC and the organizations of DoWR, RD&GR (MoJS), etc. In addition, CFCR also generates Special Bulletins called 'Orange' bulletin for Severe Flood Situations and 'Red' Bulletins for Extreme Flood Situations.

2.2.7 CAP Alert through C-DOT in association with NDMA: Common Alert Protocol (CAP) alerts are generated through an application developed by Centre for Development of Telematics (C-DoT) in association with NDMA. It started during the year 2020 for Tamil Nadu as a pilot project and was implemented during 2021 and thereafter on PAN India outreach from 2022. These alerts will be initially dispatched to the first beneficiary viz. SDMA, who will in turn create understandable warnings to warn the general public. CWC (HQ) uploads the alerts from CFCR to the concerned application for level forecasting stations through reports generated by WIMS in MS Excel format. CAP alerts should be issued for all level forecasts from DFCR in the Sachet platform <http://platform.sachetdashboard.ndma.gov.in/>.

3.0 SOP for Flood Forecasting & Warning

The basic activity of flood forecasting activity involves preparedness, data collection, its transmission, flood forecast formulation and dissemination of flood forecasts. The activities are performed as per existing Flood Forecasting Manual and also utilizing the latest technologies. The following critical activities as the general SOPs are described.

Preparedness for Flood Forecasting Activity to be completed before onset of flood season

3.1 Site Level Preparedness includes

- upkeep and maintenance of instruments for observation of water level and rainfall
- upkeep and maintenance of automatic telemetry systems
- keeping contact details of vendor updated for taking up repair works, upkeep and maintenance of communication equipment
- updation of contact details to whom the data have to be passed.

3.2 Sub-Divisional/Divisional Level Preparedness includes

- updation of contact details with all stake holders
- upkeep/maintenance of communication equipments, computers and other hardwares associated with flood forecasting activity
- provision of men and materials to all sites under their jurisdiction before start of

activity of completion of inspection visits by vendors to all telemetry sites for keeping the equipments in working condition

- attending coordination meetings called by DDMA/ District Revenue authorities, coordinating with neighbouring countries from where hydrological data are being sourced/supplied such as China, Nepal, Bhutan and Bangladesh
- updating Contact list and list of Nodal officers
- Review of Warning and Danger Levels of Level Forecast Stations, threshold limits of inflow forecast stations
- Updating of reviewed values in WIMS along with updation of HFLs if surpassed in the previous years for all the stations including base stations/monitoring stations. **HFL of old stations should be updated at the end of the flood season.**
- HFL of a new site, which has been fixed based on scanty data (say 2 to 4 years) data, should be updated just after the water level in recession limb has come down the previous HFL. If the site happens to be a bridge site or close to it, the HFL taken for the design of the bridge should be compared with CWC's Highest Observed Flood Level and the higher flood level(after transposition if required) should be adopted as the HFL of the site
- New Stations have to be also created in WIMS before start of the flood season and should be ready for data feeding from the start of the season.

3.4 Circle and Regional Level preparedness includes

- attending coordination meetings called by State Governments
- updating of Contact Details
- attending coordination meeting of Flood Crisis Management Teams (FCMT) for Integrated Reservoir Operation (IRO)
- coordinating with local Flood Meteorological Offices (FMOs) for provision of rainfall forecasts and rainfall products during the season in addition to attending coordination meeting being called for from Headquarters. There should be frequent meeting of FCMTs during the flood period. (Draft composition of FCMTs is at **Annex-3.1**)

3.5 Headquarter level preparedness includes

- updation of all contact details of stakeholders including the Principal Resident Commissioner/Resident Commissioner of State Governments/UT Government based in New Delhi,
- coordinating with IMD Headquarters for seamless exchange of data and products
- upkeep and maintenance of all hardware and software systems, providing men and material for smooth running of Control rooms
- collecting reports regarding completion of preparedness activity from regional offices
- appraising the representatives of various State governments regarding preparedness in the Annual Relief Commissioners Conference called by Ministry of Home Affairs (MHA)
- Test-run the models for flood season after required calibration.

3.6 Data Collection

CWC collects data from stations maintained by CWC, data from stations maintained by project authorities as well as other agencies. Further, the observations are collected manually as well as automatically through sensors.

3.6.1 Data Observation in CWC maintained Sites: Hourly Water Level Observation, 3-hourly rainfall observation and wherever discharge, sediment and water quality are observed are to be followed as per prevailing practice of either once daily/once weekly/once fortnightly/or once in a month, etc in case of manual observation. In case of automated observation, the upkeep/maintenance and general cleanliness of sensors, solar panel, Data Collection Unit (DCU) are done by the CWC site officials and major maintenance and repairs are carried out by the vendors who maintain the site. The Site-in-charge is responsible for data collection from sites/projects.

3.6.2 Data from stations maintained by Project Authorities/Other Agencies: Data such as Reservoir Level, Daily/Hourly Inflows and Outflows through spillway and canals, Daily rainfall, etc. are collected from project authorities/other agencies as observed by them in such duration. At Projects where telemetry is installed, the hourly data is taken from telemetry directly. In some cases, project specific data is uploaded on project/State Government website.

3.6.3 Sub-Division/Division Level Data Collection: Data which are communicated by other means such as e-mail/website from various agencies are collected at Sub-Division/Division level. These include rainfall data/reservoir details/water level data from State Government operated Gauging Stations or rainfall or gridded rainfall products from IMD or Flood Meteorological Offices of IMD. Data is also collected using telemetry from sites wherever installed with redundancy of manual observation in case of failure of telemetry. Collection of hydro-meteorological data from neighbouring countries like Nepal (MGD-1, Lucknow and LGD-1, Patna), Bhutan (MBD, Guwahati and LBD, Jalpaiguri) and China (UBD, Dibrugarh) through wireless/e-mail/website is also to be undertaken.

3.6.4 Circle/Regional level Data Collection: The additional data pertaining to Integrated Reservoir Operation(IRO) for functioning of FCMT have to be collected at Circle and Regional Office Level also.

3.6.5 Headquarter Level Data Collection: Gridded rainfall Products from IMD/Downloading of Global Precipitation Mission (GPM) rainfall products as well as Rainfall forecast products through File Transfer Protocol (FTP) from respective download locations are collected.

3.7 Data Transmission

3.7.1 Data Transmission from Site: HM data from site is transmitted to Sub-Division/Division through wireless or mobile in case of manual readings and through Satellite/GSM/GPRS in case of automated stations.

3.7.2 Data Transmission from Sub-Division/Division: HM data collected from Sub-Division/Division is transmitted through e-mail or by updating in website. The automatic telemetry data is received through the modelling centres installed at many of these locations through VSAT or GSM/GPRS communication. Some of the data are also sent through SMS utility of CWC. Transmission of Hydro-meteorological data to Bangladesh for Ganga (LGD-2, Patna) and Brahmaputra (LBD, Jalpaiguri & MBD, Guwahati) & for Barak & Other rivers (MD, Silchar) as well as point-to-point wireless

communication to Bangladesh by respective wireless stations is done.

3.7.3 Data Transmission from Circle/Regional Offices: HM data is transmitted through e-mail/SMS/Website/FTP.

3.4.4 Data Transmission from Headquarters: HM data is transmitted through updating of website/SMS/e-mail/FTP.

3.8 Flood Forecast Formulation: Short Range Flood Forecasts are formulated at Divisional/Sub-Divisional Level varying from 6 to 24 hours response time. Medium range forecast for 168 hours are formulated from CWC Headquarter.

3.8.1 Flood Forecast Formulation at Divisional/Sub-Divisional Level: Short Range forecast varying from 6 to 24 hours lead time are generated at Divisional/Sub-Divisional Level for which the statistical methods such as correlation curves and unit hydrographs are used. The 7-day (168 hour) products generated by Headquarters are also consulted for preparing these short range forecast at the Divisional/Sub-Divisional Level.

3.8.2 Flood Forecast formulation at Headquarter Level: CWC Headquarter generates 168 hour lead time advisory flood forecast using rainfall-runoff mathematical models and are disseminated to various CWC offices for their internal use as well as to some Disaster Managers/FCMT for IRO, etc. for taking quick decisions.

3.8.3 Advisories by FCMT for IRO: The flood forecast formulated by Divisional/Sub-Divisional/National Level is input for DSS for Flood Crisis management Team (FCMT) for IRO for flood management and based on these inputs, release advisories are to be issued to various stake holders by the FCMTs to system of reservoirs under their jurisdiction.

3.9 Dissemination of Forecast: The formulated forecast does not serve their purpose, if it is not disseminated immediately by the quickest possible means of communication to all stakeholders. This is also being done at various levels as detailed below:

3.9.1 Dissemination at Flood Forecast Station Level: The formulated forecasts are sent to Flood Forecast Stations by Divisional/Sub-Divisional modelling centres through wireless/mobile/SMS and these are sent to local administration at the flood forecasting station level by the site-in-charge of these flood forecasting stations with due acknowledgements.

3.9.2 Dissemination at Sub-Divisional/Divisional Level: The short range forecasts are sent to various stakeholders including CWC headquarters directly by uploading in CWC's flood forecasting website/e-mail/fax/SMS. The flood forecast bulletins are also sent to various stakeholders; flood news bulletins are also generated and sent to various user agencies as well as to Radio and Television for wide publicity to flood affected populace.

3.9.3 Dissemination at Regional Level: Daily Flood Situation Report cum Advisory for the respective jurisdiction is to be prepared and sent to all stake holders. Copy of the same should also be endorsed to CFCR and sent by 1500 hrs everyday positively by email only.

3.9.4 Dissemination at National Level: The short range forecasts are disseminated through a dedicated website <https://ffs.india-water.gov.in>. Similarly, the medium range 168-hour forecasts/advisories are disseminated through a dedicated website

<http://120.57.99.138>. CWC field units shall consult the same for generation of short range forecasts. Further the flood forecasts are also disseminated to certain specific users who will utilise the same for their specific purposes through FTP/email. The SOP for Communication of Flood Alerts to higher officers of Government of India has been reviewed and updated from the year 2021. The reviewed and updated SOP for floods is given as **Annex-3.2**. The Severe (Orange) and Extreme (Red) bulletins are to be issued every 6 hourly and 3 hourly respectively by headquarters to all stakeholders through e-mail/SMS. Daily consolidated Flood Bulletins are also issued by Headquarters for the country as a whole to various stakeholders for their utility. Daily Flood Situation Report cum Advisory (DFSITREPCa) is to be prepared on national level and uploaded in social media and sent by email to all stakeholders daily. Regional level Daily Flood Situation Report cum Advisory should also be uploaded in their microsites at CWC main website as well as social media pages.

3.9.5 Media Management: Information to Press/Electronic media about impending flood situation is one of the very important activities for taking the flood warnings to last mile connectivity. CWC's media management policy is given in **Annex-3.3**.

4.0 Report: Reports regarding the activities covered under SOP have to be generated by various offices as detailed below and sent to higher authorities for their information and further onward transmission to all stakeholders.

4.1 Divisional and Sub-Divisional Level: Activity-wise compliance report on

- a) Preparedness
- b) Site maintenance and readiness
- c) Working of telemetry sites
- d) Attending of coordination meeting at district level
- e) Preparation of Daily Flood Bulletins and Weekly Flood Bulletins
- f) Annual Flood Appraisal Reports

4.2 Circle/Organisational Level: Activity-wise compliance report on

- a) Meeting with Stakeholders
- b) Meeting with State Governments
- c) Meeting with Project Authorities
- d) Meeting with Media
- e) Meeting with IMD
- f) Report on Severe/extreme events with a basin map indicating rivernet work, HM sites, dams/reservoirs, affected districts/taluks/villages, etc.
- g) Daily Flood Situation Report cum Advisories (DFSITREPCa) at organization level

4.3 National Level: Activity-wise compliance report on

- a) Coordination meeting with MHA, NDMA, IMD, etc.
- b) Monthly Country report on flood situation
- c) Severe events and special reports
- d) Preparation of Daily Flood Bulletins/Red/Orange Bulletins
- e) Daily Flood Situation Report cum Advisories (DFSITREPCa) at National level
- f) Annual Appraisal Report for Country as a whole

5.0 Responsibility Matrix: The responsibility matrix of various activities is given in **Annex-5.1**.

Annex-1.1

Statewise Flood Forecasting Information in India for Flood Season 2025 – Level Forecasting Stations (200)									
Sl. No.	Name of the river	Name of FF site	Name of State	District	Warning Level (m)	Danger level (m)	Highest Flood Level		Concerned Nodal CWC Division
1	2	3	4	5	6	7	Level (m)	Date/Month/Year	10
1	Sabari	Chinturu	Andhra Pradesh	Alluri Sitarama Raju	40.50	42.00	50.42	16/08/1986	LGD, Hyderabad

ANNEX - 1.2

LIST OF DIVISIONAL FLOOD CONTROL ROOMS (INVOLVED IN FLOOD FORECASTING ACTIVITIES)

SL NO.	NAME OF DIVISION	Remarks
1	Upper Brahmaputra Division, Dibrugarh	
2	Middle Brahmaputra Division, Guwahati	
3	Lower Brahmaputra Division, Jalpaiguri	
4	North Eastern Investigation Division II, Aizawl	
5	North Eastern Investigation Division III , Itanagar	
6	Meghna Division, Silchar	
7	Meghna Investigation Division, Shillong	
8	Sikkim Investigation Division, Gangtok	
9	Chenab Division, Jammu	
10	Snow Hydrology Division, Shimla	
11	Himalayan Ganga Division, Haridwar	
12	Middle Ganga Division I , Lucknow	
13	Middle Ganga Division II , Lucknow	
14	Middle Ganga Division III , Varanasi	
15	Lower Ganga Division 1, Patna	
16	Lower Ganga Division 2, Patna	
17	Lower Ganga Division 3, Berhampur	
18	Damodar Division, Asansol	
19	Chambal Division, Jaipur	
20	Upper Yamuna Division, New Delhi	
21	Lower Yamuna Division, Agra	
22	Mahi Division, Gandhinagar	
23	Tapi Division, Surat	
24	Narmada Division, Bhopal	
25	Wainganga Division, Nagpur	
26	Eastern River Division, Bhubaneswar	
27	Mahanadi Division, Burla	
28	Lower Godavari Division, Hyderabad	
29	Upper Godavari Division, Hyderabad	
30	Lower Krishna Division, Hyderabad	
31	Upper Krishna Division, Pune	
32	Hydrology Division, Chennai	
33	Cauvery Division, Bengaluru	
34	Southern Western Rivers Division, Kochi	
35	Southern Rivers Division, Coimbatore	
36	Planning and Investigation Division, Faridabad

No.3/120/2025-FFM/

Date: 04.02.2025

NOTIFICATION

In partial modification of Notification No. 3/120/2019-FFM/ dated 22nd April 2019, competent Authority has approved the revised designated flood period for various river basins of the country as given under:

S. No.	Basin	Existing Period
1.	Brahmaputra & Barak (including Teesta, Rivers flowing in States of Tripura, Manipur, Mizoram, Nagaland, Meghalaya, North Bengal, Sikkim) and Jhelum Sub Basin of Indus	1 st May to 31 st October
2.	All other Basins up to Krishna Basin excluding the subbasins of Krishna such as Ghataprabha, Malaprabha, and sub basins of Tungabhadra such as Tunga and Bhadra.	1 st June to 31 st October
3.	All Basins South of Krishna Basin and the subbasins of Krishna such Ghataprabha, Malaprabha, and sub basins of Tungabhadra such as Tunga and Bhadra.	1 st June to 31 st December

In case of floods in any basin beyond the above designated flood period due to unexpected rain/releases from dams or other reasons, the flood forecasting activity shall be resumed in affected basins by the concerned organisation/division till the water level falls below warning level/inflow falls below threshold limit at all FF/IF stations and necessary bulletins shall be disseminated as usual to all users as well as CFCR.

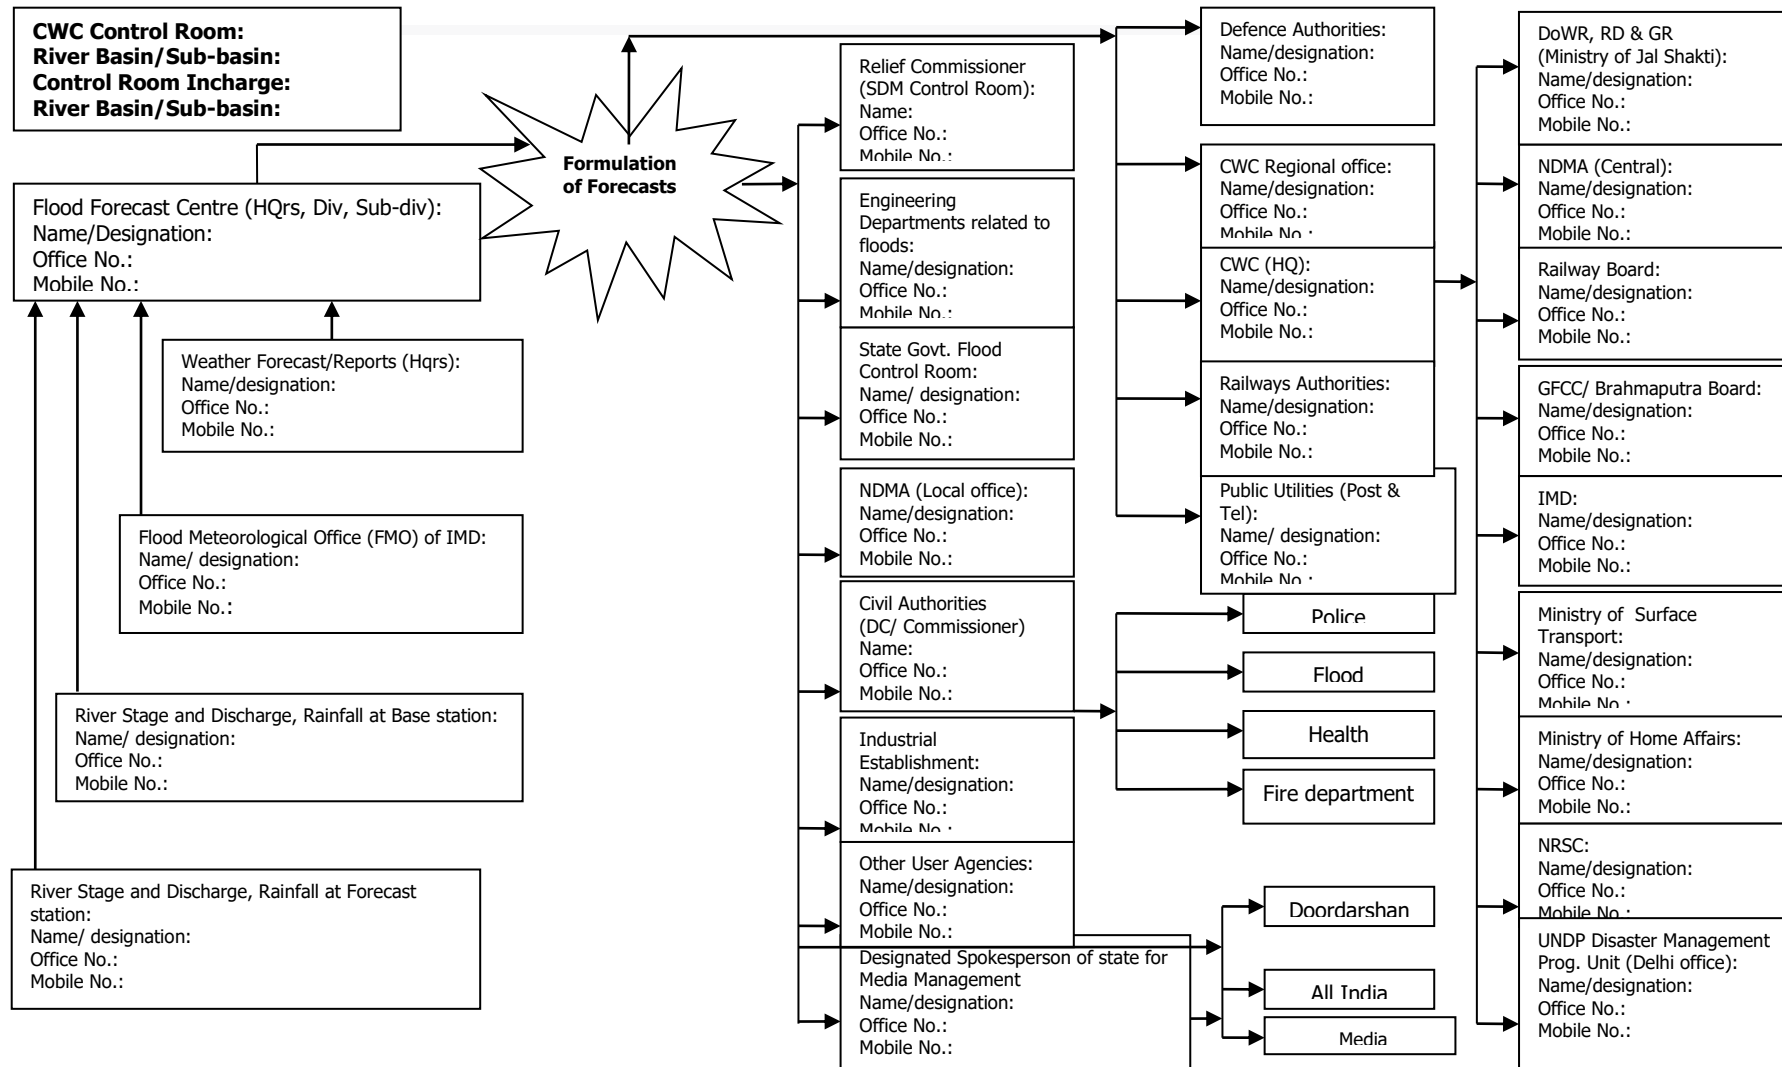

The modifications will come into force from the date of issue of this notification.

Signed by Rajesh Kumar Singh

Date: 04-02-2025 17:23:21

Reason: Approved

Standard Operating Procedure for upkeep of Telemetry System of Central Water Commission				
Stations in Charge Name:				Contact Number:
Location	Activity	Person concerned	Periodicity	Return to be sent to Divn/Modelling Centre/ Circle/ Organisation/ Headquarter
1	2	3	4	5
Telemetry Sites with Regular Staff	Physical inspection regarding security arrangements, cleanliness, connectivity among components, data display, etc	JE/AE/AEE concerned	Monthly or date of site visitor disruption in data transmission to Div whichever is earlier.	Monthly to Division
	Cleaning of Solar Panels, Tipping Bucket Raingauge, battery leads, debris/silt from Termination blocks, ensuring connectivity, etc.	Site staff under supervision of JE/AE/AEE	Monthly or after every heavy rainfall or dust storm or cyclonic storm or flood or disruption in data transmission.	Monthly to Division
	Verification of data from DCP/ DCU display on test check basis using gauge installed along the water level sensor and measured volume of water for rainfall sensors for few hours say 3 to 5 hours.	JE/ AE/ AEE concerned	Monthly or date of site visit or disruption in data transmission to Div whichever is earlier.	Monthly to Division
	Registering complaint with the vendor for correcting the fault beyond the control of site staff/ in charge under intimation to Division office and duly recorded in the site register.	JE/ AE/ AEE concerned	Immediately after disruption of data as first information under intimation to Divisional Office. Immediately after nature of complaints has been identified after field inspection under intimation to Divisional office.	Monthly to Division
Telemetry Sites without Regular Staff	Physical inspection regarding security arrangements, cleanliness, connectivity among components, data display, etc	JE/ AE/ AEE concerned	Monthly or date of site visit or disruption in data transmission to Div which ever is earlier.	Monthly to Division
	Cleaning of Solar Panels, Tipping Bucket Raingauge, battery leads, debris/silt from Termination blocks, ensuring connectivity, etc.	Local labour or site staff on tour from other site under the supervision of JE/ AE/ AEE	Monthly or after every heavy rainfall or dust storm or cyclonic storm or flood or disruption of data.	Monthly to Division
	Verification of data on test check basis using gauge installed along the water level sensor and measured volume of water for rainfall sensors for few hours say 3 to 5 hours.	JE/ AE/ AEE concerned	Monthly or date of site visit or disruption in data transmission to Div which ever is earlier.	Monthly to Division
	Registering complaint with the vendor for correcting the fault beyond the control of site staff/ in charge under intimation to Division office and duly recorded in the site register.	JE/ AE/ AEE concerned	Immediately after disruption of data as first information under intimation to Divisional Office. Immediately after nature of complaints has been identified after field inspection under intimation to Divisional office.	Monthly to Division
Division Office/Modelling Centre	Monitoring of Data Reception from site through GPRS/ GSM directly and Satellite through ERS / VSAT and data from other agencies as agreed in advance.	Duty Officer	Daily during non-monsoon and three hourly during monsoon	Fortnightly to Circles/ Organisation/ CWC HQ (FMO)
	Physical verification of equipments installed like Server/ UPS/ VSAT/ Earthing, etc and working of data management software installed in the server.	AE/AEE/EE	Weekly or disruption.	Fortnightly to Circles/ Organisation
	Registering complaint with the vendor for correcting the fault beyond the control of site staff /in charge/ Duty officer of control room under intimation to the Executive/ Superintending Engineer and duly recorded in the register. Ensuring availability of responsible officer/staff during complaint redressal visit of service engineer	Duty Officer	Immediately after disruption of data or receipt of similar information from site as first information as second line of monitoring. Immediately after nature of complaints has been identified after field inspection or receipt of similar information from site as second line of complaint redressal.	Fortnightly to Division Concerned in case of one MC form or divisions as well as to Circle, Organisations Concerned
	Review of licences and payment of fees to MOCIT	EE	Annual	Annual to CWC HQ (FMO)
	Usage of data/ sharing data with other as agreed in advance.	Duty Officer	Daily during non-monsoon and three hourly during monsoon	Fortnightly to CWC HQ (FMO)

1	2	3	4	5
EarthReceivingStation	Verification of Raw Data Reception at DDRGS	Officer in Charge Through service Engineer	Daily during non-monsoon and three hourly during monsoon	
	Physical verification of equipments installed like Server/ UPS/ VSAT/ Earthing, etc and working of data management software installed in the server.	Officer in Charge through service engineer of vendor	Weekly or disruption.	
	Registering complaintwith the vendor for correcting the fault. Ensuring availability of responsible officer/staff during complaint redessal visit of service engineer	Officer in Charge	Immediately after disruption of data as first information. Immediately after nature of complaints has been identified after field inspection.	
SiteLevel	The data backed up using Pendrive should be sent to concerned MC/ Division for filling the gap due to transmission losses in their system and then deleted from the Pendrive to keep ready for future use	JE/AE/AEE concerned	Monthly or during site visit	
Division/MCLevel	Use mirror server for data back up. Primary and secondary data validation similar to manually observed data. Storage of validated data alongwith raw data in separate folders. Uploading of the validated telemetry data in eSWIS after creation offacility for the same.	AE/ AEE/ EE	Monthly	Monthly to Circles/ Organisation/ CWC HQ (FMO)

MEMORANDUM

Flood Forecasts formulated by Central Water Commission is a very important non-structural flood management strategy for minimising the loss due to floods in various parts of the country. Press/Electronic media plays a very vital role in taking the flood forecast to last mile connectivity to the affected populace. In order to enable effective media management, Chairman, CWC hereby notifies the following media management policy from Divisional Control Room to CWC Headquarter Level for publicizing the flood forecasts to flood affected populace through Press/Electronic Media.

S. No.	CWC Location	Items to be given for reporting/publishing	Responsible Officer	Remarks
1.	Divisional Control Room	Flood News report whenever flood forecasts are issued related to the jurisdiction along with Current situation	Executive Engineer	No additional briefing
2.	Circle/ Regional Level	Special Flood Report for Severe/ Extreme Flood Situation	Chief Engineer (CE)/Superintending Engineer (SE)	CE/SE can issue press release regarding the impending severe/extreme flood situation in various rivers, if required. A copy of the Press release to be provided to Member RM and Chairman, CWC before releasing.
3.	Headquarter Level	Special Flood Reports for Severe/Extreme Flood Situation	Chairman/ Member(RM)/Chief Engineer (FM)/Director (FFM)	(i) Chairman/Member(RM) can call press conference and brief the press regarding the impending severe/extreme flood situation in various rivers (ii) Chief Engineer(FM)/Director FFM can issue press release regarding the impending severe/extreme flood situation in various rivers, if required. A copy of the Press release to be provided to Member RM and Chairman, CWC before releasing.

The approval is valid from the date of this memorandum and accordingly the interaction with Press/Electronic media can be initiated as indicated above. This approval will be reviewed/ modified every two years before commencement of flood season.

-Sd/-
(Sharad Chandra)
Director (FFM)
